Particular description of goods.—Perfumery, Face-Creams, Tooth-Powder, Shampoos, Rouge, and Also Chemicals and Pharmaceutical Preparations—viz., Acetate of Amyl, (Confectioners';) Acetate of Benzyl, Extra, Free from Chlorin; Acetate of Benzyl O, Free from Chlorin; Acetate of Bornyl, Acetate of Citronellyl, Acetate of Geranyl, Acetate of Glyceryl, Acetate of Isobornyl, Acetate of Linalyl, Acetate of Menthyl, Acetate of Phenylethyl, Acetate of Phenylmethyl, Acetate of Phenylpropyl, Acetate of Rhodinyl, Acetate of Terpinyl, Acetophenone; Acid—Benzoic, Cinnamic, Phenylacetic; Alcohol—Benzylic, Cinnamic, Decylic C_{10}, Dodecylic C_{12}, Nonylic C_9, Octylic C_8, Phenylethylic, Phenylpropylic, Undecylenic C_{11}; Aldehyde—Anisic, Extra; Anisic, O; Benzoic, Free from Chlorin; Cuminic, Decylic C_{10}, Dodecylic C_{12}, Hepthylic C_7, Nonylic C_9, Octylic C_8, Phenylacetic, Undecylenic C_{11}; Ambranone, Ambrone E, Ambrone S; Amyl Acetate, (Confectioners';) Amyl Benzoate, Amyl Butyrate, Amyl Salicylate, Anethol, Anisate of Methyl, Anthranylate of Methyl; Aubépine, Extra; Aubépine, Liquid; Aubépine, Crystals; Aurantone, Begonone, Benzoate of Amyl, Benzoate of Benzyl, Benzoate of Citronellyl, Benzoate of Geranyl, Benzoate of Isobutyl, Benzoate of Linalyl, Benzoate of Methyl; Benzyl Acetate, Extra, Free from Chlorin; Benzyl Acetate O, Free from Chlorin; Benzyl Alcohol; Benzyl Aldehyde, Free from Chlorin; Benzyl Benzoate, Benzyl Butyrate, Benzoic Aldehyde, Benzylethyl Oxid, Benzylidene Acetone, Bergamont, Bergamone, Borneol, Bornyl Acetate, Bouvardone, Bromelia, Bromostyrol, Butyrate of Amyl, Butyrate of Benzyl, Butyrate of Citronellyl, Butyrate of Geranyl, Cheiranthone, Camphene, Carnation E, Carnation S, Cassie; Chevrefeuille, (see Honeysuckle;) Cinnamate of Amyl, Cinnamate of Benzyl, Cinnamate of Methyl, Cinnamate of Isobutyl, Citral T, Citral P, Citronellal, Citronellol G, Citronellol P, Citronellol T, Citronellyl Acetate, Citronellyl Benzoate, Citronellyl Butyrate, Civet, Coumarin, Cuir de Russie, Cyclamen, Cyclosione, Dianthone, Dibenzyl Oxid, Diphenylmethane, Diphenyl Oxid, Eucalyptol, Essence Styrax, Eugenol, Fleur d'Heliotrope, Fleur de Lilas, Fleur de Lys, Fleur de Muguet, Fleur de Violette, Foin, Gardenone, Geraniol P, Geraniol Palma Rosa, Geraniol T, Geranyl Acetate, Geranyl Butyrate, Geranyl Benzoate, Geranium A, Geranium B, Geranium Crystals; Geranium S, Geranium Vert, Girofiée, Glyceryl Acetate; Hawthorn, (see Aubépine;) Heliotrope-Blossom, Heliotropin; Heliotropin, Amorphous; Honeysuckle, Hyacinthol, Hyacinthe B, Hyacinthe E, Hyacinthe P, Hyacinthe S, Indol, Ionone, Iraldein, Ironone S; Ironone, Extra; Ironone BP, Ironone B; Ironone, Alpha; Iralnone, Isoborneol, Isoborneol Acetate, Isoeugenol, Isosafrol, Jacinthe; Jasmin, Extra; Jasmin B, Jasmin S, Jasmin CS; Lavender, Alpine; Lavender S, Lavender E, Leafone, Lilac-Blossom I and II, Lilac; Lily, French; Lily of the Valley I, Lily of the Valley II, Lily of the Valley III, Linden-Blossom, Linalol, Linalyl Acetate, Linalyl Benzoate, Melilot, Methyl Acetophenone, Methyl Anthranylate, Methyl Anisate, Methyl Benzoate, Methyl Cinnamate, Methyl Eugenol, Methyl Heptenone, Methyl Heptyl Ketone, Methyl Nonyl Ketone, Methyl Paracresol, Methyl Phenylacetate, Methyl Salicylate, Mimosa S, Muguet or Lilac, Menthol, Menthyl Acetate, Mentholone; Musk—Ambrette, Musk—Ketone, Musk—Liquid, Musk—Xylol; Narcissus, Nerol, Nerolin, Neroli E, Neroli S, New-Mown Hay, Niobe, Œillet, Œnanthol, Orchidée, Orchidin R, Orientone, Orris Resin, Oxid of Dibenzyl, Oxid of Diphenyl, Oxid of Diparacresyl, Oxid of Benzylethyl, Oxid of Phenylcresyl, Paracresyl Oxid Phenylacetate of Methyl, Phenylacetic Aldehyde, Phenylcresyl Oxid, Pêche, Percicone, Phenylethylol, Phenlyethyl Alcohol, Phenylethyl Acetate, Phenylpropyl Alcohol, Phenylpropyl Acetate, Pois de Senteur, Rhodinol I, Rhodinol II, Rhodinol Acetate, Rose H; Rose, Oriental; Rose R, Rose, Red; Rose Soap, Rose Tea, Roseol, Resindone, Salicylate of Amyl, Salicylate of Isobutyl, Salicylate of Methyl, Sandalone, Safrol, Scatol, Sweet-Pea, Syringa, Terpin Hydrate, Terpineol, Terpineol Acetate, Terpinolene, Tilleul, Trefolone, Trefol, Tonkinone, Triacetin, Tuberose, Vanillin, Vanillol S; Vanilla, Arthol; Violet A, Violet-Blossom; Violet, White; Violet, Wood; Violanone, Vert de Violette, Yanone, Yara-Yara, Ylang-Ylang, Wallflower.
Claims use since about Oct. 14, 1916.

Ser. No. 128,028. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) WILLIAM H. STONEMAN, Albany, N. Y. Filed Feb. 5, 1920.

STONAMEL

Particular description of goods.—Enamel Paints; Dry, Paste, and Ready-Mixed Paints.
Claims use since Oct. 18, 1919.

Ser. No. 128,029. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) WILLIAM H. STONEMAN, Albany, N. Y. Filed Feb. 5, 1920.

STONECOAT

Particular description of goods.—Ready-Mixed Paints.
Claims use since Oct. 18, 1919.

Ser. No. 128,059. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE FRANCO-AMERICAN FOOD COMPANY, Jersey City, N. J. Filed Feb. 6, 1920.

Particular description of goods.—Canned Pork and Beans, Beans and Spaghetti in Hermetically-Closed Containers.
Claims use since about the 15th day of November, 1886; in connection with pork and beans since about May, 1911; in connection with beans since about January, 1920, and in connection with sphagetti since about May, 1911.

Ser. No. 128,295. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) FRANK CHAPMAN, Providence, R. I. Filed Feb. 12, 1920.

Particular description of goods.—Soldering-Flux.
Claims use since 1903.

Ser. No. 128,346. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ANANIA FLORES, Marianna, Pa. Filed Feb. 13, 1920.

The lining on the drawing indicates the color blue.
Particular description of goods.—Perfume.
Claims use since about Jan. 1, 1919.

Ser. No. 128,347. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MAX FRAIBERGER, San Francisco, Calif. Filed Feb. 13, 1920.

Particular description of goods.—A Medicine for the Treatment of Anhidrosis.
Claims use since Jan. 10, 1920.

Ser. No. 128,367. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) EMORY SPEER MORRIS, Atlanta, Ga. Filed Feb. 13, 1920.

NI-LATE

Particular description of goods.—Insecticides.
Claims use since about June 1, 1919.

Ser. No. 128,637. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) YOUNG SMYTH FIELD COMPANY, Philadelphia, Pa. Filed Feb. 19, 1920.

Smythfield STAR DYES

No claim being made to the word "Dyes" apart from the mark as shown.
Particular description of goods.—Dyes.
Claims use since Feb. 5, 1920.

Ser. No. 128,707. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HARRY H. SEEREE, St. Louis, Mo. Filed Feb. 20, 1920.

'Y DAMMIT

The words "A Rust Eradicator" are hereby disclaimed apart from the mark shown on the drawing.
Particular description of goods.—A Rust-Eradicator in the Form of Dry Powdered Chemicals.
Claims use since Jan. 10, 1920.

Ser. No. 128,863. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) REMINGTON SALT COMPANY, Ithaca, N. Y. Filed Feb. 24, 1920.

REMINGTON

Without waiving any common-law rights applicant hereby disclaims the word "Remington" apart from the mark shown in the drawing.
Particular description of goods.—Salt.
Claims use since June 1, 1901.

Ser. No. 128,870. (CLASS 6. CHEMICALS MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) JOHN SVEDA, Detroit, Mich. Filed Feb. 24, 1920.

Trade-mark consists of applicant's portrait and autographic signature.
Particular description of goods.—External Medicine for Rheumatism, Neuralgia, and General Soreness.
Claims use since about Dec. 22, 1919.

Ser. No. 129,247. (CLASS 6. CHEMICALS, MEDICINES AND PHARMACEUTICAL PREPARATIONS.) REX RELIEF COMPANY, Maryville, Tenn. Filed Mar. 4, 1920.

Particular description of goods.—A Medicinal Preparation for Treatment of Colds and the Liver.
Claims use since about Jan. 10, 1920.

Ser. No. 129,503. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) IDEAL DISINFECTANT CO., Newark, N. J. Filed Mar. 10, 1920.

IDICO

Particular description of goods.—Disinfectants and Deodorants.
Claims use since February, 1919.

Ser. No. 129,605. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) RICHARD BROS. DIE WORKS, Detroit, Mich. Filed Mar. 12, 1920.

Particular description of goods.—Metal Working Machinery and Tools Comprising Dies, Punches, Die-Retainers, Punch-Retainers, Jigs, Drill-Chucks, Collet-Holders, and Milling-Cutters.
Claims use since on or about Feb. 2, 1920.

Ser. No. 129,803. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) PROTO CHEMICAL CO., INC., New York, N. Y. Filed Mar. 16, 1920.

PROTO-FER

Particular description of goods.—Tonic and Restorative Preparations.
Claims use since Feb. 21, 1920.

Ser. No. 129,921. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE APPLE-LAX COMPANY, Winchester, Va. Filed Mar. 19, 1920.

"APPLE-LAX"

Particular description of goods.—A Pure Apple-Syrup Laxative.
Claims use since Mar. 4, 1920.

Ser. No. 129,927. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) EDWARD F. HARPER, Philadelphia, Pa. Filed Mar. 19, 1920.

Particular description of goods.—Liniment for Rheumatism, Sprains, Bruises, &c.
Claims use since Feb. 19, 1920.

Ser. No. 129,938. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MACKIE PINE OIL SPECIALTY CO., INC., Covington, La. Filed Mar. 19, 1920.

Particular description of goods.—A Disinfectant.
Claims use since Dec. 15, 1919.

Ser. No. 130,007. (CLASS 39. CLOTHING.) AVEDON & COMPANY, INC., New York, N. Y. Filed Mar. 22, 1920.

AVEDON

The lining in the said word is only for shading.
Particular description of goods.—Women's and Misses' Blouses, Women's and Misses' Dresses, Women's and Misses' Coats, Women's and Misses' Outer Suits, Women's and Misses' Outer Skirts, Women's and Misses' Petticoats, Women's and Misses' Hosiery, Women's and Misses' Capes, and Women's and Misses' Wraps.
Claims use since the 12th day of September, 1912.

Ser. No. 130,039. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) HUDSON COFFEE MILLS, INC., New York, N. Y. Filed Mar. 22, 1920.

The English translation of the Chinese characters being "Fair Dealing."
Particular description of goods.—Tea.
Claims use since 1914.

Ser. No. 130,052. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MELLIER COMPANY, PERFUMER, St. Louis, Mo. Filed Mar. 22, 1920.

DARDANELLA

Particular description of goods.—Perfume, Toilet Water, Talcum Powder, Face-Powder, Bath-Powder, Bath-Salts, Headache-Cologne, Smelling-Salts, Almond-Meal, Toilet Cerate, Cold-Cream, Dry Cream, Rouge, Lip-Rouge, Eyebrow-Pencils, Tooth-Powder, and Tooth-Paste.
Claims use since Mar. 12, 1920.

Ser. No. 130,104. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MILE-A-MINUTE, INCORPORATED, Pittsburgh, Pa. Filed Mar. 23, 1920.

Particular description of goods.—A Preparation to Be Added to Gasolene for Increasing Mileage and Preventing Carbon.
Claims use since Feb. 24, 1920.

Ser. No. 130,149. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ERIN M. MORTON, Centertown, Ky. Filed Mar. 24, 1920.

PINKERBS

Particular description of goods.—Laxative Tablets for Sluggish and Torpid Liver.
Claims use since Aug. 1, 1919.

Ser. No. 130,165. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) FRUIT SUPPLY COMPANY, St. Louis, Mo. Filed Mar. 25, 1920.

In the trade-mark as shown in the accompanying drawing the lettering "Fruit King" is white on a red background, the fruit is red, the leaves are green, the crown is red with gold bands, and the circular background for fruit and crown is yellow.
Particular description of goods.—Fresh Apples.
Claims use since Dec. 15, 1919.

Ser. No. 130,187. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE WORSHAM COMPANY, Henderson, Ky. Filed Mar. 26, 1920.

The picture forming a part of the trade-mark being fanciful.
Particular description of goods.—An Eczema-Lotion.
Claims use since Feb. 18, 1920.

Ser. No. 130,201. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) J. A. BOON, Gary, Ind. Filed Mar. 26, 1920.

J. A. B.

Particular description of goods.—Liniment for Use in the Treatment of Rheumatism.
Claims use since Feb. 20, 1920.

Ser. No. 130,260. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) PAUL A. BALTRANAS, Chicago, Ill. Filed Mar. 27, 1920.

Particular description of goods.—Laxative Medicine or Bitters.
Claims use since Feb. 2, 1920.

Ser. No. 130,292. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) REPUBLIC DRUGGIST SYNDICATE, INC., New York, N. Y. Filed Mar. 27, 1920.

Particular description of goods.—A Compound of Beef and Iron, a Blood-Purifier, a Compound Extract of Cod-Liver Oil; a Preparation for Kidney, Bladder, and Liver Troubles; a Uterine Tonic, an Iron-Peptonate-Manganese Compound, a Bowel-Regulator, a Nerve and Body Tonic.
Claims use since Jan. 1, 1920.

Ser. No. 130,310. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ALBANO & GANGEMI, Brooklyn, N. Y. Filed Mar. 29, 1920.

VERMUT

Particular description of goods.—A Tonic.
Claims use since about December, 1919.

Ser. No. 130,348. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) VOSBURGH (INC.), Chicago, Ill. Filed Mar. 29, 1920.

QUINEGG

Particular description of goods.—A Shampoo Liquid and Shampoo Jelly.
Claims use since Apr. 1, 1908, and by the predecessor in business of said corporation, Ernest A. Vosburgh, deceased, since the 1st day of April, 1908.

Ser. No. 130,396. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) UNITED DRUG COMPANY, Boston, Mass. Filed Mar. 30, 1920.

Caloris

Particular description of goods.—Tooth-Paste.
Claims use since February, 1920.

Ser. No. 130,450. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HENRY THAYER & CO., INC., Cambridge, Mass. Filed Mar. 31, 1920.

CUTEX

Particular description of goods.—Salves and Ointments for Pimples, Ringworm, Tetter, Eruptions, Blackheads, Irritation, Skin Humors, Scald-Head, Nettle-Rash, Erythema, Itch, Burns, Boils, Carbuncles, Poison-Ivy, Felons, Piles, and Eczema.
Claims use since July 6, 1911.

Ser. No. 130,499. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE C. S. WELCH COMPANY, New York, N. Y. Filed Apr. 1, 1920.

OSTARA

Particular description of goods.—Complexion-Powder, Toilet Rouge, and Talcum Powder.
Claims use since about Dec. 1, 1919.

Ser. No. 130,510. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) BEECHER-HOLLINS CO., Boston, Mass. Filed Apr. 2, 1920.

ARTRO

Particular description of goods.—Embalming Fluid.
Claims use since Jan. 10, 1920.

Ser. No. 130,567. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) BISCEGLIA BROTHERS, San Jose, Calif. Filed Apr. 3, 1920.

B-B

Particular description of goods.—Canned Fruits and Canned Vegetables.
Claims use since October, 1919.

Ser. No. 130,609. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE OMEGA CHEMICAL COMPANY, New York, N. Y. Filed Apr. 3, 1920.

Cadum

Particular description of goods.—Dentifrices
Claims use since October, 1909.

Ser. No. 130,623. (CLASS 6. CHEMICALS MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) SHEATS STOCK TONIC COMPANY, Winder, Ga. Filed Apr. 3, 1920.

Sheats

The picture is that of Mr. William Henry Sheats, a member of the applicant firm.
Particular description of goods.—Stock-Tonics and Worm-Powders.
Claims use since 1913.

Ser. No. 130,722. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) GARDEN CHEMICAL COMPANY, New York, N. Y. Filed Apr. 6, 1920.

MELROSINE

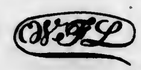
Particular description of goods.—Insecticides.
Claims use since Mar. 10, 1920.

Ser. No. 130,728. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) NATIONAL OIL PRODUCTS CO., Harrison, N. J. Filed Apr. 6, 1920.

NOPCOCOIL

Particular description of goods.—Oils Suitable for the Tanning of Leather.
Claims use since Jan. 5, 1920.

Ser. No. 130,753. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) TERESA CRISS, Shaw, Miss. Filed Apr. 7, 1920.



The portrait is that of the applicant.
Particular description of goods.—Hair-Growers and Hair-Shampooing Mixture.
Claims use since Jan. 14, 1920.

Ser. No. 130,781. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) WETTERWALD & PFISTER CO., New York, N. Y. Filed Apr. 7, 1920.

AERO

Particular description of goods.—Anilin Dyes.
Claims use since October, 1917.

Ser. No. 130,838. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) LIND DRUG CO., Orange, N. J. Filed Apr. 8, 1920.

Particular description of goods.—Remedies for Coughs, Colds, and La Grippe.
Claims use since February, 1920.

Ser. No. 130,904. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) LLOYD BROTHERS, Cincinnati, Ohio. Filed Apr. 9, 1920.

GELBIA

Particular description of goods.—A Medicine for Hypodermic Use for Spasm of Any Part of Urinary Tract.
Claims use since 1885.

Ser. No. 130,905. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) LLOYD BROTHERS, Cincinnati, Ohio. Filed Apr. 9, 1920.

COLLOIDUM

Particular description of goods.—Specific Medicines for Use in the Treatment of Diseases of the Kidneys and Bladder; for the Uterus; in Malarial Fevers; Worms; Constipation; Epilepsy; Catarrh; Leucorrhea, and Bruises.
Claims use since 1885.

Ser. No. 130,910. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MARTHA FLORENCE BUTCHER, Washington, D. C. Filed Apr. 9, 1920.

BUG BUTCHER

Particular description of goods.—Insecticides.
Claims use since Apr. 1, 1920.

Ser. No. 130,946. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) BRAUER & KREIDT, Norlina, N. C. Filed Apr. 10, 1920.

ACCMILINE

Particular description of goods.—Liquid-Fuel Intensifier.
Claims use since Jan. 5, 1920.

Ser. No. 130,988. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) OLIVER WILSON SPICER, Colorado Springs, Colo. Filed Apr. 10, 1920.

Flu-Cabs

Particular description of goods.—Tablets for La Grippe and Colds.
Claims use since Jan. 1, 1917.

Ser. No. 131,037. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) OSCAR H. LOVELL, St. Louis, Mo. Filed Apr. 12, 1920.

Blue Whistler

Particular description of goods.—A Medicinal Preparation Which Acts on the Liver and Bowels.
Claims use since Mar. 1, 1919.

Ser. No. 131,059. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 13, 1920.

ARIMAL

Particular description of goods.—Antiseptic Liquid-Soap Shampoo and Bath-Foam.
Claims use since Jan. 12, 1913.

Ser. No. 131,060. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 13, 1920.

LA BELLE COQUETTE

Particular description of goods. Rouge Paste, Liquid or Powder.
Claims use since Nov. 10, 1920.

Ser. No. 131,062. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 13, 1920.

HIRSUTOL

Particular description of goods.—Hair Tonic and Invigorant.
Claims use since Mar. 1, 1911.

Ser. No. 131,066. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) CORONA CHEMICAL COMPANY, Milwaukee, Wis. Filed Apr. 13, 1920.

CORONA CALSENATE

Particular description of goods.—Insecticides.
Claims use since Mar. 1, 1920.

Ser. No. 131,076. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) WILLIAM J. MEARS, Kansas City, Mo. Filed Apr. 13, 1920.

CHIGGERO

Particular description of goods.—A Preparation for the Treatment of Insect Bites and Stings.
Claims use since on or about June, 1916.

Ser. No. 131,081. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE MIROLENE CO., Alsen, N. D. Filed Apr. 13, 1920.

Particular description of goods.—A Remedy for the Internal Treatment of Coughs and Colds.
Claims use since about Mar. 24, 1917.

Ser. No. 131,219. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) JOLIE, INC., New York, N. Y. Filed Apr. 16, 1920.

JOLIE

Particular description of goods.—Rouges, Face-Creams, Toilet Waters, Talcs, Perfumes, Face-Powders, Nail-Polishes, and Lip-Rouges.
Claims use since Mar. 10, 1920.

Ser. No. 131,229. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) NORMA-TONE CO., Boston, Mass. Filed Apr. 16, 1920.

NORMA-TONE

Particular description of goods.—Laxative Tablet.
Claims use since on or about Apr. 7, 1920.

Ser. No. 131,250. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE AVALON FARMS COMPANY, Chicago, Ill. Filed Apr. 17, 1920.

AF

Particular description of goods.—A Tonic in Tablet Form for Hogs.
Claims use since Feb. 19, 1920.

Ser. No. 131,273. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) LA MANNA, AZEMA & FARNAN, New York, N. Y. Filed Apr. 17, 1920. Under ten-year proviso.

PISPA

Particular description of goods.—Sardines.
Claims use since Dec. 1, 1894.

Ser. No. 131,287. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) Dr. WILLIAM SEIBERT, Chino, Calif. Filed Apr. 17, 1920.

LAPIDAR

Particular description of goods.—Medicinal Pills, Said Pills Being Used as a General Medicinal Tonic.
Claims use since Apr. 1, 1918.

Ser. No. 131,295. (CLASS 26. MEASURING AND SCIENTIFIC APPLIANCES.) WILLIS & ECKELS, Chicago, Ill. Filed Apr. 17, 1920.

FILMCRAFT

Particular description of goods.—Motion-Picture Films.
Claims use since Nov. 1, 1917.

Ser. No. 131,343. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) E. H. MARCY LABORATORIES INC., Framingham, Mass. Filed Apr. 19, 1920.

ANTIZYME

Particular description of goods.—Solutions Containing Combinations of Non-Specific Plant-Proteins Prepared for Hypodermic Intra-Muscular Injection.
Claims use since Feb. 12, 1920.

Ser. No. 131,418. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) J. ROGERS FLANNERY, Pittsburgh, Pa. Filed Apr. 21, 1920.

MOROIL

Particular description of goods.—A Preparation for Cleaning and Renovating Oil and Gas Wells.
Claims use since Jan. 1, 1920.

Ser. No. 131,440. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) NATIONAL ANILINE & CHEMICAL COMPANY, INCORPORATED, New York, N. Y. Filed Apr. 21, 1920.

MONGOLA

Particular description of goods.—Food-Colors.
Claims use since Apr. 7, 1920.

Ser. No. 131,441. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) NATIONAL ANILINE & CHEMICAL COMPANY, INCORPORATED, New York, N. Y. Filed Apr. 21, 1920.

SULTA

Particular description of goods.—Food-Colors.
Claims use since Apr. 7, 1020.

Ser. No. 131,442. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) NATIONAL ANILINE & CHEMICAL COMPANY, INCORPORATED, New York, N. Y. Filed Apr. 21, 1920.

SITRO

Particular description of goods.—Food-Colors.
Claims use since Apr. 7, 1920.

Ser. No. 131,443. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) NATIONAL ANILINE & CHEMICAL COMPANY, INCORPORATED, New York, N. Y. Filed Apr. 21, 1920.

KERINE

Particular description of goods.—Food-Colors.
Claims use since Apr. 7, 1920.

Ser. No. 131,444. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) NATIONAL ANILINE & CHEMICAL COMPANY, INCORPORATED, New York, N. Y. Filed Apr. 21, 1920.

PLUMNA

Particular description of goods.—Food-Colors.
Claims use since Apr. 7, 1920.

Ser. No. 131,452. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) SHUPTRINE COMPANY, Savannah, Ga. Filed Apr. 21, 1920.

SHUCO

Particular description of goods.—Shampoo.
Claims use since Mar. 5, 1920.

Ser. No. 131,460. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) B. ALTMAN & Co., New York, N. Y. Filed Apr. 22, 1920.

ALSAM

Particular description of goods.—Perfume, Toilet Water, Talcum Powder, Face-Powder, Sachet-Powder, and Bath-Salt.
Claims use since Oct. 17, 1917.

Ser. No. 131,471. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE EAGLE-PICHER LEAD CO., Cincinnati, Ohio. Filed Apr. 22, 1920.

PICHER

Particular description of goods.—Sulfuric Acid.
Claims use since 1888.

Ser. No. 131,582. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MAGNOLIA CHEMICAL COMPANY, Houston, Tex. Filed Apr. 24, 1920.

Particular description of goods.—Germicides, Insecticides, and Disinfectants.
Claims use since Feb. 21, 1919.

Ser. No. 131,670. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) OTTO SCHMIDT, New York, N. Y. Filed Apr. 26, 1920.

No claim being made to the exclusive use of any of the words appearing on the drawing except "Otto Schmidt's Chef" apart from the mark as shown.
Particular description of goods.—Russian Dressing and Mayonnaise.
Claims use since Apr. 12, 1920.

Ser. No. 131,710. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MAURICE LEVY, New Rochelle, N. Y. Filed Apr. 27, 1920.

TINTURO

Particular description of goods.—A Hair-Coloring Preparation.
Claims use since 1910.

Ser. No. 131,718. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE MORTON CHEMICAL COMPANY, Seattle, Wash. Filed Apr. 27, 1920.

ASAPHEN

Particular description of goods.—Antipyretic and Diaphoretic Capsules for Use for Headaches, Colds, and La Grippe.
Claims use since Dec. 2, 1919.

Ser. No. 131,828. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ROOSA & RATLIFF CHEMICAL CO., Cincinnati, Ohio. Filed Apr. 29, 1920.

Particular description of goods.—Toilet Preparations—Namely, Face-Powder, Rouge, and Cold-Cream.
Claims use since May 25, 1919.

Ser. No. 131,836. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE SPRINGVILLE CANNING CO., Springville, N. Y. Filed Apr. 29, 1920.

Crescent

Particular description of goods.—Canned Fruits and Canned Vegetables.
Claims use since the year 1888.

Ser. No. 131,856. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) COMMONWEALTH CHEMICAL CORP., Jersey City, N. J., and New York, N. Y. Filed Apr. 30, 1920.

PLASTOX.

Particular description of goods.—A Camphor Substitute for Use in Making Celluloid.
Claims use since Mar. 1, 1920.

Ser. No. 131,890. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) U. S. SANITARY SPECIALTIES CORPORATION, Chicago, Ill. Filed Apr. 30, 1920.

USANCO

Particular description of goods.—Deodorant and Germicide.
Claims use since April, 1918.

Ser. No. 131,925. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) TALCUM PUFF CO., New York, N. Y. Filed May 1, 1920.

Lullaby

Particular description of goods.—Toilet Preparations—Namely, Talcum Powder.
Claims use since Apr. 23, 1920.

Ser. No. 131,989. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) SALUX LABORATORIES, INC., Seattle, Wash. Filed May 3, 1920.

Particular description of goods.—Hair-Shampoo.
Claims use since Apr. 1, 1920.

Ser. No. 132,249. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) SAMUEL GEORGE GORDON HENDERSON, Los Angeles, Calif. Filed May 10, 1920.

VEGECURA

Particular description of goods.—A Vegetable Compound for the Treatment of the Stomach, Liver, Bowels, Kidneys, and Blood.
Claims use since Sept. 15, 1919.

Ser. No. 132,295. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) DAKOTA CHEMICAL COMPANY, Sioux Falls, S. D. Filed May 11, 1920.

Particular description of goods.—Medicinal Preparations in Soft Capsules for the Treatment of Bot and Worm Ailments in Horses and Medicinal Powders for the Treatment of Worm Ailments in Hogs.
Claims use since on or about Apr. 1, 1918.

Ser. No. 132,309. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MERCK & CO., New York, N. Y. Filed May 11, 1920.

SALYSAL

Particular description of goods.—Salicylic-Acid Ester of Salicylic Acid.
Claims use since Apr. 8, 1920.

Ser. No. 132,327. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) TALCUM PUFF CO., Brooklyn, N. Y. Filed May 11, 1920.

Peter Pan

Particular description of goods.—Toilet Preparations—viz.; Talcum Powder.
Claims use since May 1, 1920.

Ser. No. 132,336. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) H. S. SCARBROUGH, Lufkin, Tex. Filed May 11, 1920.

Particular description of goods.—A Medicine to be Used in the Treatment of Gonorrhea.
Claims use since November, 1917.

Ser. No. 132,343, (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HENRY BELL, Atlanta, Ga. Filed May 12, 1920.

AUTO-TABS

Particular description of goods.—A Preparation for the Treatment of Disorders of the Stomach and Liver.
Claims use since Apr. 1, 1917.

Ser. No. 132,406. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) STEARNS & WHITE CO., Chicago, Ill. Filed May 18, 1920.

PARALAX

Particular description of goods.—Laxative Paraffin-Oil.
Claims use since Sept. 1, 1915.

Ser. No. 132,417. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) PAGE & HILL CO., Minneapolis, Minn. Filed May 18, 1920.

Durasote

Particular description of goods.—Liquid Containing Creosote, &c., Used as a Wood Preserver.
Claims use since on or about Jan. 1, 1920.

Ser. No. 132,435. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) JACOB HAUSER, Oakland, Calif. Filed May 14, 1920.

KALITAN

Particular description of goods.—A Preparation for the Treatment of the Hair and Scalp.
Claims use since Apr. 10, 1920.

Ser. No. 132,543. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) CHARLES A. MOORE, Sr., New Castle, Pa. Filed May 17, 1920.

C. A. M.

Particular description of goods.—Capsules to be Taken Internally for the Treatment of Piles.
Claims use since Jan. 1, 1915.

Ser. No. 132,554. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) PENICK & FORD, LTD. INC., New Orleans, La. Filed May 17, 1920.

Particular description of goods.—Live-Stock-Feeders' Molasses.
Claims use since June, 1913.

Ser. No. 132,570. (CLASS 45. BEVERAGES, NON-ALCOHOLIC.) CHARLES EDWARD RITTLER, Dayton, Ohio. Filed May 17, 1920.

AMERICA'S PREMIER

Particular description of goods.—Non-Intoxicating Carbonated Beverages Containing Less Than One-Half of One Per Cent. Alcohol by Volume and Sold as a Soft Drink, Particularly Ginger-Ale, Lemon Sour, and Sarsaparilla.
Claims use since May 1, 1903.

Ser. No. 132,591. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ACHILLE CARRILLO, Chelsea, Mass. Filed May 18, 1920.

The portrait is of the applicant.
Particular description of goods.—A Medicine for Venereal Diseases.
Claims use since December, 1919.

Ser. No. 132,621. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) WILLIAM SELLERS & COMPANY, INCORPORATED, Philadelphia, Pa. Filed May 18, 1920. Under ten-year proviso.

SELLERS

Particular description of goods.—Starting-Valves, Check-Valves, and Strainers.
Claims use since 1865.

Ser. No. 132,622. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) WILLIAM SELLERS & COMPANY, INCORPORATED, Philadelphia, Pa. Filed May 18, 1920. Under ten-year proviso.

SELLERS

Particular description of goods.—Turning-Lathes, Planers, Drill-Presses, Boring-Mills, Boring, Drilling, and Milling Machines, Boring and Facing Machines, Slotting-Machines, Tool and Drill Grinding Machines, Steam-Hammers, Sand-Mixing Machines, Shaft-Hangers, Pillow Blocks and Pulleys, Injectors and Ejectors.
Claims use since 1848.

Ser. No. 132,624. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ZAUDER BROS., INC., New York, N. Y. Filed May 18, 1920.

PELOTINTO

Particular description of goods.—Hair-coloring.
Claims use since May 12, 1920.

Ser. No. 132,682. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THEODORE K. BOESCH, Philadelphia, Pa. Filed May May 20, 1920.

SKEETO-GUARD

Particular description of goods.—A Mosquito-Repelling Toilet Powder.
Claims use since May 15, 1920.

Ser. No. 132,688. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ASA L. FITZGERALD, El Centro, Calif. Filed May 20, 1920.

PED-EASE

Particular description of goods.—Pile Remedy.
Claims use since Jan. 1, 1917.

Ser. No. 132,692. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HEGEWISCH CHEMICAL WORKS, Chicago, Ill. Filed May 20, 1920.

SIROGEN

Particular description of goods.—A Preparation for Coughs, Colds, and First Stages of Consumption.
Claims use since Feb. 1, 1920.

Ser. No. 132,693. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) IMPROVED CHILLING AND TRANSPORT LIMITED, London, England. Filed May 20, 1920.

Imchiller

Particular description of goods.—Chilled Fresh Meats, Such as Beef, Mutton, Lamb, Veal, Bacon, and Pork.
Claims use since November, 1919.

Ser. No. 132,748. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) E. H. LEE, Knoxville, Tenn. Filed May 21, 1920.

LEERO

Particular description of goods.—Preparation for Use in Promoting the Growth of Hair, a Hair-Dressing Oil, a Temple-Oil, and a Tetter-Salve.
Claims use since July, 1919.

Ser. No. 132,790. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) SAVANNA V. HOWARD, Chicago, Ill. Filed May 22, 1920.

LLAMA

Particular description of goods.—Hair-Tonic.
Claims use since Apr. 19, 1920.

Ser. No. 132,898. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) JACOB TANENBAUM, New York, N. Y. Filed May 24, 1920.

LaVette

Particular description of goods.—Toilet Preparations—viz., Rouge and Face-Powder.
Claims use since February, 1920.

Ser. No. 132,914. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) GEORGE W. CRANE, Fort Wayne, Ind. Filed May 25, 1920.

1795

Particular description of goods.—A Preparation for Prevention and Relief of Coughs, Colds, Croup, Sore Throat, Tonsillitis, Pneumonia, Influenza, and Other Throat Troubles.
Claims use since Apr. 30, 1920.

Ser. No. 133,116. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) U. R. S. CANDY STORES, INC., New York, N. Y. Filed May 29, 1920.

Nightingale

Particular description of goods.—Candy.
Claims use since Apr. 26, 1920.

Ser. No. 133,121. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) D. AUERBACH & SONS, New York, N. Y. Filed June 1, 1920.

ANIMAL BLOCKS

Particular description of goods.—Chocolates.
Claims use since May, 1914.

Ser. No. 133,177. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) WOODLANDS LIMITED, Dover, England. Filed June 1, 1920.

SALOX

Particular description of goods.—Flour-Improvers Comprising a Harmless Persulfate, Such as Potassium Persulfate or Ammonium Persulfate.
Claims use since Oct. 28, 1911.

Ser. No. 133,615. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) DUBUQUE SPIRAL HARROW CO., Dubuque, Iowa. Filed June 12, 1920.

Particular description of goods.—Spiral Harrow.
Claims use since Mar. 1, 1920.

Ser. No. 133,675. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) NORRIS, INC., Atlanta, Ga. Filed June 14, 1920.

The words "Exquisite Candies" being specifically disclaimed.
Particular description of goods.—Chocolates, Bonbons, and Candies.
Claims use since Nov. 17, 1910.

Ser. No. 133,814. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) JOHN F. AYERS, Salem, N. J. Filed June 17, 1920.

No claim being made to the exclusive use of the word "Brand" apart from the mark as shown in the drawings.
Particular description of goods.—White Potatoes.
Claims use since July 17, 1911.

Ser. No. 133,930. (CLASS 26. MEASURING AND SCIENTIFIC APPLIANCES.) HERMIT-CROPSE MANUFACTURING COMPANY, Kansas City, Mo. Filed June 19, 1920.

BATOMETER

Particular description of goods.—Indicators for Indicating the Internal Condition of Storage and Other Batteries.
Claims use since Apr. 10, 1920.

Ser. No. 134,004. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) PAUL F. BEICH CO., Bloomington, Ill. Filed June 22, 1920.

Particular description of goods.—Candy.
Claims use since Sept. 1, 1919.

Ser. No. 134,180. (CLASS 15. OILS AND GREASES.) BIGHEART PRODUCING & REFINING COMPANY, New York, N. Y. Filed June 25, 1920.

Particular description of goods.—Petroleum Products—Namely, Crude Oil, Gasolene, Casing-Head Gasolene, Absorption-Gasolene, Naphtha, Benzin, Kerosene, Kerosene Distillate, Rerun Distillate, Treated Wax Distillate, Untreated Wax Distillate, Gas-Oil, Absorption-Oil, Cylinder-Oil, Fuel-Oil, and Lubricating-Oil.
Claims use since January, 1918.

Ser. No. 134,283. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) UNIVERSAL WINDING COMPANY, Cranston, R. I., and Boston, Mass. Filed June 26, 1920.

LEESONA

The trade-mark consists of the word "Leesona."
Particular description of goods.—Winding-Machines for Thread, Yarn, Cord, Twine, Rope, and Wire; Countershafts and Parts Thereof.
Claims use since Oct. 8, 1915.

Ser. No. 134,285. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) THE WYOMING SHOVEL WORKS, Wyoming, Pa. Filed June 26, 1920.

WYOMING
RED EDGE

Particular description of goods.—Shovels, Spades, Scoops, Mattocks, and Picks.
Claims use since Nov. 28, 1913.

Ser. No. 134,439. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) TOCH BROTHERS, New York, N. Y. Filed June 30, 1920.

ARCTIC

Particular description of goods.—Paint-Pigments and Ready-Mixed Paints.
Claims use since 1884.

Ser. No. 134,481. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) NEW ERA MFG. CO., New York, N. Y. Filed July 1, 1920.

NewEra

Particular description of goods.—Check-Writers.
Claims use since on or about June 23, 1911.

Ser. No. 134,571. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

T K-Alloy Steel

No claim being made to the words "Alloy Steel" apart from the mark shown in the drawing.
Particular description of goods.—Tool-Steels in Bars, Billets, and Shapes.
Claims use since about the year 1905.

Ser. No. 134,572. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

SAMSON

Particular description of goods.—Alloy Steels in Bars, Billets, and Shapes.
Claims use since about 1909.

Ser. No. 134,574. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

PRESTO

Particular description of goods.—Tool-Steel in Bars, Billets, and Shapes.
Claims use since about 1910.

Ser. No. 134,575. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

RDS READING DOUBLE SPECIAL

No claim being made to the words "Reading Double Special" apart from the mark shown in the drawing.
Particular description of goods.—Tool-Steels in Bars, Billets, and Shapes.
Claims use since about 1906.

Ser. No. 134,576. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

KW-DIE STEEL

No claim being made to the words "Die Steel" apart from the mark shown in the drawing.
Particular description of goods.—Tool-Steels in Bars, Billets, and Shapes.
Claims use since about 1904.

Ser. No. 134,577. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

J-Y ALLOY STEEL

No claim being made to the words "Alloy Steel" apart from the mark shown in the drawing.
Particular description of goods.—Alloy Steels in Bars, Billets, and Shapes.
Claims use since about 1911.

Ser. No. 134,579. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

CYCLOID
GEAR STEEL

No claim being made to the words "Gear Steel" apart from the mark shown in the drawing.
Particular description of goods.—Alloy Steels in Bars, Billets, and Shapes.
Claims use since about 1909.

Ser. No. 134,580. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

FLEXO
SPRING STEEL

No claim being made to the words "Spring Steel" apart from the mark shown in the drawing.
Particular description of goods.—Alloy Steels in Bars, Billets, and Shapes.
Claims use since about 1909.

Ser. No. 134,581. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

S-M PUNCH STEEL

No claim being made to the words "Punch Steel" apart from the mark shown in the drawing.
Particular description of goods.—Tool-Steel in Bars, Billets, and Shapes.
Claims use since about 1915.

Ser. No. 134,582. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

S-O GEAR STEEL

No claim being made to the words "Gear Steel" apart from the mark shown in the drawing.
Particular description of goods.—Alloy Steels in Bars, Billets, and Shapes.
Claims use since about 1914.

Ser. No. 134,584. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THE CARPENTER STEEL COMPANY, Reading, Pa. Filed July 6, 1920.

NITRO

Particular description of goods.—Tool-Steels in Bars, Billets, and Shapes.
Claims use since about June 1, 1919.

Ser. No. 134,615. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) FRED M. TAFT, Logansport, Ind. Filed July 6, 1920.

Taf-Tum

Particular description of goods.—Liquid Polish for Autos, Pianos, and Furniture.
Claims use since June 1, 1920.

Ser. No. 134,634. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) JAMES BURNS & SONS, New York, N. Y. Filed July 7, 1920.

JUBILEE

Particular description of goods.—Roasters and Parts and Supplies for Same for Roasting Food Products Such as Coffee, Cocoa, Peanuts, Cereals, &c.
Claims use since 1914.

Ser. No. 134,703. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) THE DENVER ROCK DRILL MANUFACTURING COMPANY, Denver, Colo. Filed July 8, 1920.

WAUGH HOIST

Particular description of goods.—Hoists.
Claims use since 1919.

Ser. No. 134,723. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) JOHN OGDEN, Philadelphia, Pa. Filed July 8, 1920.

KEYSTONE
Adjustable
Sickle

No claim is made to the words "Adjustable Sickle" apart from the trade-mark as shown.
Particular description of goods.—Sickles.
Claims use since Apr. 26, 1920.

Ser. No. 134,733. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE SANI-MANI LABORATORY, Long Beach, Calif. Filed July 8, 1920.

Sani-Mani

No claim is made to the words "Clean Hands" apart from the mark shown.
Particular description of goods.—A Preparation Used to Soften Cuticle and Remove Stains.
Claims use since July, 1916.

Ser. No. 134,817. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) L. F. GRAMMES & SONS, Allentown, Pa. Filed July 12, 1920.

THE JIFFY HANDY
10-IN-1 WRENCH

No claim being made to the words "Wrench" and "Handy" apart from the other features of the mark shown on the drawing.
Particular description of goods.—Wrenches.
Claims use since November, 1919.

Ser. No. 135,109. (CLASS 15. OILS AND GREASES.) GUSTAVE A. PREISS, Elgin, Ill. Filed July 17, 1920.

IT GIVES THE WASHER PEP
PEP
OIL

No claim is made to the words "Washing Machine Oil" apart from the mark shown on the drawing.
Particular description of goods.—Lubricating-Oils.
Claims use since July 9, 1920.

Ser. No. 135,267. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CAPE COUNTY MILLING COMPANY, Jackson, Mo. Filed July 22, 1920.

Gold Leaf

Particular description of goods.—Wheat-Flour.
Claims use since 1869.

Ser. No. 135,268. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CAPE COUNTY MILLING COMPANY, Jackson, Mo. Filed July 22, 1920.

FLEUR DU CAP

Particular description of goods.—Wheat-Flour.
Claims use since Dec. 20, 1869.

Ser. No. 135,341. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) PAN AMERICAN SMELTING WORKS, INC., New York, N. Y. Filed July 23, 1920.

Particular description of goods.—White-Metal Alloys.
Claims use since Mar. 11, 1920.

Ser. No. 135,374. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) LOGAN IRON AND STEEL COMPANY, Philadelphia, Pa. Filed July 24, 1920.

LISCO

Particular description of goods.—Bar-Iron.
Claims use since May 19, 1920.

Ser. No. 135,549. (CLASS 39. CLOTHING.) MARY ELIZABETH BAKER, Washington, D. C. Filed July 29, 1920.

Marie Louise

Particular description of goods.—Ladies' Hats and Bonnets.
Claims use since June 1, 1900.

Ser. No. 135,676. (CLASS 15. OILS AND GREASES.) ULTRA REFINED CRUDE PRODUCTS COMPANY, Chicago, Ill. Filed July 31, 1920.

Her-ene

Particular description of goods.—Deodorized Kerosene.
Claims use since June 1, 1920.

Ser. No. 135,703. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) FEDERAL TOOL & ALLOY STEEL CORPORATION, New York, N. Y. Filed Aug. 2, 1920.

NORTHLAND

Particular description of goods.—Iron and Steel.
Claims use since June 15, 1920.

Ser. No. 135,704. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) FEDERAL TOOL & ALLOY STEEL CORPORATION, New York, N. Y. Filed Aug. 2, 1920.

ODIN

Particular description of goods.—Iron and Steel.
Claims use since June 15, 1920.

TRADE-MARK REGISTRATIONS GRANTED

Chocolate Truffles

Particular description of goods.—Chocolate Candy.
Claims use since about Jan. 15, 1910.

135,178. (CLASS 39. CLOTHING.) ECONOMY MANUFACTURING COMPANY, New York, N. Y. Filed July 14, 1920. Serial No. 134,948.

"Miss Economy's"

DOUBLE Wear

Particular description of goods.—Ladies' Dresses, Skirts, Coats, and Suits.
Claims use since Nov. 25, 1915.

135,179. (CLASS 19. VEHICLES, NOT INCLUDING ENGINES.) GEMMER MANUFACTURING COMPANY, Detroit, Mich. Filed Apr. 5, 1920. Serial No. 130,669.

GEMMER

Particular description of goods.—Steering-Gears for Motor-Vehicles.
Claims use since June 1, 1907.

135,180. (CLASS 35. BELTING, HOSE, MACHINERY PACKING, AND NON-METALLIC TIRES.) THE GOODYEAR TIRE & RUBBER COMPANY, Akron, Ohio. Filed Feb. 11, 1920. Serial No. 128,267.

KANTKINK

Particular description of goods.—Hose Made Wholly or in Part of Rubber.
Claims use since Nov. 1, 1913.

135,181. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THEODORE GOTTMANN & SONS, Chicago, Ill. Filed July 14, 1920. Serial No. 134,950.

Surinam BRAND

Particular description of goods.—Chocolate Candy.
Claims use since April, 1909.

135,182. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) FRANCIS CONDIE HARDER, Plainfield, N. J. Filed July 22, 1920. Serial No. 135,281.

HOMESPUN

LINEN FINISH

Particular description of goods.—Cotton Piece Goods.
Claims use since Nov. 8, 1915.

135,183. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) MARSHALLTOWN SYRUP & SUGAR COMPANY, Marshalltown, Iowa. Filed July 16, 1920. Serial No. 135,057.

MOUSSE

Particular description of goods.—Toppings for Ice-Cream.
Claims use since Jan. 1, 1910.

135,184. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) CHARLES OPPENHEIMER, Philadelphia, Pa. Filed Oct. 3, 1919. Serial No. 123,396.

The picture forming a feature of the mark is a copy of the portrait of Villette Stringer.
Particular description of goods.—Hair-Nets.
Claims use since on or about the 4th day of August, 1919.

135,185. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) PENNSYLVANIA CHOCOLATE COMPANY, Pittsburgh, Pa. Filed July 19, 1920. Serial No. 135,170.

NUTBAR

Particular description of goods.—Chocolate and Candy.
Claims use since about October, 1911.

135,186. (CLASS 46. (FOODS AND INGREDIENTS OF FOODS.) PENNSYLVANIA CHOCOLATE COMPANY, Pittsburgh, Pa. Filed July 19, 1920. Serial No. 135,171.

FULL CREAM

Particular description of goods.—Chocolate Candy.
Claims use since about January, 1914.

135,187. (CLASS 36. MUSICAL INSTRUMENTS AND SUPPLIES.) THE TORRINGTON COMPANY, Torrington, Conn. Filed July 7, 1920. Serial No. 134,676.

Torrington

Particular description of goods.—Phonograph-Needles.
Claims use since Apr. 10, 1919.

135,188. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) WALLACE ROBERTS CANNING COMPANY, Woodstown, N. J. Filed July 16, 1920. Serial No. 135,074.

SALEM COUNTY

Particular description of goods.—Jellies, Fruit Jams, Table Preserves, Canned Fruits and Vegetables.
Claims use since 1917.

LABELS

REGISTERED SEPTEMBER 21, 1920.

22,141.—*Title:* "PRONTO." (For Glass Containers Containing a Fire-Extinguishing Fluid.) THE ALLEN CORPORATION, New York, N. Y. Filed January 20, 1920.

22,142.—*Title:* "ATLASETTE, 'THE GLOVE I LOVE,'" (For Gloves.) ATLASETTE GLOVES INC., New York, N. Y. Filed December 5, 1909.

22,143.—*Title:* "ASIAGO BASSO." (For Cheese.) THE BASSO Co., Chicago, Ill. Filed March 19, 1920.

22,144.—*Title:* "PROHIBITION GINGER." (For a Preparation or Compound for Cramps, Chills, &c. BENJAMIN F. BIGWOOD, Everett and Boston, Mass. Filed January 10, 1920.

22,145.—*Title:* "SALMOTINTO." (For Cantaloup-Seed.) H. VAN BUSKIRK SEED Co., Rocky Ford, Colo. Filed May 26, 1919.

22,146.—*Title:* "SNOW CRYSTALS." (For Instantaneous Water-Softener.) CALIFORNIA SODA PRODUCTS COMPANY, San Francisco, Calif. Filed January 20, 1920.

22,147.—*Title:* "SUCCULINE." (For General Tonic for Poultry.) ALEXANDER W. CHAPPELL, Red Bank, N. J. Filed January 19, 1920.

22,148.—*Title:* "HARMONY FORGET-ME-NOT SNAPS." (For Snap-Fasteners.) FEDERAL SNAP FASTENER CORPORATION, New York, N. Y. Filed March 1, 1920.

22,149.—*Title:* "GRAPETTE." (For Beverage.) DAVID N. GOLDBERG, Chicago, Ill. Filed January 20, 1920.

22,150.—*Title:* "GIFT CHOCOLATE FROM CALIFORNIA." (For Boxes Containing Chocolates.) PETER HALL, Pasadena, Calif. Filed September 29, 1919.

22,151.—*Title:* "PLAYER ACTION PAR EXCELLENCE." (For Actions for Player-Pianos.) R. S. HOWARD COMPANY, New York, N. Y. Filed October 31, 1919.

22,152.—*Title:* "JAX." (For Cereal Beverages.) JACKSON BREWING COMPANY, New Orleans, La. Filed November 24, 1919.

22,153.—*Title:* "PURPLE SEAL PLAYTHINGS." (For Educational Playthings—Namely, Picture-Builders.) CHAS. F. LORENZEN & Co., Chicago, Ill. Filed December 20, 1919.

22,154.—*Title:* "PURPLE SEAL PLAYTHINGS." (For Phantom Blocks 71.) CHAS. F. LORENZEN & Co., Chicago, Ill. Filed December 20, 1919.

22,155.—*Title:* "ORIENTAL." (For Shampoo.) L. H. LEE, Elmhurst, Ill. Filed March 1, 1920.

22,156.—*Title:* "EUCO-MINT." (For Packages Containing Tooth-Paste.) PETER A. MANDABACH, Chicago, Ill. Filed October 24, 1919.

22,157.—*Title:* "HER CANDIED OPINION." (For Boxes Containing Chocolate Candy.) MILWAUKEE PAPER BOX COMPANY, Milwaukee, Wis. Filed February 4, 1920.

22,158.—*Title:* "SHELLEY'S CHOCOLATES." (For Boxes Containing Chocolate Candy.) MILWAUKEE PAPER BOX COMPANY, Milwaukee, Wis. Filed February 5, 1920.

22,159.—*Title:* "CHOCOLATES OF YORE." (For Boxes Containing Chocolate Candy.) MILWAUKEE PAPER BOX COMPANY, Milwaukee, Wis. Filed April 28, 1920.

22,160.—*Title:* "'GAVIOTA,' (SEA GULL)." (For Artificial Fertilizer.) THE PACIFIC GUANO & FERTILIZER Co., Honolulu, Territory of Hawaii. Filed January 20, 1920.

22,161.—*Title:* "PERMA-TITE VALVE GRINDING COMPOUND." (For Cans Containing a Valve-Grinding Compound.) PERMATITE MANUFACTURING COMPANY, INC., Minneapolis, Minn. Filed January 8, 1920.

22,162.—*Title:* "PERMA-TITE HOUSEHOLD PATCH." (For Packages Containing a Household Patch for Patching Rubber Goods.) PERMATITE MANUFACTURING COMPANY, INC., Minneapolis, Minn. Filed January 8, 1920.

22,163.—*Title:* "AMERICAN CLOTH." (For Cloth.) PETERS MANUFACTURING Co., Boston, Mass., and New York, N. Y. Filed July 18, 1919.

22,164.—*Title:* "PRICE'S NO ICE." (For Preservative Compound for Fish and Game.) PRICE COMPOUND COMPANY, Minneapolis, Minn. Filed September 4, 1919.

22,165.—*Title:* "MOTHER'S." (For Bread.) SANIWAX PAPER Co., Kalamazoo, Mich. Filed September 19, 1919.

22,166.—*Title:* "HOME MADE." (For Bread.) SANIWAX PAPER Co., Kalamazoo, Mich. Filed September 19, 1919.

22,167.—*Title:* "MILK MAID." (For Bread.) SANIWAX PAPER Co., Kalamazoo, Mich. Filed September 19, 1919.

22,168.—*Title:* "SHAW'S." (For Strawberry Jam.) THE SHAW FAMILY, INC., San Jose, Calif. Filed February 3, 1920.

22,169.—*Title:* "ALL IN ONE OINTMENT." (For Ointment.) SHEPHERD & CLEVELAND, Chicago, Ill. Filed October 15, 1919.

22,170.—*Title:* "ESSEX POISONED WHEAT." (For Poisoned Food for Rats, Mice, &c.) LOUIS L. STAEHLE, Newark, N. J. Filed February 28, 1920.

22,171.—*Title:* "SWEET-ODOR-HOME." (For Liquid Deodorant.) SWEET-ODOR-HOME COMPANY, San Francisco, Calif. Filed April 28, 1920.

22,172.—*Title:* "MAGIC HAIR CURLERS." (For Applied or Fastened Hair-Curlers.) AUGUSTUS A. WEST, Philadelphia, Pa. Filed December 30, 1919.

22,173.—*Title:* "MAGIC HAIR CURLERS." (For Applied or Fastened Hair-Curlers.) AUGUSTUS A. WEST, Philadelphia, Pa. Filed December 30, 1919.

PRINTS

REGISTERED SEPTEMBER 21, 1920.

5,352.—*Title:* "HANDY CANDY CLOVES." (For Candy—Namely, Cloves.) BEECH-NUT PACKING COMPANY, Canajoharie, N. Y. Filed June 4, 1919.

5,353.—*Title:* "HANDY CANDY LICORICE." (For Candy—Namely, Licorice.) BEECH-NUT PACKING COMPANY, Canajoharie, N. Y. Filed June 4, 1919.

5,354.—*Title:* "ECONOMY." (For Athletic Underwear.) THE B. V. D. COMPANY, New York, N. Y. Filed March 20, 1920.

5,355.—*Title:* "HAYS GLOVES." (For Leather Gloves.) THE DANIEL HAYS COMPANY, Gloversville, N. Y. Filed April 26, 1919.

5,356.—*Title:* "SHOT." (For A Non-Alcoholic Beverage.) JOSEPH A. FRANKLIN, Chicago, Ill. Filed June 25, 1919.

5,357.—*Title:* "THE DRINK WITH A TICKLE." (For a Non-Alcoholic Beverage.) JOSEPH A. FRANKLIN, Chicago, Ill. Filed June 25, 1919.

5,358.—*Title:* "OUIJA." (For a Talking-Board.) WILLIAM FULD, Baltimore, Md. Filed December 9, 1919.

5,365.—*Title:* "COME IN LET US SHOW YOU DETMER UNIVERSITY NOVELTIES LATEST SUITINGS." (For Detmer Woolens.) DETMER WOOLEN CO., New York, N. Y. Filed February 5, 1920.

REPORT
OF THE
COMMISSIONER OF PATENTS
TO THE
SECRETARY OF THE INTERIOR
FOR THE FISCAL YEAR ENDED JUNE 30, 1920.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., August 13, 1920.

SIR: I have the honor to submit herewith the following report of the business of the United States Patent Office for the fiscal year ended June 30, 1920:

Applications received during fiscal year ended June 30, 1920.

Applications for patents for inventions	81,948
Applications for patents for designs	4,110
Applications for reissues of patents	322
Applications for registration of trade-marks	14,710
Applications for registration of labels	1,280
Applications for registration of prints	570
Total applications	102,940
Disclaimers	24
Appeals on the merits	1,966
Notices of opposition	388
Total applications, disclaimers, appeals and notices of opposition	105,318

Applications for patents for inventions.

Year ended June 30—	
1911	65,365
1912	69,286
1913	67,986
1914	69,311
1915	66,497
1916	67,348
1917	68,660
1918	62,399
1919	62,755
1920	81,948

Applications for patents, including reissues and designs, and applications for the registration of trade-marks, labels, and prints.

Year ended June 30—	
1911	74,977
1912	79,747
1913	78,411
1914	81,539
1915	79,116
1916	80,021
1917	81,538
1918	73,307
1919	75,657
1920	102,940

Applications awaiting action.

June 30—	
1914	22,263
1915	18,270
1916	16,559
1917	16,058
1918	14,769
1919	17,735
1920	34,355

Patents withheld and patents expired.

	1919	1920
Letter Patent withheld for non-payment of final fees	8,354	7,235
Applications allowed awaiting payment of final fees	15,210	16,333
Patents expired	26,020	29,329
Applications in which issue of patents has been deferred under section 4885, Revised Statutes	848	171
Applications in process of issue	3,527	2,653

Patents granted and trade-marks, labels, and prints registered.

Class.	1916	1917	1918	1919	1920
Letters Patent	44,153	42,328	39,214	37,889	37,316
Design patents	1,761	1,696	1,146	1,235	2,302
Reissue patents	217	165	166	205	227
Trade-marks	6,169	6,126	4,944	3,788	6,984
Labels	833	781	516	572	682
Prints	402	342	192	205	158
Total	53,477	51,428	46,078	43,853	47,409

Receipts from all sources, fiscal year ended June 30, 1920.

Applications, first fees	$1,726,650.84
Designs	62,760.00
Reissues	9,635.00
Trade-marks	147,105.55
Final fees	738,362.90
Appeals and oppositions	35,325.00
Disclaimers	240.00
Coupons	101,536.66
Drawings	5,673.35
Recording assignments	32,423.30
Labels	7,604.80
Prints	3,624.90
Copies of records	344,329.83
Official Gazette and other publications through Government Printing Office, estimated	20,000.00
Total	2,615,697.33

Expenditures, fiscal year ended June 30, 1920.

Salaries	$1,421,129.68
Scientific library	2,405.63
Postage on foreign mail	1,107.00
Stationery	11,420.14
Furniture and sundries	10,168.93
Ice	269.85
Washing towels	137.90
Telephones	659.98
Telegraphing	21.17
Investigating public use	407.02
Photolithographing:	
Current issue	49,882.94
Reproductions	96,247.21
Foreign patents	1,969.92
Transportation of foreign exchange copies	690.55
Photographic printing	6,002.58
Photostat supplies	11,582.79
Dry mounts	6,643.00
Printing and binding:	
Official Gazette	131,421.95
Indexes	9,882.71
Specifications	408,690.60
Miscellaneous	29,185.60
International convention for protection of Industrial Property (estimated)	730.00
Coal	19,378.20
Fixed charges not enumerated	122.77
Total	2,222,128.21
Increase in compensation	214,433.16
Grand total	2,436,561.37

Receipts and expenditures.

Receipts from all sources	$2,615,697.33
Expenditures	2,436,561.37
Net surplus	179,135.96
Total net surplus to date	8,305,023.56

Comparative statement.

June 30—	Receipts.	Expenditures.	Surplus.
1911	$1,987,778.58	$1,937,001.83	$30,776.73

During the year 86,380 applications for patents, including reissues and designs, and 147,739 amendments in pending cases were filed. The number of letters constituting the miscellaneous correspondence received and indexed was 304,646.

The number of printed copies of specifications of patents sold was 2,522,218, for which a revenue of $196,698.15 was received by the Office, this amount being an increase of $89,545.30 over the receipts of last year. A total of 999,862 copies of patents was shipped to foreign governments. The whole number of copies of patents furnished for sale, for governmental use, and for foreign governments was 3,896,297.

The Office received for record 40,188 deeds of assignment, containing on an average 466.77 words per deed. There were also recorded, without fees, for other departments, 4,592 deeds.

Typewritten copies of 29,865,100 words and photostatic copies of 19,201,400 words of records, aggregating 49,066,500 words were furnished at 10 cents per hundred words, for which the Office received $49,066.50, and for certifying to these copies $2,499.25 additional, making a total of $51,565.75. For 13,519 certified printed copies, etc., the Office received $11,236.20. For 122,367 photostatic copies of foreign patents, etc., the Office received $24,050.65, and for 75,324 photographic copies $11,862.30. For all of this class of work the Office received a total of $98,714.90. The Office furnished to other departments, without charge, 647 photostatic copies and made for its own use 86,835 copies; 10,708 photographic copies were made for its own use.

RÉSUMÉ.

Special attention is called to the unusual increase in the business of this Office in all its branches for the fiscal year just closed. The gains over the previous fiscal year in applications for mechanical patents, registration of trade-marks, and in total applications were, respectively, 19,193, 6,149, and 27,283 in numbers and thirty per cent., seventy-two per cent., and thirty-six per cent. in proportionate increases. The gain in actual numbers far exceeded any previous increase of business in any one fiscal year, and this gain is larger than the *total* receipts of any calendar year in the history of the Office up to and including the year 1881.

The gain in business in the number of printed copies of patents sold was twenty-two per cent., in deeds of assignment received for record thirty-four per cent., and in words furnished of copies of records seventy-nine per cent.

The receipts of money for copies of patents increased eighty-four per cent. It is to be noted that the increase of price of these copies from 5 cents to 10 cents required by the first Deficiency Appropriation Act of November 4, 1919, was effective for a little more than half the year. The gain in receipts of money, if increase of price had been effective the whole year, would have amounted to one hundred and forty per cent.

The total receipts of money increased twenty-four per cent., and the net deficit for the fiscal year 1919 of $65,228.13 was turned into a net surplus of $179,135.96, making a relative net increase of $244,364.09 for the year.

Respectfully submitted.

R. F. WHITEHEAD,
Commissioner of Patents.

The SECRETARY OF THE INTERIOR.

DECISIONS

OF THE

COMMISSIONER OF PATENTS

AND OF

UNITED STATES COURTS IN PATENT CASES.

DECISIONS OF THE U. S. COURTS.

Court of Appeals of the District of Columbia.

HOENIG *v.* KENDIG.

Decided June 2, 1920.

PATENTS—INTERFERENCE—PRIORITY.

In an interference between H. and K. priority of invention awarded to H. on the ground that he was the first to conceive and was diligent up to the time of his reduction to practice.

Mr. E. Hume Talbert for the appellant.

Mr. J. C. Bradley for the appellee.

SMYTH, *C. J.*:

Hoenig appeals from a decision of the Patent Office awarding priority to Kendig. The invention relates to two-part insulators and means for holding the parts in assembled relationship. It is expressed in one count:

> In combination in an insulator, base and cap portions having perforations extending therethrough, and a metal fastening member comprising a shank extending through the perforations and provided at the end carrying the cap with an integral head which will not pass through the perforation in the cap and provided at the other end with a point, the said shank being provided with a struck-up portion positioned so as to engage the base and prevent the withdrawal of the fastening member therefrom.

The means consist of a nail passing through perforations in the cap and base portions, and a struck-up portion on the shank of the nail for engaging the base to prevent the withdrawal of the nail therefrom. This interference is a companion of the interference between Hoenig and Parker, this day decided, (*ante*, p. ——,) and was submitted on the same testimony. The Examiner of Interferences decided in favor of Kendig. The Board of Examiners reversed him and awarded priority to Hoenig. The First Assistant Commissioner overruled the Board and affirmed the action of the Examiner of Interferences.

Hoenig claims conception about the middle of November, 1914, and reduction to practice not later than January 1, 1915. Kendig's earliest date is February 20, 1915. In the companion case we held that Hoenig was entitled to conception and disclosure before the middle of December, 1914, and reduction to practice as early as January 1, 1915, and that he was diligent in the meantime. Our view of the testimony and the law in that case is controlling here. Consequently, the decision of the Patent Office is reversed, and priority awarded to Harry Edward Hoenig.

Reversed.

Mr. Justice VAN ORSDEL took no part in the consideration or decision of this case.

U. S. Circuit Court of Appeals—Second Circuit.

GEO. BORGFELDT & CO. *et al. v.* WEISS.

Decided March 19, 1920.

[*265 Fed. Rep., 268.*]

1. PATENTS—INFRINGEMENT OF DESIGN PATENT DEPENDS ON IMPRESSION PRODUCED ON PURCHASERS.

The question of infringement of a design patent for a doll is a question as to the impression produced on would-be purchasers.

2. SAME—DESIGN FOR DOLL VALID AND INFRINGED.

The Pfeffer design patent, No. 51,559, for a doll, *Held* valid and infringed.

3. SAME—TEST OF INFRINGEMENT OF DESIGN STATED.

Infringement of a design patent for a doll turns upon whether there is identity of appearance, whether the effect produced upon the eye is the same, and whether there is substantial identity of design, and the persons to be deceived are not experts, but ordinary observers, giving such attention to the matter as purchasers usually give.

4. SAME.—DESIGN PATENT ENTITLED TO EQUIVALENTS RESPECTING NON-ESSENTIAL DETAILS.

A design patent for a doll entitles the holder to the usual range of equivalents with respect to known prior unessential details, and though the patent drawings show a doll with a cap the figure shown is included within the claim of the patent, whether the doll is provided with painted hair, real hair, bathing-cap, or military or naval cap or any other standard form of head-dress.

APPEAL from the District Court of the United States for the Southern District of New York.

Suit by George Borgfeldt & Co. and another against Leo L. Weiss. From a decree dismissing the bill, complainants appeal. Reversed, with directions.

Mr. Hans v. Briesen (*Mr. Fred A. Klein* of counsel) for the appellants.

Messrs. Kornbluth & Pollack (*Mr. Herman C. Pollack* of counsel) for the appellee.

Before WARD, ROGERS, and HOUGH, Circuit Judges.

ROGERS, *Cir. J.*:

The suit is for the infringement of United States Design Patent No. 51,559, issued to Miss Genevieve

Pfeffer, San Jose, Calif., on December 11, 1917. The patentee states in her specification that she has invented a new, original, and ornamental design for dolls, of which—

the following is a specification, reference being had to the accompanying drawing.

There is no written description of the invention, and the claim is "the ornamental design for a doll as shown." Those drawings are reproduced herein:

Fig. 1.

The complainant gets its title from a contract with Miss Pfeffer, giving it the manufacturing rights, and reserving to herself a royalty.

The defendant has taken out no patent, but reproductions of the alleged infringing doll are here shown:

The plaintiff calls his doll "Splashme" and defendant names his "Duckme." The plaintiff's figurettes have met with remarkable success in the market; some 360,000 having been sold between April, 1918, when they were put on the market, and June, 1919, when the case was tried. The amount of the sales is said to be somewhere between $500,000 and $1,000,000.

(1) The dolls of the plaintiff and those of defendant differ from each other in certain details which are unessential. The defendant's doll is provided with painted hair, or imitation hair, where the doll of the patent shows hair covered by a cap. The defendant's doll omits the cap. The posture of the arms and legs has been slightly varied in the doll of the defendant, and the defendant's doll has painted slippers, where the plaintiff's doll has bare toes. The conclusion, however, is irresistible that defendant has copied plaintiff's design as a whole and sought to escape infringement by varying the ornamentation. In the opinion below the district judge, speaking of the two dolls, says:

At a glance one would, of course, see the patent plagiarism.

He also says that—

the only variation which the defendant has made, and which is at all observable, is to take off the bathing cap from the figure in the design. That would not be enough under ordinary circumstances, because a close-fitting cap is only distinguishable by some attention from an uncovered head.

He adds that when the cap is off—and it is removable from plaintiff's doll—the two figures are distinguishable beyond question. That is true, but in the stores, when the dolls are sold, they have their caps on; and the question is as to the impression produced on would-be purchasers.

In *Ashley* v. *Tatum* (186 Fed., 339; 108 C. C. A., 539) this court held that a patent for a design is not invalid because it does not contain a written description of the design, although its absence may have a bearing upon the construction of the patent, and therefore on the question of infringement. The Supreme Court in *Dobson* v. *Dornan* (118 U. S., 10; 6 Sup. Ct., 946; 30 L. Ed., 63) had already held that the specification for a design, which is accompanied by a photographic illustration and merely states that the nature of the design is fully represented in the illustration and claims the configuration of the design annexed, is a sufficient description and claim.

(2) This court is of the opinion that plaintiff's patent is valid. The plaintiff's design is clever and attractive; the controlling features being the eyes and the posture of a doll in bathing-costume. It is not invalidated by anything in the prior art. The exhibits produced by defendant at the trial only served to emphasize the uniqueness and individuality of the plaintiff's design.

(3) The plaintiff's patent being valid, there remains the question whether the defendant infringes. The question of infringement turns upon whether there is identity of appearance; whether the effect produced upon the eye is the same; whether there is substantial identity of design; and the persons to be deceived are not the experts, but the ordinary observers, giving such attention to the matter as purchasers usually give. That is the test laid down in *Gorham Co.* v. *White*, (14 Wall., 511; 20 L. Ed., 731,) a case which has never been overruled.

The court below has decided that there is no infringement, and in doing so appears to have misapprehended the decision of this court in *Ashley* v. *Tatum*. That case was decided in the lower court in 1910, and the opinion of the district judge is found in 181 Fed., 840. The patent in that case was a design patent for an inkwell. The district judge held the patent valid and infringed, declaring that the prior art presented nothing which in the least suggested it. The complainant's design contained no ornamentation. The defendant's design did contain ornamentation, and the court declared it was "no doubt distinguishable" from complainant's design, but he also found that it contained "every element of complainant's design." He said:

The defendant has taken over bodily every element of the complainant's design, and he has added just enough, and that, too, injuriously, to make a colorable claim to differentiation. * * * The complainant's design appears to me to have been imitated, and I therefore find that the defendant's wells are an infringement.

The case was brought to this court upon appeal, and the decision is found in 186 Fed., 339; 108 C. C. A., 539; the opinion being written by Judge Lacombe. This court reversed the court below, and held there was no infringement, although agreeing with the district judge that the two inkwells were plainly distinguishable.

The difference between the two is readily apparent to any one, expert or non-expert, * * *

said Judge Lacombe,

and there seems no likelihood that, whether looked at together or apart, the one could be mistaken for the other.

In *Ashley* v. *Tatum* there was no specification of any kind, and the patent consisted entirely of an illustration, and the article said to infringe was plainly distinguishable from the article which was said to be infringed. What was said in that case must be strictly confined to the class of cases to which it belongs. The case is plainly distinguishable from the case now before the court, as will presently appear. After this court decided *Ashley* v. *Tatum*, an attempt was made to get it before the Supreme Court by writ of certiorari; it being alleged that the Patent Office would allow no verbal description in design patents, and that over 30,000 of such patents were imperiled so far as their scope was concerned. The application, however, was denied. (225 U. S., 707; 32 Sup. Ct., 839; 56 L. Ed., 1266.)

In 1912 in *Graff, Washbourne & Dunn* v. *Webster* (195 Fed., 522; 115 C. C. A., 432) this court had before it a design patent for a dish. The question under consideration in the Tatum case was not discussed, and the case itself was not referred to. But Judge Coxe, speaking for the court, said:

Having seen the complainant's design in a show case or shop window, the ordinary buyer would be very likely to mistake the defendants' design for it, if seen in similar environment. This is the real test of infringement of design patents. If the ordinary buyer, having seen one of the complainant's dishes and wishing to procure one like it, would be induced to buy one of the defendants' dishes instead, it is enough. That he would be so deceived is plain, not only from the testimony that persons were actually deceived, but also from an examination of the dishes themselves. Their general appearance is so similar that a minute and careful inspection is required to distinguish the differences.

In 1914 in *Mygatt* v. *Schaffer* (218 Fed., 827; 134 C. C. A., 515) this court had before it a design patent for a prismatic glass reflector. In this case the Tatum case was not referred to. We held it not necessary that the alleged infringing article should be an exact copy of that of the patent to sustain a charge of infringement of design patent. There was nothing said in the opinion which has any bearing upon the question now under consideration.

In 1915 in *Ashley* v. *Weeks-Numan Co.* (220 Fed., 899; 136 C. C. A., 465) this court again had before it a design patent for an inkstand. But in this case there was a written specification, and we held that the patentee was not limited to the precise article shown in the drawing, but was entitled to the protection of the court against the making and marketing of inkstands which contained the dominant features of the design described in the specification.

(4) The court agrees with the statement of plaintiff's counsel that, so far as the claim of the design patent is concerned, the plaintiff is entitled to the usual range of equivalents with respect to known prior unessential details, so that the figure shown is clearly included within the claim of the patent, whether the doll is provided with painted hair, real hair, bathing-cap, military or naval cap, or any other standard form of head-dress, since all of these were well-known equivalents in the actual art to which this patent relates.

The decision in *Ashley* v. *Tatum* did not enunciate a rule of law applicable to all design patents, but a rule applicable to the type of case then before the court, in which, on the face of the exhibits, the article of the design patent and the article alleged to be infringed were so clearly distinguishable that no likelihood existed of one being mistaken for the other. That case differs from this, in that in this case the article of the design patent and the article alleged to be infringed so closely resemble each other that there is a likelihood of the one being mistaken for the other by the ordinary observer. Where this is the case, infringement is made out, and the rule laid down in *Ashley* v. *Tatum* does not apply.

The decree is reversed, with costs, and the court is directed to reinstate the bill and to grant the relief prayed.

ADJUDICATED PATENTS.

(U. S. C. C. A. Mich.) The Wilson patent, No. 1,144,676, for a headlight with a shield positioned so as to obstruct those rays which would otherwise strike the lower part of the reflector, *Held* not infringed by defendant's headlight, in which the shield is in two parts, one of which obstructs a substantial portion of the direct forward rays from the bulb. *Wilson* v. *Quinn et al.*, 265 Fed. Rep., 14.

(U. S. D. C. W. Va.) The Handel patent, No. 979,664, for a holder for lamp-shades, *Held* void for lack of invention in view of the prior art. *Handel Co.* v. *Jefferson Glass Co. et al.*, 265 Fed. Rep., 286.

(U. S. C. C. A. Mich.) The Jaenichen design patent, No. 40,157, for a design for a scale-frame, *Held* not infringed. *Standard Computing Scale Co.* v. *Detroit Automatic Scale Co.*, 265 Fed. Rep., 281.

(U. S. C. C. A. Ill.) The Knudsen patent, No. 1,221,190, for radius-rods for automobiles, claims 1 and 2 *Held* not infringed and claims 3 and 4 void for lack of invention. *Walker Mfg. Co. et al.* v. *Illinois Brass Mfg. Co.*, 265 Fed. Rep., 279.

(U. S. C. C. A. N. Y.) The Pfeffer design patent, No. 51,559, for a doll, *Held* valid and infringed. *Geo. Borgfeldt & Co. et al.* v. *Weiss*, 265 Fed Rep., 268.

(U. S. C. C. A. Ill.) The Todd patent, No. 793,249, for printing apparatus designed to protect checks and drafts, *Held* not anticipated, valid, and infringed. *Hedman Mfg. Co. et al.* v. *Todd Protectograph* Co., 265 Fed. Rep., 273.

(U. S. D. C. N. Y.) The Barber patent, No. 781,802, for valves and valve-gear for explosive-engines, *Held* valid. *Barber* v. *Otis Motor Sales Co.*, 265 Fed. Rep., 675.

(U. S. C. C. A. Okla.) The Lubbers patents, Nos. 702,013, 702,014, 702,017, 822,678, 886,618, 914,588, and 1,020,920; the Thornburg patent, No. 759,329; the Chambers patent, No. 762 880; the Hitner patents, Nos. 821,361 and 822,452; the Schmerz patent, No. 890,306; the Frink patent, No. 988,454; the Bridge patent, No. 1,006,995, and the Maynard patent, No. 1,073,613, all relating to methods and machines for drawing glass, should each be viewed as a part of a completed whole and as marking the successive steps in improving and developing the basic invention of Lubbers, resulting in processes and apparatus which have revolutionized the old art of making window-glass and produced it commercially for the first time otherwise than by hand-blowing. So considered such patents were not anticipated, are valid, and are entitled to liberal construction as pioneer patents; also *Held* infringed. *Okmulgee Window Glass Co.* v. *Window Glass Mach. Co. et. al.*, 265 Fed. Rep., 626.

(U. S. D. C. N. Y.) The Goldman patent, No. 1,009,502, for a skylight with windows hinged at the bottom and slanting outward at a sufficient degree to cause the window to swing open automatically when released, *Held* not infringed by defendant's skylight, having windows set perpendicularly, with a bar or rod adapted to force the window open when the retaining rope or chain is released. *Superior Skylight Co., Inc.*, v. *August Kuhnla, Inc., et al.*, 265 Fed. Rep., 282.

Disclaimer.

1,283,224.—*Louis B. Larsen, Oscar J. Holmes,* and *Hans G. Larsen,* Chicago, Ill. MOTION-PICTURE MACHINE. Patent dated October 29, 1918. Disclaimer filed September 8, 1920, by the assignee, *Acme Motion Picture Projector Co.*

Enter this disclaimer—

"To that part of the claim in said specification which is in the following words, to wit:

"1. In a portable motion picture machine, the combination of a closed rectangular casing, a lamp house arranged in the upper rear portion of said casing and provided with upper and lower ventilating openings, a film feeding mechanism and associated optical system located in front of the lamp house and in the upper forward portion of the casing, a reel magazine located in the lower forward portion of said casing, and a motor located in the lower rear portion of said casing, and having operative connections with the film feeding mechanism and with the film reeling mechanism of the magazine aforesaid, substantially as set forth.

"2. In a portable motion picture machine, the combination of a closed rectangular casing, a lamp house arranged in the upper rear portion of said casing and provided with upper and lower ventilating openings, a film feeding mechanism and associated optical system located in front of the lamp house and in the upper forward portion of the casing, a reel magazine located in the lower forward portion of the casing, a motor located in the lower rear portion of the casing and having operative connections with the film feeding mechanism and with the film reeling mechanism of the magazine, and a fan or blower arranged beneath the lamp house and having operative connections with said motor, substantially as set forth.

"3. In a portable motion picture machine, the combination of a closed rectangular casing, a lamp house arranged in the upper rear portion of said casing and having a less width than said casing to provide spaces between the respective side walls of said casing and lamp house, the side walls of the casing having openings communicating with said side spaces, and a film feeding mechanism and associated optical system located in front of said lamp house, substantially as set forth.

"4. In a portable motion picture machine, the combination of a closed rectangular casing, a lamp house arranged in the upper rear portion of said casing and having a less width than said casing to provide spaces between the respective side walls of said casing and lamp house, the side walls of the casing having openings communicating with said side spaces, a motor arranged in the lower rear portion of the casing, and a fan or blower arranged beneath the lamp house and having operative connections with said motor, substantially as set forth.

"5. In a portable motion picture machine, the combination of a closed rectangular casing, a lamp house arranged in the upper rear portion of said casing and having a less width than said casing to provide spaces between the respective side walls of said casing and lamp house, the side walls of the casing having openings communicating with said side spaces, and a film feeding mechanism, the lamp house having upper and lower ventilating openings, substantially as set forth.

"6. In a portable motion picture machine, the combination of a closed rectangular casing, a lamp house arranged in the upper rear portion of said casing and having a less width than said casing to provide spaces between the respective side walls of said casing and lamp house, the side walls of the casing having openings communicating with said side spaces, a motor arranged in the lower rear portion of the casing, and a fan or blower arranged beneath the lamp house and having operative connections with said motor, the lamp house having upper and lower ventilating openings, substantially as set forth."

Interference Notices.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 13, 1920.

William A. Green, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Herbert B. Lederer Co., of 91 Fifth avenue, New York, N. Y., for registration of a trade-mark and trade-mark registered May 21, 1912, No. 86,586, to William A. Greer, of 315 Pennington avenue, Passaic, N. J., and a notice of such declaration sent by registered mail to said William A. Greer at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said William A. Greer, his assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

M. H. COULSTON,
First Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 13, 1920.

Gillespie-Benedict Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of The Barrett Company, of 17 Battery Place, New York, N. Y., for registration of a trade-mark and trade-marks registered June 4, 1907, Nos. 62,955 and 62,956, respectively, to Gillespie-Benedict Company, of Old Colony Building, Chicago, Ill., and a notice of such declaration sent by registered mail to said Gillespie-Benedict Company at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said Gillespie-Benedict Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

M. H. COULSTON,
First Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 15, 1920.

Ben Strauss Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of the China, Japan & South America Trading Co., Ltd., of 80 Maiden Lane, New York, N. Y., and the application of J. A. Migel, Inc., of 422 Fourth avenue, New York, N. Y., for registration of a trade-mark and trade-mark registered April 26, 1910, No. 77,614, to the Ben Strauss Company, 31 Union Square, New York, N. Y., and a notice of such declaration sent by registered mail to said Ben Strauss Company at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said Ben Strauss Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

M. H. COULSTON,
First Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 22, 1920.

Charles A. Robins, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Noah Hodge, 1620 Redwood street, Los Angeles, Calif., for registration of a trade-mark and trade-mark registered August 20, 1901, No. 36,922, to Charles A. Robins, 707 North Sixth street, La Crosse, Wis., and a notice of such declaration sent by registered mail to said Charles A. Robins at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said Charles A. Robins, his assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

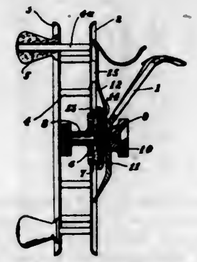
M. H. COULSTON,
First Assistant Commissioner.

Applicant's Address.

The requirement of Rule 33, that the post-office address of the applicant must be stated in the petition, means that the applicant must give the post-office address at which he customarily receives his mail.

The rule was made in order that the Office in necessary cases might correspond directly with the applicant and not through his attorney. The address of the attorney with instructions to send communications to the applicant in his care will not be accepted as a compliance with this rule.

APPLICATIONS UNDER EXAMINATION.



Condition at Close of Business September 18, 1920.

Room No.	Divisions and subjects of invention.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of applications awaiting action.

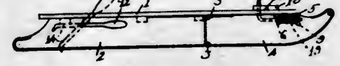
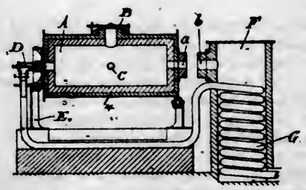
PATENTS



GRANTED SEPTEMBER 28, 1920.

1,353,816. FISHING-REEL. ADRIAN O. ABBOTT, Jr., Detroit, Mich. Filed Mar. 19, 1919. Serial No. 283,495. 7 Claims. (Cl. 242—84.5.)



1. In a fishing reel, the combination of an offset bracket having a reel seat, a spindle mounted thereon, a reel mounted on the spindle, an annular friction disk mounted on the spindle and acting against one side of the reel, and a friction shoe actuated by a spring secured to the spindle on the same side of the reel.

1,353,817. SLED. THOMAS E. ASHBY and HOWARD E. ASHBY, Wayne, Mich. Filed Jan. 8, 1917, Serial No. 141,102. Renewed Feb. 16, 1920. Serial No. 359,203. 3 Claims. (Cl. 280—21.)

1. In a sled, a seat board, runners fixed thereto, a pair of movable runners pivoted to the forward end of the fixed runners, means for turning the movable runners consisting of a steering shaft having a bent end, a cross bar connecting the movable runners and pivoted to each runner, an eye pivoted to the cross bar at about the center thereof through which the said bent end extends, said bent end terminating in a threaded portion, a retaining nut thereon and a coiled spring under tension on said bent end between the eye and retaining nut tending to hold the movable runners in neutral position.

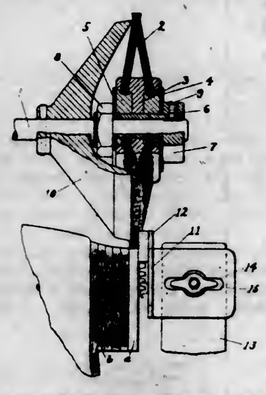
1,353,818. FURNACE. ALBERT MAURICE AUBERT, Billancourt, France. Filed Apr. 26, 1918. Serial No. 230,996. 3 Claims. (Cl. 263—28.)

1. A metallurgical tilting furnace having a gas port and an alined port, one of said ports rotatable relatively to the other and separated from each other by an open space sufficient for viewing the flame under all conditions of operation and surrounded by air, the gas current from one port to the other being sufficient to maintain the passage of gas without being diverted through said space.

1,353,819. CAST VEHICLE-WHEEL. WALTER S. ALLEN, Detroit, Mich., assignor to Detroit Steel Casting Company, Detroit, Mich., a Corporation of Michigan. Filed Apr. 23, 1919. Serial No. 292,184. 4 Claims. (Cl. 21—69.)

1. A cast vehicle wheel, comprising a hollow rim, a hub, radial spokes of solid section comparatively narrow in the plane of the wheel, wide in the plane of the axis and tapering from the central plane to the opposite sides extending between and formed integral with said hub and rim, a portion of the metal at the point of intersection at one end of the spoke being cut away to reduce the mass and avoid strains.

1,353,820. ROTARY SWITCH. THEOPHILE AMMANN, Berne, Switzerland. Filed Feb. 19, 1918. Serial No. 218,061. 3 Claims. (Cl. 200—155.)

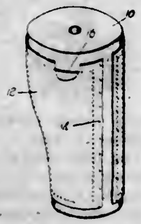


1. An electric rotary switch having a dead left-turn comprising a base-member, a body of insulating material rotatably located in said base member and having an annular portion provided with cam teeth, a contact ring bearing on said annular portion and having in its bearing face corresponding cam teeth, and fixed contact springs adapted to engage projections provided in the other face of said contact ring and hold it pressed against said annular portion.

1,353,821. HEEL-PLATE-SCOURING MACHINE. RICHARD WILLIAM CHARLES BASSETT and ARTHUR ERNEST JERRAM, Leicester, England, assignors, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Mar. 21, 1916. Serial No. 85,612. 2 Claims. (Cl. 51—17.)

1. A machine for scouring the side surface of a heel adjacent to its tread along a uniform width of said sur-

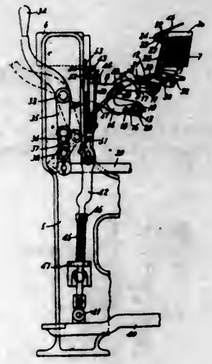
face from one breast corner to the other, said machine having in combination, a rotary brush, a rotary guard of less diameter than the brush bearing against one side of it adjacent to its periphery, a rest for the heel tread, said



rest having a curved edge the radius of curvature of which is slightly greater than the radius of the brush, and means for adjusting said rest toward and from the plane of rotation of the guard to vary the width of the heel surface being scoured.

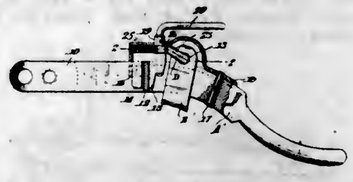
1,353,822. SETTING FOR JEWELRY. GEORGE WILLIAM DOVER, Cranston, R. I. Filed Oct. 7, 1919. Serial No. 329,019. 4 Claims. (Cl. 63—28.)

1. A cluster setting for articles of jewelry consisting of a central setting and a plurality of surrounding settings all formed integral of a single continuous wall, each of the settings forming a complete prongless setting, said single continuous wall being in the form of an upright prongless band with the seats in the edge of the band.



1,353,823. DEVICE FOR MAKING PUTTEES. JOSEPH FAUSSE, Brockton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 5, 1918. Serial No. 210,548. 5 Claims. (Cl. 69—8.)

1. A block for shaping an object of sheet material, said block having a pair of substantially parallel guides for a trimming tool and constructed to support fastenings for the edges of said sheet between said guides.

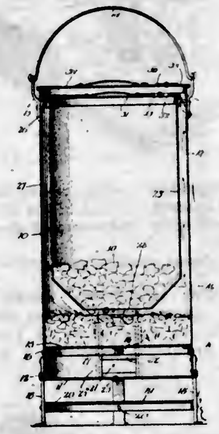


1,353,824. STOP MECHANISM FOR LOOMS. THOMAS F. FINN, North Andover, Mass. Filed May 29, 1920. Serial No. 385,330. 4 Claims. (Cl. 139—52.)

1. A stop motion for looms embodying therein a shipper handle adapted to control the power for the loom, a treadle rod adapted to control a brake, means to lock said treadle rod to hold said brake in a released position, a release rod adapted to engage said treadle rod, a tumbler operatively connected with said release rod and means

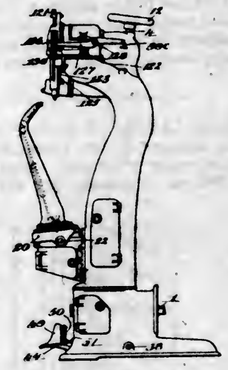
controlled by the filling thread adapted to rock said tumbler and thereby impart a rocking movement to said release rod, whereupon said treadle rod and shipper handle will be operated simultaneously to stop the loom.

1,353,825. SELF-LOCKING ATTACHMENT FOR RAILWAY-SWITCH HANDLES. CHARLES FORTH, Ottawa, Ontario, Canada, assignor to The Flexible Metal Hose Company, Limited, Ottawa, Ontario, Canada. Filed Mar. 6, 1917. Serial No. 152,750. 1 Claim. (Cl. 246—414.)



In a device of the class described, the combination with a switch handle and the tongue of a switch stand, of a casing secured to the switch handle and covering the end of the tongue, a bolt spindle pivotally mounted vertically within the casing and having an offset operating handle, said spindle having a squared portion, a laterally movable bolt engaging with the squared portion, of the spindle and operated thereby, and having an offset projection provided with beveled edges to facilitate automatic engagement with the said tongue, a projection on the bolt and spring means between the projection and the end of the casing for retaining the bolt normally in locked position.

1,353,826. STOVE. CHARLES C. FOSTER, Chicago, Ill. Filed Feb. 21, 1916. Serial No. 79,499. 1 Claim. (Cl. 126—73.)



A portable stove of the character described embodying an outer casing having a closed bottom, brackets arranged within the casing near the top thereof, a fuel hopper, said hopper being of a diameter considerably smaller than the internal diameter of the casing and having an open and contracted bottom, a circumferential flange extending about the hopper at the top thereof, said flange being adapted to rest upon the said brackets to suspend the hopper within the casing, and said brackets also serving to hold the hopper spaced from the casing wall to form therewith a flue around the hopper, a grate disposed below and spaced from the hopper, said grate extending entirely

across the outer casing and flue, a closure for the outer casing, there being an opening in the outer casing below the grate, guides on opposite sides of the opening, a closure for the opening and movable in the guides, there being a draft opening through the first recited closure and with which opening the said flue has communication,

there being a draft opening with which the hopper has communication, a closure for each of the last said openings, supports for holding the bottom of the casing elevated above the bottom of the floor, and a shield secured to the supports and spaced below the bottom of the casing and above the floor.

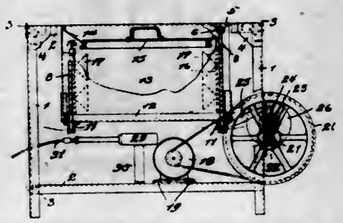
1,353,827. SOLE-SEWING MACHINE. JOHN WILLIAM GODDARD and ARTHUR ERNEST JERRAM, Leicester, England, assignors, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 21, 1917. Serial No. 150,190. 14 Claims. (Cl. 112—36.)

1. A sole sewing machine, having in combination, a straight barbed needle, a shoe supporting horn mounted to permit a lateral movement of the horn tip out of and into sewing position, and a looper located in the horn.

2. A sole sewing machine, having in combination, a straight barbed needle, a shoe supporting horn mounted to permit a lateral movement of the horn tip out of and into sewing position, a looper located in the horn, and mechanism for actuating the looper and maintaining its timed relation to the needle.

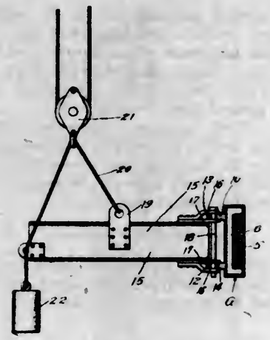
3. A sole sewing machine, having in combination, a straight barbed needle, a shoe supporting horn mounted to permit a lateral movement of the horn tip out of and into sewing position, a looper located in the horn, and means to prevent starting the machine into operation during the movement of the horn from one position to the other.

4. A sole sewing machine, having in combination, a straight barbed needle, a shoe supporting horn mounted to permit a lateral movement of the horn tip out of and into sewing position, a looper located in the horn, a lock for the horn, a presser foot, and a connection between the lock and the presser foot.



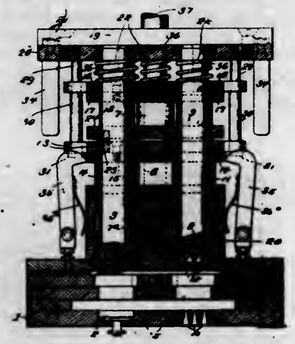
5. A sole sewing machine having in combination, a straight barbed needle, a rotatable shoe supporting horn, a looper located in the horn, and a base for the horn pivotally mounted to permit a lateral movement of the horn tip out of and into sewing position.

1,353,828. TIRE-CHAIN CONNECTION. STEWART GODDARD, Toronto, Ontario, Canada. Filed Feb. 10, 1920. Serial No. 357,759. 7 Claims. (Cl. 152—2.)



1. A hook for tire chains provided with two ears one adapted to fit against the side of a wheel rim and the other against the inner surface of the rim, the first ear having a hole for a screw formed therein and the other being provided with a cone-pointed spike threaded through the lug adapted to be driven into the rim, a head being formed on the screw adapted when turned to a suitable position to close the opening of the hook.

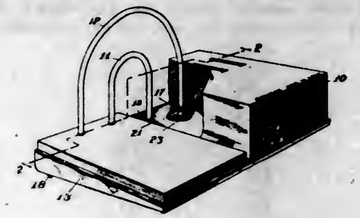
1,353,829. WASHING-MACHINE. SAMUEL S. GOLDMAN, St. Louis, Mo. Filed Apr. 29, 1919. Serial No. 293,393. 1 Claim. (Cl. 68—21.)



A washing machine, comprising a frame, a suds-box mounted to swing in said frame, inwardly projecting flanges at the top of said suds-box, vertically disposed partitions in said suds-box adjacent to and spaced from the ends thereof and having their lower edges located above the bottom of the suds-box and their upper edges spaced from and beneath the inwardly projecting flanges at the top of the suds-box, a series of pounders fixed to said partitions and projecting inwardly therefrom and communicating with the spaces between said partitions and the ends of the suds-box, and means for swinging said suds-box to surge the contents therein from end to end to cause the suds-water to forcibly move the clothes into engagement with said partitions and the pounders thereon, a portion of the suds-water passing under the partition and up through the passage between the partition and end of the suds-box to create a suction through said pounders.

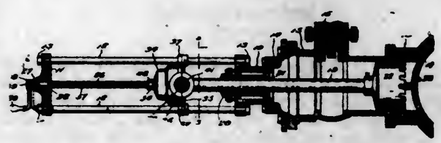
1,353,830. OPEN-HEARTH FURNACE. JOHN O. GREGG, Youngstown, Ohio. Filed July 7, 1919. Serial No. 308,993. 11 Claims. (Cl. 263—46.)

1. In an open hearth furnace, having a back wall opening extending lengthwise thereof, and buck stays crossing said opening, a plurality of portable back wall sections adapted to be arranged, end to end, behind said buck stays to close said opening, each section comprising a rigid structure capable of being inserted in place and removed therefrom, and means for supporting said sections behind the buck stays, detachably connected with the sections.



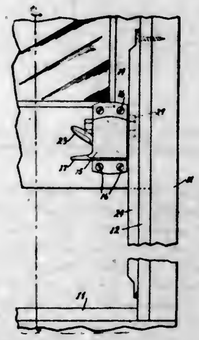
1,353,831. MACHINE FOR CUTTING OUT AND STAMPING OUT. LOUIS FERDINAND GROS, Paris, France. Filed Apr. 21, 1919. Serial No. 291,589. 3 Claims. (Cl. 113—49.)

1. In a machine of the class described, a plurality of punches, guiding means for the punches, common operating means for the punches, springs to impart reverse movement to the punches, means to limit the extent of the reverse movement of the punches, means to lock one of the punches at the end of its punching stroke, a spring to normally hold said locking means in unlocking position, and means movable with another punch to move said locking means to locking position.



1,353,832. HOLDER FOR PAD-CALENDARS. FRANK A. HALE, Chicago, Ill., assignor to Hale Specialty Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 26, 1917. Serial No. 151,012. 2 Claims. (Cl. 40—119.)

1. A holder for pad calendars comprising, in combination, a base plate having a pair of apertures through the same, an elastically expansible arch fitting the apertures of the base plate when compressed, the ends of the arch being notched upon the inside only, means below the base plate limiting the movement of the arch through the apertures when the notches are exposed at the underside of



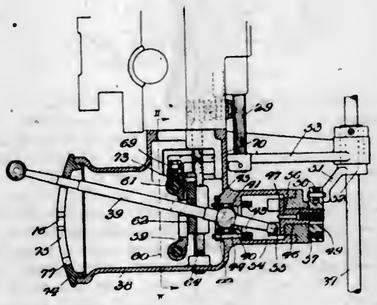
the plate and independent holding means removably engageable with the notched portions of the arch, the outer surface of the arch being uninterrupted throughout the length of the arch.

1,353,833. TAPPING-MACHINE. GEORGE S. HALEY, Dubuque, Iowa, assignor to H. Mueller Manufacturing Co., Decatur, Ill., a Corporation of Illinois. Filed Feb. 7, 1918. Serial No. 215,942. 3 Claims. (Cl. 77—38.)

1. In a drilling machine, a cutter shaft, a feed member having a longitudinal groove, means between said shaft and member for causing longitudinal movement of the shaft when relative rotary movement is imparted to the shaft or feed member, means for rotating said shaft, a gear carried by said shaft and having the same axis of rotation, a sleeve loosely mounted about said feed member, a pinion carried by said sleeve and having its axis of rotation at right angles to the sleeve, a non-rotatable gear with which said pinion is in mesh, a latch carried by said sleeve and adapted to engage in said groove, and means for maintaining said latch out of engagement with said groove.

1,353,834. SASH-LATCH. WILLIAM S. HAMM, Hubbard Woods, Ill., assignor to The Adams & Westlake Company, a Corporation of Illinois. Filed Sept. 16, 1919. Serial No. 324,162. 8 Claims. (Cl. 292—173.)

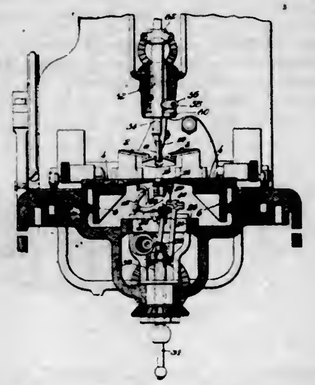
2. In combination, a window casing having a sash stop, a sash fitting within the casing and slidably engaging the stop, and a detent adapted to enter between the sash and



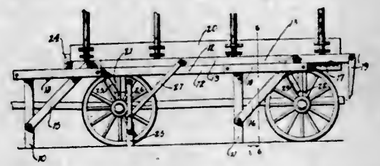
stop and to extend laterally into each, such detent having a lateral shoulder and the recess in the keeper being vertically wider than the portion of the bolt received by it and having a shoulder at its lower portion engageable back of the detent shoulder.

1,353,835. WIRE-STRETCHER. ANDREAS HANSEN, Cumberland Mills, Me. Filed Aug. 27, 1917. Serial No. 188,321. 1 Claim. (Cl. 254—162.)

In a wire stretcher, the combination with an anchor post, a rotary core, means adjustably connecting said rotary core to said anchor post, a hand lever having an offset portion associated with said core and terminating in an enlarged eye to receive the ends of the wire to be stretched, said hand lever being adapted to be rotated about said core, and having a bearing thereupon meanwhile adjacent the offset, whereby said wire is wound upon said core, a sleeve pivotally carried upon said hand lever, and a wire-engaging finger carried by said sleeve.



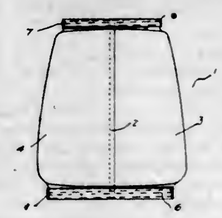
1,353,836. CONTROL MECHANISM. ERNEST C. HEAD, Van Wert, Ohio, assignor to Colburn Machine Tool Company, Franklin, Pa., a Corporation of Pennsylvania. Filed Dec. 20, 1917. Serial No. 208,129. 48 Claims. (Cl. 77—32.)



1. In combination, three or more clutches and a single control device for actuating said clutches, said control device having a neutral position in which it is operatively related to all of said clutches.

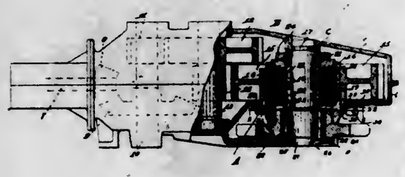
1,353,837. SEWING-MACHINE. GEORGE S. HILL, Strafford, N. H., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Aug. 28, 1916. Serial No. 117,243. 10 Claims. (Cl. 112—158.)

4. A sewing machine, having, in combination, an upper needle mechanism above the work, a reciprocating support below the work, a carrier mounted to move with and transversely of the support, a single looper on the support, and a coöperating loop spreader and an opposed looper on the carrier.



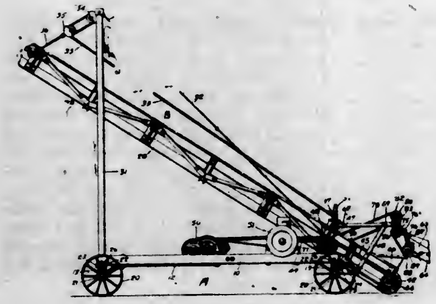
1,353,838. WAGON-BODY LIFTER. LEMUEL C. MCCRACKEN, Brush, Colo. Filed Apr. 24, 1918. Serial No. 230,508. 1 Claim. (Cl. 254—49.)

The herein described wagon body lifter comprising spaced posts, a pair of beams fixed across the upper ends of said posts in parallelism, stops outstanding from the beams at points a little forward of each post and a considerable distance rearward of the same, strips connecting said stops and with them forming guides, links pivoted to the posts and leading upward through said guides, and movable beams carried by the upper ends of said links and adapted to be dropped onto the fixed beams or raised above the same and held by contact of the links with said forward stops; combined with means on the movable beams for engagement by the wagon body to be lifted, a third link pivoted at one end to the midlength of each movable beam, and a control lever pivoted to the other end of this link, for the purpose set forth.



1,353,839. LANTERN-GLOBE. AARON MILBURN, Hall's Prairie, British Columbia, Canada. Filed Aug. 9, 1919. Serial No. 316,338. 1 Claim. (Cl. 240—96.)

A lantern globe comprising a pair of separably connected overlapping sections, the upper and lower ends of



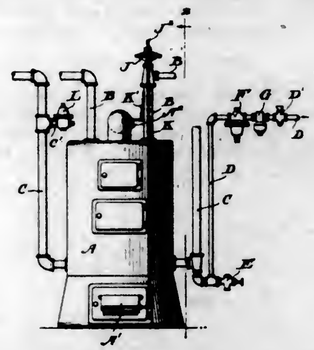
said globe being threaded, and threaded rings expansible under heat adapted for engagement with the threaded ends of the globe for a purpose specified.

1,353,840. PACKING. WILLIAM E. MOODY, Columbus, Ohio, assignor to James Ellwood Jones, Switchback, W. Va. Filed July 24, 1919. Serial No. 313,074. 4 Claims. (Cl. 286—9.)

1. In mechanism of the class described, the combination with a lubricant containing casing having an opening formed therein, of a rotatable member protruding through said opening, means for sealing the joint existing between the walls of said opening and said member, comprising a pair of beveled packing rings, an annulus securely carried by said casing and in which said rings are positioned, and a tension band surrounding said rings and serving to contract the latter inwardly about said member and in substantially perpendicular directions.

1,353,841. PORTABLE CONVEYER. LEONARD B. NEIGHBOUR, East Moline, Ill., assignor to Deere & Co., Moline, Ill., a Corporation of Illinois. Filed Oct. 23, 1918. Serial No. 259,360. 14 Claims. (Cl. 193—16.)

1. In an apparatus of the class described, the combination of a truck, an inclined conveyer mounted thereon, a hopper, a carrier in said hopper for conducting material to said conveyer, means for operating both said conveyer and carrier, wheeled supports at each end of said truck movable into positions opposite the ends of the truck for permitting lateral movement of the truck, and a rolling ground-engaging support connected with the hopper to permit the hopper to be moved laterally simultaneously with said truck and inclined conveyer without disturbing the connections of the said conveyer and carrier with their operating means, said hopper and support being relatively movable vertically to remove the weight of the hopper from the support.

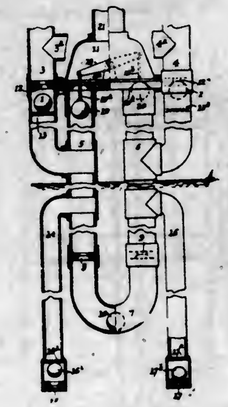


1,353,842. [WITHDRAWN.]

1,353,843. RAILROAD-SPIKE AND LOCK. GEORGE F. A. OCHS, Newark, N. J. Filed Jan. 29, 1920. Serial No. 354,841. 2 Claims. (Cl. 238—84.)

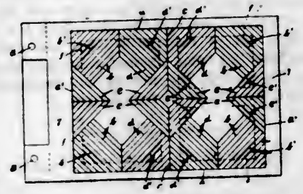
1. The combination with a composite tie having a top plate and a fibrous filler, of a spike for penetrating said plate and filler and having a lateral shoulder, and a spring-actuated dog housed in the tie beneath the said plate for engagement with the shoulder when the spike is in its operative position.

1,353,844. HOT-WATER HEATING SYSTEM. FRANK T. O'DELL, Minneapolis, Minn., assignor to H. Mueller Manufacturing Co., Decatur, Ill., a Corporation of Illinois. Filed Jan. 25, 1919. Serial No. 273,139. 2 Claims. (Cl. 237—56.)



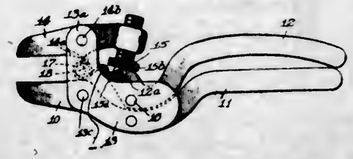
1. In a closed hot water heating system, the combination of a heater; water circulating pipes connected with the heater; a supply conduit adapted to receive water at the pressure prevailing in a city main and connected with the water circulating pipes; a relief valve connected with the water circulating pipes; a pressure controlled damper regulator connected with the water circulating pipes, and means within the supply conduit for insuring that the circulating pipes shall be completely filled with water under a definite, predetermined pressure, less than that of the city main, and any wastage through the relief valve automatically replenished to maintain such pressure.

1,353,845. PUMPING APPARATUS. THOMAS CLARENCE O'MARA, Dalgety, New South Wales, Australia. Filed Mar. 17, 1920. Serial No. 366,605. 2 Claims. (Cl. 103—8.)



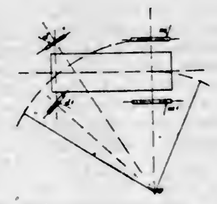
1. In a pumping apparatus, the combination of a water chamber having an outlet, a pair of barrels each communicating at one end with said chamber, said barrels being in communication with each other at their opposite

ends, each of said barrels having an inlet, means for supplying fluid under pressure to said barrels, valves for controlling the communication between the barrels and said



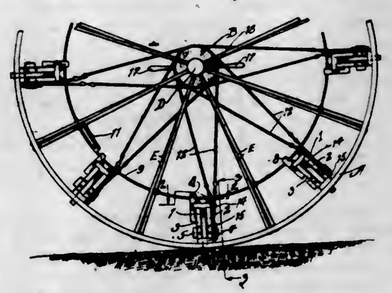
chamber, valves for controlling the inlet to said barrels, and a valve for controlling the communication between the barrels, all of said valves being adapted for operation alternately in opposite directions.

1,353,846. SELECTIVE MOUNT FOR CARDS OR PHOTOGRAPHS. HARRY L. OPSAHL, Minneapolis, Minn. Filed Apr. 26, 1920. Serial No. 376,559. 4 Claims. (Cl. 129—20.)



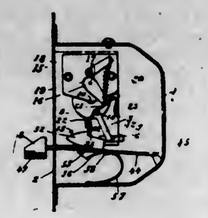
1. A selective mount for cards or pictures of different size, comprising a sheet having indicated thereon a cutting form composed of a rectangular outline and a plurality of uncut selective cutting lines running across the corners of said rectangle, thereby indicating the proper cuts, for securing retaining surfaces to embrace the corners of any desired size of card or picture, within the predetermined limits of variation, when the card or picture is laid on said form with its margins parallel with the margins of the form, substantially as described.

1,353,847. TOOL. BURTON H. PARKER, Detroit, Mich. Filed May 19, 1919. Serial No. 297,981. 9 Claims. (Cl. 81—78.)



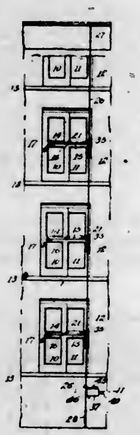
1. In a tool having opposing jaw members for engaging the work, a jaw element including a handle member, a pivoted handle member, a pivoted jaw independent of the pivoted member, and complemental means carried by the pivoted member and pivoted jaw and operative to produce a leverage action of the first order on the pivoted jaw by closing movement of the handle members, said means including a cam face carried by the pivoted handle member, and a headed threaded member carried by the pivoted jaw with the head opposing and of greater width than the width of the cam face, said head having a face adapted to coöperate with the cam face, whereby adjustment of the threaded member may be provided by the fingers of the hand gripping the handle members.

1,353,848. VEHICLE WITH TWO OR MORE PAIRS OF DRIVING-WHEELS. UGO PAVESI, Milan, Italy. Filed Dec. 27, 1918. Serial No. 268,502. 4 Claims. (Cl. 180—50.)



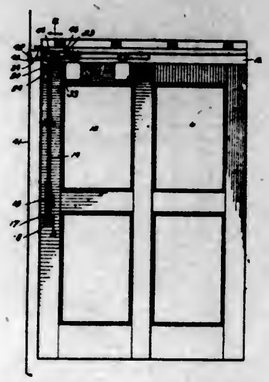
1. A self-propelled vehicle, comprising a pair of driving wheeled trucks, a driving engine rigidly secured to the axle of one of said trucks and to the motion-transmitting members for said axle, a motion transmitting gear rigidly secured to the axle of the other truck, an extensible rod adapted to transmit motion from one truck to the other, said rod being provided with universal joints, a beam pivotally connected to the axles of said trucks approximately at the longitudinal centers of the axles whereby the said axles may be rotated simultaneously through the same angle about the ends of the beam, and means for permitting the axle of one of the trucks to be swung vertically with relation to said beam thereby to bring said axle in a horizontal plane different from that of the other axle.

1,353,849. TRACTION-WHEEL CLEAT MECHANISM. CHARLES L. PENNELL, Barrs Mills, Ohio. Filed May 22, 1919. Serial No. 298,826. 5 Claims. (Cl. 301—46.)



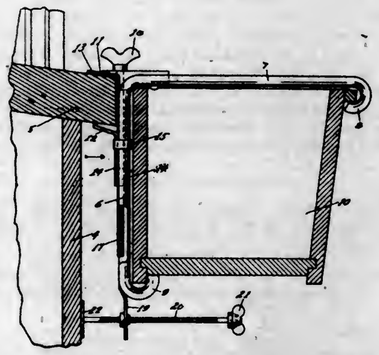
5. In a traction wheel, the combination of a rim, a hub and spokes connecting said rim and hub, drum mechanism on said hub comprising a drum, cleat devices on the rim comprising a series of cleats disposed at intervals from one another, cable connections attached at one end to the drum, a sprocket chain attached to the opposite end of said connections, a stub shaft for each cleat, a sprocket wheel on said stub shaft engaged by said sprocket chain, and locking mechanism for the cleats by which the drum is held against movement after adjustment of the cleats through connections such as above set forth.

1,353,850. ELECTRIC TIME-SWITCH. MARCUS HALL RHODES, Coleman, Ga. Filed Jan. 17, 1919. Serial No. 271,762. 11 Claims. (Cl. 200—34.)



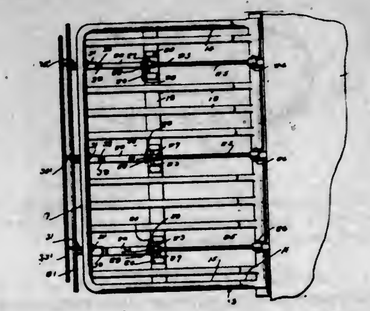
1. In an electric time switch, switch mechanism including an actuating element, a trip member for coaction with the said element, means influencing movement of the trip member in a direction to trip the actuating element to open the switch, a detent for restraining the trip member from such movement, and means for retarding such movement of the trip member.

1,353,851. SAFETY MECHANISM FOR ELEVATOR-SHAFT DOORS. ALBERT J. ROSENTRETER, Boonton, N. J., assignor to Edgar Zabriskie, Maplewood, N. J., and Frank E. Hutchins, New York, N. Y. Filed Mar. 30, 1917. Serial No. 158,535. 2 Claims. (Cl. 187—31.)



1. In elevator-shaft and elevator-shaft sliding-door mechanisms, in combination, a vertical connection extending the height of the shaft tensioning springs secured at the upper and lower ends of the shaft and to which the opposite ends of said connection are secured and which render said connection movable vertically on the stretching of one spring and the contraction of the other, a cut-out switch for cutting off the car motive power operable from said connection, shoulders on said connection at the several floors of the building, vertically movable plates on the door-frame at said floors disposed to engage said shoulders and move said connection, and manually operable door opening levers connected with the doors and having a crank connection with said plates and adapted on the opening of the doors to move said plates against the shoulders on said connection and move said connection lengthwise to break the circuit at said switch.

1,353,852. SAFETY MECHANISM FOR ELEVATOR-SHAFT DOORS. ALBERT J. ROSENTRETER, Boonton, N. J., assignor to Edgar Zabriskie, Maplewood, N. J., and Frank E. Hutchins, New York, N. Y. Filed Dec. 17, 1919. Serial No. 345,556. 8 Claims. (Cl. 187—48.)



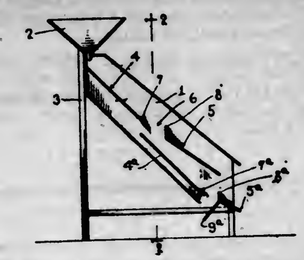
1. In elevator-shaft and elevator-shaft door mechanisms, in combination, a vertical connection extending the height of the shaft and adapted to have limited vertical movement, a cut out switch for cutting off the car motive power operable from said connection, shoulders on said connection at the several floors of the building, levers on the door framing at said floors having one arm disposed to engage the respective shoulders on and move said connection, a manually operative door-latch on each door, shoulders on the door framing to engage the latches when the doors are closed, and means carried by the latches for engaging said levers respectively on the opening of a door to actuate the same against said shoulders on said connection respectively for moving said connection lengthwise to break the circuit at said switch.

1,353,853. BRACKET. AUGUST P. SANDBERG, Minneapolis, Minn. Filed Apr. 16, 1920. Serial No. 374,487. 2 Claims. (Cl. 248—19.)

1. A device of the class described consisting of a bracket having means for supporting a box, a clamp at the upper end of the bracket, means for adjusting the lower end of the bracket relative to the vertical position of the upper end.

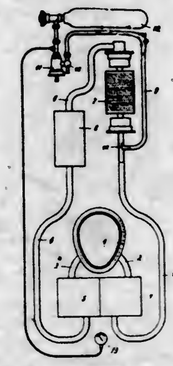
1,353,854. CAR-FENDER. JOHN WILLOUGHBY SAUERBAEI, Kenora, Ontario, Canada. Filed Oct. 10, 1919. Serial No. 329,803. 4 Claims. (Cl. 293—5.)

1. The combination with a pivotally supported fender, of a bumper element arranged forwardly of the fender and having a plurality of rearwardly extending arms slidable with relation to the fender, fender supporting means connected to said arms and a releasing device pivotally carried by the fender and extending forwardly of said bumper element and adapted to permit said arms to move rearwardly with relation to the fender.



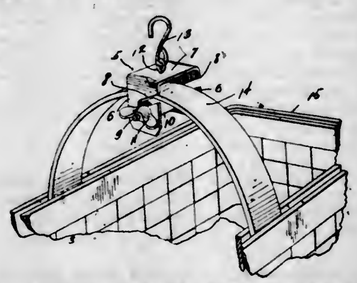
1,353,855. STEAM-CONDENSER APPARATUS. ARTHUR EDWIN LEIGH SCANES, Ashton-on-Mersey, England, assignor to The British Westinghouse Electric & Manufacturing Company, Limited, London, England. Filed Nov. 1, 1915. Serial No. 59,015. 2 Claims. (Cl. 257—43.)

1. In combination with the main cooling chamber of a condenser having a steam inlet and condensate outlet, an additional cooling chamber in restricted communication with the main chamber and having a relatively unrestricted outlet for connection with an air extracting device whereby during the operation of said air extracting device a less pressure will be maintained in the additional than in the main chamber, cooling means in said additional chamber and sealed means for delivering condensate from the additional chamber to the condensate outlet of the main chamber.



1,353,856. GRAVITY GRAIN-SEPARATOR. ANNA J. SCHLUNKE, Fargo, N. D. Filed Aug. 2, 1919. Serial No. 314,994. 1 Claim. (Cl. 130—18.)

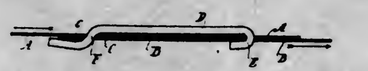
A grain separator comprising spaced frame sides, a hopper arranged to discharge grain between the upper portions of said frame sides, means supporting the frame sides and the hopper, an upper inclined chute arranged to receive grain from the hopper and extending in inclined position downwardly between the frame sides and having an upwardly directed lip at its lower end, a lower chute arranged in inclined position between the frame sides and with its upper end below and spaced from the lip at the lower end of the upper chute, a flange reaching upwardly from the upper end of the lower chute, said flange being of greater depth than the lip of the upper chute, a chute arranged between the frame sides in position to receive grain from the lower of said chutes, a chute arranged between the frame sides in position to receive grain from the space between the first-named chute and second-named chute and having a lip at its lower end,



a reversely-inclined chute in communication with the space between the lip of the fourth-named chute and the third-named chute, and an upstanding flange arranged between and common to the third-named chute and the fifth-named chute.

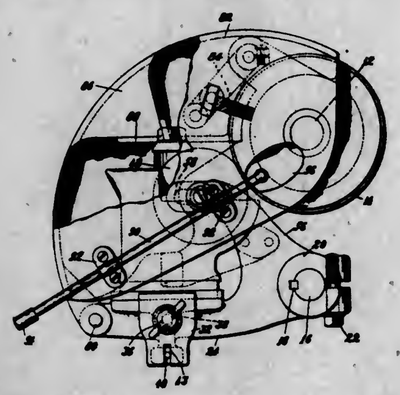
1,353,857. RESPIRATOR. DETLEF KARL HEINRICH SCHUMANN, Hamburg, Germany. Filed Dec. 8, 1913, Serial No. 805,346. Renewed Feb. 17, 1920. Serial No. 359,313. 6 Claims. (Cl. 128—191.)

1. A respirator of the character described, comprising in combination, a mask, a purifying device, a passageway for leading exhaled gases from said mask to said purifying device, means for introducing fresh oxygen into said passageway, and means for returning the regenerated air to said mask.



1,353,858. ARTICLE-CARRIER. WALTER F. SHERMAN, Albany, N. Y. Filed May 7, 1917. Serial No. 167,027. 1 Claim. (Cl. 224—5.)

The herein described article carrier comprising a stirrup of strap metal whose center is flat and whose ends are

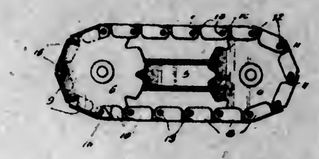


bent downward into legs, the legs having slots extending from corresponding edges thereof obliquely inward and downward, and then deflected and extending vertically downward, a bolt extending across the stirrup and lying removably in the lower ends of said slots, a roller mounted on the bolt between the legs, and a support swivelly connected with the center of the stirrup.

1,353,859. BALE-TIE. ARTHUR HAROLD SINEL, Auckland, New Zealand. Filed May 9, 1918. Serial No. 233,548. 1 Claim. (Cl. 24—22.)

A tie for bale bands formed by a length of metal returned at one end into hook form and at the other end bent away into the same line as the returned or hook end and then continued longitudinally forward and bent slightly toward the band, the portion of the tie between said bent ends being unobstructed, substantially as specified.

1,353,860. RECEPTACLE FOR FINISHING-MACHINES. JOHN F. STANDISH, Winthrop, Mass., assignor to United-Xpedite Finishing Company, Portland, Me., a Corporation of Maine. Filed Dec. 26, 1917. Serial No. 208,897. 31 Claims. (Cl. 91—50.)

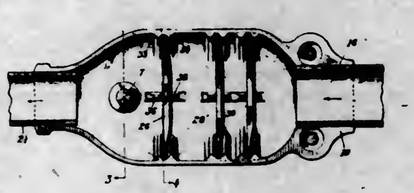


3. In a finishing machine, a receptacle provided with a dovetailed projection, a way having a wall undercut to receive one side of the projection, and a separable securing member having a portion overhanging the other side of the projection.

9. The combination with a finishing machine, of a receptacle, a driven member movable in the receptacle, readily separable means for securing the receptacle to the machine and upon separation permitting the removal of the receptacle in a definite direction, a driving member mounted upon the machine, and a separable connection between the driven member and driving member, the separation of the connection being effected by the removal of the receptacle.

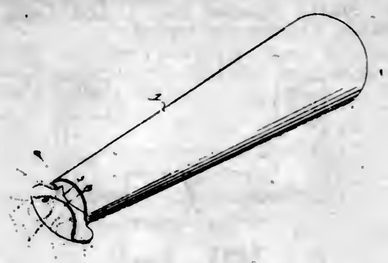
1,353,861. TOY TRACTOR-CHAIN AND LINK THEREFOR. LOUIS STROHACKER, Freeport, Ill., assignor to Structo Manufacturing Company, Freeport, Ill., a Corporation of Illinois. Filed Mar. 1, 1920. Serial No. 362,612. 3 Claims. (Cl. 305—10.)

1. A toy tractor chain comprising linked sheet metal links, each comprising a rectangular body portion having lengthwise-extending side wings perforated at one end and disposed at right angles to said body portion, and a crosswise-extending rib disposed at an angle to said body



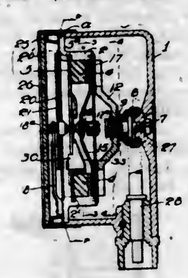
portion on the same side as said wings and having laterally-projecting tongues adapted to enter the perforations of the wings of an adjacent link.

1,353,862. BRAKE FOR TRUCKS AND SIMILAR VEHICLES. HENRY C. STRUCHEN, St. Paul, Minn. Filed Sept. 17, 1917. Serial No. 191,755. 1 Claim. (Cl. 188—119.)



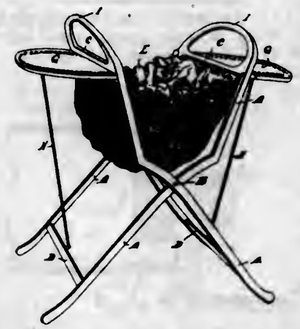
A brake for trucks, comprising a tongue hinged adjacent to a truck axle, oscillatory arms carried by said tongue and extending behind said axle, gears rigidly secured to the front wheels of said truck, a detent mounted on said arms and adapted to be held out of engagement with said gears by said tongue, means to raise said tongue and thereby engage said gears and detent, and brackets secured to said truck and adapted to support said detent when said detent is in engagement with said gears.

1,353,863. MUFFLER. GEORGE H. TABER, Binghamton, N. Y., assignor to Emco Manufacturing Company, Inc., Binghamton, N. Y., a Corporation of New York. Filed Dec. 18, 1919. Serial No. 345,700. 7 Claims. (Cl. 137—160.)



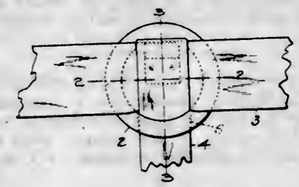
1. In a muffler, the combination of a casing consisting of two main parts joined on a longitudinal line, each part having lugs on the interior wall thereof, and baffle plates secured between said lugs as the two parts of the casing are secured together, said baffle plates having a space between them and the interior walls of the casing for the passage of the gases, substantially as described.

1,353,864. WIND INSTRUMENT. DANIEL T. THOMASSIAN, St. Paul, Minn. Filed Aug. 15, 1918. Serial No. 249,979. 4 Claims. (Cl. 46—46.)



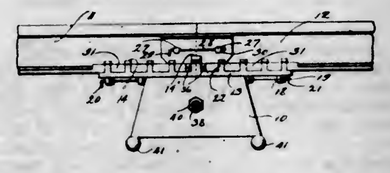
1. In an instrument of the class described, a horn and a flexible digitally controllable tongue extending therefrom and having a vibratory edge.

1,353,865. SPEED-INDICATING INSTRUMENT. WALTER VAN GUILDER, Chicago, Ill., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill., a Corporation of Virginia. Filed June 17, 1918. Serial No. 240,555. 10 Claims. (Cl. 264—4.)



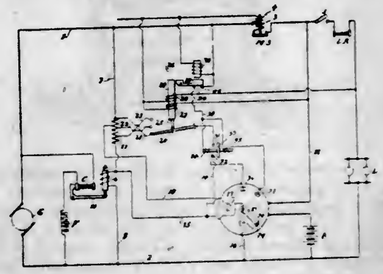
3. In a magnetic speed indicating instrument comprising a fixed magnet element having an interpolar gap, a revolving interrupted armature, and a drag element intermediate the magnet and said armature; a temperature compensating device consisting of a soft armature piece and a bi-metallic arm which carries said armature piece on its movable end proximate to the interpolar gap of the magnet for moving it relatively to said gap upon temperature changes deflecting said bi-metallic arm.

1,353,866. COMBINATION SEWING-TABLE AND NEEDLEWORK-BAG. FRANK VONDRÉE, Ilkley, England. Filed Jan. 21, 1920. Serial No. 353,025. 3 Claims. (Cl. 45—11.)



1. A combination table and needlework bag comprising a portable folding stand having crossed arms on opposite sides, the upper end of each arm being set at an angle to the lower portion, a bag supported from the arms having corners extending adjacent to the upper part of the arm, a hinged flap connected to one of the arms, and means for causing the hinged flap to be automatically elevated and projected horizontally to form a table when the stand is opened out.

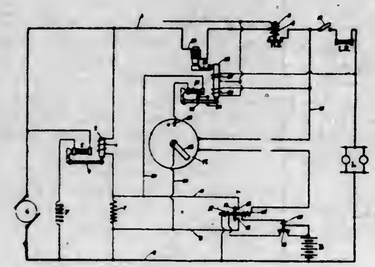
1,353,867. TRUSS. CHARLES S. WAHLSTROM, Boulder, Colo. Filed Oct. 10, 1919. Serial No. 329,767. 5 Claims. (Cl. 128—100.)



1 A truss comprising a pad having a depression and a slot in the marginal wall thereof, a strap fastened to the pad and passing loosely through the slot and across the depression, and a flexible belt extending loosely across the depression and under the strap in a relatively transverse direction whereby a pull exerted on the strap will cause the belt to enter the depression and bind against the inner edge of the marginal wall thereof.

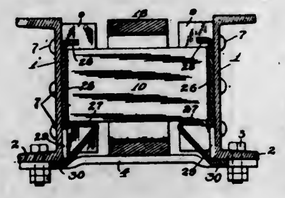
1,353,868. RAIL JOINT AND SUPPORT. RUFFUS G. WASHINGTON, Chicago, Ill. Filed Dec. 1, 1919. Serial No. 341,825. 2 Claims. (Cl. 238—213.)

1. In a rail joint a pair of rail ends each having notches in the edges of their flange portions and vertical lugs at opposite sides of said notches, a support for the rail ends having lugs for engagement in said notches and disposed between the first-named lugs, said support having removable elements for engagement in certain of the rail base notches, and angle plates connecting the rail ends and interlocking with the rail bases and the lugs and removable elements.



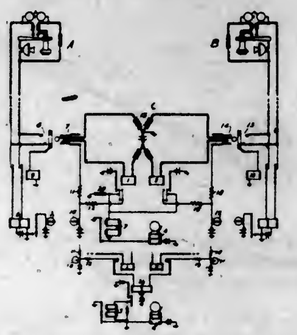
1,353,869. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,007. 6 Claims. (Cl. 171—313.)

1. In combination, a variable speed generator, a storage battery adapted for connection to be charged thereby, a



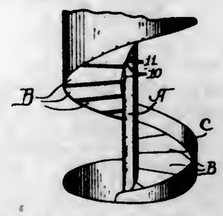
regulator including a voltage coil tending when effective to maintain substantial constancy of generator voltage, a resistance adapted for inclusion in the circuit of said coil under certain conditions and for exclusion therefrom under other conditions, means including an ampere hour meter connected in the battery branch adapted to exclude said resistance from the circuit of said coil for a predetermined interval during battery charging and to reinclude said resistance for a succeeding interval of battery charging, and electro-responsive means to re-exclude said resistance from the circuit of said coil upon a predetermined diminishment of generator voltage next succeeding substantial completion of battery charging.

1,353,870. SYSTEM OF ELECTRICAL DISTRIBUTION. LEONARD A. WATSON, Brooklyn, N. Y., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 19, 1919. Serial No. 325,009. 5 Claims. (Cl. 171—313.)



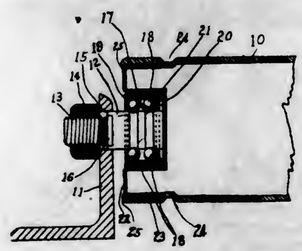
1. In combination, a variable speed generator, a battery adapted for connection to be charged thereby, a regulator including a voltage coil tending when effective to maintain substantial constancy of generator voltage, a resistance adapted for inclusion in the circuit of said coil under certain conditions, a variable resistance adapted for connection in shunt about said first-mentioned resistance, an ampere hour meter connected in the battery branch and indicative of the state of battery charge by current measurement adapted to include said variable resistance in shunt with said first-mentioned resistance at the end of battery charging, and means to control said variable resistance in accordance with the voltage of said battery.

1,353,871. DRAFT-GEAR BRACKET. JAMES MILTON WAUGH, Chicago, Ill. Filed Feb. 10, 1919. Serial No. 276,214. 6 Claims. (Cl. 213—64.)



5. In a device of the class described the combination of a pair of spaced sills, a drawbar, shock-absorbing means slidable longitudinally of the sills, and adapted to absorb twisting and pulling strains on the drawbar, supporting members positioned adjacent the inner surfaces of the sills and formed to project under the shock absorbing means to afford guide shoulders therefor, and a transverse member connecting the sills and engaging under said supporting members.

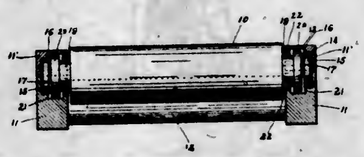
1,353,872. TELEPHONE-EXCHANGE SYSTEM. WILLIAM C. WEAVER, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 25, 1918, Serial No. 224,516. Renewed Mar. 5, 1920. Serial No. 363,592. 6 Claims. (Cl. 179—73.)



2. In a telephone exchange system, a plurality of lines terminating at a central office, a link circuit thereat for interconnecting the lines, a supervisory relay for the link circuit adapted to control a visual supervisory signaling device, an auxiliary relay operable during each operating and each releasing period of the supervisory relay, and an auxiliary signaling device controlled by the auxiliary relay to produce a momentary audible signal for each operation of the auxiliary relay.

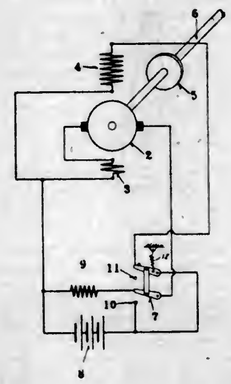
1,353,873. SPIRAL CHUTE. PETER C. WEGO, St. Paul, Minn. Filed Sept. 8, 1919. Serial No. 322,341. 4 Claims. (Cl. 193—42.)

1. In a spiral chute the combination, with a central supporting column and an outer guard rail, of a slideway consisting of sections, each of which is formed with a folded overlapping lip and a right angled flange, the underlying edge of the adjacent section being also formed with a right angled flange, and means for connecting said flanges on adjacent sections.



1,353,874. BEARING FOR CONVEYER-ROLLERS. PETER C. WEGO, St. Paul, Minn. Filed Oct. 20, 1919. Serial No. 331,927. 4 Claims. (Cl. 64—36.)

1. In a bearing for conveyer rollers, a stud having a threaded outer end, an inner end formed with a shoulder

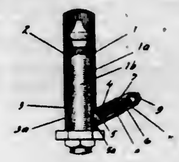


and a plurality of peripheral grooves, a series of balls in each of said grooves, a cylindrical cage for said balls, a roller cap provided with a cylindrical axial cavity adapted to snugly but revolubly fit said cage and means for locking the stud in a support.

1,353,875. GRAVITY-CONVEYER. PETER C. WEGO, St. Paul, Minn. Filed Feb. 19, 1920. Serial No. 359,973. 3 Claims. (Cl. 64—24.)

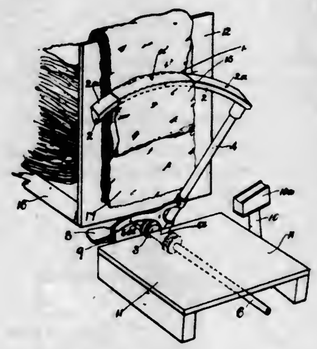
1. A gravity conveyer comprising non-metallic rollers and side rails, a socket for a bearing, formed in the outer portion of the rails, axially arranged at each end of each roller, an enlargement of said socket forming a grease cup between said bearing and said roller, and a revoluble plug for said grease cup formed axially upon said roller.

1,353,876. STARTING APPARATUS FOR INTERNAL-COMBUSTION ENGINES. HANS WEICHSEL, St. Louis, Mo., assignor to Wagner Electric Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed May 23, 1919. Serial No. 299,316. 3 Claims. (Cl. 290—38.)



1. The combination with an internal combustion engine, a starting motor therefor, an overrunning clutch for connecting the motor to the engine, and means for short circuiting the motor to cause it to act as a generator when the engine operates under its own power in the direction opposed to its normal direction of rotation.

1,353,877. METHOD OR PROCESS OF MAKING SHOES AND OTHER SIMILAR FORMS OF FOOTWEAR. PEARL J. WENTWORTH, Fort Thomas, Ky. Filed June 8, 1917. Serial No. 173,477. 4 Claims. (Cl. 12—142.)

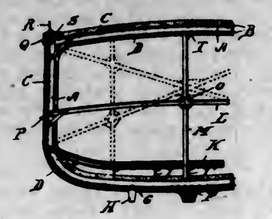


2. The method or process of making shoes and similar articles of foot-wear, including providing an assembled upper with the lining and upper secured together along their lower edges except at the heel and toe portion with a counter and box toe inserted, then lasting the assembled upper in on an unchanneled insole with an adhesive therebetween and temporarily tacking the upper and insole together while the adhesive therebetween sets to permanently secure them together, removing the tacks after the adhesive has set, placing the outsole thereon with an adhesive therebetween, applying pressure to said outsole to level the same, all while the shoe is on its original last, then stitching said outsole to said insole, and finishing the shoe.

1,353,878. VALVE-CAP. WILLIAM H. WEST, Stockton, Calif. Filed Sept. 17, 1917. Serial No. 191,699. 3 Claims. (Cl. 152—12.)

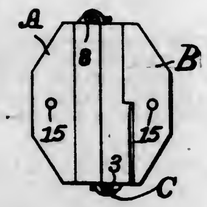
1. In a device of the class described, a cap body and a manually operable locking pin having its engaging portion arranged near the open end of the cap and means to yieldingly hold the same in a locking position and other means for locking the pin in an unlocked position.

1,353,879. APPARATUS FOR USE IN CONNECTION WITH THE FINISHING OR TREATING OF WOVEN FABRICS. PERCY KAY WHITEHEAD, Bury, and JAMES ROTHWELL, Prestwich, England, assignors to Bradford Dyers' Association Limited, Bradford, York, England. Filed Oct. 31, 1918. Serial No. 260,500. 5 Claims. (Cl. 154—42.)



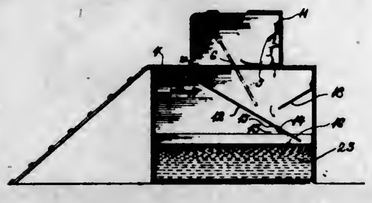
1. In apparatus for use in the pasting together of the ends of fabrics, a hollow plate, means for supporting said hollow plate so that it will extend horizontally therefrom to have its extending end free and means for heating the upper surface of said plate.

1,353,880. CEMENT SHIP CONSTRUCTION. IVAR WIDING, Dorchester, Mass., assignor to Nina M. Porter. Filed July 20, 1917. Serial No. 181,685. 3 Claims. (Cl. 114—65.)



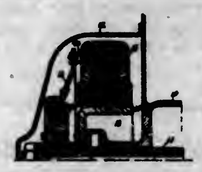
1. Reinforced concrete ship construction, comprising a metallic framework adapted to receive and hold a con-

crete covering, said framework including metallic protecting members for the corners, edges and exposed por-



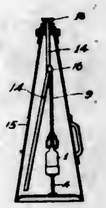
tions of said concrete, said protecting members being secured to and carried by the metallic framework.

1,353,881. CONTRACTILE SPRING DEVICE. LACEY Y. WILLIAMS, deceased, Toledo, Ohio, by Martin S. Dodd, administrator. Filed Oct. 28, 1919. Serial No. 333,877. 8 Claims. (Cl. 267—74.)



3. A spring device comprising two elements, one formed by bending a blank having two slots to form a hollow portion at one edge, a wing, and a single slot formed by the registry of the two slots; the other formed by bending a blank having a slot and between the edges of the slot to form a hollow portion at one edge, a wing and an open slot; one of said elements telescoping within the other and united thereto by a coiled spring within the same having its opposite ends secured to the oppositely disposed elements.

1,353,882. MULTIPLE TRAP. FRANK WÓJCIK, Holyoke, Mass. Filed Jan. 19, 1920. Serial No. 352,354. 1 Claim. (Cl. 43—69.)

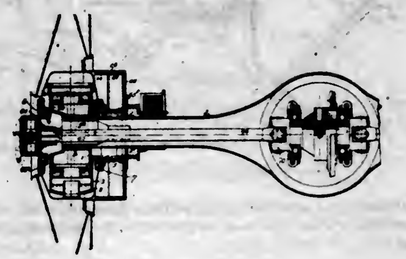


A multiple trap comprising a frame, a platform on the top of said frame, an opening in said platform, a door pivotally mounted so as to normally close said opening, the center of gravity of said door being situated to one side of the pivot thereof, an inclined chute attached to the underside of said platform under said opening, a second inclined chute attached to the wall of said frame and overshadowing said first-named chute, an extension resiliently and pivotally attached to the end of said first-named chute, and water or the like in the bottom of said frame under said opening.

1,353,883. DYNAMO-ELECTRIC MACHINE. THOMAS ZIMMERMAN, Niagara Falls, N. Y., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Nov. 12, 1915. Serial No. 61,060. 5 Claims. (Cl. 172—36.)

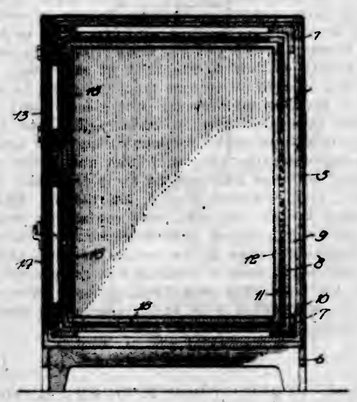
1. In a dynamo-electric machine, a laminated armature core, rings arranged on either side of said core, rivets extending through said rings and core, one of said rings being counterbored at the rivet holes on the outside surface, and a supporting plate provided with riveted bushings of non-magnetic material corresponding in number and location to said rivets, said bushings carrying said rivets and fitting into said counterbored portions for the purpose set forth.

1,353,884. FIRE-EXTINGUISHING APPARATUS. KUSTAA EMIL ALITALO, Åbo, Finland. Filed Mar. 8, 1919. Serial No. 281,493. 2 Claims. (Cl. 169—32.)



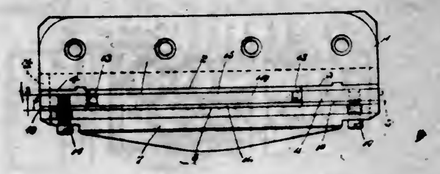
1. A fire extinguishing apparatus comprising a liquid container, a receptacle containing a substance reacting with the liquid in the container, said receptacle being arranged inside the container near the bottom thereof and provided with openings located one at each end of the receptacle, plugs connected with one another and arranged to close the openings in the receptacle, and a push rod connected with the receptacle and extending outside the container and adapted, on being operated, to open said receptacle at both ends simultaneously.

1,353,885. BEADING. EDWARD W. AUFDERHEIDE, Chicago, Ill. Filed Oct. 10, 1919. Serial No. 329,790. 3 Claims. (Cl. 155—184.)



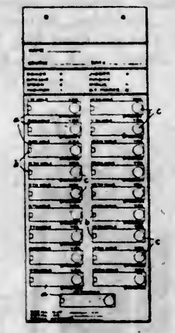
1. Beading comprising a strip of fabric folded into substantially cylindrical form, an outer cover, and tacks having their points projecting beyond the beading and their heads embedded in the folded strip of fabric.

1,353,886. PNEUMATIC ANTIVIBRATION DEVICE FOR AUTOMOBILES. GEORGE W. BELL, Detroit, Mich. Original application Serial No. 866,000, filed Oct. 10, 1914. Divided and this application filed Dec. 23, 1918. Serial No. 267,922. 7 Claims. (Cl. 180—73.)



5. In an anti-vibration device of the character described, an axle housing, a piston mounted on the end portion of the housing, a cylinder reciprocable on the piston, a pair of bearings mounted on opposite sides of the cylinder around the housing, a wheel hub journaled thereon, a wheel hub cap detachably secured to the hub, a universal joint one member of which is pivotally secured to the cap on an axis transverse to the hub axis, a driving shaft oscillatory and rotatable in the housing and non-rotatably secured to the other part of the universal joint, and differential mechanism mounted in the housing and universal joint connections between the take off driving member of the differential mechanism and the driving shaft, the wheel with piston and cylinder forming a unit removable endwise from the housing.

1,353,887. REFRIGERATOR. BERGET H. BLOCKSOM, Chicago, Ill., assignor to Wilson & Co., Inc., Chicago, Ill., a Corporation of New York. Filed Sept. 20, 1917. Serial No. 192,270. 3 Claims. (Cl. 217—5.)

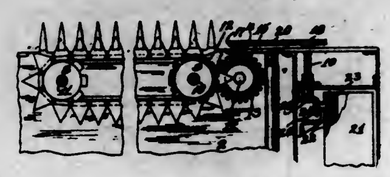


1. In a refrigerator, an outer shell, an intermediate shell, spacer members enveloping each of the corners of said intermediate shell and maintaining said shells in spaced relation to form a dead air chamber therebetween, an inner shell spaced from said intermediate shell, and a layer of curled hair in the space between said inner and said intermediate shells.

1,353,888. MORTISH-MOLD. WILLIAM E. BORST, Grand Rapids, Mich., assignor of one-half to Clarence C. Gilleo, Grand Rapids, Mich. Filed Oct. 26, 1918. Serial No. 259,764. 5 Claims. (Cl. 199—58.)

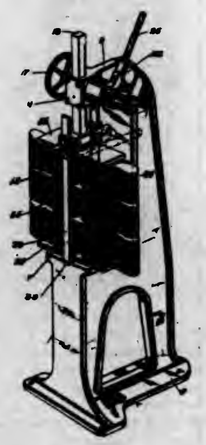
4. Means for casting an open box of type metal, and means for forming a raised border on the edges of the box around the opening therein, substantially as described.

1,353,889. GOLF SCORE-CARD. KENNETH W. BROWN, Yonkers, N. Y. Filed Aug. 1, 1919. Serial No. 314,645. 9 Claims. (Cl. 283—49.)



1. A golf score card having graphic fair greens each surrounded by a space for representing the rough about the fair green, each fair green having at one end thereof a delineated portion for designating a tee and at the other end a delineated portion designating a putting green, each fair green also having associated therewith a numeral designating the number of a golf hole or pocket to which the graphic fair green corresponds, an indicated blank for noting the distance from the tee to the golf hole or pocket, and a designated blank space for inserting the total number of strokes taken in making the hole from the tee.

1,353,890. HEADLIGHT-SHADE. FREDERICK W. CAPPELEN, Minneapolis, Minn. Filed Oct. 16, 1916. Serial No. 125,889. 1 Claim. (Cl. 240—45.6.)

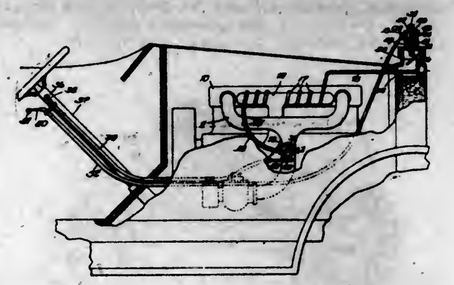


The combination, with a vehicle headlight, of semi-circular shades mounted to swing on vertical axes in front of the headlight lens to obscure a semi-circular portion of the lens upon either side of the vertical axis thereof, means connecting said shades for simultaneous movement to obscure a portion of the lenses on the same side of the vehicle, said shades swinging to a point close to the lens and in a plane parallel therewith upon either side of the vertical axis of the lens and wholly obscuring the rays of light from both lenses on the same side, whereby the space in front to the right or the left side of the vehicle is darkened and the glare of light in the face of a driver approaching is prevented.

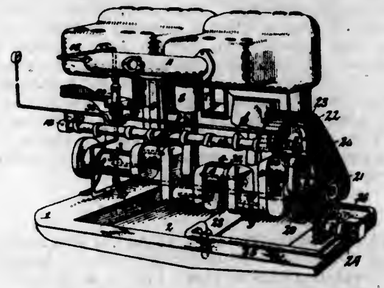
1,353,891. ENDLESS CUTTER FOR MOWERS. ALBERT E. COOK, Evanston, Ill. Filed Oct. 30, 1917. Serial No. 199,293. 4 Claims. (Cl. 56—291.)

2. A mower cutting mechanism comprising an adjustable guard bar, a flange integrally formed thereon, an endless cutter on said guard bar, and an adjustable race member on said guard bar adapted to co-act with said flange to afford a guide for said endless cutter.

1,353,892. SOLE-HOLDER. JOHN W. COSGROVE, Medford, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 24, 1917. Serial No. 150,833. 7 Claims. (Cl. 100—57.)



1. A holder for a pile of blanks adapted to be placed in and removed from a press, said holder comprising a U-shaped frame, a clamping member slidable on the arms of the frame and provided with sockets, and locking levers having slots to receive the arms of the frame, the inner ends of the levers being received in the sockets.

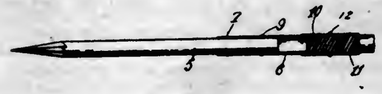


3. A holder for a pile of blanks, having, in combination, a U-shaped frame, a clamping member slidable on the arms of the U and provided with sockets and levers loosely fulcrumed at one end in said sockets and provided with means to receive and grip the arms of the U.

1,353,893. APPARATUS FOR MIXING AND CONTROLLING A SUPPLY OF FUEL FOR EXPLOSION-ENGINES. WILLIAM D. COUPER, Chicago, Ill. Filed July 8, 1918. Serial No. 243,762. 1 Claim. (Cl. 123—25.)

An apparatus of the character described embodying a source of supply of fuel, a radiator, means for supplying outside air directly to the radiator and mixing said air supply with the vapor and within the radiator, means for automatically and also positively controlling the proportion of outside air supplied to the radiator, means for conducting the said mixture of air and vapor from the radiator and mixing the same with the supply of fuel to be delivered therewith to the engine, and means for automatically and positively controlling the proportion of the said mixture of air and vapor with the said supply of fuel.

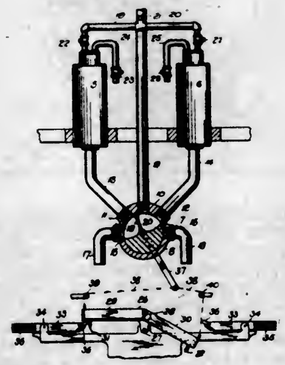
1,353,894. MECHANISM FOR CONTROLLING LUBRICATION OF EXPLOSION-ENGINES. CHARLES A. CRIQUI and ELWOOD T. LARKIN, Buffalo, N. Y.; said Larkin assignor to said Criqui. Filed Dec. 31, 1918. Serial No. 269,067. 2 Claims. (Cl. 123—196.)



1. An explosion engine having a firing cylinder, a fuel intake connected with said cylinder, a throttle for controlling the admission of fuel to said intake, a lubricating apparatus comprising a pump having an outlet connected by a delivery conduit with the parts to be lubricated, a sump from which the lubricating oil is conducted by a supply conduit to the inlet of said pump and to which the surplus oil returns from the parts to be lubricated, a pressure maintaining device comprising a valve chamber having an inlet communicating with said delivery conduit, an outlet communicating with said sump, and a valve seat between said inlet and outlet, a valve engaging said seat and opening away from said delivery conduit, and retaining means for holding said valve yieldingly against its seat, and controlling means for said valve comprising a movable element which supports said retaining means in its normal position and which is shifted in response to variations in the suction of said intake for permitting said valve to open more or less freely in accordance with variations in the position of said throttle and the load on the engine.

1,353,895. CURVED WOOD TUBE AND METHOD OF MAKING THE SAME. JOHN CZUMPFT, Brooklyn, N. Y., assignor to Art Woodwork Company, Brooklyn, N. Y., a Copartnership comprising Robert T. Buttelman, John Czumpft, and John Jung. Filed May 21, 1918. Serial No. 235,833. 2 Claims. (Cl. 144—309.)

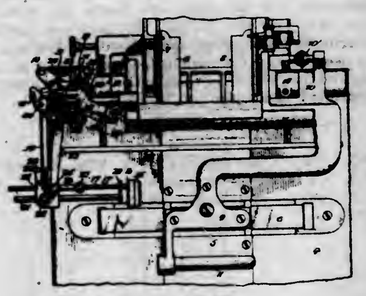
2. The method of making wood tubes of varied curvature, which consists in forming circular channels of a circular inner and outer profile from a block of wood, cutting longitudinal grooves in the two circular faces of said channels, cutting said channels into suitable sections, rabbeting the front faces of said channel sections, applying flexible longitudinal splines into the grooves of said sections and joining said sections together by glue or by other means in such a way as to form a wood tube of the curvature desired and calculated.



1,353,896. COMBINED ERASER-HOLDER AND POINT-PROTECTOR FOR PENCILS. VERNON B. DAWSON, Bridgeton, N. J. Filed May 9, 1917. Serial No. 167,534. 1 Claim. (Cl. 120—38.)

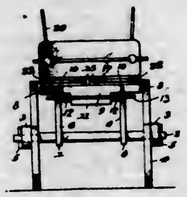
An improved eraser holder comprising a tube split at its lower end to receive a pencil and having an exterior bead at its mid-length, a rubber eraser having one end held in the upper end of the tube, and an internally smooth sleeve telescoped on the tube and slidably inclosing the projecting portion of the rubber, the sleeve being longer than the distance from the upper end of said tube to its bead.

1,353,897. HYDRAULIC AIR-COMPRESSOR. HERBERT M. DE WITT, Denver, Colo. Filed July 30, 1919. Serial No. 314,192. 4 Claims. (Cl. 230—16.)



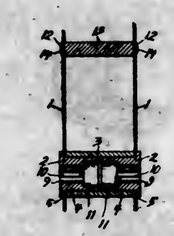
1. A hydraulic air-compressor comprising in combination with a source of water under pressure, two containers each having at one end a valve-controlled air-inlet and a valve-controlled air-outlet, a valve controlling a flow of water to and from the opposite ends of the containers and adapted to alternately place the containers in communication with the source, and mechanism for the operation of the valve by the discharge of water from the containers.

1,353,898. OIL-CAN HOLDER. HUGH L. DECKER and HARRY E. ADAMS, Toledo, Ohio, assignors to The W. G. Nagel Electric Company, Toledo, Ohio, a Corporation of Ohio. Filed Dec. 31, 1919, Serial No. 348,647. Renewed Aug. 7, 1920. Serial No. 402,031. 4 Claims. (Cl. 248—20.)



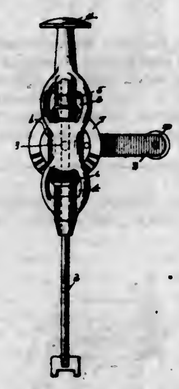
1. A holder of the class described, comprising an L-shaped body member with catch means at its outer end, and an angled spring tongue carried by the upright of said member and adapted to exert an upward and an outward lateral pressure on an article seating in the holder.

1,353,899. EJECTOR FOR PRINTING-MACHINES. JOSEPH S. DUNCAN, Chicago, Ill., assignor to Addressograph Company, Chicago, Ill., a Corporation of Illinois. Filed June 23, 1919. Serial No. 306,029. 16 Claims. (Cl. 271—84.)



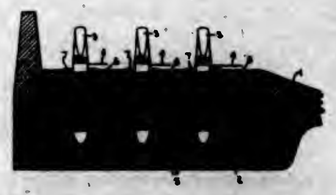
2. In a printing machine, the combination of an ejector, a lever to operate said ejector, a spring controlled rocker pivotally mounted independent of said lever and movable conjointly therewith and independently thereof, means for holding the rocker in set position for operating the lever, and a tripper for operating said means.

1,353,900. TOY. ERNEST C. FLATMAN, Detroit, Mich. Filed July 29, 1919. Serial No. 314,063. 7 Claims. (Cl. 46—48.)



4. A toy comprising an axle provided with detachable wheels, bolster supported members on said axle, bolsters detachably connected to said members, a body on said bolsters, ladder and planks forming the bottom of said body, and means extending transversely of said body and through said bolster supporting members adapted to retain said body on said bolsters.

1,353,901. REEL. LE ROY M. FULTON, Chicago, Ill. Filed Jan. 30, 1920. Serial No. 355,139. 9 Claims. (Cl. 242—70.)

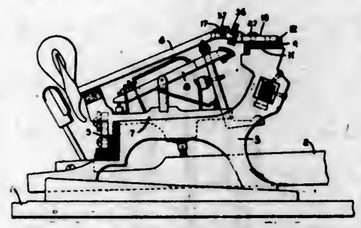


1. A reel including a disk provided with a central aperture; a bored hub member; a second hub member adapted to pass through the aperture of the disk and into the bore of said first mentioned hub member and adapted to be secured therein; a circumferential flange formed on said second hub member adapted to engage the adjacent side of the disk to clamp the same against said first mentioned hub member; and means for rotatively fixing the disk and one of the hub members including interengaging radial surfaces formed on the disk and said one hub member and disposed to be maintained in interengaging relation when the disk is clamped between said flange and first mentioned hub member.

1,353,902. DRIVING MECHANISM FOR GRINDING-TOOLS. CHARLES W. HEBERGER, Rochester, N. Y. Filed Apr. 3, 1919. Serial No. 287,271. 1 Claim. (Cl. 74—50.)

In a grinding tool for valves, the combination of a frame, a spindle mounted to rotate in said frame, a mutilated bevel gear mounted to rotate on one side of said frame, a mutilated pinion having alternate segments of teeth and blank spaces mounted on said spindle on one side of said mutilated gear, and a second bevel pinion mounted on said spindle on the other side of said bevel gear.

1,353,903. PIANO. RICHARD W. GERTZ, Brookline, Mass. Filed June 22, 1918. Serial No. 241,366. 5 Claims. (Cl. 84—67.)

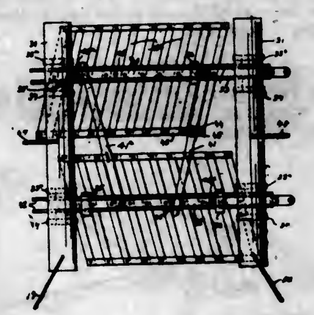


1. A wrest plank for a piano composed of a plurality of layers of closely-woven textile fabric adhesively united face to face and densely compacted together thereby to provide an all-fabric frictional engagement with the tuning pins which are anchored therein.

1,353,904. AGRAFFE. RICHARD W. GERTZ, Brookline, Mass. Filed Dec. 20, 1918. Serial No. 267,570. 6 Claims. (Cl. 84—138.)

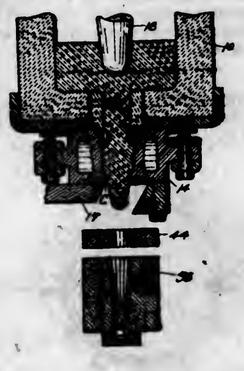
1. In piano construction, the combination with a piano frame having a plurality of agraffe-receiving recesses, of an agraffe in each recess resting against the bottom thereof and retained in position by the walls thereof, each agraffe having a concave under face, thereby forming at opposite sides two bearing edges which rest against the bottom of the recess.

1,353,905. PIANO-ACTION. RICHARD W. GERTZ, Brookline, Mass. Filed Feb. 6, 1919. Serial No. 275,283. 1 Claim. (Cl. 84—26.)



In a piano action, the combination with a supporting rail, of a flange member supported thereon and having a transverse groove, means for securing the flange member to the supporting rail, a pivot pin in said groove, a hammer shank pivotally connected to said pivot pin, a clamping member for retaining the pivot pin in the groove, means for securing the clamping member to the flange member, which means is entirely separate from the means that secures the flange member to the rail whereby the clamping member may be removed or replaced without disturbing the adjustment of the flange, a wippen provided with a repetition lever, and a stop screw for the repetition lever screw-threaded through the flange.

1,353,906. CURRENT-MOTOR. FRANK L. GILMAN and WILLIS M. BAUM, Los Angeles, Calif. Filed Feb. 25, 1918, Serial No. 219,042. Renewed Feb. 12, 1920. Serial No. 358,132. 1 Claim. (Cl. 170—95.)

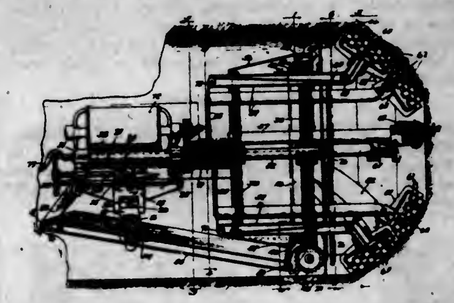


A current motor comprising a pair of pontoons anchored in parallel relation on opposite sides of a stream;

a pair of guide rails connecting said pontoons at each end thereof; a traveling carriage mounted at each end of each of said pair of rails and extending downwardly therefrom; a cross rail carried by each pair of said carriages; a plurality of propeller blades pivotally mounted

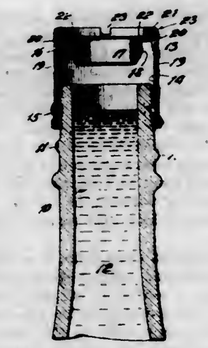
intermediate their ends on the underside of said cross rails; cross bars connecting the free ends of said propeller blades; means actuated by said propeller blades for reversing the same; and a connection from said propeller blades to transmit the power developed thereby.

1,353,907. MEANS FOR AND METHOD OF FLOWING GLASS. JOSEPH B. GRAHAM, Evansville, Ind., assignor to The Owens Bottle Machine Company, Toledo, Ohio, a Corporation of Ohio. Filed June 14, 1917. Serial No. 174,697. 37 Claims. (Cl. 49—55.)



8. The combination of means for supporting a mass of molten glass, comprising lateral and bottom supporting surfaces, and means to withdraw said bottom surface and leave the glass supported by said lateral surfaces, the latter formed to temporarily sustain the weight of the glass, and means to withdraw the lateral surfaces and thereby permit the glass to drop by gravity.

18. The method of manipulating glass, which consists in establishing a flowing stream, arresting said stream and causing the glass to accumulate, supporting the accumulating mass by the lateral surfaces thereof while the bottom portion of the mass is unsupported and permitted to draw downward, and then releasing said mass.

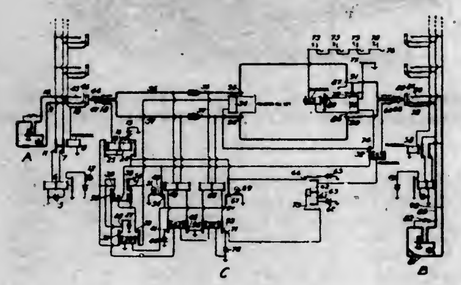


1,353,908. TUNNELING-MACHINE. CARL W. HODGSON, Denver, Colo. Filed July 19, 1918. Serial No. 245,753. 19 Claims. (Cl. 262—7.)

1. A tunneling machine embodying a rotatable support, means for rotating the support, cutters mounted upon the support for rotation therewith and for independent rotation with respect thereto, means for imparting such

independent rotation to the cutters, and means responsive to the movement of said support for advancing the cutters.

1,353,909. CLOSURE FOR JARS, BOTTLES, AND OTHER RECEPTACLES. ALFRED INGRAM and HARRY INGRAM, Brooklyn, N. Y., assignors to Ingrams Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 8, 1919. Serial No. 322,403. Renewed June 11, 1920. Serial No. 388,347. 4 Claims. (Cl. 215—13.)

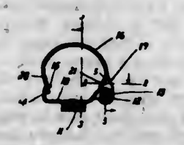


3. A receptacle and a closure therefor comprising a barrel or skirt portion having a top member and integral side fingers slit and bent inwardly and having a reverse bend at their upper ends forming recessed hooks, a top having a depending central part to enter the mouth of the receptacle and a lateral flange extending outwardly from the upper end of said depending portion and engaged at its edges by said hooks and at its upper surface by said top member, and a vertical gasket on said depending portion to seal against the same and the inner side walls about the mouth of the receptacle, said gasket having a downwardly and inwardly tapered lower edge, a wall to engage said depending portion of said top, a wall to engage the adjacent surfaces of the receptacle and an upper edge to engage the flange of said top, and said barrel or skirt portion and said top being in independent parts and said barrel portion being rotatable around said top.

4. A receptacle and a closure therefor comprising a barrel or skirt portion having its upper edge bent inwardly and downwardly to form a raised bead, a top member extended inwardly from the lower inner edge of said bead, side fingers slit and bent inwardly from the side of the barrel portion and said bead and having a reverse bend at their upper ends forming recessed hooks and recesses in said bead at the points where the upper ends of said fingers were cut therefrom, a top having a depending central part to enter the mouth of the receptacle and a lateral flange extending outwardly from the upper end of

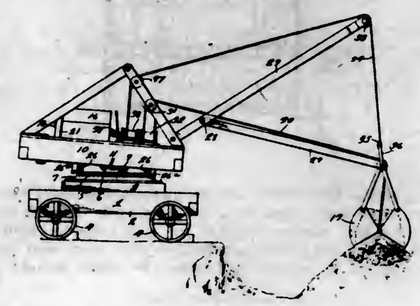
said depending portion and engaged at its edges by said hooks and at its upper surface by said top member, and a vertical gasket on said depending portion to seal against the same and the inner side walls about the mouth of the receptacle, said barrel or skirt portion and said top being in independent parts and said barrel portion being rotatable around said top.

1,353,910. TELEPHONE SYSTEM. LEWIS H. JOHNSON, Bloomfield, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated, a Corporation of New York. Filed July 25, 1914. Serial No. 853,139. 20 Claims. (Cl. 179—58.)



1. A telephone system comprising subscribers' lines terminating at a central office, link conductors thereat for interconnecting said lines, line signals for said lines, a double-wound relay associated with each end of said link conductors, one of said windings being normally short-circuited when said link conductors are connected with said lines, a cutoff relay for the line signal energized over a circuit including the non-short-circuited winding of said double-wound relay, and means controlled by the operation of a subscriber's switch-hook for removing the short circuit from said short-circuited winding to release said cut-off relay, whereby the subscribers may regain control of said line signals.

15. In a telephone system comprising a calling telephone line, a link circuit including talking conductors connected with the calling line, a source of current normally connected with the talking conductors for supplying talking current to the calling line, a relay in the link circuit connected between the source of current and the talking conductors and controlled over the calling line, a second line, means for connecting a source of ringing current therewith and circuit connections rendered effective by the line-controlled relay in response to the opening of the calling line for disconnecting the source of current from the talking conductors thereby removing the line-controlled relay from control of the calling line and for causing the disconnection of the ringing current from the second line.



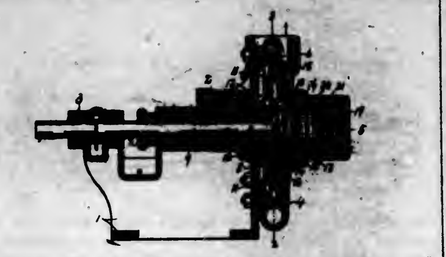
1,353,911. [WITHDRAWN.]

1,353,912. BOW-HOLDER. GEORGE S. KELLEY, Cranston, R. I. Filed Oct. 7, 1919. Serial No. 329,126. 3 Claims. (Cl. 24—228.)

3. A head dress retaining device comprising a base portion having a jointed ear at one end pierced and twisted to stand at a right angle to the plane thereof, a ribbon retaining yoke of resilient material having a jointed ear at one end pierced and twisted to stand at right angles to the plane thereof, said jointed ears being pivotally connected together, a catch at the opposite end of said yoke for releasably engaging the corresponding end of said base, a portion of said ear on the yoke being offset to engage the edge of the ear in the base to limit the forward swing of said yoke.

1,353,913. POWER-EXCAVATOR. RICHARD C. KEOGAN, South Bend, Ind. Filed May 13, 1920. Serial No. 381,159. 6 Claims. (Cl. 212—58.)

1. An excavating machine comprising a base having a pivotally and tiltably mounted platform thereon, a weight suspending element carried by the platform for lifting a weight, and means interposed between the base and platform whereby when the weight is suspended by the weight engaging element the platform will be tilted and slued to one side and means whereby when the weight is released by the weight engaging element the platform will be moved in a reverse direction.

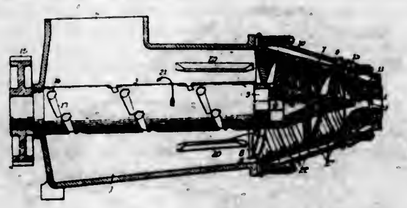


1,353,914. BRAKE-SHOE. CHARLES H. KEYES, Denver, Colo. Filed Jan. 20, 1919. Serial No. 272,044. 2 Claims. (Cl. 74—13.)

2. A brake-shoe of the character described comprising a ring made of bent metal of channel section, the flanges of which extend inwardly from its periphery, the ring being split crosswise and its end portions being bent inwardly to provide opposed faces for the engagement of an interposed cam, hooks formed integrally with the web of the ring at opposite sides of its split, and a spring attached to the hooks.

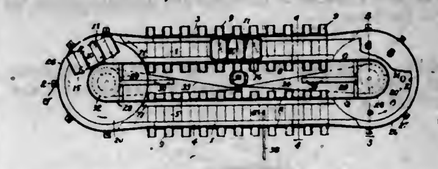
1,353,915. CENTRIFUGAL PUMP. BENJAMIN J. KIME, Seneca Falls, N. Y., assignor of one-fourth to Ransom R. Micks, Seneca Falls, N. Y. Filed Nov. 21, 1919. Serial No. 339,531. 4 Claims. (Cl. 103—43.)

1. In a centrifugal pump, an impeller case having an inlet and an outlet, an impeller having an inlet and passages communicating respectively with the first-named inlet and outlet, a valve controlling communication between the inlet and passages of the impeller and normally having restricted communication with said passages, a piston actuated in one direction by pressure of the fluid discharged by the impeller and connected to the valve for gradually opening the latter as the liquid pressure increases beyond a certain degree, and retracting means for the valve and piston.

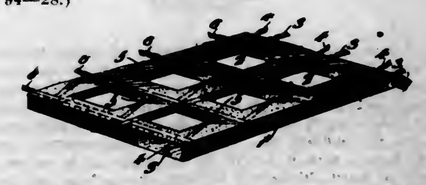


1,353,916. REFLECTING DEVICE FOR ELECTRIC INCANDESCENT LAMPS. SIDNEY M. KNOPF, New York, N. Y. Filed Aug. 22, 1917. Serial No. 187,617. 1 Claim. (Cl. 240—103.)

A reflector for incandescent electric lamps, comprising a shell in the shape of a truncated cone, a flange at the lower edge of said cone, and a disk supported on said flange, said disk being in a plane at right angles to the axis of said shell, said shell being provided with an inner reflective surface, and said disk being provided with a lower reflective surface.



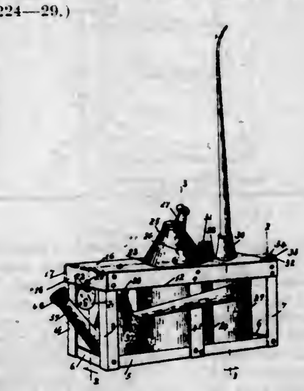
1,353,917. BRICK MACHINERY. FRANK B. LAMBERT, Chicago, Ill. Filed Oct. 9, 1915. Serial No. 54,935. 2 Claims. (Cl. 25—14.)



2. In a clay press, a sharply tapered screw having a single thread of relatively large pitch, means for rotating the screw, a screw casing having an inner surface closely approximating the outer edges of the screw, said casing having an inner surface closely approximating the outer edges of the screw, said casing having covered its inner tapered surface substantially by a plurality of shallow screw threads alternated with grooves of substantially the same width as the threads, the side faces of the threads which receive the clay being inclined to the axis of the screw and adapted to direct the clay toward the axis of the casing as the same is forced forward by the screw.

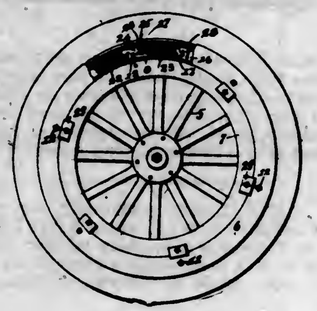
1,353,918. SPEEDWAY AMUSEMENT DEVICE. AUGUST P. LAUSTER, Brooklyn, N. Y., assignor, by direct and mesne assignments, to Hyla F. Maynes, Gaines, Pa. Filed Feb. 28, 1920. Serial No. 361,953. 18 Claims. (Cl. 104—36.)

1. In a device of the character set forth, a pair of horizontal turn-tables mounted to rotate and located some distance apart, a car, a guideway adjacent one turn-table to receive the car and direct it onto the turn-table to guide the car to travel around on the turn-table to the opposite side and thereupon direct the car from the turn-table, a similar guideway for the other turn-table, and a pair of track guideways for the said car, one arranged to cause the car when ejected from one turn-table by the guideway to pass along one track and enter the said guideway of the other turn-table, the second track guideway being arranged to receive the car ejected from the latter turn-table and guide it back to the other turn-table.



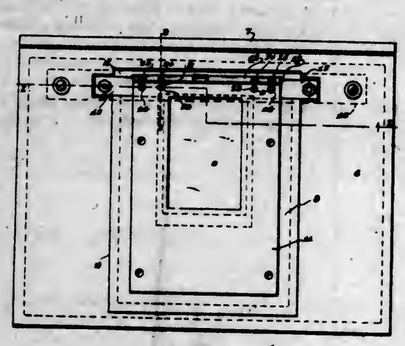
1,353,919. VAULT-LIGHT, SKYLIGHT, OR FLOOR-LIGHT CONSTRUCTION. CHARLES HENRY LAW, Forest Hill, N. Y., assignor to American Bar-Lock Company, New York, N. Y., a Corporation of Pennsylvania. Filed Sept. 27, 1919. Serial No. 326,886. 3 Claims. (Cl. 94—28.)

1. A skylight, vault light, or floor light construction comprising a concrete slab having lens receiving openings and having embedded in it on opposite sides of the openings, a longitudinally extending upper and a lower bar, the upper bar being in truss formation so that opposite each opening it has truss portions extending above the face of the slab to form bonding portions, reinforcing bars embedded in the slab, extending at an angle to the other reinforcing bars and positioned above them, lenses covering the lens receiving openings, and a layer of concrete surrounding the lenses and embedding the bonding portions of the truss-reinforcing bars.



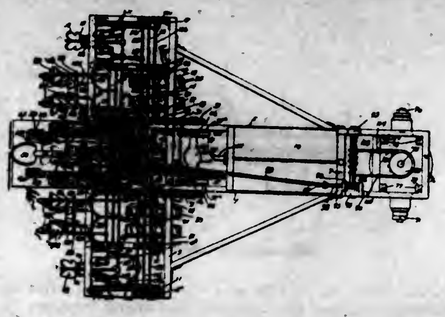
1,353,920. OIL KIT. JAMES W. LAYTON, Springfield, Ill. Filed June 7, 1920. Serial No. 387,049. 2 Claims. (Cl. 224—29.)

1. A kit comprising a case; an oil bucket having a conical top, ears on said conical top and a bail engaged in



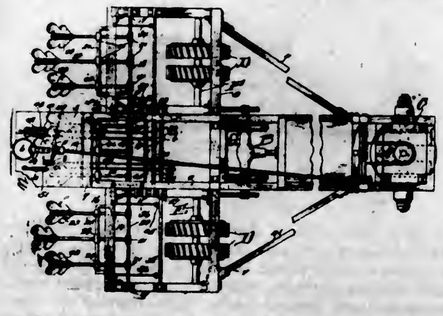
said cars; an oil can having a neck and an elongated nozzle and a filler tube; a torch having a cap; a cover detachably connected with the case and having openings accommodating the conical part of the bucket and the neck and the filling tube of the oil can; and an inwardly extended hood attached to the cover and accommodating the cap of the torch.

1,353,921. VEHICLE-TIRE. GEORGE C. LEHR, St. Louis, Mo. Filed May 5, 1919. Serial No. 294,903. 1 Claim. (Cl. 152—8.)



A vehicle tire comprising a plurality of spiral springs having helical ends so as to form substantially flat surfaces and arranged radially, hinged connections for connecting each spring with the adjacent springs at their outer ends so as to form substantially a ring, a solid rubber tire surrounding the springs and their connections, a bead formed on each side of the tire adjacent the springs, a strip of fabric interposed between the springs and the tire, centrally located projections located on the inner ends of the springs in combination with a split demountable rim, in which said projections and springs are seated.

1,353,922. PHOTOGRAPHIC-PRINTING FRAME. CARL JOSEPH LISH, Louisville, Ky. Filed Mar. 19, 1920. Serial No. 367,083. 4 Claims. (Cl. 95—77.)



1. In a photographic printing apparatus, a support having an opening, a negative and print paper supporting member movably mounted in said opening, and having apertures over which the paper is adapted to be positioned, punch pins carried by the support in line with the apertures, a presser plate hinged to the aforesaid supporting member and having apertures adapted to register with the first-mentioned apertures, and a platen engageable with the support and with the presser plate for moving the supporting member and the presser plate in a direction to force the punch pins through the apertures thereof.

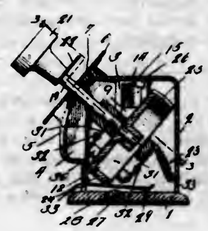
1,353,922. MOTOR-DRIVEN TRACTOR-CULTIVATOR. EARL S. LUCAS, Randolph, Iowa. Filed Apr. 16, 1919. Serial No. 290,454. 4 Claims. (Cl. 180—21.)

1. In a machine as set forth, a frame provided with bearings, a driving shaft comprising axially alined sections mounted in said bearings, additional depending bearings on the frame in advance of the first bearings, differentially united axially alined driven shaft sections mounted in the last mentioned bearings, a casing housing said differentially united shaft sections and terminating at its opposite ends in stationary brake drum heads, rotatably movable brake drum heads adjacent the first heads and having operative gear connections with the differentially united shaft sections, gear means operatively connecting the outer ends of the differentially united shaft sections and the first shaft sections for transmitting power to the latter, means coöperating with the rotatably movable brake drum heads whereby through the medium of the movable brake drum head, the differentially united shaft sections and the gear means will act to control the first driving shaft sections, and supporting traction drive wheels on the first shaft sections.

1,353,924. CULTIVATOR. EARL S. LUCAS, Randolph, Iowa. Filed Aug. 9, 1919. Serial No. 316,363. 4 Claims. (Cl. 97—34.)

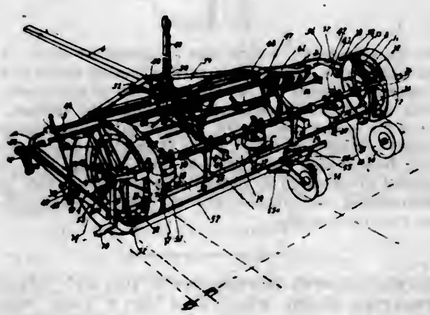
1. In a cultivator, a frame, forward and rear supporting wheels therefor, the rear wheels being adjustable laterally, a plurality of soil working implements, shafting on which said implements are adjustable relatively to the rear supporting wheels, whereby the implements may be positioned to the rear of the rear supporting wheels, or upon either side of the forward supporting wheels, and swingingly mounted means for raising and lowering said implements.

1,353,925. AUTO-TOP. ALFRED E. LYONS, San Jose, Calif. Filed July 8, 1918. Serial No. 243,870. 4 Claims. (Cl. 296—116.)



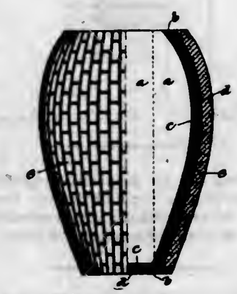
4. In a top prop for autos, the combination with a main bow adapted to be supported by the body, and other bows,

all bows having longitudinal grooves in their limbs; of a runner slidable in the groove of each bow and to which runner another bow is pivoted, a latch on the runner, a keeper on the pivoted bow adapted to be engaged by said



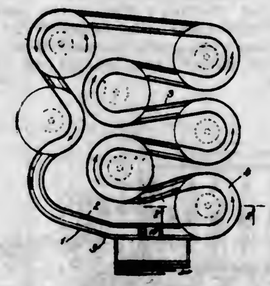
latch when such bow is opened up, and a spring-actuated dog mounted in each bow at a point to lock the runner of the next bow with the latter in position to distend the top.

1,353,926. CHECK-PRINTING MACHINE. THOMAS W. R. MCCABE, Waterbury, Conn., assignor to Charles H. Hasbrouck, Binghamton, N. Y. Filed May 2, 1917. Serial No. 165,902. 5 Claims. (Cl. 197—6.4.)



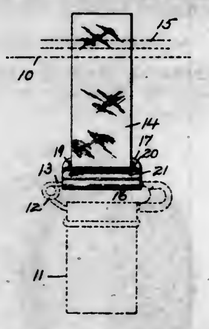
1. A machine of the character described comprising a platen wheel, a printing wheel adapted to be moved in a curved path over the platen wheel, means for retaining the printing wheel in engagement with the platen wheel during a printing operation, means for disengaging the printing wheel from the platen wheel immediately subsequent to the printing operation, and means for retaining the printing wheel out of engagement with the platen wheel during its return movement over the platen wheel to a normal position.

1,353,927. CHECKROW CORN-PLANTER. JOSEPH W. MCNEAL, St. Paul, Minn. Filed Feb. 12, 1918. Serial No. 216,786. 8 Claims. (Cl. 111—25.)



1. In a corn planter of the class described, the combination with the frame and supporting wheels therefor, of a reel rotatable on said frame between said wheels and connectible therewith, seed dispensing devices, having a seed discharge opening, and means including seed guiding devices on said reel to engage said dispensing devices and register with said discharge opening when said reel and wheels are connected and the latter are rotated as and for the purpose specified.

1,353,928. METHOD OF MAKING VASES. MAX MARTIN, New York, N. Y. Filed Sept. 18, 1919. Serial No. 324,364. 2 Claims. (Cl. 25—154.)



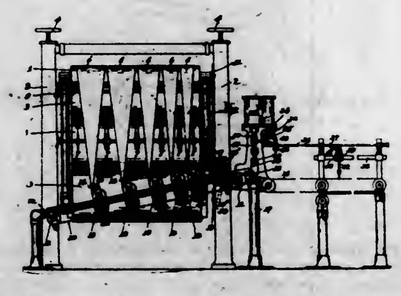
1. The process herein described of making vases which consists in providing a central core of wood consisting of separate detachably connected parts, providing a wire mesh jacket or casing in which said core is inclosed, said jacket or casing being of greater dimensions than said core and said parts being so placed as to form a continuous space between them, then filling in said space with plastic cement worked through the wire mesh jacket or casing and entirely inclosing said wire mesh jacket or casing in said cement, then applying waterproof material to the reinforced cement body thus formed, then inclosing said body and the waterproof material in an outer wall consisting of brick or inlay work, and then removing said core.

1,353,929. AMUSEMENT APPARATUS. HYLA FREDERICK MAYNES, Gaines, Pa. Filed Mar. 9, 1920. Serial No. 364,468. 5 Claims. (Cl. 104—64.)

1. An amusement apparatus comprising a guideway having reverse curve or turns, a car adapted to move along said guideway and projectors situated at the turns of the guideway designed to impart motion to the car and project it from turn to turn in an irregular and jerky fashion.

1,353,930. PIN-RECEIVING TAB FOR GARMENTS. HERMAN MERKEL, East Orange, and JACOB BUECHER, Newark, N. J. Filed Feb. 16, 1920. Serial No. 359,063. 4 Claims. (Cl. 24—226.)

1. A pin receiving tab for garments comprising a strip of fabric, a tubular clip having a slitted ear to receive the strip, and means for insuring the engagement of the strip for its entire width with the edge of the slit.



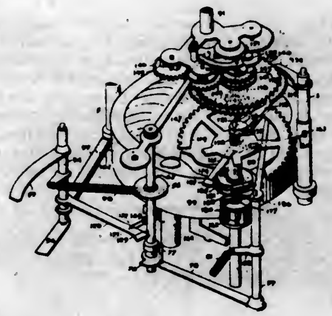
1,353,931. ART OF GROWING PLANTS. ELLIS MILLER, New York, N. Y. Filed June 29, 1918, Serial No. 242,525. Renewed Aug. 12, 1920. Serial No. 403,150. 6 Claims. (Cl. 71—93.)

1. The improvement in the art of preparing a radioactive composition for plant growth which comprises heating and then grinding the tailings of crude carnotite ore, and finally mixing with inert material.

1,353,932. PROCESS OF FORMING ARTIFICIAL PEARLS. TATSUHEI MISE, Watakano, Japan, assignor to Dai-Nippon Enkei Shinju Kabushiki Kwaisha, Shimo-Ochiai-Mura, Toyotama-Gun, Tokyo-Fu, Japan. Filed May 7, 1919. Serial No. 295,506. 3 Claims. (Cl. 252.)

1. A process of forming pearls consisting of first opening the shell of the pearl producing mollusk, then opening the muscle of the foot of the mollusk, then forming a sack-like space at the point where the internal organ is connected with the mantle and finally inserting a kernel through the opening and into the space provided.

1,353,933. APPARATUS FOR LAYING OR FORMING TIRE-TREADS. HOWARD I. MORRIS, Los Angeles, Calif., assignor, by direct and mesne assignments, to Morris Tire Machinery Company, a Corporation of California. Filed July 17, 1917. Serial No. 181,080. 13 Claims. (Cl. 154—1.)

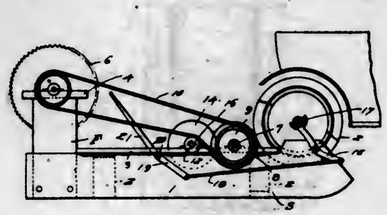


1. In combination, a traveling belt conveyer for supporting and carrying thin heated plastic strips of rubber, a second traveling conveyer, a series of pressure rolls between which said second conveyer travels, and means for feeding said strips of rubber from said first conveyer to the surface of the second conveyer and between one pressure roll of each pair and the conveyer.

1,353,934. METHOD AND MACHINE FOR MAKING THE RUBBER ELEMENTS FOR TIRES, LAMINATED TIRE-TREADS, &c. HOWARD I. MORRIS, Los Angeles, Calif., assignor, by direct and mesne assignments, to Morris Tire Machinery Company, a Corporation of California. Filed Dec. 29, 1917. Serial No. 209,386. 19 Claims. (Cl. 154—0.)

1. A plurality of calenders for rolling strips of rubber, a conveyer passing successively under said calenders, and pressure means for plying the strips as delivered to said conveyer from said calenders.

1,353,935. ELECTRICALLY WOUND AND SYNCHRONIZED STRIKING-CLOCK. ANTON R. NELSON, Susanville, Calif., assignor of one-half to Isaac Knoch, Susanville, Calif., and one one-hundredth to Francis M. Wright, San Francisco, Calif. Filed Mar. 2, 1917. Serial No. 152,043. 1 Claim. (Cl. 58—35.)

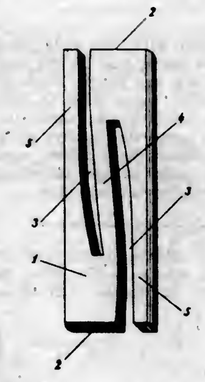


In an electrically wound and synchronized clock, the combination of a spring for imparting motion to the clock mechanism, a spring for imparting motion to the synchronizing mechanism, a motor for winding said springs, a switch for closing the circuit through said motor, means whereby a temporary interruption of current through said motor synchronizes the clock, and further means whereby a second interruption of current will not again affect the synchronizing mechanism until the next predetermined time for synchronizing.

1,353,936. POWER-TRANSMISSION DEVICE. RUDOLF PRANTNER, Wright, Minn. Filed Mar. 8, 1920. Serial No. 363,954. 2 Claims. (Cl. 74—106.)

1. A device of the class described comprising a supporting structure, a drive shaft carried thereby, a driven shaft operatively engaged with the drive shaft, a counter shaft carried by the supporting structure and in driving

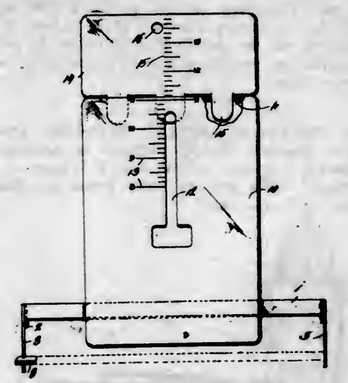
connection with the operative connection between the drive shaft and the driven shaft, a balance wheel carried



by the counter shaft, and means carried by the drive shaft for engagement with the driving wheel of a motor driven vehicle.

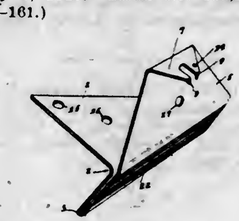
1,353,937. METHOD OF DRYING VARNISHED (PATENT) LEATHER. HEINRICH SCHULZ, Worms, Germany, assignor to Firm Cornelius Heyl, Worms, Germany. Filed Dec. 12, 1916. Serial No. 136,410. 3 Claims. (Cl. 34—24.)

3. The herein-described method of drying varnished leather, which consists in subjecting the leather to the simultaneous action of ultraviolet rays and a gaseous derivative of ammonia.



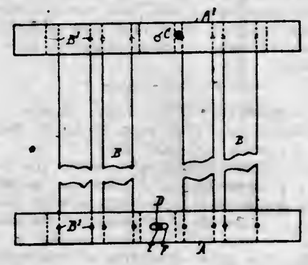
1,353,938. ATHLETIC EXERCISER. WILHELM SCHURR, Langnau-on-the-Albis, Switzerland. Filed June 2, 1919. Serial No. 301,291. 1 Claim. (Cl. 46—69.)

An elastic athletic exerciser made of a single piece of oblong wood, a shoulder at each end thereof, a longitudinal prong extending from each shoulder in opposite directions, and a longitudinal elastic bridge uniting said shoulders.



1,353,939. TYPEWRITER ATTACHMENT. EMORY SUDLER and CHARLES E. SUDLER, New York, N. Y. Filed Dec. 29, 1919. Serial No. 348,018. 4 Claims. (Cl. 197—189.)

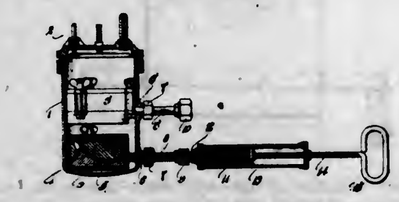
1. A typewriter attachment including a plate having indicia thereof to visualize the position of paper in the typewriter, a second plate carried by the first plate and provided with indicia in serial with the indicia on the first plate to indicate the position of the typewriter paper when the latter is of such length as to extend beyond



the outer terminal of the first plate, and means for associating said plates with the typewriter.

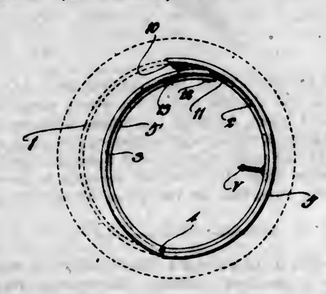
1,353,940. COMBINED CLAMP AND WHEEL-GUARD FOR FARM-WAGONS. LEVI P. WELLS, Gering, Nebr. Filed July 2, 1919. Serial No. 308,141. 4 Claims. (Cl. 280—161.)

1. Means for preventing the wearing of a hole in a wagon box by the turning of a front wheel, comprising a guard of hard sheet material, including horizontal and vertical portions enabling application to the edge of the wagon box at the place of wear, and a portion bent upon itself and away from the aforesaid portions to provide a resilient extra thickness at the place of contact of the wheel.



1,353,941. FOURDRINIER PAPER-MAKING MACHINE. WILLIAM ALEXANDER AITKEN, Gravesend, England. Filed July 22, 1918. Serial No. 246,212. 1 Claim. (Cl. 92—51.)

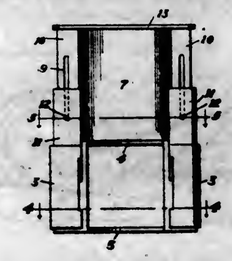
In a paper-making machine having movable suction-boxes beneath the Fourdrinier web and flush with the top of their supporting standards, the combination with



a limited plurality of said boxes of a centrally pivoted carrier plate at the one end and a centrally guided carrier plate at the other end thereof and longitudinally disposed on said standards, means for fixing the ends of said boxes, to the carrier plates, a pivot in one of said plates between the two middle suction-boxes, an arcuate slot and guide pin positioned opposite said pivot in the other carrier plate.

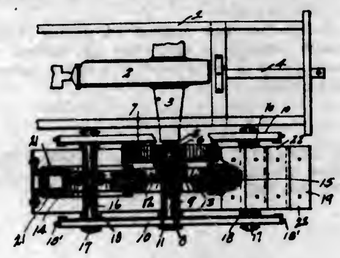
1,353,942. DENTAL FLASK AND CHARGER. DELBERT A. AKIN, Spokane, Wash., assignor of one-third to John Meckay and one-third to Earl F. Fuller, of Spokane, Wash. Filed Feb. 19, 1920. Serial No. 359,918. 3 Claims. (Cl. 18—33.)

1. The combination with the vulcanizer adapted to receive steam pressure as a heating medium and the flask having a matrix therein, of a charging pipe, passed through the wall of the vulcanizer and entered into said flask to open into the matrix, said pipe having a socket end, and a charging device having a head to engage said socket in operative position for flowing plastic material into the matrix.



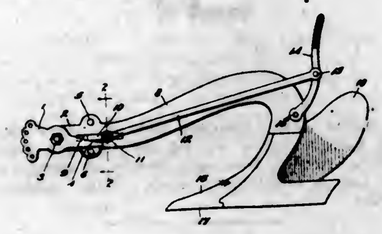
1,353,943. DEMOUNTABLE RIM. ALBERT L. ANDERSON, Spokane, Wash., assignor of one-fourth to James F. Mazna and one-fourth to George B. Shafer, Spokane, Wash. Filed Mar. 24, 1920. Serial No. 368,279. 2 Claims. (Cl. 301—32.)

1. The combination in a demountable rim of a long and a shorter hinged section each fashioned with a transverse integral hinge sleeve, and each sleeve formed with an offset hinge pin, said offset pins each projecting into the complementary opposed hinge sleeve to form alined pivot members.



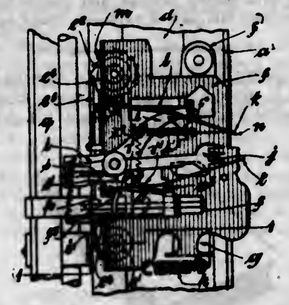
1,353,944. TOBACCO-BITER. LOYD ELDEN ASHENFELTER, Atlanta, Ga. Filed Sept. 11, 1919. Serial No. 323,086. 3 Claims. (Cl. 131—38.)

1. A tobacco biter comprising a holder for the plug consisting of a frame having a body and laterally extending jaws for receiving the plug between them, the body being open to permit of inspection of the plug, said body having at each side of the opening a channel shaped guide, each guide consisting of telescoping sections having a limited movement away from each other, a transversely curved blade having outwardly bent edges to engage within the guides, said blade and guides having means for limiting their movement with respect to each other, a plate serving as a finger piece secured to the top of the blade and extending beyond the blade away from



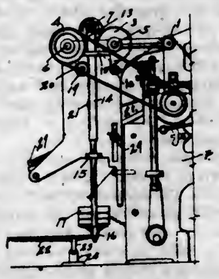
the body of the plug receiving frame, said plate having a depending spike for impaling the plug during and after the cutting.

1,353,946. TRACTOR-MACHINE. ARTHUR R. BLEWETT, Portland, Oreg., assignor to Blewett Tractor Company, Tacoma, Wash. Filed Apr. 8, 1919. Serial No. 288,450. 4 Claims. (Cl. 180—9.1.)



1. The combination with the main frame, the axle shaft and its driven pinion and central rigid supporting axle, a hub on the axle and journal boxes at the ends of the hub, of a tractor frame fixed on said boxes and oscillatable on the axle, bearing boxes at the ends of the frame, and end supporting pulleys journaled in said bearing boxes, an intermediate driving sprocket carried by the hub, and a flexible driving belt supported on the end pulleys and driven by said sprocket.

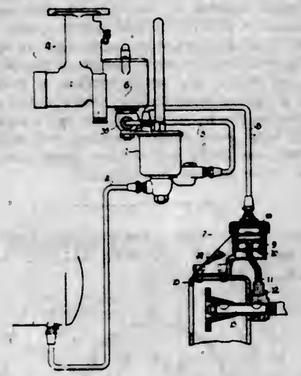
1,353,946. CLEVIS ADJUSTMENT FOR PLOWS. ALFRED A. BRYANT, Easley, S. C. Filed May 10, 1920. Serial No. 380,858. 3 Claims. (Cl. 97—4.)



1. In a plow the combination of a beam having a longitudinally disposed slot; a block adapted to reciprocate longitudinally of said beam in said slot; a clevis pivoted to said beam and having an extension adapted to be engaged and moved by said block; a lever; and connections between said lever and block for moving the latter, substantially as described.

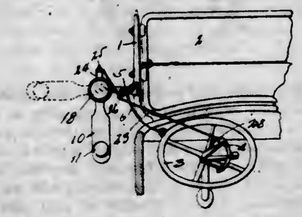
1,353,947. WARP-THREAD AND LIKE SELECTING AND SEPARATING MECHANISM. WILLIAM DOBSON, Blackburn, England. Filed Feb. 15, 1917. Serial No. 148,899. 7 Claims. (Cl. 139—94.)

1. In warp thread and like selecting and separating apparatus, a carriage, a guide bar along which the carriage may move and means for supporting the bar, mechanism upon the carriage for traversing the carriage along the bar, and a feeler upon the carriage for controlling the traverse of the carriage, a needle-like and forwardly and diagonally movable selector hook upon said carriage, separator mechanism also upon said carriage adapted to receive the selected threads from the selector hook and hold a series of them spaced apart, actuating mechanism upon the carriage to actuate the selector hook and separator mechanism and the said traversing mechanism, a continuously running prime mover for operating the said actuating mechanism, a mechanical make and break device between the prime mover and the said actuating mechanism, through which the power is transmitted, and a further feeler also upon the carriage which is acted upon by the separated threads and which controls the mechanical make-and-break device, as herein set forth.



1,353,948. WINDING MECHANISM FOR PRINTING-PRESSES. ORVILLE VINCENT DUTRO and ARTHUR S. BURROUGHS, Spokane, Wash. Filed Apr. 8, 1919. Serial No. 288,546. 3 Claims. (Cl. 242—66.)

1. The combination with a compensating frame comprising side bars vertically movable, of a pair of supporting rolls, one of which is positively driven, a winding roll having trunnions and resting upon the supporting rolls, and said side bars detachably suspended from said trunnions, a weighted device connecting the side bars at their lower ends, and means for lifting said device to free the winding roll from the supporting rolls.



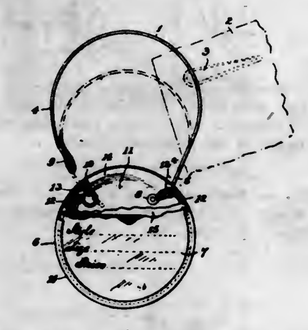
1,353,949. FUEL-FEED SYSTEM. FRANCIS E. EDWARDS, Chicago, Ill., assignor to Stromberg Motor Devices Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 13, 1918. Serial No. 253,972. 5 Claims. (Cl. 158—36.)

1. In combination, an air chamber having a movable wall for creating impulses of alternate compression and rarefaction, a pumping chamber communicating with said air chamber, said pumping chamber having inlet and discharge valves, and a closed auxiliary air chamber having

means for permitting communication with said first named air chamber, said means being controlled by the level of liquid in the pumping chamber.

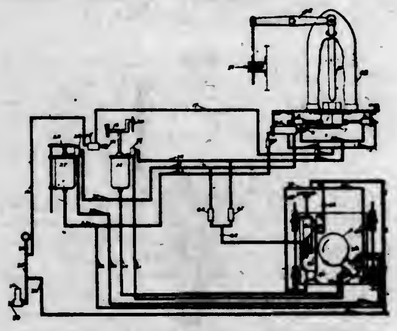
1,353,950. AUTOMOBILE-SIGNAL. OTA FREELS, Spokane, Wash. Filed May 12, 1919. Serial No. 296,454. 2 Claims. (Cl. 116—54.)

1. The combination with the supporting post, of an adjustable bracket arm having circumferential oppositely disposed slots, a bearing bushing having a set screw and mounted on the bracket arm, a signal arm provided with a pivot shaft passed through the slotted bracket arm and through said bearing bushing, and means for swinging said signal arm on its pivot as described.



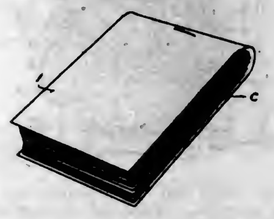
1,353,951. LUBRICATOR. ELMER FROST, Muskegon Heights, Mich. Filed Oct. 13, 1919. Serial No. 330,465. 2 Claims. (Cl. 184—76.)

2. A lubricator comprising a cup, an outlet member for said cup, said outlet member having a chamber, said chamber including a valve seat in one end, a bushing adjustably mounted in the chamber and forming the other end



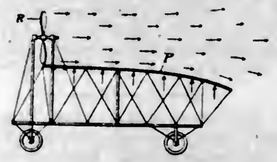
thereof, said bushing having a valve seat in its lower surface and having a recess at the base of the valve seat and passages communicating with the recess and the cup, manually operable means carried by the bushing for adjusting said bushing to increase or decrease the length of the chamber, a valve in said chamber, said valve having a plurality of grooves, the upper end of said valve cooperating with the recessed portion of the bushing to provide an oil pocket, the lower portion of said valve being reduced, a spring surrounding said reduced portion, said spring urging the upper end of the valve into engagement with the valve seat of the bushing, and potential means for urging the lower end of the valve into engagement with the valve seat of the chamber.

1,353,952. TAG. BENJAMIN GORDON, New York, N. Y. Filed Dec. 26, 1919. Serial No. 347,572. 1 Claim. (Cl. 40—20.)



A non-detachable tag comprising a lock casing consisting of a metallic capsule having a plurality of peripheral apertures, a metallic closure secured thereto, and a flexible metallic attaching member coiled between said capsule and closure with a retaining portion provided with a detent eye opposite one of said apertures and an attaching portion extending through another of said apertures, the free end of said attaching member having a locking bend to pass into said detent eye through the adjacent aperture and to be engaged in locking relation therewith.

1,353,953. APPARATUS FOR GATHERING MOLTEN GLASS. JOSEPH B. GRAHAM, Evansville, Ind., assignor to The Owens Bottle Machine Company, Toledo, Ohio, a Corporation of Ohio. Filed Jan. 18, 1917. Serial No. 143,002. 7 Claims. (Cl. 49—55.)



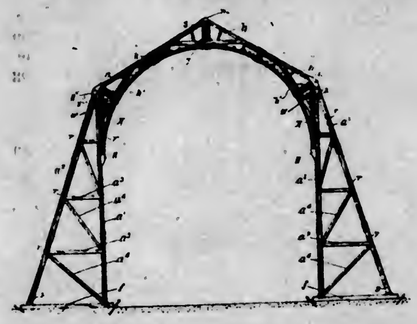
6. The combination with means for establishing a flow of glass, of a two part receptacle to temporarily support the glass as it accumulates therein to form a gather, a cut-off device forming a closure for the bottom of said receptacle, a pneumatic motor to actuate said receptacle for discharging the gather, a pneumatic motor for operating the cut-off device, separate pneumatic timing devices for said motors, valves controlling the supply of air pressure for setting said timing devices, and means to cause the actuation of said last named valves in timed relation.

1,353,954. COMBINED TOWEL AND ANTISEPTIC PAD. THOMAS B. HENRY, Northville, Mich. Filed May 23, 1919. Serial No. 299,201. 1 Claim. (Cl. 206—57.)

A pad comprising a series of small sheets of dimensions which will fit within a coat-pocket, said sheets being impregnated with a sterilising or cleansing agent, a separate series of larger towel or wiper sheets folded to the same dimensions as the smaller sheets and bound together therewith, and a protecting cover for the pad.

1,353,955. APPARATUS FOR AERIAL NAVIGATION. CARL HERING, Philadelphia, Pa. Filed Oct. 30, 1915. Serial No. 58,775. 18 Claims. (Cl. 244—18.)

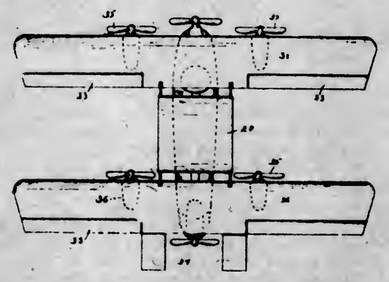
1. The combination with an aeroplane comprising a rotary power driven propeller and a wing or plane propelled through the atmosphere by said propeller and located behind said propeller, of an auxiliary plane or wing disposed below and closely adjacent to the air current produced by said propeller, whereby said auxiliary plane or wing exerts a lifting force separate and distinct from lifting force produced by motion of translation of the aeroplane through space.



2. The combination with an aeroplane comprising a rotary power driven propeller and a wing or plane propelled through the atmosphere by said propeller and located behind said propeller, of an auxiliary plane or wing disposed below and closely adjacent to the air current produced by said propeller, whereby said auxiliary plane or wing exerts a lifting force separate and distinct from lifting force produced by motion of translation of the aeroplane through space, the velocity of the air current produced by said propeller with respect to said auxiliary plane or wing exceeding the velocity of the propulsion of the aeroplane through the atmosphere.

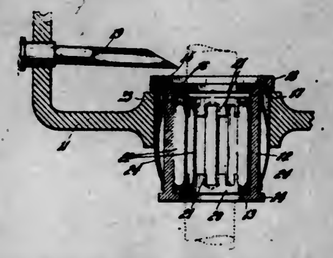
3. The combination with an aeroplane comprising a rotary power driven propeller and a wing or plane behind the same and propelled through the atmosphere thereby, of an auxiliary plane or wing disposed below and closely adjacent said propeller and extending rearwardly therefrom, whereby the current of air produced by said propeller reduces the pressure on the upper side of said auxiliary plane or wing and effects a resultant lifting force.

4. The combination with an aeroplane comprising rotary power driven air propelling means and wings or planes propelled through the atmosphere thereby and extending on both sides and to the rear thereof, of an auxiliary plane od wing disposed below and closely adjacent said propelling means and extending rearwardly therefrom, whereby the air current produced by said propeller causes said auxiliary plane or wing to exert a resultant lifting force separate and distinct from lifting force produced by motion of translation of the aeroplane through space.



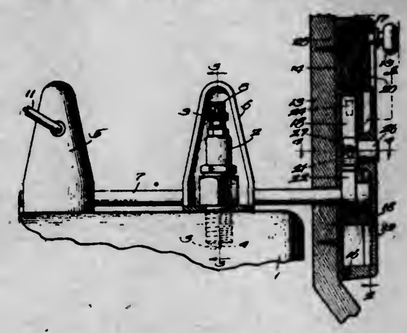
5. The combination with an aeroplane comprising rotary power-driven air-propelling means and wings or planes propelled through the atmosphere thereby and extending on both sides thereof, of an auxiliary plane or wing disposed below and closely adjacent said propelling means and extending rearwardly therefrom, whereby the air current produced by said propeller causes said auxiliary plane or wing to exert a lifting force separate and distinct from lifting force produced by motion of translation of the aeroplane through space, said auxiliary plane or wing being inclined downwardly toward the rear.

1,353,956. SHED FOR AIRSHIPS, AEROPLANES, AND THE LIKE. GASTON HERVIEU and PIERRE MARIE GEORGES MARÉCHAL, London, England. Filed June 19, 1918. Serial No. 240,868. 5 Claims. (Cl. 20—1.)



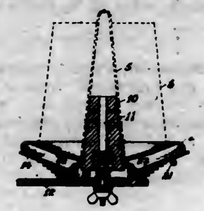
1. In a shed for airships, aeroplanes, and the like comprising in combination a series of principal constructional units consisting of a roof portion supported by triangular stanchions at each side, stretchers between said units located at suitable intervals apart, at the central ridge along the rafters, at the eaves and up the stanchions, bridges between said units located at the eaves and beneath the central ridge, covering means for said structure, boards secured to the bridges located at the eaves, and means on said boards for supporting the covering means.

1,353,957. AEROPLANE. LEO HINZ, Perth Amboy, N. J., assignor of one-half to Friedrick Martin, New York, N. Y. Filed Sept. 22, 1919. Serial No. 325,384. 5 Claims. (Cl. 244—14.)



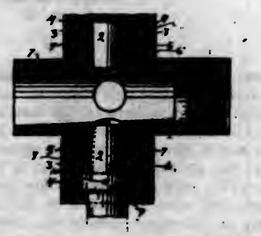
1. An aeroplane comprising a body of stream-line construction both in cross-section and plan view, steering elements of stream-line construction in cross-section and plan view, and fore and aft propellers with power elements of stream-line construction, the said steering elements being pivoted in the plane of the center of gravity.

1,353,958. YIELDING UPPER BEARING FOR CENTRIFUGAL SEPARATORS. GEORGE W. HOFMANN and WILLIAM R. MURAT, Milwaukee, Wis., assignors to Standard Separator Company, Milwaukee, Wis., a Corporation of New Jersey. Filed Nov. 18, 1916, Serial No. 132,026. Renewed Mar. 1, 1920. Serial No. 362,550. 6 Claims. (Cl. 64—48.)



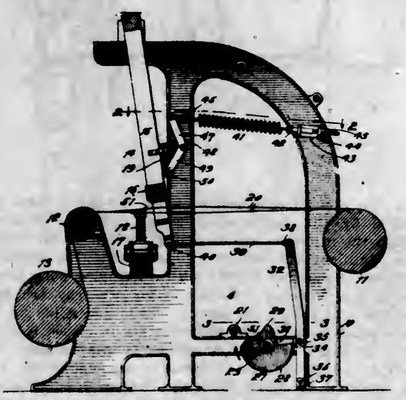
5. An upper bearing for centrifugal separator spindles, comprising a yieldably mounted sleeve for surrounding the spindle, vertical rollers therein to bear against the spindle and the walls of the sleeve respectively, an internal flange at the lower end of the sleeve, a lower spacer ring resting on the flange and provided with sockets in its upper part in which the lower ends of the rollers are loosely seated, a similar spacer ring with its sockets in its lower part and loosely fitting on the upper ends of the rollers, and a retaining ring fitting in the upper end of the sleeve.

1,353,959. GUARDING MECHANISM FOR SPARK-PLUGS OF INTERNAL-COMBUSTION ENGINES. CHARLES T. HOLST, Chicago, Ill., assignor of one-half to William J. Cullerton, Chicago, Ill. Filed Oct. 13, 1919. Serial No. 330,341. 9 Claims. (Cl. 123—146.5.)



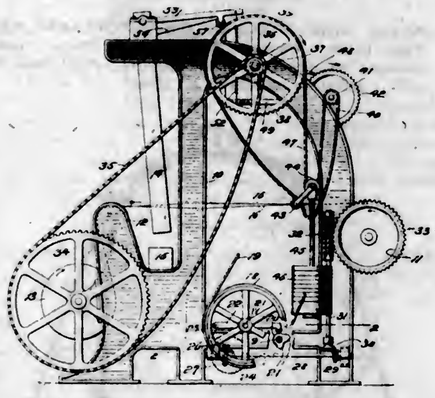
1. An internal combustion engine having a spark plug carried by the engine and having sparking electrodes within the explosive gas receiving portion of the engine; of a container for the spark plug mounted in connection with the engine and formed with a swinging body portion and a complemental closure portion whereby the spark plug may be either inclosed or made accessible; a lock for holding the swinging body portion in closed position; and a plurality of contacts carried by the swinging body portion and of differing lengths to be engageable, when the container is closed, with the current conductor upon the outer end of one of a plurality of spark plugs of differing lengths, employed as the aforesaid spark plug, said contacts being in spark plug short circuiting connection.

1,353,960. COP-MOUNTING. WILLIAM A. HOUCK, Reading, Pa. Filed Nov. 7, 1919. Serial No. 336,304. 5 Claims. (Cl. 242—141.)



5. In combination with a base plate, a fixed cop support, a spring-pressed thread-supporting disk movable thereon, and a cop-edge contacting facing on said disk adapted to snugly encircle the cop quill.

1,353,961. AEROPLANE-TRACTOR. JAMES INGELLS, Muskegon, Mich. Filed May 3, 1919. Serial No. 294,583. 5 Claims. (Cl. 170—173.)



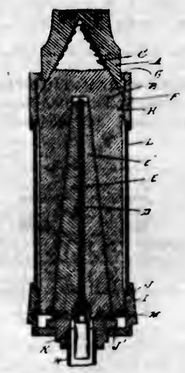
1. In an aeroplane tractor, a steel hub for use upon an aeroplane motor shaft, cylindrical arms radiating from said hub and screw threaded upon their outer peripheries, tractor blades fitted at the hub end to closely fit within the arms, a collar removably mounted near the hub end of each blade and adapted to withstand extreme pressure longitudinally of the blade, and a joint nut fitted to screw upon each arm and engage the collars and hold the blades firmly in place.

1,353,962. LOOM. JOSEPH JOULE and CHARLES ALBERT COUPS, Belleville, N. J., assignors to Eastwood Wire Manufacturing Company, Belleville, N. J., a Corporation of New Jersey. Filed Mar. 10, 1916. Serial No. 83,221. 4 Claims. (Cl. 139—67.)

2. In a loom, in combination, a warp-beam, a cloth-beam, a lay and means for operating and controlling the movements of the lay comprising springs secured at one end to the loom frame, pivoted two-armed levers supported from the sides of the loom-frame and to which the other ends of the springs are connected, cams on the side members of the lay engaged by the free ends of said levers for forcing the lay forwardly, said springs being under tension, and means for drawing the lay to its rear position and controlling the forward movements of the lay under the force of said springs.

1,353,963. LOOM. JOSEPH JOULE and CHARLES ALBERT COUPS, Belleville, N. J., assignors to Eastwood Wire Manufacturing Company, Belleville, N. J., a Corporation of New Jersey. Filed Mar. 4, 1916, Serial No. 82,028. Renewed Apr. 30, 1920. Serial No. 378,011. 8 Claims. (Cl. 139—30.)

4. In a loom, in combination, a warp-beam, a cloth-beam, a lay, means for rotating the warp-beam to feed the warp wires, a weight, means suspending said weight and connected with the cloth beam to wind the cloth thereon and tension the warp stranda, and means operable by the lay for maintaining the weight substantially in a given position, the means suspending the weight comprising a sprocket chain and sprocket wheels upon which the chain is mounted and in a loop of which chain the weight is held suspended, and said chain being adapted to travel in one end portion in a direction to permit the weight to descend slightly on the rotary motion of the cloth beam, and the means for maintaining the weight substantially in a given position being a pawl arm engaging the shaft of the sprocket wheel at the other end portion of the said chain and a crank arm connected with the lay and having a flexible connection with said pawl arm, whereby on the movement of the lay in one direction, said crank arm may actuate said pawl arm to effect the upward travel of a portion of said chain and thereby elevate the weight to the extent that it had previously descended.



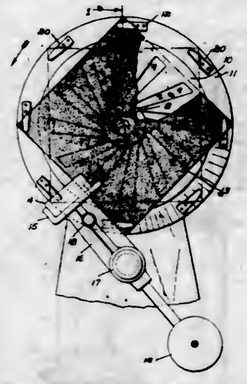
1,353,964. AUTOMOBILE TURN-INDICATING DEVICE. JULIAN KAZIENKO, Rosebank, N. Y. Filed Jan. 13, 1920. Serial No. 351,195. 3 Claims. (Cl. 116—54.)

1. An automobile signaling device comprising a hollow standard, a pair of arms hinged to the upper end thereof, the lower end of said standard being vertically slotted on three sides, a pair of plates disposed within the standard adjacent opposite slotted sides thereof, necks on said plates projecting through the adjacent slots in the standard, pedal members fixed on said necks and bearing slidably on the outer surface of the standard, projections on said plates, a third plate disposed in the standard adjacent the third slotted side thereof and resting on the said projections, a neck on said third plate projecting through the adjacent slot in the standard, a pedal member fixed on

said neck and bearing slidably on the outer surface of the standard, and operative connections between the first mentioned pair of plates and the said arms.

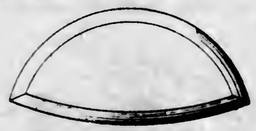
1,353,965. ELECTRICALLY-HEATED TOOL. FRANK KUHN, LAWRENCE H. THOMAS, and JULES G. SPIESS, Detroit, Mich., assignors to American Electrical Heater Company, Detroit, Mich., a Corporation of Michigan. Filed May 27, 1920. Serial No. 384,512. 5 Claims. (Cl. 219—26.)

1. The combination with a tool to be heated, of a heat-conducting body in alinement with said tool and having a surface parallel to the surface on said tool, said body being provided with a wedge-shaped longitudinally extending recess, a heating element in said recess, a wedge member also in said recess for clamping said heating element, and longitudinally adjustable means connecting said wedge member and tool to simultaneously clamp said parallel surfaces of the tool and body in contact with each other and the heating element in heat conducting contact with said body.



1,353,966. SUCTION-HEAD FOR DISK GRINDING-MACHINES. WILLIAM A. LORENZ, Hartford, Conn. Filed Oct. 29, 1919. Serial No. 334,203. 8 Claims. (Cl. 51—13.)

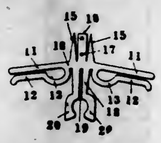
1. A suction head for a disk grinding or polishing machine, having a central opening and channels leading outwardly therefrom to different distances from the central opening, and a valve adjustably mounted on the head and controlling communication between said central opening and said channels, whereby communication may be



established between the central opening and all of the channels or only a part of the channels.

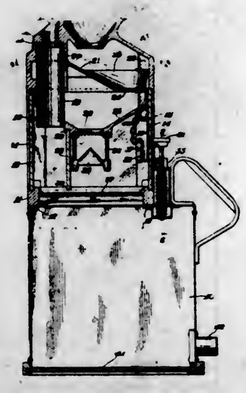
1,353,967. DISK GRINDING-MACHINE. WILLIAM A. LORENZ, Hartford, Conn. Filed Oct. 29, 1919. Serial No. 334,204. 4 Claims. (Cl. 51—13.)

1. A grinding or polishing machine having a rotatable shaft, a head having a working face containing recesses and an imperforate rim that extends below the plane of said working face, means whereby air may be exhausted from the recesses in the head back of the central portion of a square abrasive sheet placed on the working face thereof, and means on said depressed rim of the head for engaging and holding the corners of said abrasive sheet below the plane of the working face of the head.



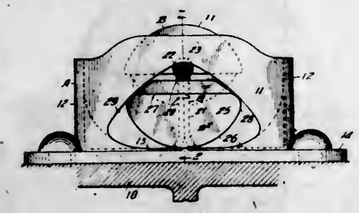
1,353,968. SHOE-STIFFENER. JAMES L. MCCLELLAN, Brookline, Mass. Filed Oct. 11, 1919. Serial No. 329,935. 5 Claims. (Cl. 91—68.)

Fabric, filled with celluloid-resin.



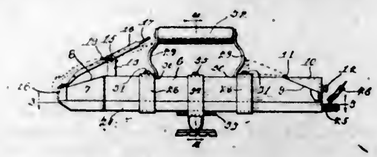
1. As a new article of manufacture, a shoe stiffener consisting of a blank of fibrous absorbent material, and a filling which consists of a celluloid-resin solution diffused throughout the blank, and adapted to be softened by a moderate degree of heat, and to harden by cooling, said filling being non-adherent to a sewing needle, free from liability to stain upper leather and linings, and rendering the blank waterproof, so that the blank may be softened by immersion in hot water without absorbing the water.

1,353,969. COLLAR AND TIE HOLDER. JOSEPH A. MARINER, Chicago, Ill. Filed Mar. 18, 1920. Serial No. 366,956. 4 Claims. (Cl. 24—56.)



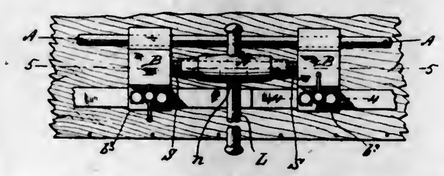
1. A collar and tie holder formed from a single sheet of metal and comprising means for engaging with and holding the flaps of a collar, a hook for securing the holder to a tie, and a clip adapted to engage with a collar button.

1,353,970. FARE-BOX. HOWARD A. MULLETT, Wauwatosa, Wis., assignor to The Milwaukee Electric Railway & Light Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Oct. 14, 1918. Serial No. 258,029. 6 Claims. (Cl. 232—7.)



1. In a fare box, the combination of a ticket receiver having a funnel-shaped mouth of soft metal with a contracted throatway having a hardened metal ring at its end of a diameter less than the width of the ticket to require flexing of the ticket as it is forced therethrough, and a conduit below the ring of greater area to allow the ticket to straighten out after being flexed.

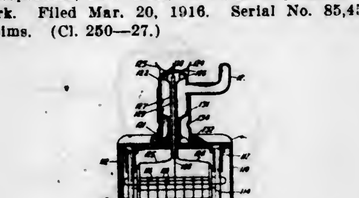
1,353,971. SIDE BEARING. JOHN F. O'CONNOR, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed Nov. 28, 1919. Serial No. 341,013. 3 Claims. (Cl. 64—64.)



2. In an anti-friction bearing, the combination with a hollow retaining member having spaced side walls provided with openings therein, of an anti-friction element disposed within said retaining member, said element comprising an upper section and a lower section, said sections having concentric peripheral cylindrical bearing surfaces, the axes of which extend lengthwise of the anti-friction element, said sections having coöperating bearing surfaces curved to permit relative adjustment between the sections about an axis extending transversely of said axis of the anti-friction element, said lower section of the anti-friction element having its ends extended and disposed within said openings, the contours of said extended ends and openings being formed to prevent bodily displacement of the anti-friction element as an entirety relatively to the retaining member.

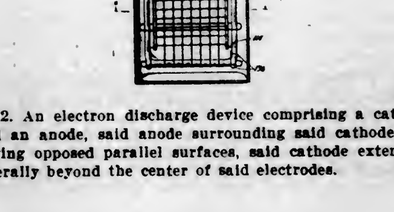
1,353,972. ELECTRIC HEATER FOR SEALING-WAX. ARTHUR J. ORDING, Chicago, Ill. Filed Oct. 3, 1919. Serial No. 328,281. 1 Claim. (Cl. 219—21.)

In a device of the character described, the combination with an electric heater, of a handled container mounted thereon and having a tapered and cross-sectionally angular discharge nozzle at one of its ends and an opening for the insertion of wax at its other end, a door to close the last named opening, a spring actuated lever fulcrumed on the container near its discharging nozzle, a cross-sectionally angular door on said lever to close the opening in said nozzle, a seal mounted on the heater at a distance therefrom and non-heat-conducting material interposed between the seal and heater.



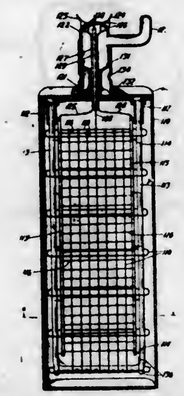
1,353,973. BINDING-STRAP TIGHTENER. SIDNEY J. ORNSTON, New York, N. Y. Filed Sept. 10, 1919. Serial No. 322,808. 4 Claims. (Cl. 254—67.)

1. A strap tightening appliance of the character designated, comprising slidable clamp blocks formed with opposite pitch non-rotatable screw studs, a rotatable turn buckle nut engaging therewith, an alinement rod on which said clamp blocks are slidably mounted, and leverage means for actuating said turn buckle nut, each of said clamp blocks being formed with a stationary clamping jaw and a movable clamping jaw, and with a binding screw for forcing the movable jaw toward the stationary jaw for the purpose of positively gripping and holding the end of a binding strip between said jaws, together with spring tension means arranged to tend constantly to separate said movable clamping jaw from the stationary clamping jaw.



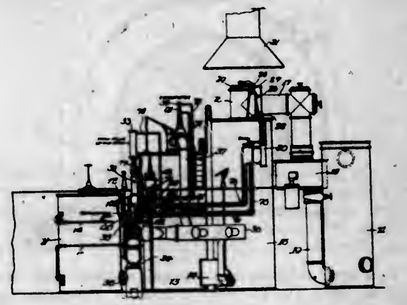
1,353,974. CABINET. BRADLEY S. SMITH, Buffalo, N. Y. Filed Aug. 23, 1915, Serial No. 46,836. Renewed Oct. 25, 1919. Serial No. 333,568. 1 Claim. (Cl. 211—16.)

A device of the kind described, comprising a support and a plurality of bars pivotally secured to said support, each bar having a retainer-member secured thereto and each retainer-member being stamped of sheet metal and being of channel shape in cross section, the ends of each retainer-member being curved upwardly and each member having a spacing projection near each end to hold said



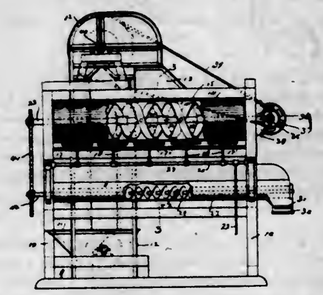
member spaced from said bar, and means for securing said retainer-member at a point between its ends to said bar.

1,353,975. HAY-LOADING DEVICE. HARRY SMITH, Dayton, Ohio. Filed Apr. 2, 1915. Serial No. 18,721. 6 Claims. (Cl. 296—11.)



1. The combination with a vehicle bed or rack having longitudinal track bars thereon of a longitudinally movable truck of less length than the vehicle rack or bed comprising a plurality of longitudinally disposed and transversely arranged members so proportioned and connected as to form a flexible structure capable of a warping movement to substantially conform with the movements of the rack or bed as the vehicle travels over uneven ground, and carrying wheels on said truck engaging the track bars of the vehicle rack or bed to facilitate the to and fro movement of the truck thereon.

1,353,976. VACUUM-TUBE DEVICE. ERWIN R. STOEKLE, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 20, 1916. Serial No. 85,457. 39 Claims. (Cl. 250—27.)

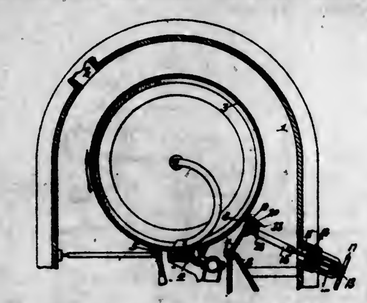


12. An electron discharge device comprising a cathode and an anode, said anode surrounding said cathode and having opposed parallel surfaces, said cathode extending laterally beyond the center of said electrodes.

1,353,977. VALVE-CONTROL MECHANISM. THOMAS W. STONE, Fort Wayne, Ind., assignor to Western Gas Construction Company, Fort Wayne, Ind., a Corporation of Indiana. Filed July 21, 1919. Serial No. 312,294. 16 Claims. (Cl. 48—83.)

1. In a gas making apparatus, in combination: a gas generator; a stack adapted to communicate therewith; a blast pipe leading to said generator; a blast valve controlling the blast to the generator; a stack valve adapted to open the stack; and a unitary manually-controlled means for opening the blast valve and at an automatically determined interval thereafter opening the stack valve, whereby a blast through the generator is maintained prior to the opening of said stack valve; substantially as specified.

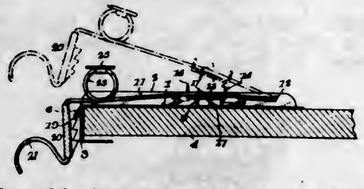
1,353,978. FEED-MIXER. LESLIE R. VEATCH, Buffalo, N. Y. Filed July 24, 1919. Serial No. 312,907. 5 Claims. (Cl. 99—2.)



1. The combination in a mixing device, of a mixer comprising a casing, a mixing member having a right-hand helical blade and a left-hand helical blade, said blades being rotatable within the casing and means extending along the entire length of the mixer for instantly dumping the entire contents of the mixer.

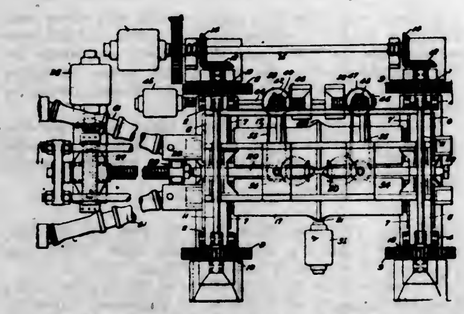
3. A mixing device comprising a mixer, means for conducting feed to the mixer, means for instantly dumping the entire contents of the mixer, and a relay bin located beneath the mixer.

1,353,979. COMPOSITION FOR RAZOR OR OTHER STROPS. BASIL E. WISE, Canton, Ohio. Filed Aug. 4, 1919. Serial No. 315,245. 2 Claims. (Cl. 51—1.)



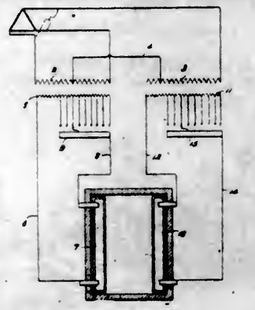
1. A composition for razor strops or the like for honing purposes composed of powdered or pulverized carborundum, powdered or pulverized aloxite, powdered talc and petrolatum and parowax.

1,353,980. DRIER. FREDERICK C. M. YAHN, Buffalo, N. Y., assignor to Buffalo Foundry & Machine Company, Buffalo, N. Y., a Corporation of New York. Filed Jan. 27, 1919. Serial No. 273,227. 2 Claims. (Cl. 257—98.)



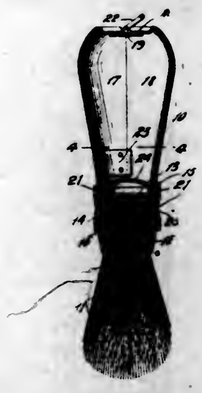
1. A drier comprising a movable member upon the surface of which the material is dried, a scraper for removing the material from said member, and cooling means arranged adjacent to said scraper comprising two attaching plates secured side by side and terminating one above the other, two inclined walls extending laterally from the upper ends of said attaching plates, and a bottom plate connecting the lower ends of said inclined plates, said plates forming walls of a jacket for receiving a cooling fluid.

1,353,981. FISH-CLAMP. CARL A. H. BAHDE, Milwaukee, Wis. Filed June 21, 1919. Serial No. 305,794. 8 Claims. (Cl. 17—10.)



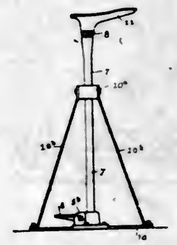
1. In a fish clamp the combination of a supporting member provided at one end with a depending thrust abutment having an inward projection to hook under the edge of a table or shelf, a jaw member pivotally connected with the supporting member, and means for releasably and adjustably fastening the jaw member in clamping relation to the supporting member.

1,353,982. HORIZONTAL SHELL-ROLLING MILL. THADDEUS F. BAILY and FRANK T. COPE, Alliance, Ohio, assignors to The Electric Furnace Company, Alliance, Ohio, a Corporation of Ohio. Filed June 14, 1918. Serial No. 240,057. 5 Claims. (Cl. 80—23.)



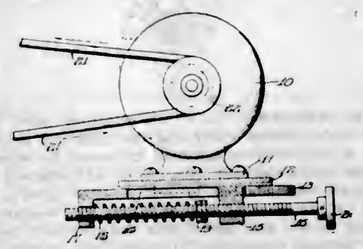
3. A shell rolling mill including a plurality of rotating rolls shaped to form the exterior of two artillery shells, the said rolls being adapted to have placed therebetween a billet of heated steel, means for moving the rolls into engagement with the billet and to roll it into the form of two artillery shells, piercing rods slidably mounted to enter the billet from opposite ends to form cavities therein while the billet is being rotated and means for trimming the shells to the required length.

1,353,983. PHASE-DISTRIBUTION SYSTEM. THADDEUS F. BAILY and FRANK T. COPE, Alliance, Ohio, assignors to The Electric Furnace Company, Alliance, Ohio, a Corporation of Ohio. Filed June 27, 1918. Serial No. 242,165. 2 Claims. (Cl. 204—64.)



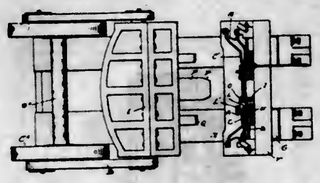
1. In a phase distribution system, the combination with a pair of electric resistance elements, each resistance element provided with a pair of electrodes of a three phase supply line, two phases connected to the primary coil of a three to two phase transformer, the remaining phase connected to the primary coil of a second three to two phase transformer, the primary coils of said transformers being "Scott" connected, a secondary coil coöperating with the primary coil of each transformer and a connection between the electrodes of each resistance element and the adjacent secondary coil.

1,353,984. LATHER-BRUSH. MARCUS B. BEHRMAN, Tompkinsville, N. Y., assignor to American Safety Razor Company, Brooklyn, N. Y., a Corporation of New York. Filed July 22, 1919. Serial No. 312,526. 2 Claims. (Cl. 15—38.)



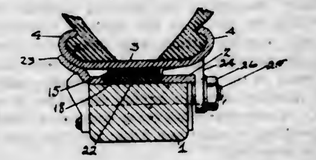
1. A brush of the character described comprising a bunch of bristles, a ferrule engaging the knot of the bunch, an outer ferrule secured thereto, and at its upper and lower edges spaced therefrom to afford annular recesses, and a hollow handle comprising longitudinal sections adapted to be opened one from the other, and at their inner ends formed with cylindrical portions adapted to enter the aforesaid annular recesses, the bunch, with its ferrules, being detachable from the handle and said bunch being adapted to be confined within the handle or arranged to extend therefrom, said outer ferrule in both positions of the bunch serving to bind the sections of the handle in closed relation.

1,353,985. SHOEMAKER'S JACK. LOUIS L. BEAG, Bellingham, Wash. Filed Mar. 30, 1920. Serial No. 369,914. 2 Claims. (Cl. 12—123.)



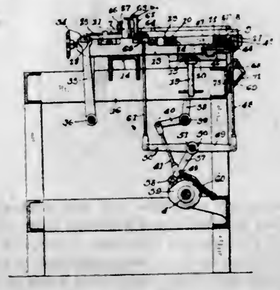
1. In combination, a footstep socket attachable to the floor, a staff stepped for revolution in said socket, an upper bearing revolubly mounting said staff, a shoe-retaining device removably mounted on the upper end of said staff, and a pedal fulcrumed in said footstep and frictionally engageable with said staff.

1,353,986. SUPPORT FOR MOTORS. GOTTFRID BERGENDAHL, Rock Island, Ill., assignor to Rock Island Plow Company, Rock Island, Ill., a Corporation of Illinois. Filed Mar. 4, 1918. Serial No. 220,220. 4 Claims. (Cl. 64—52.)



1. In a device of the class described, a prime mover carrying a driving pulley, a belt passing around said pulley, a plate secured to said prime mover and supporting the weight of said prime mover, a flat supporting member on which said plate is adapted to slide, due to the pull exerted by said driving belt, a downwardly extending lug carried by said plate and passing through a slot in said supporting member, a threaded rod passing through said lug, and a spiral spring surrounding said rod and operating to resist movement of said prime mover due to the pull by the belt.

1,353,987. METHOD OF FORMING AXLES. STEPHEN F. BORKEY, Flint, Mich. Filed June 7, 1917. Serial No. 173,414. 10 Claims. (Cl. 29—153.)

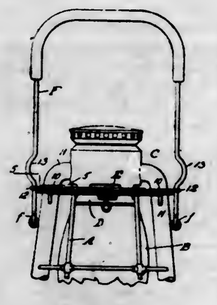


1. The method of forming axles, comprising the successive fashioning of opposite end portions thereof with an intermediate portion of less than the required length, and subsequently stretching the intermediate portion to secure an exact dimension between the fashioned ends.

1,353,988. TRANSVERSELY-SPLIT DEMOUNTABLE RIM. RICHARD S. BRYANT, Cleveland, Ohio, assignor, by mesne assignments, to The Standard Parts Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 6, 1915. Serial No. 770. 13 Claims. (Cl. 152—21.)

1. The combination with a transversely split, demountable wheel-rim; of an upstanding lug on the inner face of said rim near one end thereof; a tongue attached to the other end of said rim and adapted to extend across the split therein, said tongue having an offset portion providing a recess adapted to engage said lug to prevent circumferential separation of such rim-ends; and a locking member arranged to swing on a radial pivot into engagement with said tongue so as to prevent radial separation of such rim-ends.

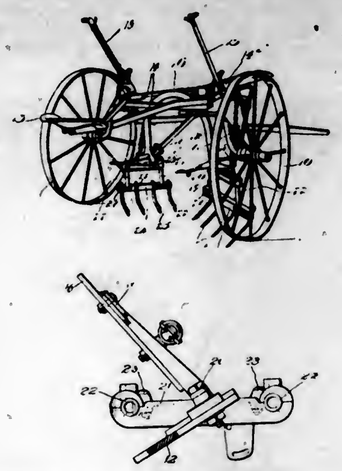
1,353,989. CONTROL FOR STITCHING-MACHINES. MARTIN CHRISTENSEN, Racine, Wis., assignor to Christensen Machine Company, Racine, Wis., a Corporation of Wisconsin. Filed Nov. 7, 1918. Serial No. 261,562. 7 Claims. (Cl. 1—7.)



7. In a book-stitching machine having a stapler, the combination with the driving mechanism of the stapler, of a reciprocating member adjacent said mechanism, an extension carried by the mechanism, a latch member carried by said reciprocating member, and means for moving said latch member to engagement with said extension whereby said mechanism will be carried by said member in its reciprocating movement to actuate the stapler.

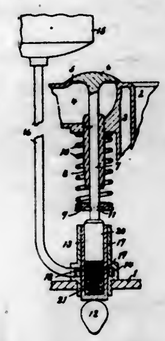
1,353,990. IGNITION SYSTEM. ALFRED C. DE LORME, East Orange, N. J., assignor to Splitdorf Electrical Company, Newark, N. J. Filed Dec. 31, 1918. Serial No. 269,088. 6 Claims. (Cl. 123—184.)

1. In an ignition system for engines using spark plugs for igniting the fuel in its cylinders, an ignition device adapted to produce a spark at any one of said plugs for starting ignition, an independent ignition device adapted to produce a spark at said plug for running ignition, means for electrically connecting the starting ignition device to said plug when the piston in the cylinder containing said plug is in the working stroke and means for electrically connecting the running ignition device to said plug when the said piston is in the compression stroke, said means including a distributer block having two rows of contacts, the contacts of one row being cross connected individually to a corresponding contact one firing interval away in the other row as described.



1,353,991. BAIL-HOLDING DEVICE FOR LANTERNS. ERNEST C. EVERETT, New York, N. Y., assignor to R. E. Dietz Company, New York, N. Y. Filed May 8, 1919. Serial No. 295,662. 5 Claims. (Cl. 240—52.)

1. A lantern having a movable top, and a movable carrying bail, said top and bail being provided with coöperating parts rigid with said top and bail respectively and arranged to engage each other in the normal position of the top to hold the bail from movement, said parts being so arranged that they are moved into and out of engagement with each other by relative movements of said top and bail.

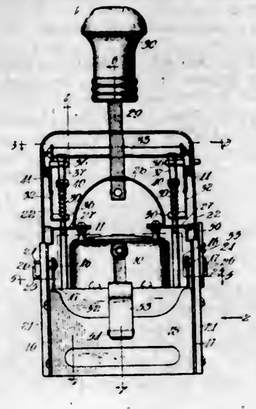


1,353,992. SURFACE CULTIVATOR. JOE FERRIS, Morris, Ill. Filed May 7, 1919. Serial No. 295,421. 4 Claims. (Cl. 97—35.)

1. In a surface cultivator, a gang of cultivator blades consisting of a plurality of blades, means for adjustably supporting the forward ends of each of said blades, whereby, they may be individually angled about a vertical axis

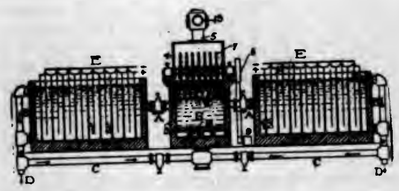
or adjusted about a horizontal axis, and means for adjusting said gang as an entirety about a longitudinal axis.

1,353,993. SELF-ADJUSTING VALVE-LIFTER. ELMER F. FISHER, Brookfield, Mass. Filed Sept. 3, 1919. Serial No. 321,489. 8 Claims. (Cl. 123—90.)



1. The combination, in a self-adjusting valve lifter, with a spring-pressed valve and its stem, and actuating means, of reciprocating members interposed between said actuating means and said stem, one of said members being imperforate and adapted to rest directly upon a fluid column in the other of said members, and means automatically to seal and unseal said last-mentioned member for the purpose respectively of making and breaking said fluid column.

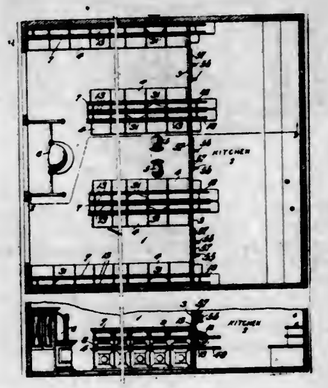
1,353,994. SELF-INKING STAMP. HARRY S. FOLGER and TOBEY ROSS, Chicago, Ill., assignors, by direct and mesne assignments, to R. D. Swisher Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed May 28, 1915, Serial No. 30,903. Renewed Feb. 24, 1920. Serial No. 360,762. 11 Claims. (Cl. 101—103.)



1. In a stamp, a frame providing guides, a die-carrying slide supported in said guides and providing another guide, a handle having a stem slidable in the other guide and arranged to move the die-carrying slide in its guides, an inking device, and means by which the inking device is

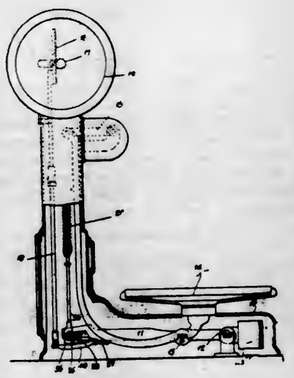
operated by the sliding movement of the stem of the handle in the guide of the die-carrying slide.

2. In a stamp, a frame providing guides, a die-carrying slide supporting in said said guides, a handle for moving the slide, an inking device pivoted to and movable with the slide, and means by which a manipulation of the handle causes a movement of the inking device independent of the movement of the slide.



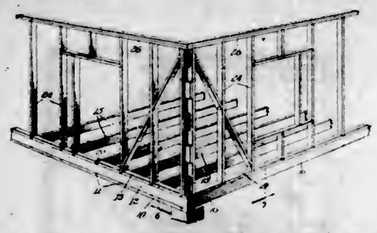
1,353,995. ELECTROLYTIC APPARATUS. WILLIAM E. GREENAWALT, Denver, Colo. Filed Jan. 7, 1919. Serial No. 270,046. 19 Claims. (Cl. 204—5.)

19. In electrolytic apparatus, an electrolyzer, a gasing chamber adapted to contain a relatively large pool of the electrolyte under continuous treatment with a gas and adapted to confine a gas over the pool and having a gas inlet and a gas outlet and an electrolyte inlet and an electrolyte outlet, means for treating the electrolyte in the pool with a reducing gas, means for causing a flow of reduced electrolyte from the gasing chamber to the electrolyzer and of oxidized electrolyte from the electrolyzer to the gasing chamber, and means arranged for regulating the flow of electrolyte and time of treatment so that the oxidation in the electrolyzer and the reduction in the gasing chamber may be maintained within predetermined limits.



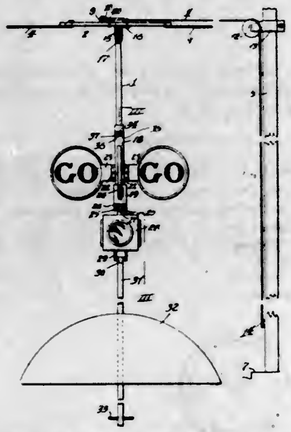
1,353,996. AUTOMATIC RESTAURANT AND VENDING MECHANISM THEREFOR. HUGH A. HALL, Philadelphia, Pa. Filed Mar. 14, 1919. Serial No. 282,708. 11 Claims. (Cl. 186—1.)

1. In a vending machine, means controlled by the intending purchaser to signal to an attendant an order, a tray conveyer to travel between the attendant and the intending purchasers, said tray being removable only at one point in the travel of the conveyer, and means to



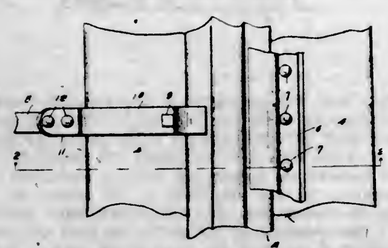
cause a tray on said conveyer to be automatically removed from the conveyer in a position accessible to the person who gave the order.

1,353,997. SCALE AND THERMOSTAT THEREFOR. BERT W. KING and ADAM C. BURKHEISER, Detroit, Mich., assignors to Detroit Automatic Scale Company, Elkhart, Ind., a Corporation of Indiana. Filed Oct. 20, 1916. Serial No. 126,648. 11 Claims. (Cl. 265—69.)



1. In a scale, in combination with a scale lever and a counterbalancing spring therefor, weight indicating mechanism, a draft rod connecting the weight indicating mechanism with the scale lever to actuate the former, a connection between the spring and lever, a thermostat for compensating for the variations in the spring due to changes in temperature, said thermostat being adapted to vary the connection of the spring and lever and being independent of the draft rod, whereby the relation to the draft rod and lever remains unchanged at all temperatures.

1,353,998. BUILDING CONSTRUCTION. EDWARD A. LAUGHLIN, Port Arthur, Tex. Filed Feb. 14, 1919. Serial No. 276,971. 7 Claims. (Cl. 20—0.5.)



1. In a building construction, walls having plates at top and bottom, notched with dovetailed notches at regular intervals and studs extending between the plates and having dovetailed extensions entering the notches, to be positioned thereby.

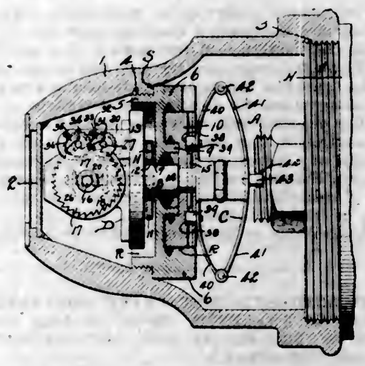
1,353,999. STREET-TRAFFIC SIGNAL. THOMAS O. MILLER, San Antonio, Tex. Filed Nov. 26, 1917. Serial No. 204,040. 9 Claims. (Cl. 116—63.)

1. A street traffic signal comprising a turnably mounted vertically suspended member, an indicator turnably mounted on said member, means for operating said member from therebeneath, and other means for operating said member independently from said first mentioned means, located at a distance therefrom.

1,354,000. RAIL SECURING AND SUPPORTING MEANS. DANIEL V. MOTT, Fernie, British Columbia, Canada, assignor to Edward G. Daniels, Fernie, British Columbia, Canada. Filed June 17, 1919. Serial No. 304,972. 4 Claims. (Cl. 238—26.)

3. In rail supporting and securing means, a supporting member of substantially T-shape in cross section, one of the arms of the head of said member being turned upwardly and inwardly to provide a supplemental supporting plate extending across the upper end of the stem of said member and disposed in superposed relation to the head thereof for receiving and supporting the base of the rail.

1,354,001. PROCESS OF MAKING LITHOGRAPHIC POSTERS. GEORGE N. PIPER, Cleveland, Ohio, assignor to The Postergraph Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 12, 1917. Serial No. 201,617. 5 Claims. (Cl. 95—5.4.)

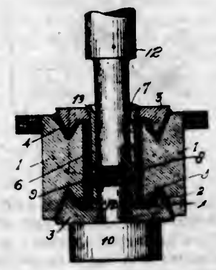


1. The process of making a lithographic poster which comprises producing photographically upon a suitable base the subject of the poster correctly interpreted in dots or grain by projection from a small negative, and treating the base so as to cause the dots or grain to produce a relatively hard image for subsequent inking substantially as described.

1,354,002. AEROPLANE. RALPH R. REED, Morgan Hill, Calif. Filed July 10, 1919. Serial No. 309,801. 4 Claims. (Cl. 104—23.)

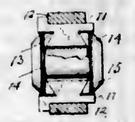
1. The combination of an aeroplane provided with cable-guides, and guiding cables passing through said cable-guides and permitting the aeroplane to travel therealong while continually resisting lateral and vertical movements of the aeroplane, each of the cables being supported substantially at the ends of the normal path of travel of the aeroplane, said cables being sufficiently long and elastic to permit them to be deflected a considerable distance laterally and vertically of the said normal path while continually tending to hold the aeroplane parallel to the earth (or level) and return said aeroplane to said normal path.

1,354,003. HUB-ODOMETER. CHARLES DONAT RICHARD, New York, N. Y. Filed June 11, 1917. Serial No. 174,078. 7 Claims. (Cl. 235—95.)



1. A hub odometer including a rotor element, a stator element, a register device connected with said stator element and having an operating wheel, and means for operating said register device including a rock shaft having an operating engagement with said wheel of the register device, a two-way cam device for operating said rock shaft including a swinging arm carried by said shaft and having a cam at its free end, a sleeve mounted at right-angles to said rock shaft and carrying another cam for engaging with said cam on the swinging arm, a gear carried by the end of said sleeve opposite the cam, and a gear carried by the rotor element for meshing with said other gear.

7. A driving mechanism for hub odometer registers including an operating wheel, intermeshed gears having eccentrically mounted pawls, and an oscillating operating shaft connected with one of said gears.

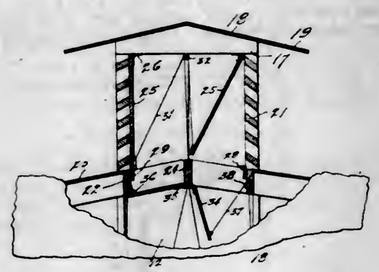


1,354,004. [WITHDRAWN.]

1,354,005. COMMUTATOR AND METHOD OF ASSEMBLING SAME. SEBASTIAN N. SLOAN, Maumee, Ohio, assignor to The Toledo Standard Commutator Co., Toledo, Ohio, a Corporation of Ohio. Filed Mar. 3, 1917. Serial No. 152,239. 4 Claims. (Cl. 171—321.)

2. In a commutator, a series of segments in cylindrical formation, a supporting sleeve extending co-axially with the commutator through the segments, end clamping rings at the ends of the segments and forced together so as to tightly clamp the segments and hold them from axial and radial displacement, insulation between the segments and between the clamping rings and the segments, and between the sleeve and the inner edges of the segments a solidified insulating medium which supports said segments and said insulation from distortion due to the pressure of the clamping rings.

1,354,006. PROCESS OF MAKING COMMUTATORS. SEBASTIAN N. SLOAN, Toledo, Ohio, assignor, by mesne assignments, to The Toledo Standard Commutator Co., Toledo, Ohio, a Corporation of Ohio. Filed May 2, 1918. Serial No. 232,087. 17 Claims. (Cl. 171—321.)

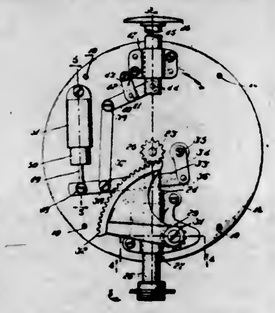


1. The process of making commutators which comprises assembling the segments on the barrel of a segment holder between end clamping rings, subjecting the segments to clamping pressure between the rings, providing between the segments and the barrel of the holder a hard pressure-resisting, insulating support, and subjecting the segments to a second and increased pressure between the clamping rings.

1,354,007. SPOOL OR HOLDER FOR COMMUTATORS. CHARLES A. VAN DUSEN, Toledo, Ohio, assignor, by mesne assignments, to The Toledo Standard Commutator Co., Toledo, Ohio, a Corporation of Ohio. Filed Feb. 24, 1919. Serial No. 278,970. 11 Claims. (Cl. 171—321.)

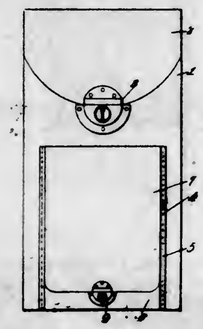
1. As an article of manufacture, a one-piece holder for the segments of a cylindrical commutator comprising a cylindrical body provided at its ends with integral segment clamping flanges having inner clamping faces normally a sufficient distance apart to permit the segments to be assembled around the body and adapted to be swaged inwardly over the segment tangs by pressure applied axially to opposite ends of the holder.

1,354,008. CURING-HOUSE. ROBERT B. VAUGHAN and RALPH M. LOVE, Dallas, Tex. Filed Feb. 2, 1920. Serial No. 355,611. 3 Claims. (Cl. 98—26.)



3. The combination with a curing house for sweet potatoes and the like, having a roof, of a pent house arranged upon the roof and extending above the same, said pent house having openings in its sides, a longitudinal beam arranged at the bottom of the pent house and forming two openings at such bottom, vertically swinging dampers arranged upon opposite sides of the longitudinal beam and hinged thereto and adapted to be moved to opened and closed positions, said dampers when closed serving to prevent air in the curing house passing into the lower end of the pent house doors arranged within the pent house and adjacent the sides thereof to cover the same, said doors being hinged at their upper ends and adapted to have their lower ends swung inwardly whereby the doors are angularly arranged and serve as guide means to direct the air to the sides of the pent house, and means to move the dampers and doors.

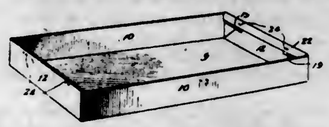
1,354,009. EMOLLIENT FOR MOTION-PICTURE FILMS. PAUL WERNER, St. Louis, Mo., assignor, by direct and mesne assignments, to Werner Film-Protector Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed Apr. 7, 1919. Serial No. 288,420. 4 Claims. (Cl. 134—9.)



4. An emollient composed substantially of one-half ounce (½ oz.) beeswax, six and one-half ounces (6½ oz.) paraffin wax, one ounce (1 oz.) pulverized camphor, one-half ounce (½ oz.) stearic acid, and seven and one-half ounces (7½ oz.) tallow.

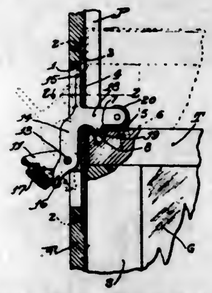
1,354,010. MICROMETER-CALIPER. ANDREW WYZENBEEK, Chicago, and ELISHA JESSE CADY, Oak Park, Ill.; said Wyzenbeek assignor to said Cady. Filed May 24, 1919. Serial No. 299,479. 4 Claims. (Cl. 33—147.)

1. In a calipering device, an anvil, a reciprocating handle, a reciprocating plunger, operating connections between the plunger and handle, a rack-bar on the plunger, means to adjust the bar to different angular positions on the plunger, a scale and revoluble pointer, a shaft carrying the pointer, gear connections between the shaft and rack-bar, and a return-spring for the plunger.



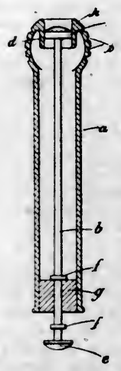
1,354,011. COMBINATION CAMERA AND FILM CASE. ROBERT LE ROY ATWELL, Atlanta, Ga. Filed Nov. 28, 1917. Serial No. 204,425. 1 Claim. (Cl. 190—52.)

The combination with a camera case, of a case, for holding films comprising a back strip of substantial thickness secured on one face of the camera case, sides secured to said face of the camera case and spaced from said back strip to provide channels for the reception of the end flanges of film spools, a flexible member constituting the top and a portion of the front of the film case and secured at one end between the camera case and the back strip of the film case, a flexible member constituting the bottom and a portion of the front of the film case and secured at one end between the camera case and the back strip of the film case, means for detachably connecting said flexible members, said members, when detached from each other, being adapted to move apart and into the same plane with the back strip of the film case to expose the entire interior of said case, and a series of alining spring clips secured to the back strip of the film case along the center thereof to hold a series of parallel film rolls transversely within the film case.



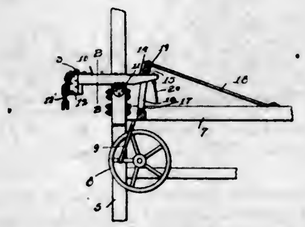
1,354,012. BOX. SIEGMUND BACHMANN, Chicago, Ill. Filed Nov. 10, 1916. Serial No. 130,619. 3 Claims. (Cl. 229—34.)

1. A box formed of a base, walls extending upwardly therefrom, corner-extensions connected with the walls of the box and having portions lying flatwise against adjacent box-walls, and flaps carried by the walls against which said extensions lie and overlapping said extensions at their ends, said corner-extensions having sections connected therewith at the upper extremities of said corner-extensions and interposed between the ends of said flaps



and portions of said corner-extensions lying flatwise against the box-walls, said sections directly underlying said flaps and directly overlying the last-referred-to portions of said corner-extensions and coöperating with said flaps to hold said box in erected condition.

1,354,013. SASH-LOCK. ALVA BAKER, Plattsburg, N. Y. Filed May 1, 1920. Serial No. 378,144. 3 Claims. (Cl. 292—128.)



1. In a sash lock, the combination with a keeper plate adapted for attachment to the top rail of the sash near one end thereof and having an opening; of a rightangular hook whose horizontal arm has a depending spur for engaging said opening, a roller pivoted in the inner end of this arm, the vertical arm of said hook depending from the outer end of its horizontal arm, a supporting element for attachment to the frame, said depending arm being pivoted to such element at a point below the horizontal arm, and yielding means normally turning the hook on its pivot to throw its horizontal arm inward and its spur downward into engagement with the opening in the keeper plate.

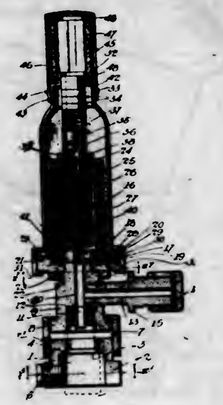
1,354,014. MEANS FOR APPLYING MEDICAMENTS TO THE BODY. REGINALD BAXTER, London, England. Filed July 19, 1920. Serial No. 397,332. 2 Claims. (Cl. 128—264.)

2. Means for applying medicaments other than fluids or liquids to the body including a hollow stem having a head provided with an inwardly turned cylindrical portion, a piston in said cylindrical portion, a removable closure for the end of the stem opposite the head, and a piston rod passing through said closure provided with checks or stops to engage the same.

1,354,015. DRILLING-MACHINE. ROY BEARD, Bowling Green, Ky. Filed July 3, 1920. Serial No. 393,915. 5 Claims. (Cl. 255—11.)

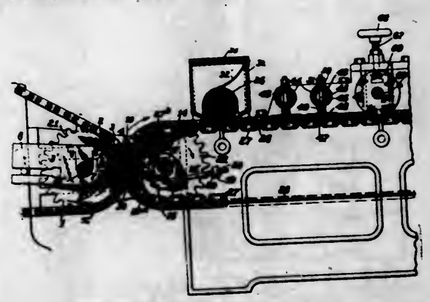
1. In combination with the derrick legs and the main walking beam of a drilling machine, an auxiliary walking beam pivotally supported by the derrick legs, a link member carried by the main walking beam and embracing a portion of the auxiliary walking beam, whereby movement of the walking beam causes a relative movement of the auxiliary walking beam, and anti-friction means carried by the link member and operating on the auxiliary walking beam.

1,354,016. GRAIN-SAMPLER. EMIL G. BOERNER and ELIHU H. ROPES, Washington, D. C. Filed Jan. 26, 1920. Serial No. 354,299. 1 Claim. (Cl. 83—15.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)



A device for the purpose described, consisting of united back and body portions forming a recess, and a handle secured to said back portion and extending at a right angle to the upper edges of said body portion, one of the sides of said body portion being of greater height than the opposite side.

1,354,017. PRESSURE-GAGE. JUNIUS A. BOWDEN, Los Angeles, Calif., assignor to A. Schrader's Son, Incorporated, New York, N. Y., a Corporation of New York. Filed Aug. 13, 1912, Serial No. 714,897. Renewed Dec. 7, 1918. Serial No. 265,786. 18 Claims. (Cl. 73—31.)

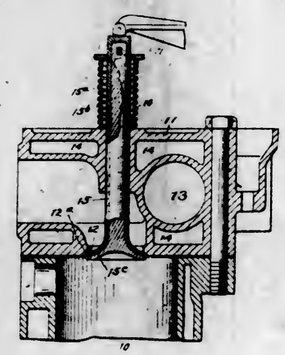


1. In a pressure gage, a barrel with a bead formed near its outer end, a shield with spring sections formed with a groove engaging said bead, a gage bar adapted for projecting from the barrel within the shield, and a glass tube between the shield and gage bar when projecting.

12. In a pressure gage, a supporting body, a flange thereon, a disk on said body below said flange, said disk having an annular recess, an expansible air chamber with a flange below said first flange and seated in said annular recess, a nut on said body for forcing said flange on the body and said disk toward each other to bind the flange of

the air chamber therebetween within said recess, a barrel surrounding the air chamber, a cap slidable in the barrel and secured to said air chamber for guiding the latter, a gage bar slidable in and protruding from said barrel and having coöperative engagement with the air chamber, and a spring opposing outward movement of the gage bar.

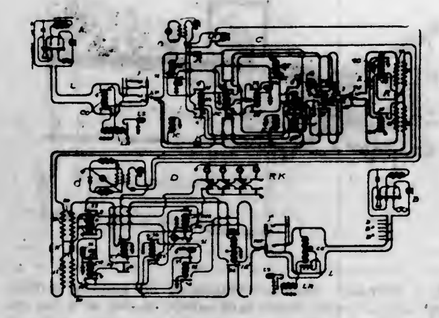
1,354,018. BRONZING-MACHINE. ADDISON W. BROCK, Baltimore, Md., assignor to H. Gamse & Bro., Baltimore, Md. Filed June 9, 1919. Serial No. 302,788. 21 Claims. (Cl. 91—59.)



5. A bronzing machine comprising an endless carrier, guide wheels about which said carrier moves with its upper and lower stretches substantially horizontal, grippers on the carrier for taking and releasing sheets, and means for supplying bronze to the sheets as they are being transported by the carrier.

6. In combination in a bronzing machine, a carrier for the sheets, a hopper for supplying the bronze material, a roller at said hopper having a portion of its periphery exposed at the lower end of the hopper for the delivery of the material onto the sheet, means for rotating the roller and adjustable means for limiting the length of the hopper space available for holding the bronze and consequently the effective length of the roll, substantially as described.

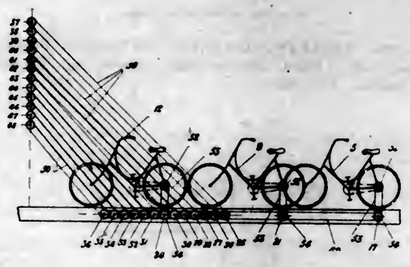
12. In combination with carrier means for transporting sheets, means for supplying bronze to the sheets, and rubbing means comprising a plate or bar, hangers for hold-



ing the same, an upper plate, springs for pressing the upper plate toward the lower plate and textile material extending over the lower face of the lower plate with its edges held between the plates, substantially as described.

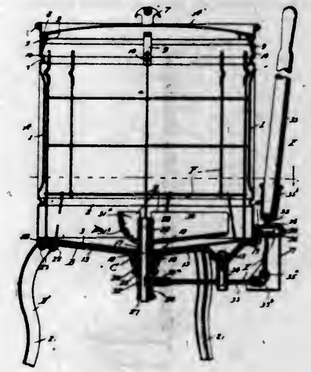
1,354,019. VALVE. ALANSON P. BRUSH, Detroit, Mich. Filed Feb. 16, 1918. Serial No. 217,651. 6 Claims. (Cl. 123—188.)

1. A valve adapted particularly for internal combustion engines comprising a stem with an enlarged portion serving as a head, and having relatively high heat conducting material covering the inner face of the head and extending along the valve stem.



1,354,020. TELEPHONE SYSTEM. HARRY W. BRYCE, Downers Grove, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 6, 1915. Serial No. 54,293. 25 Claims. (Cl. 179—50.)

16. In a telephone system, a two-conductor link circuit, a supervisory relay connected to said link circuit, a trunk circuit, manual means for connecting said link circuit to said trunk circuit, apparatus associated with said trunk circuit and controllable over the two conductors thereof in parallel to unite said link circuit conductors to actuate said supervisory relay.

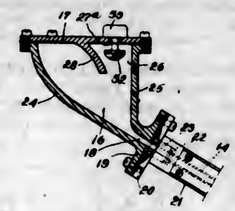


25. A telephone system including a manual link circuit, ringing means associated with said link circuit, a subscriber's line circuit, a trunk circuit, and means for said link circuit operative only when said link circuit is connected to said subscriber's line for initiating the operation of said ringing means.

1,354,021. APPARATUS FOR THE PURPOSE OF PROVIDING PUBLIC AMUSEMENT AND EXERCISE. HERBERT CLEGG, Burnley, England. Filed Feb. 11, 1920. Serial No. 357,841. 2 Claims. (Cl. 46—69.)

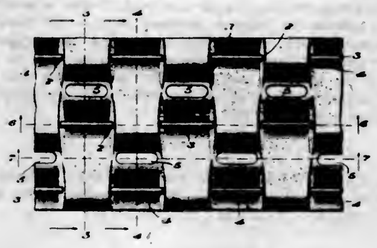
1. In an amusement apparatus, a series of stationary pedal-actuated machines arranged parallel to each other and facing in the same direction, a series of screws arranged horizontally and parallel to each other and crosswise of the stationary machines, a series of slidable indicating devices operated by the said screws, and driving devices connecting each stationary machine with the driving screw of the indicating device pertaining to it to give the effect of a race.

1,354,022. DISH-WASHING MACHINE. GEORGE W. CONOVER, Chicago, Ill., assignor to the C-K Co., Chicago, Ill., a Corporation of Illinois. Filed Nov. 20, 1915. Serial No. 62,479. 3 Claims. (Cl. 141—9.)



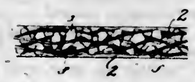
1. In a dish-washing machine, the combination of a vessel provided with substantially vertical corrugations, a rotary paddle in the lower portion of said vessel comprising a long arm and a short arm, the latter having surfaces adapted to direct the water upwardly and outwardly from the lower central portion of the vessel, and means for rotating said paddle.

1,354,023. TRAP FOR MANOMETER-TUBES. GARDNER CORNETT, Bronxville, N. Y., and CECIL W. STANCLIFFE, Toronto, Ontario, Canada, assignors to Pneumercator Company, New York, N. Y., a Corporation of Maine. Filed June 7, 1919. Serial No. 302,578. 15 Claims. (Cl. 73—54.)



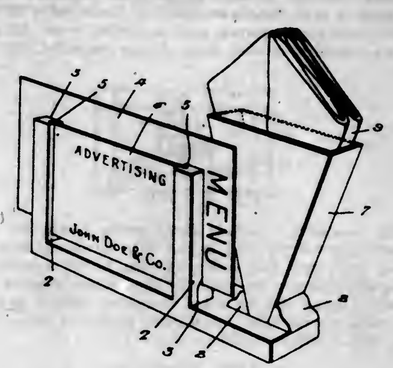
1. The combination with a manometer tube having an upper end, of a chamber in communication at its lower

part with said tube and provided with a vent in its upper part, and a baffle interposed between said vent and the



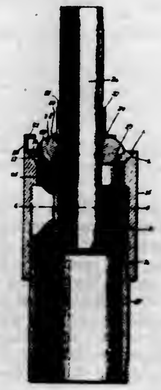
course of a stream flowing from the manometer tube into the chamber.

1,354,024. BUILDING FABRIC. WILLIAM CLAYTON CORYELL, Youngstown, Ohio, assignor to The General Fireproofing Company, Youngstown, Ohio, a Corporation of Ohio. Filed July 9, 1919. Serial No. 309,629. 5 Claims. (Cl. 20—13.)



1. A building fabric consisting of a body sheet crimped to form transverse rows of shallow undulations, and the hills and valleys of adjacent rows being arranged in staggered relation to produce longitudinal rows of corrugations, and metallic reinforcing members threaded through the corrugations of each longitudinal row.

1,354,025. METHOD OF STONE-SURFACING FIBROUS MATERIALS. WILLIAM CLAYTON CORYELL, Youngstown, Ohio, assignor to The General Fireproofing Company, Youngstown, Ohio, a Corporation of Ohio. Filed July 9, 1919. Serial No. 309,631. 6 Claims. (Cl. 91—68.)

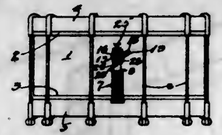


6. A method of water-proofing and fire-proofing relatively porous sheet materials having an oily combustible base, which consists in first rubbing a dust of waterproofing substance into the voids of the relatively porous base, and subsequently applying a coating of liquid artificial stone compound to the dust impregnated base to envelop the same.

1,354,026. MENU AND NAPKIN HOLDER. WILLIAM A. COX, Los Angeles, Cal. Filed Dec. 11, 1919. Serial No. 344,253. 2 Claims. (Cl. 40—124.)

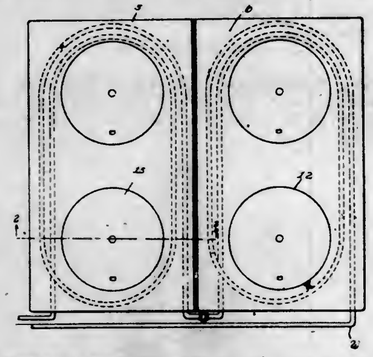
1. A menu holder comprising a base and a pair of posts rising from the base, said posts having vertical slots for receiving a menu card, and vertical grooves in their adjacent sides at opposite sides of said slots for receiving advertising cards.

1,354,027. GAS-ENERGY-CONTROL HEAD FOR OIL-WELLS. ERD V. CROWELL, Tulsa, Oklahoma. Filed Aug. 30, 1919. Serial No. 320,870. 7 Claims. (Cl. 166—2.)



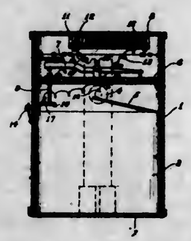
1. A device of the character described, comprising a tubular body portion to be connected with the anchor packer arranged within the casing of an oil well, a movable valve to control the discharge of fluid from the upper end of the tubular body portion, a second movable valve to control the discharge of fluid from the tubular body portion and to control the opening movement of the first named valve, and a tubing leading into the tubular body portion and vertically adjustable with relation thereto and carrying an element to engage with the second named valve.

1,354,028. SNARE-TENSIONING DEVICE FOR DRUMS. ROBERT C. DANLY, Chicago, Ill., assignor to Ludwig & Ludwig, Chicago, Ill., a Corporation of Illinois. Filed May 28, 1919. Serial No. 300,265. 10 Claims. (Cl. 84—127.)



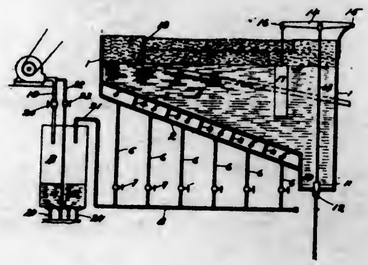
1. A snare tensioning device comprising a slotted support, a slotted cam mechanism pivotally mounted thereon,

a slidable member mounted on said support, a roller mounted thereon and engaged in the slots in said support and in said cam mechanism, a string tensioning member slidably mounted on said support, an adjusting screw mounted on said slidable member and connected with said string tensioning member, said adjusting screw adapted to be actuated to tension snare strings connected with the



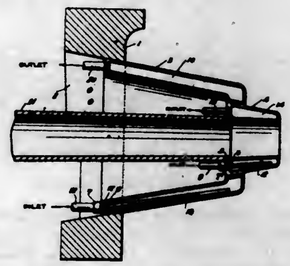
string tensioning member, and locking means on said adjusting screw for holding the same in an adjusted position, said cam mechanism adapted to be operated to cause simultaneous movement of the slidable member, the adjusting screw and the string tensioning member to move the snare strings from an adjusted tensioned snare position into a release position.

1,354,029. AUXILIARY STOVE-TOP. ESTELLA DEFFENBAUGH, Berkeley, Calif. Filed Feb. 26, 1920. Serial No. 361,521. 1 Claim. (Cl. 126—53.)



A separable auxiliary stove top including plates, each of said plates having its side and rear walls bent at right angles to form supporting flanges, one of said plates having a downwardly and upwardly extending flange providing a V-shaped groove, one of the walls of the opposite plate extending downwardly at an angle, and adapted to be positioned within the groove, and each of said plates having burner openings, and sinuous water pipes surrounding said openings, adapted to be detachably connected approximately in line with said groove.

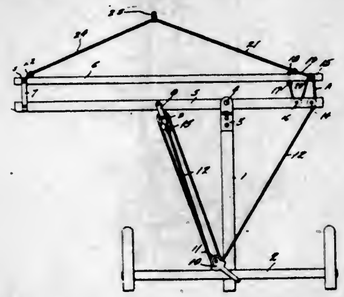
1,354,030. SIGNALING DEVICE. ANDERSON DILLY, Brooklyn, N. Y. Filed Nov. 4, 1919. Serial No. 335,716. 3 Claims. (Cl. 240—8.5.)



1. A portable signal device comprising a container, a light bulb mounted thereupon, a key member for producing the flashes of light in code signaling, a source of electric current including circuit wires, means upon which the said circuit wires are wound when the key member is operated from the container, said key being removable from the container to permit signaling when the key is relatively distant from the container and the circuit wires are unwound.

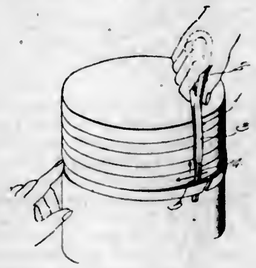
1,354,031. ORE-CONCENTRATING APPARATUS. BENJAMIN H. DOSENBACH, Butte, Mont.; Edna M. Dosenbach executrix of said Benjamin H. Dosenbach, deceased. Filed Jan. 28, 1918. Serial No. 214,104. 2 Claims. (Cl. 83—55.)

1. In a device of the class described, a vaporizing vessel, means for forcing air into contact with a modifying agent therein to form a mixture of air and vaporized modifying agent, means for controlling the proportion of air and modifying agent in said mixture and the pressure of the mixture and means for introducing said mixture under said regulated pressure into ore pulp contained in a flotation cell.



1,354,032. TWYER AND COOLING-BOX. JAMES P. DOVEL, Birmingham, Ala. Filed Oct. 30, 1917. Serial No. 199,345. 2 Claims. (Cl. 122—6.6.)

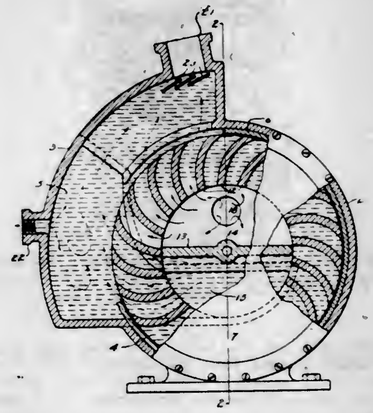
1. The combination with a twyer and the like having a water chamber and a threaded water inlet port in its outer wall, of a fitting having its inner end externally threaded, an internal shoulder beyond which the bore of the fitting is enlarged toward its inner end, internal threads in the outer end of said bore, and a water discharge pipe inserted with a loose fit through the bore of the fitting and having its outer end flanged to engage said shoulder, substantially as described.



1,354,033. DRAFT-EQUALIZER. THOMAS J. DUDLEY, Dallas, Tex., assignor of one-fourth to A. L. Gracey, Dallas county, Tex. Filed Sept. 2, 1919. Serial No. 320,978. 2 Claims. (Cl. 278—1.)

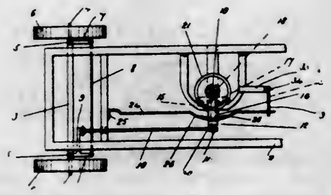
1. In a draft equalizer, the combination with the draft connection of a vehicle, of a transverse evener beam pivotally attached to said draft connection at a point whereby it is divided into a long portion and a short portion, a draft bar pivotally attached to the extremity of the long portion of the evener beam, a pulley block pivoted to the long portion of the evener beam adjacent the center of said beam, a second pulley block connected with a fixed point on the vehicle in rear of the evener beam, a flexible connection having one end secured to one of the pulley blocks and passing between said blocks in several strands, the

other end of the flexible connection extending to the extremity of the short portion of the evener beam and formed into a loop, a pulley in the short end of the evener beam over which the looped end of the connection passes, a pulley disposed in the free end of the draft bar and within the looped end of the connection around which the latter passes, and a draft connection attached to the ends of the draft bar.



1,354,034. PISTON-RING TOOL. NEIL COGSWELL ENSWORTH, Warren, Pa. Filed Sept. 4, 1919. Serial No. 321,538. 2 Claims. (Cl. 29—84.)

1. A tool for applying and removing piston rings comprising a single strip of metal having a handle formed at one end, the opposite end thereof being flattened and reduced in thickness from the handle to the end of the strip to form a shank, said shank being longitudinally curved, the end portion thereof being of less width than the portion adjoining the handle.

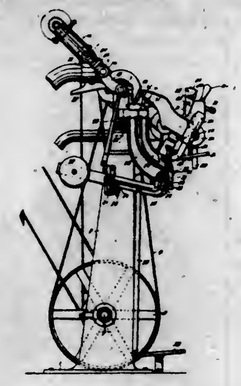


1,354,035. ROTARY COMPRESSOR. BION B. FARNHAM, Kenmore, N. Y. Filed Apr. 9, 1919. Serial No. 288,698. 1 Claim. (Cl. 230—14.)

A rotary compressor, comprising a housing forming a main chamber and an auxiliary chamber in communication with each other, said main chamber being divided into an upper and a lower chamber, an air intake port communicating with said upper chamber, an air outlet port communicating with said auxiliary chamber, adjustable means for changing the location of said upper and lower chambers with relation to the auxiliary chamber, means for supplying water to said auxiliary chamber, an overflow duct connecting the auxiliary chamber with said lower chamber, an impeller including a pair of members connected together by a plurality of curved blades extending radially of the main chamber and having ducts therebetween adapted to communicate with said upper and lower chambers, said ducts being adapted to receive water

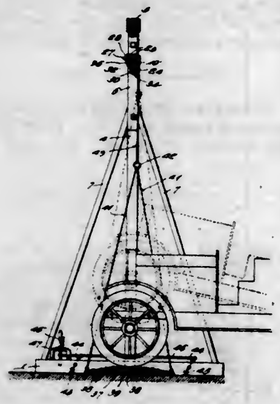
when in communication with the lower chamber, means for rotating said impeller thereby to forcibly eject the water therefrom into the auxiliary chamber during the communication of its ducts with the upper chamber, and baffles within the auxiliary chamber opposite the air outlet port.

1,354,036. STEERING ATTACHMENT FOR TRACTORS. RALPH S. FARNSWORTH, Loda, Ill. Filed Nov. 25, 1919. Serial No. 340,515. 3 Claims. (Cl. 280—89.)



1. The combination, with the steering mechanism of a tractor provided with a crank mounted to oscillate in a vertical plane and provided with a lateral projection, of a spring plate secured to the tractor at one end and having a laterally projecting portion having an opening for engaging automatically with the said projection and thereby holding the said crank stationary.

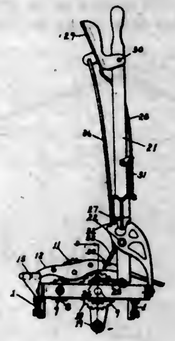
1,354,037. HEEL-BREAST-TRIMMING MACHINE. LOUIS G. FREEMAN, Cincinnati, Ohio, assignor to Louis G. Freeman and Charles F. Freeman, trustees, Cincinnati, Ohio. Filed June 15, 1917. Serial No. 174,824. 25 Claims. (Cl. 12—47.)



1. In a machine of the class described, adapted to trim the heel breasts of boots and shoes, a rotary cutter, a rocking frame, a movable jack carried thereby and adapted to hold a shoe, means to adjust said jack so that the heel

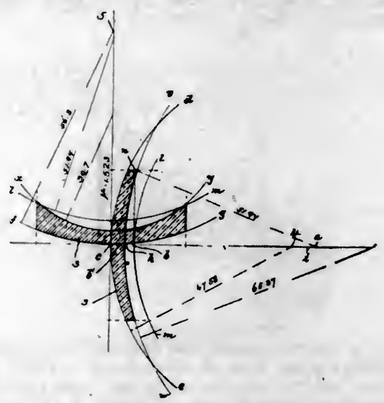
breast is presented to the cutter in a predetermined angular position to clear the shoe shank, and means to

move the jack and shoe toward and from said cutter in said angular position while thus adjusted.



1,354,038. VEHICLE-HOISTING DEVICE. WILLIAM C. GEORGE and FRED N. NOFSGER, Humboldt, Nebr. Filed Sept. 15, 1919. Serial No. 323,740. 4 Claims. (Cl. 187—9.5.)

1. In a vehicle hoisting device, the combination of a flexible platform consisting of a plurality of bars hingedly connected together at adjacent edges, and means for raising and lowering said platform, said means including suspending elements fastened to the ends of the outermost bars of said platform whereby the latter is permitted to flex around a pair of wheels supported thereon.

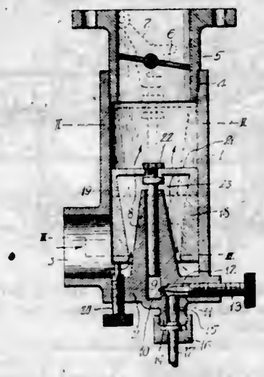


1,354,039. PLANTER. JOSEPH HAINES, Lawton, Mich. Filed Oct. 31, 1919. Serial No. 334,837. 4 Claims. (Cl. 74—58.)

1. In a structure of the class described the combination of a driven shaft, a driving shaft, a driving wheel rotatably mounted on said driving shaft, a pawl carried by said driving shaft coacting with said driving wheel, a rock shaft provided with a trip normally disengaging said pawl, a set of driving gears of different diameters splined upon said driving shaft, a gear on said driven shaft, a connecting gear adapted to mesh with said driven shaft gear and with the driving gear aligned therewith, a pivoted support for said connecting gear whereby it may be lifted out of mesh to permit the shifting of said driving gears, a shifting lever for said driving gears provided

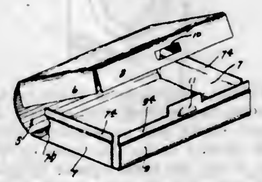
with a detent, a coacting segment and a pivoted hand-piece connected to said detent, and a link connecting said hand-piece to said connecting gear support whereby said connecting gear is lifted out of mesh to permit the shifting of said driving gears when said lever detent is released.

1,354,040. SPECTACLE-LENS. JAMES H. HAMMON, Vincennes, Ind. Filed Feb. 19, 1919. Serial No. 277,964. 7 Claims. (Cl. 88—54.)



1. A spectacle glass whose convex front surface is normal to the field of direct vision through all points in the visual field.

1,354,041. CARBURETER. CLARE W. HESS, Flint, Mich. Filed Jan. 2, 1918. Serial No. 209,992. 1 Claim. (Cl. 261—62.)

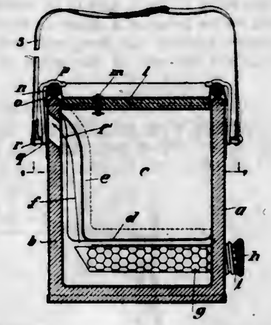


A carbureter comprising a cylindrical body having a side air inlet connection, a conical shaped nozzle integral with the bottom of said body and provided with a cylindrical bore extending into the bottom of said body, a fuel inlet communicating with said nozzle, an air valve free to slide in said body to and from said conical nozzle and having an inner wall tapered the reverse of the wall of said nozzle and the small end in proximity to the bottom of said cylindrical body and capable of seating thereon, a cylindrical metering pin loosely connected to said valve

and extending into the bore of said nozzle, and a screw carried by the lower end of said body engaging the lower

end of said valvular member and adapted to limit the downward movement of said valvular member in said cylindrical body.

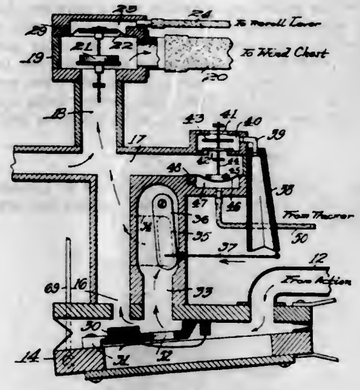
1,354,042. CIGARETTE-CASE. BENJAMIN F. HUNZIKER, Minneapolis, Minn., assignor to Julius F. Hunziker, Minneapolis, Minn. Filed Mar. 8, 1920. Serial No. 364,057. 1 Claim. (Cl. 206—41.)



A cigarette case formed from a single piece of sheet metal bent on a curve at its intermediate portion to form a bowed spring acting edge wall, tending to open the case, and with the two sides forming portions of the sheet at their edges and ends having coöperating lapping flanges, said edge forming flanges having yieldingly engaging interlocking elements, and one of said end forming flanges adjacent to the bowed edge of the case, having a passage that is always open when the case is closed, to permit the endwise discharge of cigarettes, one at a time, all of the other edge forming flanges having curved ends located immediately adjacent to said bowed edge of the case, substantially as described.

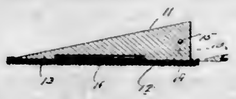
1,354,043. WEED-DESTROYER. GEORGE KRAMER, Dysart, Iowa. Filed Oct. 23, 1919. Serial No. 332,807. 1 Claim. (Cl. 167—6.)

A weed-destroying compound, composed of substantially equal portions of lye and salt, a larger portion than either of saltpeter, and a larger portion of slack coal than of saltpeter.



1,354,044. PORTABLE-COOKER ARRANGEMENT. FRANZ KRÜGER, Berlin, Germany. Filed July 3, 1916. Serial No. 107,480. 4 Claims. (Cl. 126—261.)

2. In a portable cooking device comprising a casing, a food vessel disposed within said casing, a heating chamber extending below that vessel transversely above the bottom of said casing through the whole length of said food vessel, a chimney arranged at one end of that chamber at right angles to it and leading to the upper edge of said casing, an opening in the wall of said casing at the other end of said heating chamber, a heating device for solid



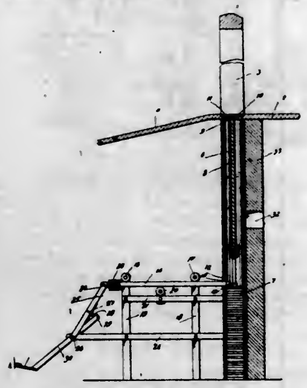
fuel, arranged within that chamber and extending from said opening to the other end of said chamber and nearly to the lower end of the chimney.

1,354,045. EXPRESSION DEVICE FOR AUTOMATIC MUSICAL INSTRUMENTS. HERBERT J. LA JOIE, Orange, N. J., assignor to Autopiano Company, a Corporation of New York. Filed June 17, 1918. Serial No. 240,306. 3 Claims. (Cl. 84—42.)

1. In an expression mechanism for automatic musical instruments, a player action, an exhaust connection, a tracker-bar having an expression opening therein, pneumatic means to increase the air tension in the action, controlled from said tracker opening, an expression regulating pneumatic through which the air is exhausted, and manual means to positively expand said pneumatic to increase the air tension on the action.

1,354,046. DOOR-HOLDER. EDWIN LANNING, La Casa, Tex. Filed Mar. 18, 1920. Serial No. 366,848. 1 Claim. (Cl. 292—343.)

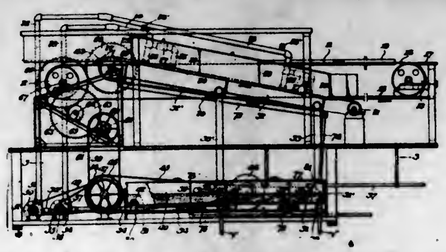
A door holder comprising a wedge block adapted for engagement between the carpet of a floor and the bottom



edge of a door, said block being cut out in its carpet engaging face to provide a recess and resultant end bosses, and a pivoted yoke carried by the thicker end of the block for suspending the block at times, and to lie within the recess at times, said recess being of a depth to receive the yoke when so engaged beneath the door, and said yoke being arranged to permit the pile of the carpet to pass therethrough.

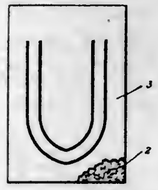
1,354,047. POCKET FOR GARMENTS. SAUL LEVINE, New York, N. Y. Filed Sept. 22, 1919. Serial No. 325,293. 4 Claims. (Cl. 2—15.)

1. A double pocket construction for a garment, having a pocket opening therein, comprising an inner wall member including a part folded to form a reëntrant portion, said inner wall member having its edges secured to the inner face of the garment down to the reëntrant portion and the inner wall of the reëntrant portion being secured to the inner face of the garment along its lower and side edges.



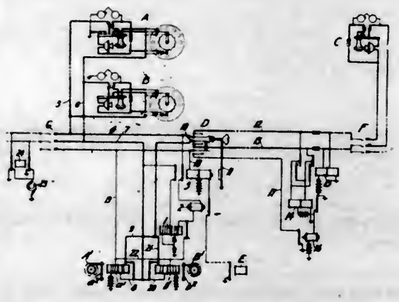
1,354,048. SAFETY-GUARD. CHARLES J. LINDSTROM, Clinton, Mo. Filed Mar. 15, 1920. Serial No. 366,086. 11 Claims. (Cl. 268—2.)

1. The described device consisting of a blind, a spring upon which the blind is mounted and a tube in which the spring is inclosed, said tube being split to accommodate said blind.



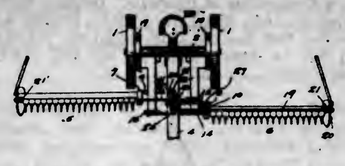
1,354,049. DISH-WASHER. JESSE LINTON, Philadelphia, Pa. Filed Sept. 8, 1917. Serial No. 190,282. 2 Claims. (Cl. 141—9.)

2. In a dish washing machine, the combination of means for automatically carrying dishes from a charging point to a discharging point including two conveyer belts and means for automatically transferring dishes from the first belt to the second belt and then at a required interval



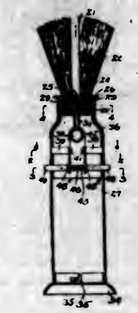
back to the first belt, and stream ejector devices operating upon the dishes while in transit for washing and rinsing the same.

1,354,050. ROOFING-TILE. ARTHUR LOVELL, Douthat, Okla. Filed Jan. 10, 1920. Serial No. 350,525. 2 Claims. (Cl. 108—17.)



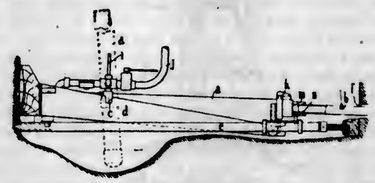
1. A roofing tile, comprising a sheet or body portion of compressed felt impregnated with asphalt, and a facing plate of metallic sheet zinc permanently secured to one asphalted side surface of the felt body portion, one exposed surface of the tile being formed by the sheet zinc and its other exposed surface being formed by the compressed felt.

1,354,051. CALL-REGISTERING SYSTEM. ALBEN E. LUNDELL, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 30, 1918. Serial No. 256,232. 21 Claims. (Cl. 179—9.)



1. In a telephone system, a party line having a plurality of substations, a register mechanism individual to each of said substations, means for selecting one of said mechanisms upon the initiation of a call at the associated substation, and means for reversing the current through said register mechanism to cause the operation thereof.

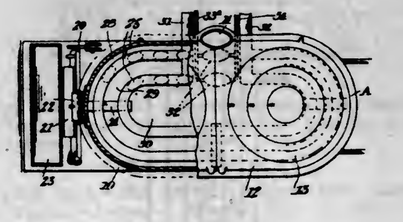
1,354,052. TWO-WAY MOWER. WILLIAM MCDONALD, Twin Falls, Idaho. Filed Feb. 19, 1920. Serial No. 359,957. 3 Claims. (Cl. 56—288.)



1. The combination in an implement as described including the hinged cutter bar and tongue, of a lift bar pivoted at the free end of the cutter bar, an oscillatable disk supported on the tongue, said lift bar pivoted to the disk, and a lever attached to the disk, and means for holding the disk in stationary position.

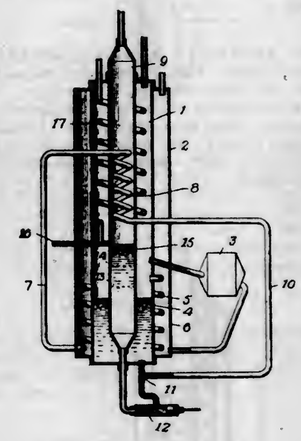
1,354,053. LATHER-BRUSH FOR POWDERED SOAP. FRANK MCLAUGHLIN, Philadelphia, Pa. Filed Sept. 5, 1919. Serial No. 321,950. 16 Claims. (Cl. 132—33.)

1. In a lather brush, a brush body having a hollow center of small diameter as compared with the base and extending from the point of the bristles to the base thereof to form an orifice adapted to receive powder, and a handle for the brush.



1,354,054. EARTH-BORING MACHINE. ARTHUR RIVINGTON MANGNALL, Chester, and ROY FORBES IRVING, Clifton, Bristol, England. Filed July 31, 1920. Serial No. 400,512. 9 Claims. (Cl. 37—39.)

1. An earth boring machine comprising a frame having means for clamping the same in a position adjacent to the mouth of the bore to be produced, a second frame adjustably connected to the first frame, a hydraulic cylinder pivotally mounted in the second frame, and a hydraulic plunger in said cylinder.

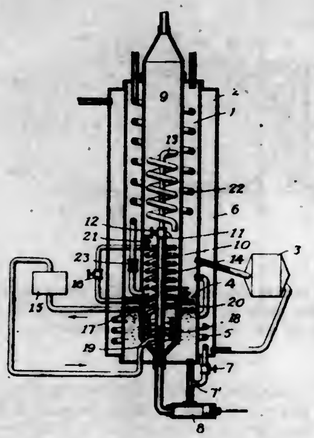


1,354,055. HEATER. ROBERT NICHOLAS MURPHY, Ottawa, Ontario, Canada. Filed Aug. 25, 1919. Serial No. 319,708. 5 Claims. (Cl. 126—5.)

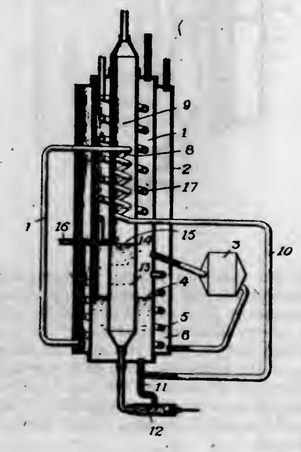
1. In a heater, a body portion formed with a water jacket, water circulating elements located in the heater and spaced from the jacket to provide fuel space between the elements and the walls of the jacket, an additional

fuel space within the confines of the elements, said fuel spaces being open at the top and designed to be fired alternately as and for the purpose set forth.

1,354,056. PROCESS OF SEPARATING MIXED GASES. FRED E. NORTON, Worcester, Mass., assignor to Jefferies-Norton Corporation, a Corporation of Delaware. Filed Aug. 31, 1915, Serial No. 48,325. Renewed July 29, 1919. Serial No. 314,162. 16 Claims. (Cl. 62—175.)



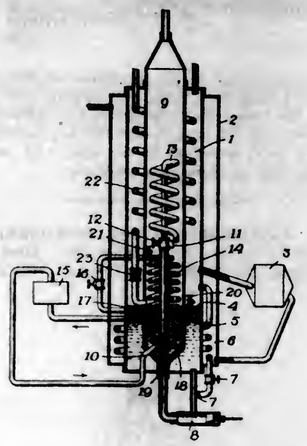
1. The herein described process of separating mixed gases, by liquefaction and distillation, comprising the increase of pressure on the liquefied portion, the progressive liquefaction of the incoming mixture by the evaporation of said liquefied portion under its increased pressure, the rectification of the evaporate from said liquefied portion under its increased pressure by the vapor residue of progressive liquefaction, and the condensation of said vapor residue in said liquefied portion, before the increase of pressure thereon.



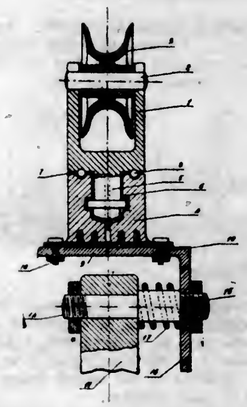
1,354,057. PROCESS OF SEPARATING MIXED GASES. FRED E. NORTON, Worcester, Mass., assignor to Jefferies-Norton Corporation, a Corporation of Delaware. Filed Oct. 20, 1915, Serial No. 56,987. Renewed July 29, 1919. Serial No. 314,163. 14 Claims. (Cl. 62—175.)

1. The herein described process of separating a mixed gas, comprising the liquefaction thereof, the increase of

pressure on the liquid, the distillation of said liquid under increased pressure by the addition of latent heat extracted from the fluid undergoing liquefaction and the rectification of the products of distillation by means of said liquid.

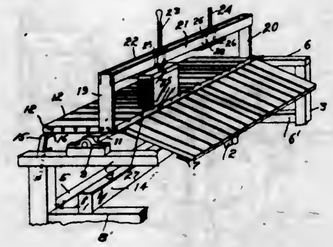


1,354,058. APPARATUS FOR THE SEPARATION OF MIXED GASES. FRED E. NORTON, Worcester, Mass., assignor to Jefferies-Norton Corporation, Worcester, Mass., a Corporation of Delaware. Original application filed Aug. 31, 1915, Serial No. 48,325. Divided and this application filed Jan. 26, 1918, Serial No. 213,887. Renewed July 14, 1920. Serial No. 396,334. 21 Claims. (Cl. 62—122.)



1. A system of the class described, for separating mixed gases by progressive liquefaction and rectification, comprising a reverse flow interchanger providing a rectifying column, and means for maintaining a pressure in said column higher than the pressure at which liquefaction of the gas takes place.

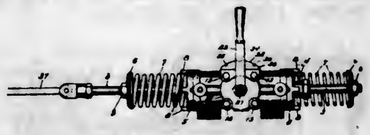
1,354,059. APPARATUS FOR THE SEPARATION OF MIXED GASES. FRED E. NORTON, Worcester, Mass., assignor to Jefferies-Norton Corporation, Worcester, Mass., a Corporation of Delaware. Original application filed Oct. 20, 1915, Serial No. 56,987. Divided and this application filed Jan. 28, 1918, Serial No. 214,051. Renewed July 14, 1920. Serial No. 396,335. 18 Claims. (Cl. 62—122.)



1. A system for the separation of mixed gases by progressive liquefaction and rectification, comprising a reverse flow interchanger providing a rectifying column, means for maintaining a pressure in said column higher than the pressure at which liquefaction of the gas takes place, and means for transferring latent heat from the fluid undergoing liquefaction to the high pressure fluid in said rectifying column.

1,354,060. TROLLEY FOR ELECTRIC TRAMWAYS. GIOVANNI ODIERNO, Milan, Italy. Filed June 26, 1919. Serial No. 306,973. 1 Claim. (Cl. 191—60.)

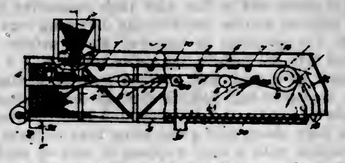
In combination with a deformable parallelogram in a trolley device for electric cars, rods forming a part of the parallelogram and having the lower ends pivoted to the roof of the car, a plate forming a part of the parallelogram and having a lateral wing projection pivoted laterally to the upper ends of the rods, friction springs intermediate the wing projection and rods, a sectional support having a central socket, means for fastening the support centrally on said plate, a forked member having a downwardly extending pivot rotatably arranged in said socket, a seating on said support, ball bearings intermediate the seating and forked member, and a grooved roller mounted in said forked member.



1,354,061. PAPER-PAD PRESS. ROBERT R. PALMER, San Francisco, Calif., assignor of one-third to August E. Drucker, San Francisco, Calif. Filed Dec. 3, 1919. Serial No. 342,130. 4 Claims. (Cl. 100—57.)

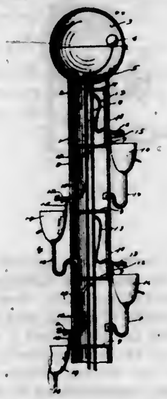
1. A paper pad press comprising a frame, a support movably mounted thereon, a second support hinged to the first support, and means to press a bundle of sheets against the first support.

4. A paper pad press comprising a frame, a support movably mounted therein, a second support hinged to the first support, three stops on the frame adapted to hold the two supports in a trough position, to hold one support horizontal and to hold that support vertical and means to hold a series of pads on the first support.



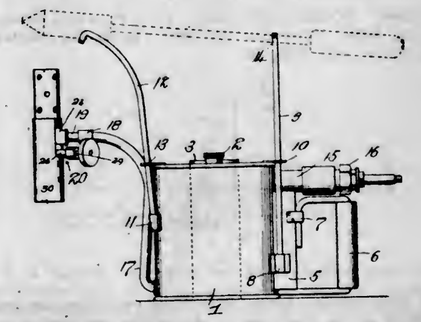
1,354,062. HEADLIGHT-TURNING MECHANISM. ALFRED PAYNE, Quebec, Quebec, Canada. Filed Oct. 23, 1919. Serial No. 332,629. 4 Claims. (Cl. 240—61.)

1. In a lamp turning mechanism, the combination of a lamp pivoted to swing upon a vertical axis, a cylinder provided with end heads and having supply and exhaust ports communicating with the opposite ends thereof, a rod slidable through said end heads and movable longitudinally of the cylinder, a piston carried by said rod and operating within the cylinder, abutments upon the projecting ends of the rod, springs surrounding the opposite ends of the rod between the abutments and end heads of the cylinder for resisting movement of the piston in opposite directions and for normally maintaining said piston in a position centrally of the cylinder, connecting means between the rod and lamp, and valve mechanism controlling the supply and exhaust of fluid to and from the ends of the cylinder.



1,354,063. APPARATUS FOR GRADING FINELY-COMMINUTED MATERIALS. CLARENCE Q. PAYNE, New York, N. Y. Filed Aug. 7, 1919. Serial No. 315,944. 16 Claims. (Cl. 83—54.)

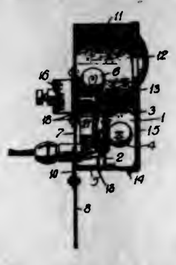
1. Apparatus for the sizing of finely comminuted material, comprising an endless belt and means for operating the belt to cause the finer particles to adhere to the surface thereof, means for varying the resistance to the motion of the different-sized granular particles along the discharge end of the belt, means for collecting separate



groups of said granular particles and means for removing the finer particles adhering to the belt, from the lower flight thereof.

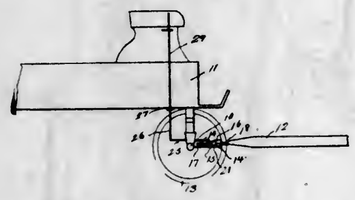
1,354,064. SANITARY DRINKING-FOUNTAIN. GEORGE R. PRATT, Williston, N. D. Filed Mar. 22, 1918. Serial No. 223,985. 2 Claims. (Cl. 299—8.)

1. A drinking fountain, comprising in combination, a casing serving as a waste pipe, a feed pipe therein, a plurality of horizontally extending nozzles mounted in the casing for vertical sliding movement and for vertical tilting movement therein, a basin carried by each nozzle, a flexible connection between each nozzle and the feed pipe, and a flexible connection between each basin and the waste pipe.



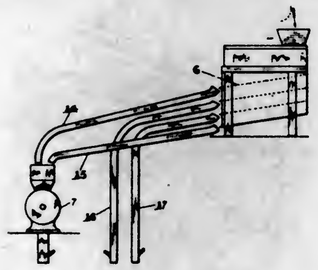
1,354,065. TOOL-HOLDER FOR BLOW-TORCHES. WILLIS PRUESSING and CARL PRUESSING, Syracuse, Nebr. Filed Sept. 18, 1916. Serial No. 120,732. 1 Claim. (Cl. 126—236.)

A device of the character described comprising a torch including a tank, an air pipe leading into the same at one side, a gas pipe leading out of the tank at the opposite side and carried upward and bent forward, and an upright



tubular burner to which the gas pipe delivers; plates secured upon the tank at front and rear and each having two openings, sockets secured to the wall of the tank below said plates and in line with their respective openings, a rear support having downwardly diverging legs passing through the openings in the rear plate, astride the air pipe and into the sockets, its upper end having a seat for the shank of a tool, and a front support having downwardly diverging legs passing through the openings in the front plate, astride the gas pipe, and into the front sockets, its body above said plate being bent forward and its top provided with a seat disposed in rear of said burner and adapted to support the head of a tool.

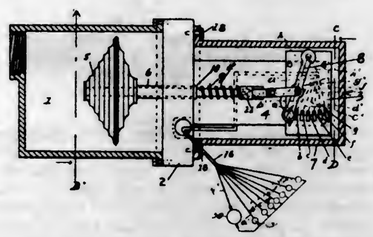
1,354,066. SIGNAL FOR AUTOMOBILES. FERDINAND C. ROBERTS, Detroit, Mich. Filed Oct. 16, 1916. Serial No. 125,793. 2 Claims. (Cl. 40—132.)



1. In tail light construction wherein a pair of lamps are supported to illuminate two independent warning signals and a license number plate, means for supporting the elements in relative positions, said means including a casing having a body portion having a partition to divide the body portion into two compartments arranged in front and rear relation, the vertical portion of the partition carrying one of such lamps located in the front compartment in rear of one of the signals, a hood overlying both compartments and in open communication with the rear compartment, said hood carrying the second signal, a lamp for the second signal supported by the rear wall of the casing and positioned above said rear compartment and within the hood, said second compartment having a bottom adapted to permit passage of light rays therethrough, a license number plate supported by the rear wall of the casing to position it in rear of such light rays, and lamp connections located within the rear compartment, the lamps and connections being so disposed as to permit substantially unobstructed passage of light rays from the second lamp to said compartment bottom.

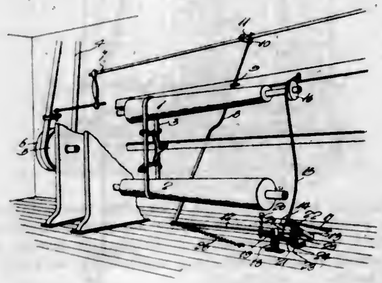
1,354,067. HORSE-DETACHER. PAUL STEWART, Brocksburg, Nebr. Filed Mar. 22, 1918. Serial No. 224,023. 1 Claim. (Cl. 278—29.)

A horse detacher including members carried by the rear portions of the draft pole of the vehicle and having upwardly extending angular lugs, members pivotally connected to the axle of the vehicle and having gripping arms one of which is flexible and formed with terminal socket portions for receiving and holding the lugs of the pole means, a transverse shaft carried by the vehicle and having angular heads on the ends thereof disposed between the gripping arms, and means for rotating said shaft whereby the said heads will engage and flex the said flexible gripping arms out of engagement with the lugs of the pole means.



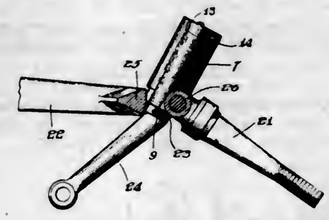
1,354,068. MANUFACTURE OF ANIMAL FOODS FROM KITCHEN WASTE AND THE LIKE. RICHARD L. D. TAYLOR, Toronto, Ontario, Canada, assignor to Predigest Food Company, Limited, Toronto, Ontario, Canada. Filed Feb. 25, 1919. Serial No. 279,111. 6 Claims. (Cl. 99—5.)

3. A process of treating garbage which consists in pulping the material; then drying and tumbling the pulped material to cause the formation of nodules; cooking the product of the previous step in the process without agitation to avoid breaking up the nodules; and screening the dried and cooked product to separate the nodules from the coarser and finer parts.



4. A process of treating garbage which consists in mixing with the same a pulverulent absorbent vegetable filler; pulping the partly dried mixture; and then drying the pulp at a temperature over 300° Fahr., at the same time tumbling the pulped material to cause the formation of nodules.

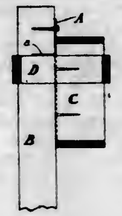
1,354,069. SAFETY APPLIANCE FOR SHIPS. ALOYSIUS S. TERHAAR, San Diego, Calif. Filed Dec. 1, 1916. Serial No. 134,520. 1 Claim. (Cl. 200—81.)



A device of the class described, adapted to be mounted in the keel of the ship, in combination, a disk having a central hole therein; a tube mounted in said hole; a normally expanded collapsible member 5 mounted on said tube; a shaft mounted within said tube, said shaft having one end extending within said collapsible member and attached to the apex thereof, and the opposite end extending without said disk; a water chamber mounted on said disk and inclosing said collapsible member, said water chamber having a water inlet adapted to communicate with the outside of the ship in which it is mounted; a bracket mounted on said disk outside said water chamber; a guide block for said shaft mounted on said bracket; a collar mounted on said shaft; a spring mounted on said shaft between said guide block and said collar whereby auxiliary resistance is afforded to the pressure of the water on the member 5; a switch having a plurality of points, mounted on said bracket; a connecting pitman for said shaft and said switch; and a housing mounted on said disk without said water chamber to protect the members which are mounted on said bracket; substantially as described and for the purposes set forth.

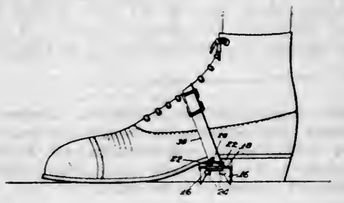
1,354,070. SAFETY STOP-MOTION FOR SPEEDER-MACHINES. WALTER F. TRAYWICK, Belmont, N. C., assignor of one-third to Benjamin T. Bumgardners, Belmont, N. C., and one-third to Charles E. Ware. Filed Aug. 7, 1919. Serial No. 315,933. 2 Claims. (Cl. 74—46.)

1. The combination with a speeder machine, of a lever fulcrumed to a stationary part of the machine and operatively connected to the belt shifting rod thereof, a brake for one of the upper cones of the machine, a stop fixed to a stationary part of the machine, a trigger connected to said lever and engageable with said brake, said trigger being engageable with said stop when in set position to hold said lever and said brake inoperative, and a second lever fulcrumed to a stationary part of the machine and engageable with said trigger to release the latter and permit said first lever and said rod to shift and said brake to be applied, said second lever being positioned beneath and adapted to be engaged by the corresponding lower cone of the machine upon breaking of the belt connecting said cones.



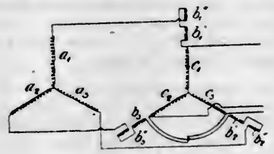
1,354,071. AUTOMOBILE-LOCK. EVERETT ST. JOHN, Philadelphia, Pa. Filed May 29, 1917. Serial No. 171,610. 6 Claims. (Cl. 70—90.)

1. An automobile lock comprising a body adapted to be inserted between the axle supporting sleeve and the sleeve supporting bracket and to be withdrawn therefrom, and locking means for securing said body in said inserted position.



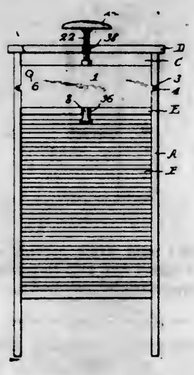
1,354,072. BUFFER-BRACKET FOR PICKER-STICKS. JOSEPH SAVOIE, Central Falls, R. I. Filed July 12, 1920. Serial No. 395,756. 1 Claim. (Cl. 139—21.)

A buffer bracket for loom picker sticks consisting of a flat body struck up from sheet metal adapted to be secured by screws to both the buffer and the picker stick; and having separable side arms disposed one on each side



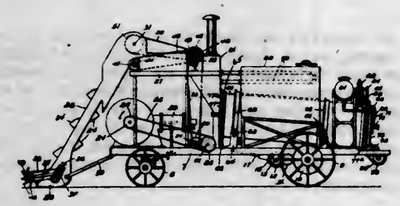
of the picker stick; said arms serving to prevent side movement of said bracket and also to retain in position the tape binding D, substantially as shown.

1,354,073. ICE-CREEPER. ABRAHAM SCHEMEL, Yonkers, N. Y. Filed May 29, 1920. Serial No. 385,312. 3 Claims. (Cl. 36—62.)



1. An apparatus as characterized comprising a strap plate having means rigidly formed thereon for holding a service strap for attachment to the shoe of a person; a spur plate having down-turned sharpened spur portions for engaging the ground, said spur plate having an up-turned hook lug; resilient latches mounted on said spur plate for engaging said strap plate to be supported thereby; and accessible means for moving said latches from engagement with said strap plate.

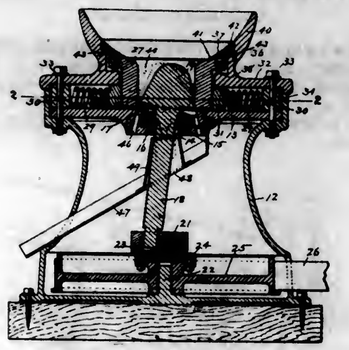
1,354,074. MACHINERY FOR BALANCING OF UNSYMMETRICAL LOADS WITH POLYPHASE DISTRIBUTION-NETS OR SUPPLY-MAINS. HIDDE KLAAS SCHRAGE, Stockholm, Sweden. Filed Dec. 22, 1919. Serial No. 346,758. 4 Claims. (Cl. 172—238.)



1. A system comprising polyphase supply mains, an unbalanced load therefor, an auxiliary induction machine having primary windings connected in series between said supply mains and said load and short-circuited secondary windings rotating backwardly with respect to the phase sequence of the primary currents, and a phase balancer connected in parallel with the load at a point intermediate the load and said induction machine.

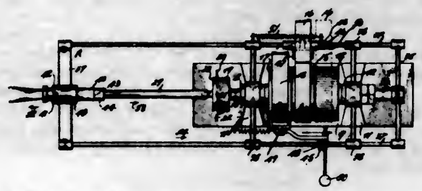
1,354,075. SELF-SOAPING WASHBOARD. GEORGE H. SCULLY and JESSIE B. SCULLY, Kansas City, Mo., assignors to J. F. MARX, Hartington, Nebr. Filed Nov. 19, 1918. Serial No. 263,150. 4 Claims. (Cl. 68—29.)

1. In combination with a washboard, a container on said washboard for holding a liquid washing compound, a self-closing outlet valve at the lower portion of said container, and means for opening said valve and discharging the compound from the container in the form of spray.



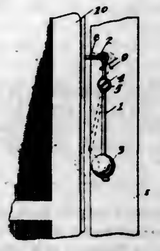
1,354,076. ROAD-MAKING MACHINE. JAMES W. T. STEPHENS, New Orleans, La., assignor of one-third to Harley A. W. Howcott and one-third to J. P. Baldwin, New Orleans, La. Filed Apr. 21, 1919. Serial No. 291,436. 14 Claims. (Cl. 94—42.)

1. In a road making machine, a rotary calcining cylinder, a throat communicating with said cylinder, means for delivering comminuted earth to the throat for passage to the cylinder, means for heating the interior of the cylinder, a stack communicating with the throat for the discharge of the products of combustion from the cylinder, a binder receptacle, a heating coil within said receptacle and having its inlet and discharge ends communicating with the stack, and means in the throat for causing the products of combustion from the cylinder to pass directly outward through the stack or to pass through said coil before discharging through the stack.



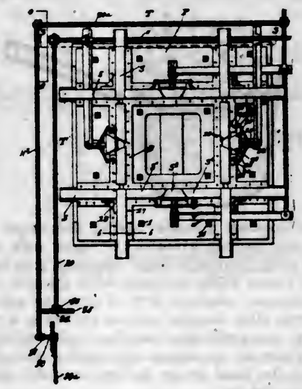
1,354,077. CRUSHING AND PULVERIZING MACHINE. NATHANIEL A. STRATTON, Boston, Mass. Filed Sept. 15, 1919. Serial No. 323,857. 4 Claims. (Cl. 83—10.)

1. A crushing machine comprising a base having a central annular fulcrum and fixed spring abutments spaced outwardly from said fulcrum, a lever adapted to oscillate universally on said fulcrum and having, below the fulcrum, a longer arm, and, above the fulcrum, a shorter conical arm constituting a conical crushing jaw, an annular crushing jaw surrounding the conical jaw, and adapted to slide horizontally on the base in any direction, said jaws forming a tapering annular throat, means for gyrating said lever on its annular fulcrum to cause a progressive contraction of said throat, springs radiating from the annular jaw and seated at their outer ends on said abutments, and segmental brake shoes pressed by said springs against the external surface of the annular jaw,



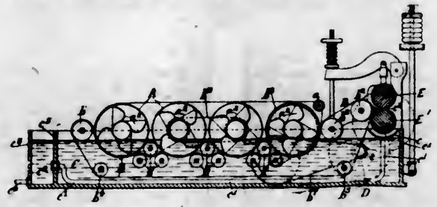
said springs and brake shoes permitting horizontal rectilinear yielding movements of the annular jaw, and preventing a turning movement of the annular jaw by force transmitted from the gyrating conical jaw through material wedged in said throat.

1,354,078. THREAD-CUTTING MACHINE. ANTONY STRUKELL, Brooklyn, N. Y., assignor of one-fourth to Harry B. Dods, Brooklyn, N. Y. Filed Dec. 4, 1919. Serial No. 342,363. 8 Claims. (Cl. 10—89.)



1. In a thread cutting machine, a longitudinally movable carrier to receive the article to be threaded, a chuck in line therewith to coöperate with said carrier to hold the said article while the threads are being cut, said chuck being movable with said carrier, rotatable cutting tools adjacent the carrier, means to rotate the cutting tools, and means to automatically cause the tools to cease operating after a predetermined number of threads have been cut.

1,354,079. DOOR-CHECK. MCGARVEY E. TATE and ROBERT M. TATE, Somerset, Ky. Filed Feb. 27, 1920. Serial No. 361,811. 11 Claims. (Cl. 16—77.)



1. A door check, comprising a substantially vertical rod having a pivot between its ends, a bumper carried at the lower end of said vertical rod, and means apart from the bumper for engagement by the door whereby the bumper is at all times positively operated by the movement of the door into the path of the door as the latter is moved into a closed position.

1,354,080. RAILWAY-TRACK CROSSING. BENJAMIN G. VAN DYKE, Jr., Detroit, Mich. Filed Sept. 13, 1919. Serial No. 323,527. 3 Claims. (Cl. 246—381.)

3. In combination, a pair of track rails comprising movable sections and stationary sections, said movable sections being arranged in pairs and movable longitudinally of the rails and capable of occupying active and inactive positions, a third movable section for each pair of sections, all the third movable sections being disposed upon the outer sides of said rails and adapted to be interposed between a pair of movable sections when the latter are in active position, and withdrawn from the same when they are in inactive position, and mechanism arranged upon the outer sides of said rail for moving all of the movable sections of one rail or the other into active or inactive position, said means comprising beams disposed upon the outer sides of the rails and parallel thereto and movable in opposite directions, levers operatively connecting said beams and sections, and superposed rods mounted for reciprocating movement and connected to said beams.

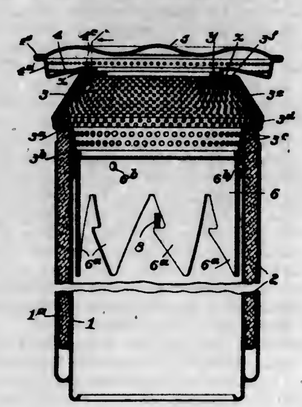
1,354,081. APPARATUS FOR SCOURING, DYEING, OR OTHERWISE TREATING WITH LIQUOR, WOOL, YARN, OR OTHER FIBROUS MATERIAL. HUBERT WALKER, Cleckheaton, England. Filed Dec. 8, 1917. Serial No. 206,149. 4 Claims. (Cl. 8—16.)

1. In apparatus for treating fibrous material with liquor, the combination of a receptacle adapted to contain liquor, a plurality of perforated cylinders arranged to be rotated in a partly submerged condition in the liquor, each of said cylinders containing a number of troughs which during the rotation of the cylinders scoop up liquor from the receptacle, discharge it through the perforations in the cylinder and convey air through the liquor in the receptacle, and a traveling apron arranged to travel in contact with the lower part of the cylinders.

2. In apparatus for treating fibrous material with liquor, the combination of a receptacle adapted to contain liquor, a plurality of perforated cylinders arranged to be rotated in a partly submerged condition in the liquor, each of said cylinders containing a number of troughs which during the rotation of the cylinders scoop up liquor from the receptacle, discharge it through the perforations in the cylinder, and convey air through the liquor in the receptacle, an endless conveyer passing over feed and delivery rollers, under guide rollers and between groups of rollers arranged to cause the conveyer to travel in contact with the lower part of the cylinders, a guide roller situated above one of the delivery rollers and an endless guide tape passing over such guide roller and around the group of cylinders between their ends.

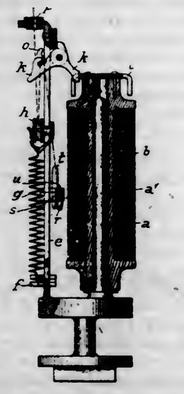
3. In apparatus for treating fibrous material with liquor, the combination of a receptacle adapted to contain liquor, a plurality of perforated cylinders arranged to be rotated in a partly submerged condition in the liquor, each of said cylinders containing a number of troughs which during the rotation of the cylinders scoop up liquor from the receptacle, discharge it through the perforations in the cylinder and convey air through the liquor in the receptacle, an endless conveyer passing over feed and delivery rollers, under guide rollers and between groups of rollers arranged to cause the conveyer to travel in contact with the lower part of the cylinders, a guide roller situated above one of the delivery rollers, an endless guide tape passing over such guide roller and around the group of cylinders between their ends, a pair of squeezing rollers situated in proximity to one of the delivery rollers and a plate arranged to direct the material delivered from the delivery rollers into the squeezing rollers.

4. In apparatus for treating fibrous material with liquor, the combination of a receptacle adapted to contain liquor, a plurality of perforated cylinders arranged to be rotated in a partly submerged condition in the liquor, each of said cylinders containing a number of troughs which during the operation of the cylinders scoop up liquor from the receptacle, discharge it through the perforations in the cylinder and convey air through the liquor in the receptacle, an endless conveyer passing over feed and delivery rollers, under guide rollers and between groups of rollers arranged to cause the conveyer to travel in contact with the lower part of the cylinders, a guide roller situated above one of the delivery rollers and an endless guide tape passing over such guide roller and around the group of cylinders between their ends, a pair of squeezing rollers situated in proximity to one of the delivery rollers, a plate arranged to direct the material delivered from such delivery rollers into the squeezing rollers, a trough situated underneath the squeezing rollers, a compartment situated at the feed end of the receptacle and connected with the trough by a pipe, the said compartment containing a filtering device through which liquid can return to the receptacle, and an aperture for draining purposes.



1,354,082. SPRING-MOUNTING FOR VEHICLE-BODIES. CHRIST WESTERGARD, Denbigh, N. D. Filed Nov. 13, 1919. Serial No. 337,798. 2 Claims. (Cl. 267—54.)

1. A device of the character set forth comprising a channel-shaped chassis bar having its channeled side disposed downwardly, an anchoring plate fitted snugly between the side flanges of the chassis bar, said anchor-

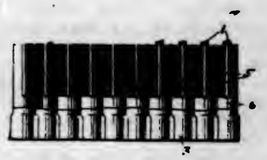


ing plate being provided with a centrally disposed rectangular downwardly projecting portion whose ends form spaced vertical shoulders, a pair of quarter-elliptic springs having pivotal connecting means at their outer ends and having their inner ends bearing against said shoulders and contacting the lower face of the anchoring plate, a clamping plate contacting with the lower sides of said quarter-elliptic springs at their inner ends, and fastening bolts passing through the chassis bar, inner ends of the quarter-elliptic springs and the clamping plate.

1,354,083. AIR-DISTRIBUTER FOR OIL-STOVES. FRED E. WHITE, Gardner, Mass., assignor to Central Oil & Gas Stove Company, Gardner, Mass., a Corporation of Massachusetts. Filed Sept. 11, 1919. Serial No. 323,060. 7 Claims. (Cl. 67—63.)

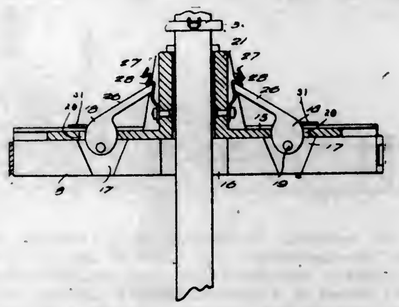
1. An air distributer for wick stoves having an annular perforated wall and a substantially horizontal annular perforated portion at its upper part, and a distributer cap held above and spaced from said horizontal portion and providing an air distributing space between itself and said horizontal portion.

1,354,084. BOBBIN FOR BRAIDING-MACHINES. CARL WILDI, Wohlen, Switzerland, assignor to The Firm of Argovia A.-G., Mellingen, Switzerland. Filed Sept. 11, 1919. Serial No. 323,217. 5 Claims. (Cl. 28—24.)



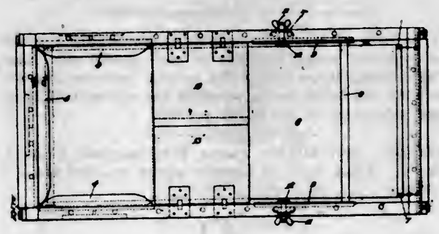
1. In a yarn carrier for braiding machines, a spindle on which the bobbin rotates, a post substantially parallel to said spindle, a thread guard slidable on said post, stops for said guard, tension means and take-up mechanism on the post and connected to said guard, and a locking and releasing member for the bobbin mounted on said post and controlled by the yarn and the take-up mechanism.

1,354,085. COOKING UTENSIL. ANTHONY ZISK, Baltimore, Md. Filed Feb. 20, 1919. Serial No. 278,164. 1 Claim. (Cl. 53—8.)



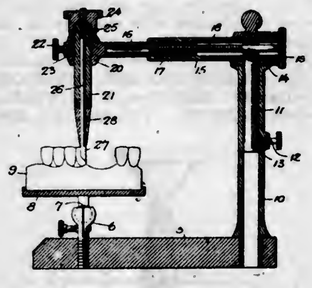
A lid for cooking utensils having the upper portion thereof cut out forming a recess the lower wall of which is provided with relatively large openings, the side edge wall of the recess being provided with grooves, a perforated slide member adapted to fit within the groove, and an imperforate slide member having its edges within the recess above the perforated member and fitting snugly within the edges of the recess and having its upper surface lying in the same plane as that in which the upper surface of said lid lies.

1,354,086. STORAGE-BATTERY ELECTRODE OR PLATE. CORNELIUS AMBEUSTER, Roslyn, Pa. Filed Sept. 4, 1918. Serial No. 252,529. 1 Claim. (Cl. 204—29.)



In a storage battery plate or electrode, including metal rods surrounded by active material or material adapted to become active, and in combination therewith, a poured end-connecting bar, and ribbed and slotted insulating tubes inclosing said material and provided at their ends with ribless cuffs adapted to fit corresponding mold cavities, substantially as described.

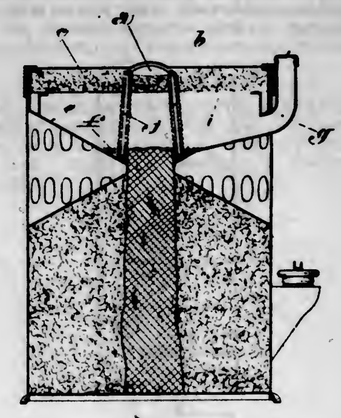
1,354,087. PIPE-CLAMP. WILLIAM BUEKER, Dewey, Okla. Filed June 21, 1919. Serial No. 305,849. 2 Claims. (Cl. 24—249.)



2. A pipe clamp including a base, adjustable clamping elements supported thereon, said clamping elements including body plates, and upright jaws carried by the adjacent terminals thereof, pivoted cams engaging and operating the clamping elements, pawls carried by the cams and spring members carried by the clamping members engageable with the pawls to lock the latter in various adjusted positions to effect various adjustments of the clamping elements.

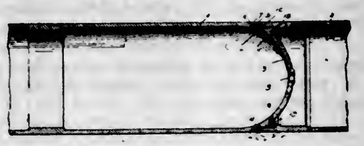
1,354,088. CHILD'S COMBINATION-COT ADAPTABLE AS PLAY-PEN, &c. ALICE BURCHELL, Mayfield, England. Filed Mar. 30, 1920. Serial No. 369,989. 1 Claim. (Cl. 5—58.)

A device of the class described including in combination, an inclosure frame, a removable bottom therefor, a seat adapted to be supported on the side rails of said inclosure frame and at one end thereof, cushions detachably carried by the side walls of the inclosure frame adjacent the seat position, and a table located adjacent the seat position and consisting of swinging leaves hinged to the opposite side walls of the inclosure frame.



1,354,089. DENTAL TOOL. HENRY CALLSEN, New York, N. Y. Filed Nov. 29, 1919. Serial No. 341,491. 6 Claims. (Cl. 32—10.)

1. In a dental tool, the combination of a base and a tubular upright, a tool carried in a sleeve and parallel with the upright, telescopic means connecting the sleeve with the upright, and means for adjusting and locking the above parts.

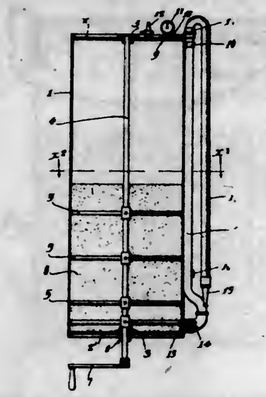


1,354,090. CATALYTIC HEATING APPARATUS. RAMON CAMELL, Rhone, and LAURENT COCHET and JOSEPH GRITTE, Lyon, France, assignors to Societe Lyonnaise Des Réchauds Catalytiques Camell, Cochet, Gritte & Cie. (Société en Commandite), Calure, Rhone, France. Filed June 13, 1919. Serial No. 304,039. 1 Claim. (Cl. 69—15.)

In catalytic heating apparatus, the combination of a container for a catalytic mass, a pellet of spongy platinum in this container, a chamber below said container, means for introducing liquid fuel into said chamber, and means

for supporting a wick extending from the interior of said chamber to the pellet in said container.

1,354,091. FLASK FOR TORPEDOES. ARTHUR HUTCHINSON CHASE and HARRY LUTHER BOESCH, Washington, D. C., assignors to the Government of the United States. Filed Mar. 22, 1919. Serial No. 284,471. 5 Claims. (Cl. 114—20.)



1. An improvement in flasks for torpedoes comprising an air flask, a flask head formed integral with said air flask at its after end and a water compartment adapted to be secured to said air flask.

1,354,092. ENVELOP. JAMES S. CRATE, Houston, Tex. Filed Oct. 20, 1919. Serial No. 331,946. 3 Claims. (Cl. 229—73.)

1. An envelop having on its outer face adjacent one end vertical and horizontal lines forming a vertical column of spaces, retaining devices located centrally in said spaces, said envelop adjacent said column of spaces having a transparent portion and a pocket formed back of the transparent portion and adapted to receive a card containing a column of destination spaces registering with the first-mentioned column of spaces, and a removable indicator adapted to be connected to any of said retaining devices.

1,354,093. DRY-CHEMICAL FIRE-EXTINGUISHER. CHARLES S. DAVIDSON, Los Angeles, Calif., assignor of one-third to Frank M. Pool and one-third to John E. Faber, Los Angeles, Calif. Filed July 2, 1919. Serial No. 308,216. 1 Claim. (Cl. 169—31.)

In a dry chemical fire extinguisher, a container in the form of a cylinder having a port adjacent its lower end, a valve for said port, a tube connected with the valve and extending to the upper end of the container, a hose fastened to the upper end of the tube, bearings in the opposite ends of the container, a shaft extending from end to end of the container and journaled in said bearings and having one end projecting outside of the container, a crank on the projecting end of the shaft, and stirring blades on the shaft extending at right angles thereto inside of the container.

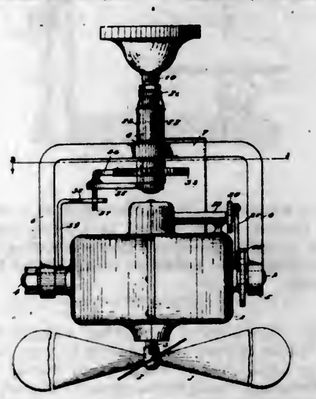
1,354,094. SAFETY-PIN. HARRY S. DOLBEY, Providence, R. I. Filed Mar. 25, 1920. Serial No. 368,528. 3 Claims. (Cl. 24—161.)

1. A safety pin comprising a piercing arm, an opposing back-arm connected at one end to said piercing arm and having a catch portion at its opposite end, said piercing arm being provided with a flattened stiffening portion adjacent its connected end.

1,354,095. GARTER ATTACHMENT. DAVID C. EVANS, Cincinnati, Ohio, assignor to Pioneer Suspender Company, a Corporation of Pennsylvania. Filed Dec. 12, 1917. Serial No. 206,738. 3 Claims. (Cl. 24—222.)

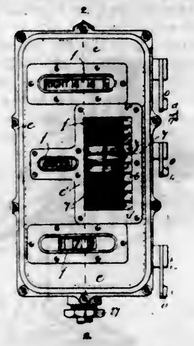
1. A garter attachment for disengageably connecting the leg band, comprising a stud-carrying element provided with an oval head having a flattened stem mounted thereon, and a coöperating element having an elongated opening for receiving the head and a circular opening spaced therefrom, but connected therewith by a contracted channel for permitting the passage of the flattened stem to the circular opening, the circular opening having a diameter corresponding substantially to the greater dimension of the flattened stem, the respective longitudinal axes of the elongated opening and of the head and its stem being at an angle with each other when the parts are in operative locking position in order that, to disengage the members, the elements must first be arbitrarily moved to bring said axes into alinement, so that the flattened stem may be moved through the channel from the circular opening into the elongated opening.

1,354,096. BUTTLESS KNITTING-MACHINE NEEDLE. WILLIAM FELS, Elizabeth, N. J., assignor to MAX Nydegger, Elizabeth, N. J. Filed Feb. 3, 1919. Serial No. 274,607. 2 Claims. (Cl. 66—5.)



1. A buttless knitting machine needle having a shank and terminal hooks, portions of the opposed side faces of said hooks being flat needle guiding surfaces continuous with and lying in the plane of the corresponding opposed side faces of the shank portion.

1,354,097. END-MILL. JAMES FITZSIMMONS, Baldwin, N. Y. Filed Aug. 27, 1919. Serial No. 320,144. 2 Claims. (Cl. 29—103.)

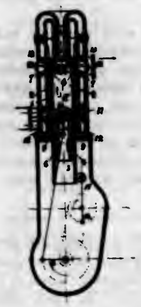


1. A detachable end-mill comprising a shank and a cutter element, the shank having a screw threaded stem terminating in a truncated cone and the cutter having a socket adapted to coöperate with the stem on the shank, substantially as described.

1,354,098. OSCILLATOR FOR ELECTRIC FANS. MAURICE M. GLASSER, Charleston, S. C. Filed Oct. 11, 1919. Serial No. 329,960. 7 Claims. (Cl. 230—1.)

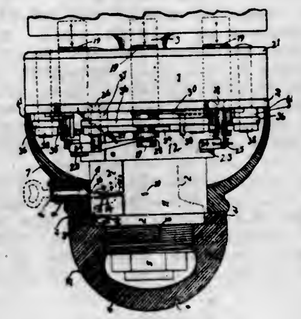
7. In an electric fan, a yoke comprising a body and arms, the yoke being mounted to rotate at its center on an axis perpendicular to the body, the fan having a motor casing journaled between the arms of the yoke to swing on an axis at right angles to that of the yoke's rotation, and means controlled by the oscillation of the motor casing for intermittently moving the yoke on its axis.

1,354,099. ELECTRICAL TRANSMITTING AND INDICATING APPARATUS. EDWARD ALFRED GRAHAM, Brockley, London, England. Filed June 24, 1919. Serial No. 306,501. 3 Claims. (Cl. 177—337.)



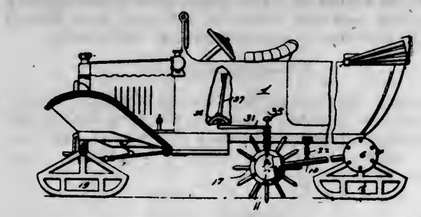
1. Electrical apparatus of the kind referred to, comprising an indicating unit embodying an electric motor, switch mechanism for determining the operation of such motor, a two part casing, an insulating base in one part of the casing, upon which a portion of the switch mechanism is mounted, the remainder being carried by the said part of the casing, terminal pillars upon such base, and tubular contacts associated with the motor but insulated from the indicating unit, adapted to be engaged by the terminal pillars and to support the indicating unit in a manner that will permit it to be placed in position with the motor thereof in proper electrical connection both with the terminal pillars and with the portion of the switch mechanism upon the base, or to be removed, when the casing is open.

1,354,100. ELECTRIC DETONATOR. HARRY L. GRANT and GEORGE HADDOW, Tamaqua, Pa., assignors to Atlas Powder Company, Philadelphia, Pa., a Corporation of Delaware. Filed May 20, 1920. Serial No. 382,979. 2 Claims. (Cl. 102—10.)



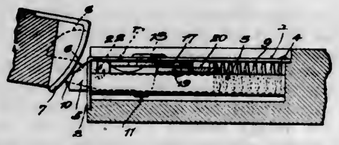
1. In a device of the character described an adapter formed of insulating material and having a central underside cavity therein, an axial opening leading therethrough and in communication with said cavity, grooves upon opposite sides of said passage and communicating therewith, and shoulders at the bottoms of said groove, a strip extending through said passage, fuse wires having their ends located in said grooves with their extremities abutting said shoulders, said wires being united to said strip, and a head of primer composition upon said strip within the underside cavity, of such size as to prevent endwise movement of the strip through said passage.

1,354,101. FOUR-STROKE-CYCLE INTERNAL-COMBUSTION ENGINE. AUGUSTE CLEMENT GRETEN and FRANÇOIS MUSMAN, Luxemburg, Luxemburg. Filed Nov. 14, 1919. Serial No. 337,925. 4 Claims. (Cl. 123—75.)



1. An internal combustion engine comprising a cylinder having an exhaust passage, an inlet passage and an air passage, a piston mounted in the cylinder to reciprocate, a sleeve mounted in the cylinder between the piston and cylinder and formed with passages corresponding to those in said cylinder, and means for operating the sleeve, to hold the exhaust passage open during the first part of the downward movement of the piston, to close all the passages during another portion of the downward movement of the piston, subsequently opening the intake passage during farther downward movement of the piston, and thereafter opening the air passage at the lower limit of movement of the piston, and then closing all passages during the next entire upward movement of said piston.

1,354,102. AUTOMOBILE-LOCK. RAYMOND M. GUY, Wichita, Kans. Filed Aug. 21, 1919. Serial No. 318,915. 9 Claims. (Cl. 70—90.)



1. An automobile wheel hub, plungers slidably housed therein, a cylinder rotatably mounted on said hub and means actuated by the rotation of said cylinder for sliding said plungers to a desired position.

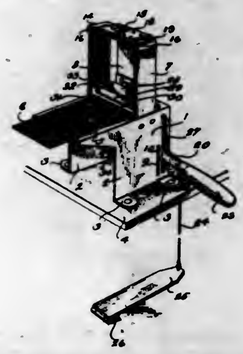
1,354,103. MOTOR-VEHICLE PROPELLING ATTACHMENT. OTTO E. HAGLUND, Medina, N. D. Filed Nov. 4, 1919. Serial No. 335,671. 3 Claims. (Cl. 180—6.)

2. The combination with a motor vehicle and its rear axle, and propelling mechanism including a propeller wheel, a hanger pivoted on and leading forward from said axle, and driving connections leading from the axle along the support to the propeller wheel; of manually operable mechanism for raising or lowering said propeller wheel or pressing it into contact with the surface at will, and means within said mechanism permitting it to yield against said pressure when the propeller is forced upward.

1,354,104. LOCK FOR AUTOMOBILE-DOORS. GEORGE HARRISON, Jr., Bridgeport, Conn., assignor to The Bassick Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Nov. 5, 1919. Serial No. 335,826. 8 Claims. (Cl. 292—335.)

2. A lock for automobile doors, comprising a casing, a main latch member guided within the casing, a spring which normally projects said member, an auxiliary latch member rockable within the main latch member and having a striking nose and a heel projection, and means engaging said auxiliary member for retracting both members and causing said projection to interlock with the casing and hold said members retracted with the nose of the auxiliary member projected beyond the latch engaging face of the main latch member, whereby when the door is closed said nose will primarily engage the keeper and release the main latch member and allow it to be projected into locking engagement with the keeper.

1,354,105. MERCURY COMPOUNDS OF GLUCOSIDS AND PROCESS OF MAKING SAME. MAX HARTMANN, Basel, Switzerland, assignor to Society of Chemical Industry in Basle, Basel, Switzerland. Filed Apr. 29, 1920. Serial No. 377,712. 2 Claims. (Cl. 23—24.)



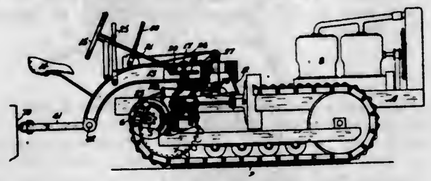
1. As new products the herein described mercury compounds of glucosids constituting white powders soluble in water, but very difficultly soluble in organic solvents.

1,354,106. HANDLE FOR VALVES AND OTHER USES. EDWIN C. HOLTON, Somerville, Mass., assignor to Holton-Abbott Manufacturing Company, West Somerville, Mass., a Corporation of Massachusetts. Filed May 15, 1915, Serial No. 28,325. Renewed Feb. 15, 1919. Serial No. 277,281. 20 Claims. (Cl. 16—171.)

1. A handle comprising a body having a recess, a core of metal cast in place in said recess and having a non-circular passage for the reception of a shank or the like, and a rod or wire mounted in said body to cross a part of said recess, the central part of such rod being embedded in the metal core, and its ends passing into the body at opposite sides of the core, whereby to prevent turning of the core within the body.

1,354,107. SECTION-CLOSER AND FOUNDATION-FASTENER FOR HONEY-SECTIONS. PAUL T. ILLIG, Ebensburg, Pa. Filed Nov. 7, 1918. Serial No. 261,494. 12 Claims. (Cl. 6—12.)

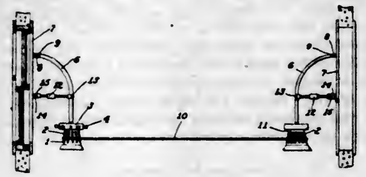
1. In a honey section former and foundation press, the supporting structure including a table having a slot therein, a plate slidably extending through said table slot, a honey section pressure plate carried by the upper end of said slidable plate and adapted to be moved in pressing engagement with a honey section, and a lever pivotally carried by said supporting structure and connected to said sliding plate for operating the same.



5. In a honey section former and foundation press, the combination of means for forming a honey section comprising a slidablep late having an angled portion on one end, a pressure plate rigidly connected to said angled portion, a second pressure plate adjustably connected to said angled portion and means for moving said slidable plate, said pressure plates having their outer ends angling outwardly and downwardly for guiding engagement with portions of a honey section.

9. In a honey section former and foundation press, a supporting structure including a table provided with an opening adapted to receive therethrough one side of a honey section, a supporting plate carried by said supporting structure beneath said opening and adapted to support the inner surface of one side of a honey section flush with the upper surface of said table, a honey section pressure plate carried by said supporting structure, means for operating said pressure plate, said table adapted to support a sheet of comb foundation forming wax, means operable synchronously with the operation of said pressure plate for affixing a comb foundation to a honey section, means for cutting the comb foundation to proper size carried by said affixing means, a bracket supported beneath said table and adapted to support means for heating the table and the foundation forming wax thereon.

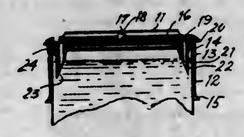
10. In a honey section former and foundation press, a supporting structure including a table, a plate slidably extending through said table, said table provided with an opening adapted to receive one side of a honey section, a supporting plate supported beneath said opening and adapted to support the honey section so that the inner face of the lower side of the honey section will lie flush with the top of said table, a pressure plate carried by the upper end of said slidable plate and adapted to be moved into pressing engagement with the honey section, a lever pivotally carried by the supporting structure and connected to said sliding plate for operating the same, an angled bracket adjustably carried by said slidable plate, and a comb foundation pressing stone carried by said angled bracket.



12. In a honey section former and foundation press, a supporting structure including a table, a plate slidably extending through said table, said table provided with an opening adapted to receive one side of a honey section, a supporting plate supported beneath said opening and adapted to support the honey section so that the inner face of the lower side of the honey section will lie flush with the top of said table, a pressure plate carried by the upper end of said slidable plate and adapted to be moved into pressing engagement with the honey section, a lever pivotally carried by the supporting structure and connected to said sliding plate for operating the same, an angled bracket adjustably carried by said slidable plate, a comb foundation pressing stone carried by said angled bracket, a knife adjustably carried by said stone for adjustment toward or from the stone, and means connected to said lever to return it to its normal position after operation thereof.

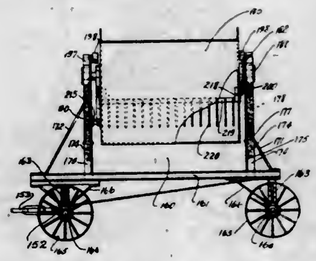
1,354,108. TRACTOR. JOHN M. JOHNSON, Winters, Calif. Filed Nov. 22, 1917. Serial No. 203,308. 8 Claims. (Cl. 180—92.)

1. In a tractor having a propelling chain track arranged on each side, a divided drive shaft adapted to transmit power to said tracks, means on said shaft for retarding the speed of either track, a hollow post secured on the tractor, a draw-bar adapted to swing horizontally about said post, means on the draw-bar for operating said track retarding means, and means on the draw-bar operable independently of said track retarding means for maintaining the tractor on a straight course when attached to a load.



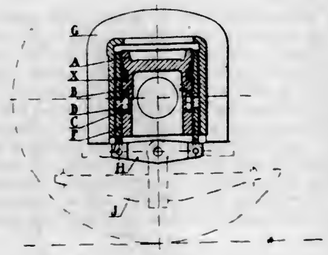
1,354,109. CLOTHESLINE-HOLDER. JOSEPH KISH, Johnstown, Pa. Filed Jan. 7, 1920. Serial No. 349,974. 3 Claims. (Cl. 68—3.)

1. In a device of the character described, a conical pulley spaced means on the conical surface of said pulley for receiving pins therebetween, handles projecting radially from said pulley for rotating said pulley, and a flared bottom end on said pulley for preventing a line passed around said pulley from leaving said pulley.



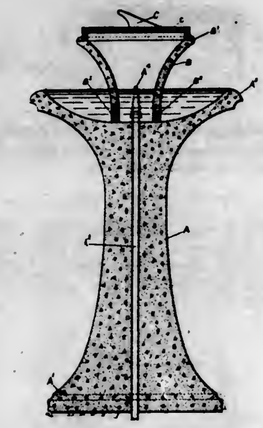
1,354,110. CAN FUNNEL AND SPOUT. TORAKI KITAOKA, Los Angeles, Calif. Filed Apr. 14, 1919. Serial No. 289,969. 3 Claims. (Cl. 221—23.)

1. A can funnel and spout comprising a cylindrical body having beveled ends and a lateral slot, perforating punches integral with the body and having longitudinal ports communicating with the cylindrical body, a rotary valve member mounted in the cylindrical body and having beveled ends corresponding with the ends of the body, said



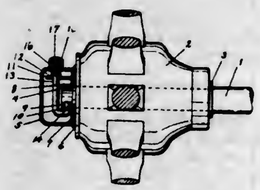
beveled ends covering the ports in closed position, and a handle projecting through said slot and adapted to operate the bolt to open and closed positions.

1,354,111. AUTOMATIC BEET-PULLER. VASILY KOSENKO, New Brunswick, N. J. Original application filed Apr 17, 1919, Serial No. 290,662. Divided and this application filed Mar. 5, 1920. Serial No. 363,596. 3 Claims. (Cl. 298—18.)



1. The combination with a beet harvester, of a trailer engageable with said harvester, pairs of posts arranged centrally at each end of said trailer, a receptacle journaled between said posts, the journals of said receptacle moving vertically therebetween, resilient means for holding said receptacle in a normally raised position, said receptacle being pivoted at one side of the center, means permitting said receptacle to oscillate upon its axis, means for limiting said oscillating movement, and means for returning said receptacle to its normal position after the discharge therefrom.

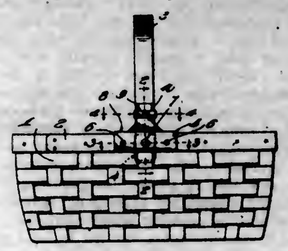
1,354,112. AXLE-BOX FOR ADJUSTABLE LOCOMOTIVE-AXLES. PAUL LEFÈBVRE, Brussels, Belgium, assignor of one-half to Societe Anonyme Les Ateliers Metallurgiques, Brussels, Belgium. Filed May 8, 1920. Serial No. 379,940. 5 Claims. (Cl. 105—174.)



4. In an axle-box for adjustable axles, the combination with a body of an axle-box, guides for the body, links pivotally mounted on the body at one end, rods pivotally mounted on the other end of the links and adapted to slide vertically on said guides, and a rocking lever connecting the ends of said rods.

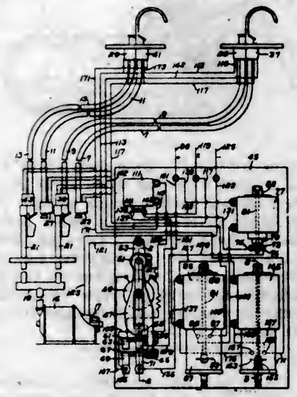
1,354,113. BIRD-BATH. AMY H. LAVERETT, Alton, Ill. Filed Aug. 16, 1919. Serial No. 317,933. 4 Claims. (Cl. 299—3.)

1. In a bird bath the combination of an open chamber, the sides whereof are perforated, with a fountain adapted to deliver within and play through said chamber and means for supplying water to said fountain, and a cover for said chamber adapted to obstruct the play of said fountain.



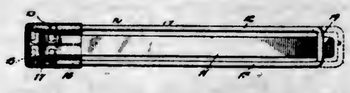
1,354,114. WHEEL-RETAINING SPINDLE-CAP. CHARLES A. LINDBERG, Sturgis, Mich., assignor to Sturgis Steel Go-Cart Company, Sturgis, Mich. Filed Apr. 12, 1920. Serial No. 373,116. 4 Claims. (Cl. 301—120.)

1. The combination with a spindle and wheel, of a spindle cap having a side opening therein, a disk-like member secured in the inner end of said cap and provided with an inwardly projecting flange-like spindle collar and an inwardly projecting arm having an opening therein alined with said opening in said cap, said collar and spindle having registering holes opposite said arm, a locking dog slidable in said hole in said arm and having a cap-like head slidable in said opening in said cap, the inner end of said dog having a return bend therein engaging said holes in said collar and spindle, and a coiled spring arranged on said dog between the said head and supporting arm.



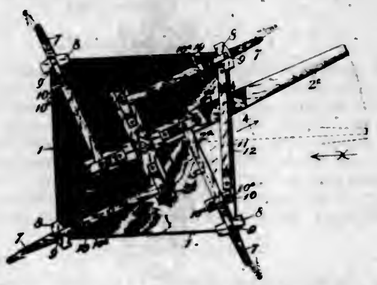
1,354,115. BASKET. WILLIAM B. LOEWENBERG, Converse, Ind. Filed May 5, 1919. Serial No. 294,818. 3 Claims. (Cl. 217—125.)

1. The combination with a basket and an arched handle, of plates secured to one side of the basket rim and shouldered to abut the upper edge of said rim, said plates having tongue portions extending upwardly beyond said rim, pivots connecting the ends of said handle with said plates



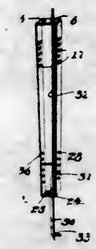
and allowing downward folding of said handle, and means coöperating with said handle and said tongue portions for holding the former in rigid upright position for use.

1,354,116. GOVERNING MECHANISM FOR DESPATCH SYSTEMS. JAMES G. MACLAREN, Mamaroneck, N. Y. Filed Mar. 4, 1918. Serial No. 220,128. 15 Claims. (Cl. 243—7.)



1. Means for governing an electric mechanism in conjunction with the despatch of carriers through a transit tube or the like comprising a circuit closer controlling the energization of the mehanism, electric moving means therefor, a circuit for said means including a circuit closer and a switch arranged to close on the delivery of a carrier, a timed moving device for said second mentioned circuit closer and means to initiate operation of the same on each despatch of a carrier.

1,354,117. HAIR-CURLER. ALFRED V. P. MARTIN, Brooklyn, N. Y. Filed Nov. 11, 1919. Serial No. 337,313. 2 Claims. (Cl. 132—19.)

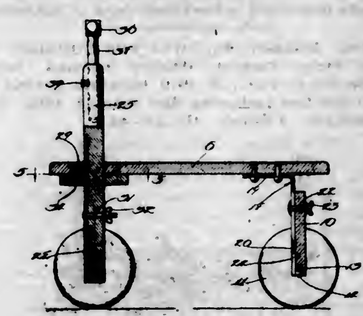


1. As an article of manufacture, a hair curler comprising a curling member around which a strand of hair is adapted to be curled, and a clamping member adapted to clamp the curled strand of hair in position on the said curling member, the said curling and clamping members being slidingly connected with each other at one end to allow of moving the said curling and clamping members lengthwise one on the other, the said clamping member being arranged to swing up and down with the sliding end as the fulcrum to allow of opening and closing the clamping member relative to the curling member, the free end of the clamping member being adapted to pass into interlocking engagement with the free end of the said curling member on moving the clamping member forward on the curling member and while holding the clamping member depressed.

1,354,118. AUTO-TIRE CHANGER. FRANK MARTIN, Chandler, Okla. Filed Oct. 30, 1919. Serial No. 334,573. 2 Claims. (Cl. 157—1.)

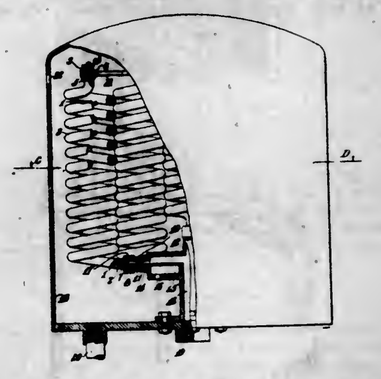
1. In a device of the character described, a base plate; a rotatable member mounted thereon; tangential arms longitudinally movable on said plate said arms being pivoted at their inner ends to said rotatable member with their outer ends projecting beyond said base plate; guides for the outer ends of said arms, said guides being mounted on the base plate, said arms having hooks at their outer projecting ends and rim shoes between said hooks and said guides; upper and lower stop bars secured to the base plate at one side of the rotatable member; a handle connected with said rotatable member for operating the same, said handle passing between said stop bars and projecting beyond the base plate, said stop bars having ratchet teeth on their opposing faces for engaging the top and bottom sides of said handle to hold the same in adjusted positions, the teeth on one bar being adapted to hold the handle against movement in one direction and the teeth on the other bar being adapted to hold it against movement in the opposite direction.

1,354,119. EMBROIDERING DEVICE. GEORGE W. MAXWELL, Chicago, Ill. Filed Oct. 20, 1919. Serial No. 331,885. 4 Claims. (Cl. 112—80.)



2. A reversible handle for holding embroidery needles, having an opening at one end for a needle of one diameter and having an opening at the other end for a needle of another diameter, said handle further having means adjacent each end thereof to coöperate with a needle to secure the same in the handle, the opening at one end of the handle operating as a guide for the thread passing to a needle held at the other end of the handle.

4. A reversible handle for holding embroidery needles of different diameters consisting of a frame formed of a flat bar bent so as to have two side bars connected at one end by an integral end bar, the opposite ends of said side bars having end bar sections projecting toward each other and forming an end bar for that end of the handle, said first named end bar having a pair of openings therethrough of equal diameter for holding two embroidery needles of equal diameter, said end bar sections each having an opening therethrough, said last named openings being of unequal diameter to enable each of the same to hold an embroidery needle of a different diameter from that of the other, said side bars adjacent each end of the holder having means to coöperate with the embroidery needles to secure the same in the holder.

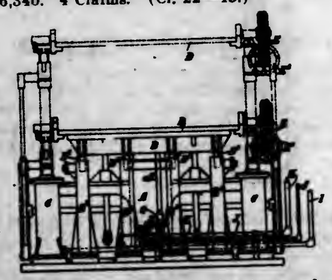


1,354,120. [WITHDRAWN.]

1,354,121. CHILD'S VEHICLE. PAUL O. MORATZ, Bloomington, Ill., assignor to B. Coleman Silver, Chicago, Ill. Filed June 4, 1919. Serial No. 301,835. 3 Claims. (Cl. 208—165.)

3. A child's vehicle comprising, in combination, a platform, supporting wheels for the rear end thereof, a steering post in conjunction with the front end thereof, a steering wheel on the lower end of the steering post, an angle bar having its vertical arm vertically adjusted with respect to the steering post and its horizontal arm beneath and serving to support the front end of the platform, means for retaining said horizontal arm in coöperative position with respect to the platform, and a steering handle in conjunction with the upper end of the steering post, substantially as described.

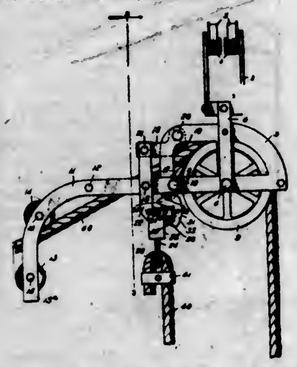
1,354,122. CONDENSING APPARATUS. JAMES COWAN MORTON, Auckland, New Zealand. Filed Apr. 4, 1918, Serial No. 226,748. Renewed Aug. 23, 1920. Serial No. 405,485. 2 Claims. (Cl. 257—205.)



1. A condensing apparatus consisting of sets of coils, in which each coil comprises two tubes, an inner tube of

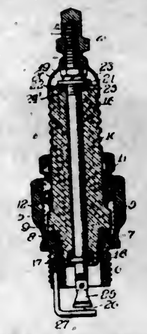
round cross section and an outer tube of oval cross section, the first mentioned tube being disposed within the last mentioned tube.

1,354,123. TREATMENT OF VULCANIZED INDIA-RUBBER GOODS EMBODYING A FOUNDATION FABRIC. WILLIAM EDGAR MUNTZ, London, England. Filed Jan. 21, 1915. Serial No. 3,653. 6 Claims. (Cl. 18—53.)



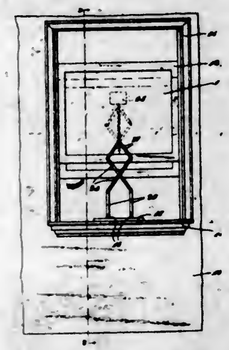
1. A process for neutralizing the sulfurous and sulfuric acids H_2SO_3 and H_2SO_4 and their anhydrous and gaseous forms, generated by the oxidation of the rubber in vulcanized rubber goods having a foundation fabric; which consists in subjecting the said goods to a suitable heat and treating them in a hermetically sealed chamber with undiluted ammonia gas, said treatment taking place under the greatest pressure possible without injury to the goods by disintegration or otherwise, whereby said gas is enabled to impregnate the rubber throughout, and then removing the heat and pressure so as to cause the said gas to remain imprisoned in the elastic pores of the rubber.

1,354,124. MOLDING-MACHINE FOR FOUNDRY USE. JOHN BIRCH NEESHAM, Glasgow, Scotland. Original application filed Jan. 18, 1919, Serial No. 271,898. Divided and this application filed June 24, 1919. Serial No. 306,340. 4 Claims. (Cl. 22—45.)



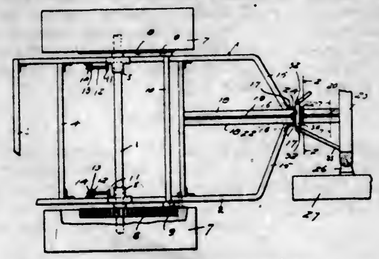
1. A molding machine of the jarring type and operated by fluid pressure, having a molding table, a cylinder with ram therein for raising said table, valve mechanism for controlling the fluid pressure admitted to the said cylinder whereby said table can be automatically raised and then allowed to fall, stationary impact members and means arranged in connection with said impact members to receive the impact of the table each time it falls to produce an equable jarring action throughout said table.

1,354,125. HAY-CARRIER. HENRY S. NUNAMAKER, Canton, Ohio, assignor to The V. L. Ney Hay Tool Company, Canton, Ohio, a Corporation of Ohio. Filed Feb. 28, 1919. Serial No. 279,720. 6 Claims. (Cl. 188—64.)



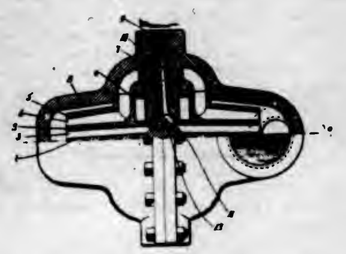
1. A hay carrier provided with a main sheave, an elevating rope connected to said carrier and passing over the sheave and forming a fall and extending away from the sheave at an angle, means for automtically locking the sheave against rotation when a predetermined weight is placed upon the fall of the elevating rope and means for releasing said sheave when a pull is exerted upon the elevating rope.

1,354,126. SPARK-PLUG. WILLIAM O. OLSON, Chicago, Ill., assignor, by mesne assignments, to The Arc-O Manufacturing Co., Inc., Chicago, Ill., a Corporation of Illinois. Filed May 20, 1918. Serial No. 235,566. 1 Claim. (Cl. 123—169.)



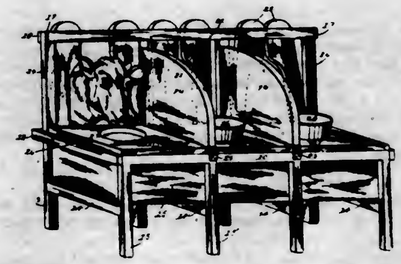
A spark plug having a straight electrode therethrough and provided at its lower end with an axially disposed flattened terminal of non-oxidizing metal having a relatively low heat conductivity, the sparking end of said terminal being arranged transversely of said electrode and extended in length greater than the transverse diameter of said electrode and greater than the width of the terminal back of said sparking end, and another electrode having its terminal arranged beneath and parallel with said sparking end.

1,354,127. WINDOW-WASHING APPARATUS. PETER J. PALUTSKAS, Pittsburgh, Pa. Filed July 20, 1918. Serial No. 245,812. 1 Claim. (Cl. 15—59.)



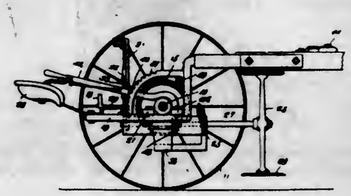
In a device of the character described, a base, a plurality of pairs of lugs secured on said base, two sets of pairwise arranged links, each set pivotally connected to two pairs of said lugs, pairwise arranged crossed bars joined at their point of intersection and pivotally secured to the links of each set, lower and upper cross bars for the rear set, rods connecting the two sets of links, a handle secured to the apex of the front set, rods connecting the upper crossed bars of the rear set and a slotted vertical bar sliding on one of said rods and adapted to carry a wiper at its upper end, substantially as described and for the purpose set forth.

1,354,128. TRACTOR-FRAME. WILLIAM D. PRENTICE, Fargo, N. D. Filed Oct. 25, 1919. Serial No. 333,190. 4 Claims. (Cl. 280—112.)



1. A tractor frame including a frame, supporting members secured to said frame, means connecting the frame to the supporting members adjacent the forward ends, a front axle, means connecting the front axle to the supporting members to permit the front axle to have pivotal movement about a horizontal axis, radius rods connected to said axle, and means carried by the supporting members and connected to the radius rods to permit said rods to have pivotal movement about a horizontal axis.

1,354,129. COMBINED CENTRIFUGAL PUMP AND MOTOR. HARRY A. PRINDLE, East Orange, N. J. Filed Aug. 10, 1915. Serial No. 44,679. 27 Claims. (Cl. 103—69.)



1. In a turbine, a casing, a runner having opposite axial projections mounted in recesses in said casing, opposite gas supply passages communicating with said recesses, and opposite gas turbine passages in said runner communicating with said recessca.

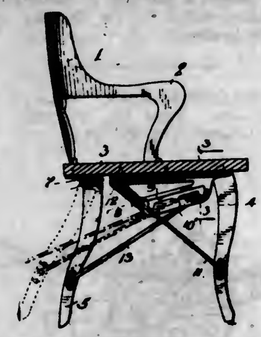
1,354,130. CATTLE-FEEDING TROUGH. JOHN RUDZINSKAS, Muskegon, Mich. Filed Mar. 13, 1920. Serial No. 365,376. 2 Claims. (Cl. 119—27.)

1. A manger comprising a frame, a box supported in said frame, said frame being extended upwardly on one side to form a headstall, said headstall being divided into sections, a cover for said box hinged to said frame and having fixed thereon a plurality of quadrantal partitions located in juxtaposition to the dividing lines of the sections of the headstall.

1,354,131. COTTON-CHOPPER. WILLIAM D. RAINEY, Lockesburg, Ark. Filed Aug. 19, 1919. Serial No. 318,449. 1 Claim. (Cl. 97—46.)

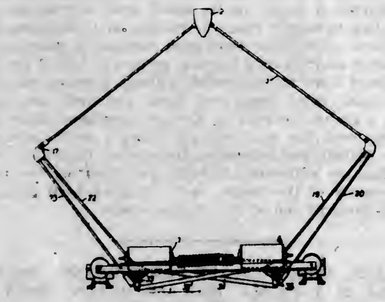
In a cotton chopper, a shaft having wheels, a gear wheel rotatably mounted on the shaft, means for communicating motion of the shaft to the gear wheel, a bearing for a chopper shaft, a member supported on the shaft and having a recess in its lower side, a trunnion pin projecting upwardly from the bearing and extending into the recess of the last mentioned member, a downwardly extending shaft on said bearing, an arm in which the last mentioned shaft is trunnioned, a frame carrying the arm, said frame being supported from the first mentioned shaft, a pinion mounted on the last mentioned shaft and meshing with the gear wheel, a chopper shaft journaled in its bearing and extending rearwardly thereof, a lever engaging the rearward extension for adjusting the shaft transversely of the frame, and a chopper head mounted on the forward end of the chopper shaft.

1,354,132. INSECT-ESCAPE FOR SCREENS. JOHN P. REILY, St. Louis, Mo. Filed Apr. 24, 1920. Serial No. 376,191. 3 Claims. (Cl. 156—37.)



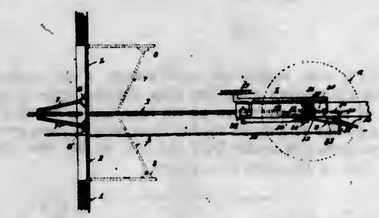
3. As a new article of manufacture, a fly escape for screens comprising a hollow cone formed from a single piece of sheet metal open at its base and pointed at its apex whereby it may be forced through a screen, and fingers projecting laterally from the base of the cone, whereby it may be attached to a screen.

1,354,133. CHAIR. HAROLD ROWNTREE, Kenilworth, Ill., assignor to National Pneumatic Company, New York, N. Y., a Corporation of West Virginia. Filed Sept. 1, 1917. Serial No. 189,397. 8 Claims. (Cl. 155—77.)



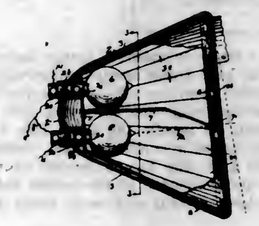
1. The combination with a seat, a back, and front support rigidly secured together, a rear support pivotally

connected to said seat, and a single bracket carried beneath said seat at the approximate center thereof and



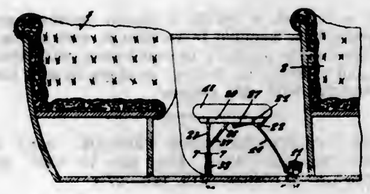
adjustably connected to said rear support for controlling the degree of pivotal movement thereof relative to said seat.

1,354,134. PANTOGRAPH-TROLLEY. WILLIAM SCHAAKE, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 29, 1915. Serial No. 64,043. 8 Claims. (Cl. 191—65.)



1. In a trolley, the combination with a pantograph frame, a contact shoe mounted upon said frame, and shafts for supporting said frame, of cams mounted upon said shafts, and vacuum-actuated mechanisms comprising cylinders, vacuum-actuated pistons operating within said cylinders and flexible connections between said cams and said pistons.

1,354,135. DOOR OPENING AND CLOSING DEVICE. VALENTINE SCHILDWACHTER, Peoria, Ill. Filed Feb. 27, 1919. Serial No. 279,477. 5 Claims. (Cl. 268—9.)



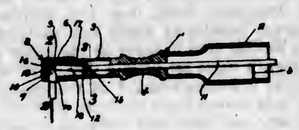
1. In combination with a door, an apparatus for opening and closing the same including a rigid member extending perpendicularly to the plane of the closed door, a guile to direct the movement of the member, an arm pivoted at one end to the member and at its other end to the door, a crank-arm operatively connected to the member adapted in the movement thereof to open or close the door, an electric motor adapted to be set in operation including a circuit-breaker, a lever-arm in control of the latter, gearing interposed between the motor and the crank-arm, and a track portion rotatable with the gearing adapted to hold the circuit-breaker closed through said lever-arm and also adapted to cause the circuit-breaker to be opened at a predetermined period in the movement of the crank-arm.

1,354,136. HEADLIGHT. EDWARD SCHUYLER, Syracuse, N. Y. Filed Nov. 4, 1919. Serial No. 335,598. 3 Claims. (Cl. 240—41.)

1. A no-glare head-light, including a conical reflector having a closed end arranged in vertical plane and provided with a reflecting surface, said reflector being formed with a plurality of wedge-shaped plane surfaces which taper from its open end to its plane end, a pair of electric lamps supported by said plane end, and a partition dividing the interior of the reflector horizontally and separating said lamps, the free end of said partition declining forwardly for restricting the rays of the lowermost lamp to the level of the horizontal axis of said lamp, and the top and bottom surfaces of said partition being polished for reflecting the rays from the corresponding lamps.

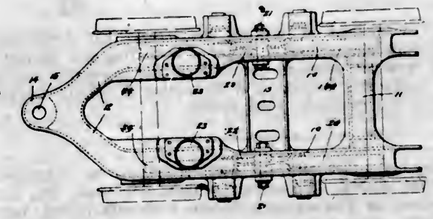
1,354,137. AUXILIARY SEAT. JOHN K. SHANAMAN, Annville, Pa. Filed July 10, 1917. Serial No. 179,686. 3 Claims. (Cl. 155—13.)

1. An auxiliary seat including front and rear legs pivotally connected to the seat, a crank shaft upon the front and rear legs for swinging the legs against one face of the seat when the seat is swung downwardly and forwardly relative to the front legs, and spring controlled lever and link connections between the front legs and the supporting structure for holding the seat yieldingly in folded position.



1,354,138. SHOE-HEEL. SAMUEL G. SHAPIRO, New York, N. Y. Filed Sept. 20, 1919. Serial No. 325,249. 2 Claims. (Cl. 36—40.)

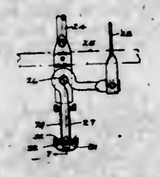
1. In combination, a metal heel having an opening therethrough, said opening being constricted intermediate its length; a plug of yieldable material to fit within said opening and extend through the constricted part of the latter; means independent of the latter to secure said plug, a flange integral with said plug adapted to rest



against the bottom portion of said metallic heel body and an integral portion of said plug below said metallic heel body shaped to form a tread.

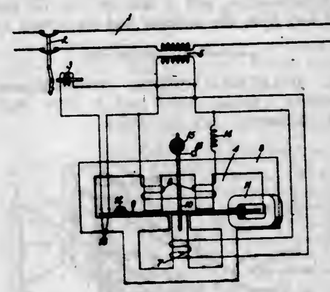
1,354,139. HANDPIECE. WILLIAM F. SHAW, Denver, Colo. Filed July 2, 1920. Serial No. 393,504. 2 Claims. (Cl. 32—15.)

1. In a device of the class described, a holder; a shaft journaled in the holder and provided with a crank; and a U-shaped tool carrier comprising arms, one of which is mounted on the shaft, the other of which is mounted on the crank.



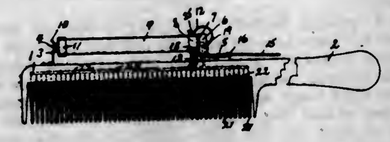
1,354,140. FRONT TRUCK FOR LOCOMOTIVES. WILLIAM M. SHEEHAN, St. Louis, Mo., assignor to Commonwealth Steel Company, St. Louis, Mo., a Corporation of New Jersey. Filed Aug. 11, 1919. Serial No. 316,805. 12 Claims. (Cl. 105—82.)

6. In a front truck for locomotives, a frame having side members, the rear ends of which are connected to form a radius bar, a plurality of wheel carrying axles journaled in said frame and locomotive frame supporting bearings on the side members of the truck frame between the wheel carrying axles.



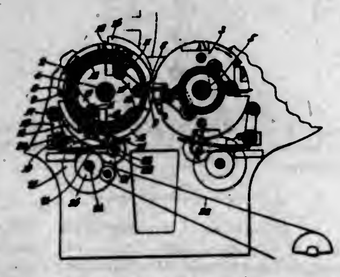
1,354,141. CHILD'S-VEHICLE CONSTRUCTION. WILLIAM J. SLEFFEL, Lakewood, Ohio, assignor to The Kirk Latty Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 17, 1919. Serial No. 277,484. 2 Claims. (Cl. 208—114.)

1. In a vehicle of the class described, the combination of an axle having vertical pins moutted adjacent either end thereof, wheel spindles bent and crimped around said pins to swing horizontally about the same, said spindles extending outwardly in line with said axle from said



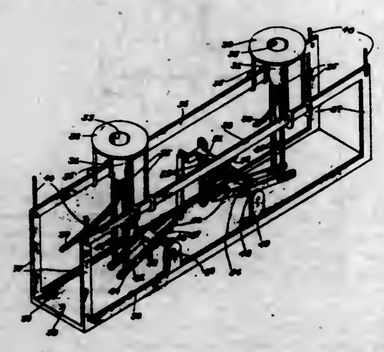
pins, and also rearwardly therefrom in parallel relation, and wheels mounted on the outwardly extending portion of said spindles.

1,354,142. ELECTRICAL PROTECTIVE DEVICE. BENJAMIN H. SMITH, Turtle Creek, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 5, 1916. Serial No. 89,068. 10 Claims. (Cl. 175—338.)



1. A relay for an electric circuit comprising a magnetizable core member, two cooperating parallel-connected current windings therefor, and an armature, portions of the core member being adapted to become magnetically saturated when a predetermined current traverses the circuit whereby the phase relation of the currents traversing the two windings so shifts that the armature develops a substantially constant torque for all values of current above the predetermined value.

1,354,143. HAIR-COMB. JOHN S. STEWART, Youngstown, Ohio. Filed May 20, 1920. Serial No. 382,980. 1 Claim. (Cl. 132—8.)



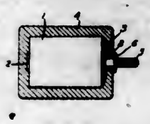
In a device of the class described, a comb having a bracket spring mounted at the outer end thereof, an upright portion, a channel therein positioned so that one end opening registers with an opening in an end cap of an oil reservoir when shifted to give exit to oil in said reservoir, a spring attached to said upright portion, an oil reservoir secured between said springs, an end cap, an opening near the circumference of said end cap, a lever for shifting the inner end of said oil reservoir, a manifold within the body portion of said comb, central openings in teeth of said comb, substantially as described for the purpose set forth.

1,354,144. DELIVERY MECHANISM. CLYDE E. SWICK, San Francisco, Calif., assignor to Hawley Pulp and Paper Company, a Corporation of Oregon. Original application filed Oct. 8, 1915, Serial No. 54,828. Divided and this application filed Mar. 16, 1918. Serial No. 222,857. 13 Claims. (Cl. 271—87.)

11. In combination, a paper folding roll, a stripper for stripping the folded paper therefrom, a stationary tumbler coöperating with the stripper to hold the folded web of paper therebetween, and a tumbler arm for removing the folded web from the stripper and stationary tumbler.

1,354,145. MILKING-MACHINE. DYON TEHUE, Calgary, Alberta, Canada. Filed Sept. 5, 1919. Serial No. 321,850. 5 claims. (Cl. 31—100.)

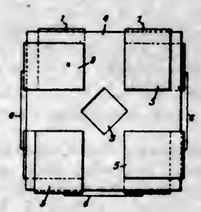
1. A milking machine comprising a portable frame adapted to be secured in operative position, a plurality of pliable teat cups adjustably mounted in said frame, said teat cups having an elliptical longitudinal section, rigid rings encompassing said cups, and means for manually actuating said rings whereby said teat cups are compressed.



2. A milking machine, comprising a portable frame, means for securing said frame in position, teat cups adjustably engaged in said frame, said teat cups being of pliable material, manually operable levers mounted on said frame, rigid rings arranged circumjacent to the smaller portions of said teat cups, and adapted to compress the same as they are moved longitudinally thereon, means combined with said levers for operating said rigid rings, and flexible tubular connections from each of said teat cups leading to a container.

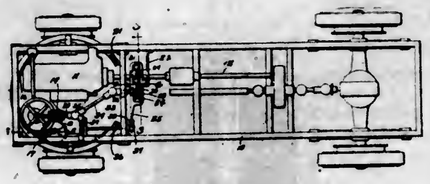
3. In a milking machine, the combination with a frame, means for supporting said frame, and a plurality of pliable teat cups adjustably mounted in said frame, of rings movable circumjacent of said cups and adapted to produce a compressive effect, therein manually operated means for actuating said rings, tubes extending from said cups, valves arranged in said tubes, a container, tubular connections extending from said container to said tubes and means for producing a partial vacuum in said container.

4. In a milking machine, the combination with a movable frame, means combined therewith for attaching said frame in operative position, said frame having a pair of rails in its upper portion, pliable teat cups adapted to receive the teats of an animal, connections from said cups to said rails whereby they may be moved longitudinally thereon, rings surrounding said cups, said rings being adapted to compress said cups as they are moved longitudinally over their surface, levers in said frames whereby said rings are moved alternately over the surface of said teat cups, a container, a gage in said container by which the contents may be visibly ascertained, flexible tubes extending from said container, a valve therein, and means for producing a partial vacuum in said container.



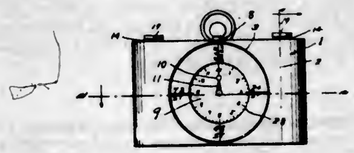
5. In a milking machine, the combination with a support frame, and means for engaging said frame with an animal, of a plurality of longitudinally disposed rails formed with said support frame, pliable teat cups adjustably arranged on said rails, said teat cups having an enlarged central portion, rigid rings disposed to encircle said cups, links extending from said rings, a lever engaged with said rings, means for actuating said lever, said lever being fulcrumed on said frame, a hollow container adapted to be sealed air tight, a gage by which the contents of said container may be visually ascertained, means for dispensing liquid from said container at the bottom thereof, handles by which said container may be operated, a flexible tube engaged at the upper portion of said container, a valve set in said tube, said tube having a plurality of branches engaged at the opposite end of said valve, said branch tubes engaging with the lower extremity of said teat cups, and independent valves set in each of said tubes whereby the passage therethrough may be individually controlled.

1,354,146. CONDENSER. PHILLIPS THOMAS, Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 25, 1919. Serial No. 279,090. 6 Claims. (Cl. 250—41.)



5. A method of making condensers that comprises superimposing alternate layers of insulating and conducting material, securing terminals to the respective layers of conducting material and die-casting a metallic casing about the condenser thus formed.

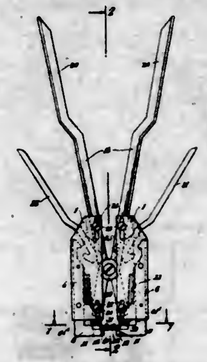
1,354,147. CONDENSER AND METHOD OF MAKING THE SAME. PHILLIPS THOMAS, Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 7, 1919. Serial No. 281,161. 7 Claims. (Cl. 250—41.)



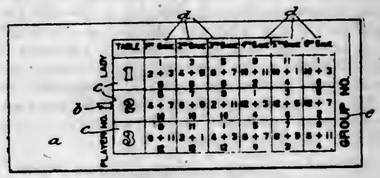
1. A condenser comprising a plurality of condenser units having a common dielectric provided with a central opening and connected in series and a casing therefor.

1,354,148. POWER-DRIVEN TRUCK STEERING-GEAR. DANIEL T. TIMBERLAKE, St. Louis, Mo., assignor to Universal Motor Truck and Traction Engine Company, St. James, Mo., a Corporation of Missouri. Filed Dec. 16, 1918. Serial No. 267,008. 6 Claims. (Cl. 180—81.)

2. In a motor truck, a main frame, a motor carried thereby, a secondary frame arranged for revoluble movement beneath the front portion of the main frame, a front axle and wheels carried by said secondary frame, a segmental rack on said secondary frame, a pinion meshing with said rack, a rocking frame provided with a friction disk, drive connections from the shaft of the motor to said disk, transmission means between said disk and pinion and means for actuating said rocking frame whereby the friction disk will cause movement to be imparted to the aforesaid pinion.



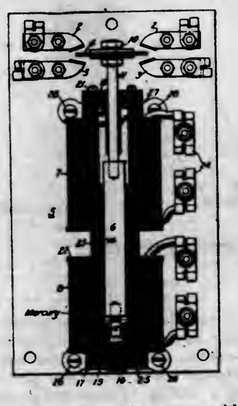
1,354,149. STREET-INDICATOR. CHRISTOPHER TEEANOR, Oakland, Calif. Filed May 5, 1920. Serial No. 379,053. 3 Claims. (Cl. 116—131.)



1. In a street indicator of the class described, the combination with a case having an opening in its front wall and a clock carried in the case with its dial in axial alinement with said opening, of a pair of vertically disposed reels carried inside the case and disposed one on each side of the clock, and a ribbon disposed between the dial of the clock and said front wall, the ribbon being windable from one of said reels onto the other thereof and provided with a plurality of circular openings extending through from one side to the other, and means for rotating said reels for moving said ribbon across said dial so that one of said last named openings may be brought into axial alinement with said dial and said first named opening.

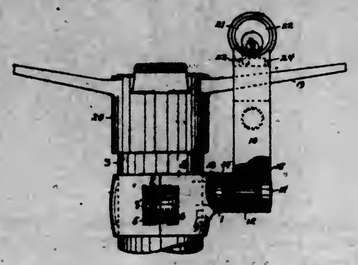
1,354,150. BENDING DEVICE FOR STRAP-FASTENERS. ALEXANDER L. WARD, New York, N. Y. Filed Jan. 10, 1919. Serial No. 270,448. 6 Claims. (Cl. 81—15.)

1. In a bending device, the combination of a pair of levers pivotally secured together to constitute pliers, a pair of members having vertical portions and horizontal foot portions, adapted to extend beneath said levers and to form a support for a band, said members being so secured to said levers as to move toward and away from each other as said levers are closed and opened and to be capable of vertical movement, relatively to said levers, said foot portions being so positioned relatively to said levers, normally, that closing movement of said levers will cause the lower ends of said levers to press vertical flanges of a band on said foot portions toward each other, and lever means pivoted to said pliers and adapted, when said first levers are closed to press said first levers downwardly relatively to said vertical members, to cause flattening of said band flanges between said foot portions and the lower ends of said first levers.



1,354,151. TALLY-CARD. WILLIAM W. WHITE, New York, N. Y. Filed May 5, 1917. Serial No. 166,570. 3 Claims. (Cl. 283—1.)

1. A set of tally cards, each card bearing marks indicating to the player holding that card the position the said player is to occupy at each of a series of tables for a predetermined number of games and the arrangement of all of the players at each of said tables for each of said games.

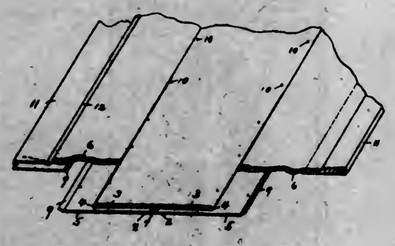


1,354,152. RELAY DEVICE. CHARLES C. WHITTAKER, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 19, 1917. Serial No. 175,595. 10 Claims. (Cl. 175—337.)

1. A relay device comprising a movable magnetizable core member, two windings for actuating the core member

in opposite directions and a body of mercury for so supporting the core member that it may be acted upon with equal promptness by both windings.

1,354,153. LOCK FOR STEERING-WHEELS. JOHN WILDING, Fort Wayne, Ind. Filed July 23, 1919. Serial No. 312,756. 3 Claims. (Cl. 70—129.)

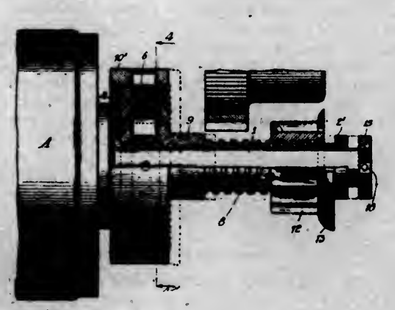


1. In a device for locking a steering wheel from turning upon its column, an internally recessed base member adapted to be immovably secured upon the column closing the interior thereof; a pair of shackles, one of which contains a lock and the other having a jaw adapted to be engaged by the lock when the shackles are in closed position; a screw for each of the shackles affording pivotal support therefor at its lower end and extending into the recessed base; and means concealed within the recessed base for securing the screws in place, said shackles being shaped so as to encompass one of the arms of the steering wheel when in locked position.

1,354,154. POTENTIALLY-REACTIVE COMPOSITION AND PROCESS OF MAKING SAME. LEO H. BAEKELAND, Yonkers, N. Y., assignor to General Bakelite Company, New York, N. Y., a Corporation of New York. Filed Oct. 31, 1919. Serial No. 334,850. 16 Claims. (Cl. 106—22.)

7. A potentially reactive composition containing a phenol resin and a methyleneamin-phenol.

1,354,155. SEAM AND EDGE BINDER FOR FLOOR-COVERINGS. FRANK R. BARCLAY, Youngstown, Ohio. Filed Mar. 4, 1920. Serial No. 363,293. 1 Claim. (Cl. 16—70.)



In a device of the class described, having in combination with a binder comprising a base portion, an upright portion, a top portion, sharp corners formed at the turns made in forming the top portion and the base portion, thereby forming a trough portion when reversed, down turned flanges on the flattened top portion, substantially as described for the purpose set forth.

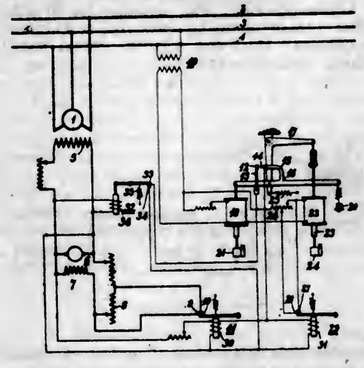
1,354,156. MOLDING PROCESS AND APPARATUS. ARTHUR J. BASTIAN, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 7, 1917. Serial No. 167,184. 4 Claims. (Cl. 154—1.)

1. The process of producing molded articles that comprises superposing in a mold a plurality of bodies of moldable material separated by plates conforming in outline to the shape of the mold, each of the bodies of moldable material being composed of sheets of fibrous material associated with a binder that is adapted to soften when heated and to harden under the influence of pressure and further heat, and applying heat and pressure simultaneously to all of the superposed bodies.

1,354,157. ENGINE-STARTER. VINCENT BENDIX, Chicago, Ill. Filed Dec. 18, 1918. Serial No. 267,281. 10 Claims. (Cl. 74—7.)

1. In an engine starter, a drive or transmission comprising a driving shaft, a driving head secured thereto, a sleeve mounted on the shaft for rotary movement therewith and with respect thereto, and having a driven head coöperating with the other head, said two heads being concentric of each other, a spring coöperating with the two heads and forming a driving connection between them, and a driving member mounted on the sleeve for longitudinal movement thereof and rotary movement therewith.

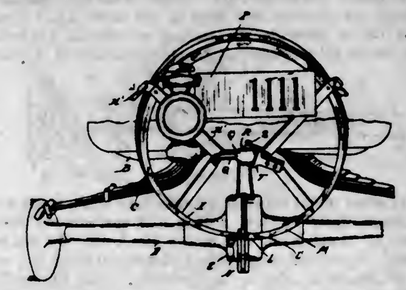
1,354,158. REFLECTING LAMP SHADE AND GLOBE. ERNEST M. BENNETT, Prahran, Melbourne, Victoria, Australia. Filed Dec. 20, 1918. Serial No. 267,626. 2 Claims. (Cl. 240—106.)



2. A lamp shade or globe of transparent glass, having a reflecting medium covering its exterior surface, and provided on its interior with integral, inwardly-extending multi-sided projections, the sides of said projections being of concave formation.

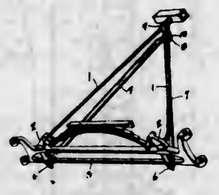
1,354,159. PIN-ATTACHED SEPARABLE FASTENER. IDA V. BENOIT, Brooklyn, N. Y. Filed Apr. 10, 1918. Serial No. 227,789. 7 Claims. (Cl. 24—88.)

1. In a separable fastener, a head member, and a socket member, said socket member comprising a pin adapted to be passed at least once through the material and back again and resilient gripping means integrally connected to said pin and adapted to receive the head member.



1,354,160. ELECTRICAL REGULATOR. CLARENCE A. BODDIE, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 28, 1917. Serial No. 157,930. 6 Claims. (Cl. 171—229.)

6. The combination with a dynamo-electric machine and an exciter therefor, of a regulator of the vibratory type for the field strength of the exciter and means intermittently operated under certain conditions for modifying the operation of the regulator when the exciter voltage exceeds a predetermined value.



1,354,161. DEMOUNTABLE-RIM SUPPORT FOR MOTOR-VEHICLES. WILLIAM N. BOOTH, Detroit, Mich. Filed July 23, 1917. Serial No. 182,179. 10 Claims. (Cl. 224—29.)

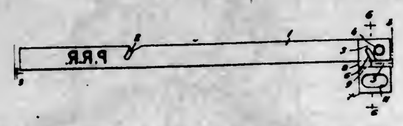
1. In a motor vehicle, the combination with a frame having a rear cross-bar, a spring for supporting the same and clips for securing said frame to said cross-bar, of a tire-holder in rear of said frame, and a support for

said tire-holder comprising angle bars secured by said clips, the rear ends thereof being split and bent to form supporting braces for said holder.

1,354,162. FRONT-AXLE BRACE. ALLEN E. BOSLEY, St. Louis, Mo. Filed Mar. 24, 1919. Serial No. 284,612. 2 Claims. (Cl. 267—66.)

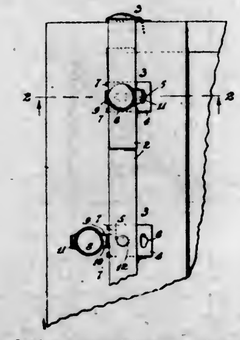
1. The combination with radial brace rods of an automobile which are connected at their forward ends to the front axle of the automobile and which converge and are connected together at their rear ends and terminate in a ball or universal connection to a part of said automobile, a member embracing said ball and extending between the crotch of said brace rods, and auxiliary brace rods connected to said member and to the front axle of said automobile.

1,354,163. VEHICLE-WHEEL. HENRY F. BRANDT, Peoria, Ill. Filed Oct. 13, 1919. Serial No. 330,459. 2 Claims. (Cl. 301—52.)



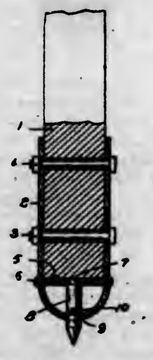
1. In a vehicle wheel, a pair of rim portions each including a flange at one edge, spaced members integral with the rim portions securing them in rigid spaced relation, said members extending beyond the outer edges of the rim portions, a detachable flange engaging over the extensions of the members and supported upon them, a tread portion carried by each rim portion, means for clamping the tread portions in position, and spaced lugs lying between the first named flanges inward from the tread surfaces of the said tread portions.

1,354,164. SHACKLE-SEAL. WINFRED MUDGE BROOKS, West Orange, N. J. Filed Apr. 28, 1920. Serial No. 377,227. 2 Claims. (Cl. 292—322.)



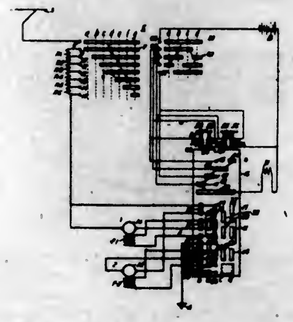
1. A shackle seal comprising: a sheet metal blank in strip form having, near one end thereof, a notch in one

of its side edges, a sheet metal sealing member, superimposed on said sheet metal blank near its other end, having a notch complementary to the first and disposed adjacent the opposite side edge of the sheet metal blank, means for so securing the sealing member to the sheet metal blank as to admit of the introduction of a thick-



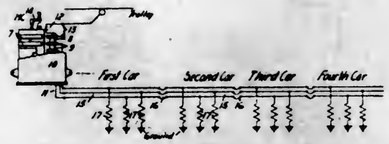
ness of sheet metal between the two, said blank being bent back upon itself to form a loop and the notches interlocked, by crossing one end of the blank over the sealing member, to prevent longitudinal displacement of the two ends of the strip, and a lug projecting from the sealing member beyond one of the side edges of the sheet metal blank to be folded over the interlocked parts.

1,354,165. SEALING MEANS. WINFRED MUDGE BROOKS, West Orange, N. J. Filed July 14, 1920. Serial No. 396,166. 3 Claims. (Cl. 292—325.)



1. A sealing device comprising: a sheet metal blank consisting of a body portion, a head connected to said body portion by a weakened neck, said head being doubled over the body portion by bending the neck, and a piercing lug extending at an angle from the free end of the head toward the plane of the body portion when the parts are bent up.

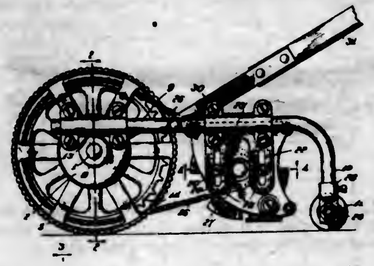
1,354,166. LADDER-FOOT. JOSEPH E. BUSKO, Pittsburgh, Pa., assignor to Safety First Supply Company, a Corporation of Pennsylvania. Filed May 24, 1920. Serial No. 383,712. 8 Claims. (Cl. 228—61.)



1. In combination in a ladder foot, a U shaped member adapted to fit around the end of the side bar of a ladder, means for securing the sides of said member to said end of the side bar, a transverse bar secured at its ends to the sides of the U shaped member, and provided with a socket and a prong secured removably in said socket with its end extending through the curved portion of the U shaped member.

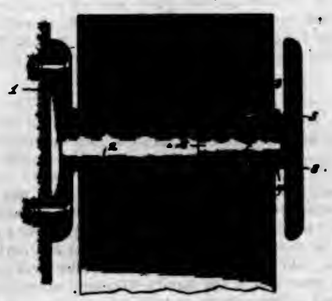
1,354,167. CONTROL SYSTEM. ANDREW H. CANDEE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 3, 1917. Serial No. 184,244. 5 Claims. (Cl. 172—179.)

4. In a system of control, the combination with a plurality of rotatable control drums, of plural means biased to lockingly engage the end surface of one drum in different positions thereof, said means being successively electrically released by another drum.



1,354,168. SYSTEM OF CONTROL. JOHN A. CLARKE, Jr., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 3, 1917. Serial No. 194,427. 5 Claims. (Cl. 172—179.)

1. In a multiple-unit system of control, the combination with a common controller for such units and a magnetic-blowout coil for said controller, of means comprising a resistor that is bodily movable to shunt said coil to maintain a substantially constant current therein, irrespective of the number of series-related control units.



1,354,169. LAWN-MOWER. HARRY T. COLDWELL, Chicago, Ill., assignor of one-half to George A. Sanford, Morristown, N. J. Filed Oct. 6, 1919. Serial No. 328,899. 11 Claims. (Cl. 56—249.)

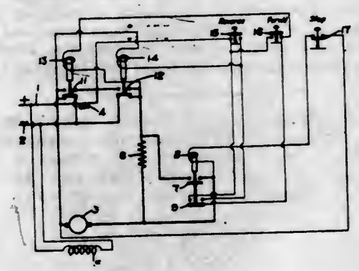
1. A lawn mower comprising in combination, a frame, a pair of tractor wheels supporting the same, cutting mechanism geared to said tractor wheels, means permitting vertical adjustment of the cutting mechanism on the frame, and separate means permitting adjustment of the cutting mechanism on the frame toward and from the tractor wheels to compensate for variations in the distance be-

tween the cutting mechanism and tractor wheels due to vertical adjustment, substantially as described.

1,354,170. TOILET-PAPER FIXTURE. FRED WESLEY COOK, North Chicago, Ill., assignor to Chicago Hardware Foundry Company, North Chicago, Ill., a Corporation of Illinois. Filed Oct. 29, 1919. Serial No. 334,318. 3 Claims. (Cl. 211—31.)

1. The combination in a toilet paper fixture, of telescoping fixed and removable sections, the fixed section comprising a head formed with orifices for the passage of attaching screws and a tubular shank extending centrally from said head and provided with a notch in its free end, the removable section comprising a circular head and a stem extending centrally from the head and adapted to fit the bore of the tubular shank of the fixed section, said removable section having a stop lug adapted to engage the notch of the tubular shank aforesaid and hold the parts from independent turning movement, and means associated with said stem and shank for locking the sections together.

1,354,171. TONE-MODIFIER. EARL F. COPP, Montclair, N. J. Filed Apr. 29, 1920. Serial No. 377,429. 9 Claims. (Cl. 274—27.)

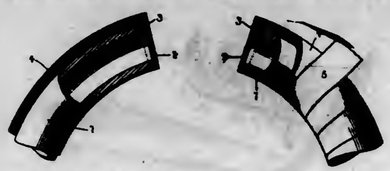


1. A tone modifier for phonographs comprising tone modifying means operable to engage successively smaller areas of the diaphragm of a sound box, and a control device for thus operating said tone modifying means to successively reduce the free vibrating area of the diaphragm.

1,354,172. AUTOMOBILE-LOCK. JOHN COURTNEY, Mark Center, Ohio. Filed Oct. 15, 1918. Serial No. 258,202. 1 Claim. (Cl. 70—126.)

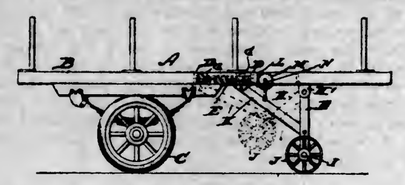
A locking device for automobiles having three pedals, comprising two elongated arms of different lengths which are straight for the greater portion of their length to engage with both sides of the three pedals and hold the pedals in alinement with each other, each arm near one end terminating in a curve, a hing connecting the curved ends of the arms, each arm terminating at the unhinged end in an eye, with the arms, eyes and hinge all in substantially the same plane, and a closed link pivotally carried by the eye of the shorter arm and movable over the end of and embracing the longer arm, whereby the two arms may be locked in parallel relation, said device being applied so as to extend loosely along the upper and lower sides of the pedals whereby if one pedal is depressed the other two must move it.

1,354,173. MOTOR-CONTROL SYSTEM. RAY E. DE CAMP, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 6, 1916, Serial No. 124,043. Renewed Mar. 30, 1920. Serial No. 370,049. 5 Claims. (Cl. 172—288.)



3. In a control system, the combination with a pair of switches each adapted to occupy a normal position, and an actuating coil for each of said switches adapted to cause the actuation of its corresponding switch to a second position, of a second pair of switches each adapted to cause the energization of one of said coils to effect said actuation of said corresponding switch, the circuit of the actuating coil of each of said first pair of switches including said controlling switch for said coil and the other of said first pair of switches when said other switch occupies said normal position, and means for short-circuiting said controlling switch from said circuit but maintaining said other of said first pair of switches in said circuit.

1,354,174. METHOD OF MAKING INNER TUBES. HENRY DECH, Trenton, N. J., assignor to Mercer Tire Company, Trenton, N. J., a Corporation of New Jersey. Filed Apr. 12, 1917. Serial No. 161,619. 4 Claims. (Cl. 154—14.)



1. The method of making an inner tube comprising, first, building the major part of the tube on a curved mandrel;

second, vulcanising the said part; third, removing it from the mandrel; fourth, placing a section of similar tubular form and having laterally extending sleeves between and

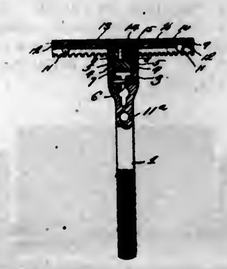
abutting the ends of the said part with the sleeves projecting within the said part; and, finally, vulcanising the ends and section together.

1,354,175. TRAILER. CONSTANT DE MATTIA, Detroit, Mich., assignor to Wolverine Truck-Trailer Co., Detroit, Mich., a Corporation of Michigan. Filed Dec. 19, 1919. Serial No. 346,092. 3 Claims. (Cl. 280—33.1.)

1. In a trailer, a main frame including side members and transverse members connecting the side members, spaced I-beams connecting a pair of the transverse members and confined within the main frame, a screw shaft journaled in said pair of transverse members and located between said I-beams, a block having screw threaded connection with said screw shaft to travel on the latter and having grooves in the sides thereof to receive flanges of said I-beams whereby to guide said block, a swinging frame having pivotal connection with the main frame and with said block, and means to rotate said shaft to shift said block and therefore raise and lower said swinging frame.

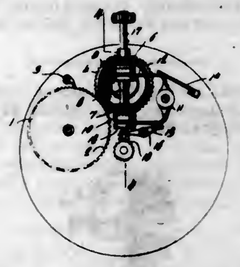
1,354,176. SHEET-MUSIC. JOHN S. DONSON, Buffalo, N. Y., assignor, by direct and mesne assignments, to The Niantic Sheet Music Company, Buffalo, N. Y., a Corporation of South Dakota. Filed Sept. 24, 1919. Serial No. 326,013. 5 Claims. (Cl. 283—47.)

1. Sheet music formed of a single strip or sheet of material and having a sheet of music printed on each side thereof with the title of each piece of music following and printed on the same side as the other piece of music, the whole being folded to expose the titles at the front and rear so that when opening the folded sheet music, the piece of music corresponding to the exposed title will be brought to view.



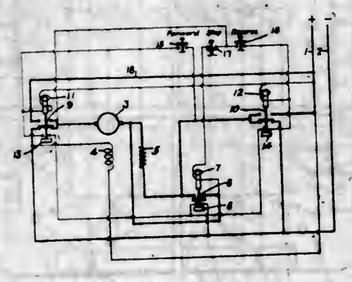
1,354,177. BUFFER-SPRING FOR VESTIBULE-DIAPHRAGM FACE-PLATES. CARL E. EKLIND, Chicago, Ill., assignor to Walter P. Murphy, New York, N. Y. Filed Oct. 10, 1919. Serial No. 329,650. 10 Claims. (Cl. 105—14.)

1. The combination with the end wall and diaphragm face plate of a vestibule railway car, of a semi-elliptical spring, the middle of which is engaged with one of the aforesaid elements of the car, and links each pivoted at



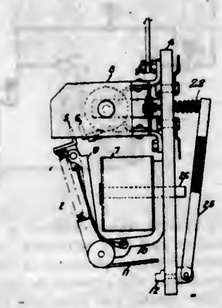
an end remote from the aforesaid car element to one of the extremities of said spring at its other end pivotally connected with the other of said car elements.

1,354,178. SAFETY-RAZOR. CHARLES S. FARRISS, De Land, Fla. Filed July 11, 1919. Serial No. 310,233. 2 Claims. (Cl. 30—12.)



2. A safety razor comprising a handle, one end of said handle being provided with a bifurcation, a razor head, said razor head being threaded into a lug, said lug being disposed between the arms formed by the bifurcation and pivoted in said arms, the razor head being provided with a lug, an aperture in the handle disposed below the bifurcation, said aperture being adapted to receive the lug carried by the razor head when a partial turn is imparted to the razor head on the pivoted lug and the razor head tilted to a parallel position in relation to the handle.

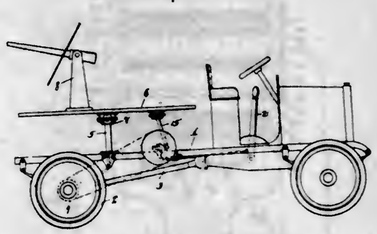
1,354,179. STEM WINDING AND SETTING MECHANISM FOR WATCHES. CHARLES I. FURBISH, Amesbury, Mass. Filed Apr. 22, 1920. Serial No. 375,737. 7 Claims. (Cl. 58—68.)



1. A winding mechanism for a time movement the same comprising a winding gear, an operating stem and intermediate gearing between the winding gear and operating stem and embodying a ratchet connection whereby a continuous winding may be effected by a forward and a backward rotation of the operating stem.

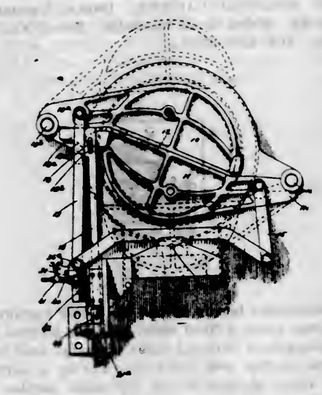
1,354,180. MOTOR-CONTROL SYSTEM. ADOLPH A. GASDA, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 30, 1916. Serial No. 123,068. 6 Claims. (Cl. 172—288.)

1. In a motor-control system, the combination with an electric motor, of a switch adapted to be closed to start said motor and having an actuating coil, an accelerating switch, means for temporarily closing the circuit of said coil, and means operatively connected to said accelerating switch for maintaining the circuit of said coil energized.



1,354,181. SWITCH MECHANISM. ADOLPH A. GASDA, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 19, 1917. Serial No. 202,701. 10 Claims. (Cl. 200—94.)

1. In a switch mechanism, the combination with a main switch having an energizing and a blowout coil, and an auxiliary switch biased to its open position, of means controlled by said energizing coil for effecting the closing of said auxiliary switch, and means controlled by the blowout coil for permitting the closing of the auxiliary switch under predetermined conditions.

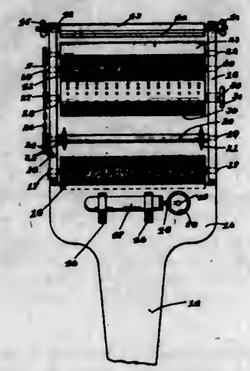


1,354,182. GUNNERY-TRAINING APPARATUS. GIUSEPPE GIANGIORGIO, Cleveland, Ohio. Filed Oct. 6, 1919. Serial No. 328,816. 2 Claims. (Cl. 89—40.)

1. In a device of the character described, the combination with a motor driven vehicle, of a platform pivotally mounted upon the vehicle frame, a gun mounted upon said platform, a crank shaft mounted transversely upon said frame, a rod connecting said crank shaft with the platform about centrally and longitudinally of the vehicle, a crank shaft mounted longitudinally upon said frame, gearing connecting said crank shafts, a rod connecting

said second crank shaft with the platform at one side of the vehicle, and gearing connecting the driving axle of said vehicle with said first named crank shaft for imparting a longitudinal and transverse rocking movement to said platform.

1,354,183. FIRE-DOOR-OPERATING MECHANISM. ARTHUR W. GILLESPIE, Chicago, Ill. Filed Dec. 2, 1916. Serial No. 134,729. 6 Claims. (Cl. 110—177.)



1. In combination, a fire door comprising sections mutually separable on opening, said sections being operatively connected, a foot-operable means to move said sections to open position, said means being controlled by a foot lever, and fluid-operable means to move said sections to open position, said fluid-operable means being controlled by said foot lever, said foot lever being detachable from said foot-operable means when it is desired to operate said fire door by said fluid-operable means.

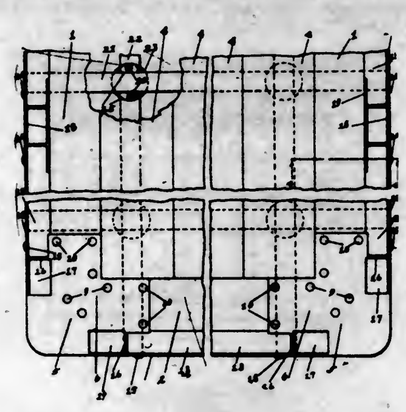
1,354,184. PAPER-HANGING APPARATUS. ANTHONY GRIGAS and MIKE GRIGAS, Worcester, Mass. Filed July 16, 1919. Serial No. 311,125. 3 Claims. (Cl. 216—6.)

1. In a paper hanging apparatus, the combination with a handled frame having a pair of spaced arms extending at the head thereof, a paste supplying cylinder rotatably

mounted therein, means for pressing paper against said cylinder, a roller mounted between said arms adapted to press the paper upon the wall, means for trimming the

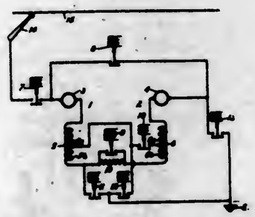
edges of said paper combined with said arms, a plate mounted in said arms adapted to enter angular corners by which said paper is pressed therein, and means for adjusting said plate.

1,354,185. [WITHDRAWN.]



1,354,186. HORSE-DETACHER. ROBERT THOMAS HARP, Gatliff, Ky. Filed Sept. 11, 1919. Serial No. 323,101. 1 Claim. (Cl. 278—32.)

Horse detaching means of the character specified, comprising a base plate, a fixed member and a pivoted member mounted thereon, a covering plate engaging said members and secured to the base plate and having a portion upturned, a lever pivoted to the upturned portion of the covering plate and having a longitudinal slot therein, a restraining member adapted to engage the before mentioned pivoted member and passing through the slot of said lever and a keeper insertible between the fixed and pivoted members and normally retained in operative position thereby.

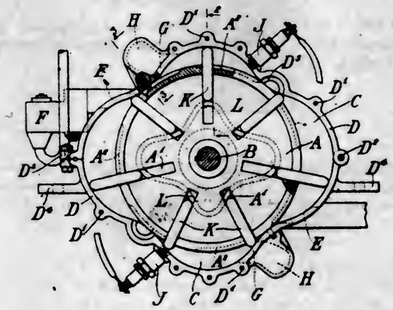


1,354,187. TRUCK-BODY. DAVID H. HARRIS, Kalamazoo, Mich. Filed Apr. 3, 1920. Serial No. 371,095. 9 Claims. (Cl. 296—43.)

1. In a structure of the class described, the combination of side and end sills having mitered joints, a combined stake pocket and corner iron comprising a top plate having an outer flange at its edge and an angled inner flange embracing the edges of the sills with the top plate resting thereon, the ends of the inner flange being extended beyond the ends of the outer flange providing attaching ears, there being cross members between said flanges coacting therewith to provide stake pockets, bolts disposed vertically through said top plate and sills, a tie plate on the under side of said sills overlapping the joint thereof and receiving bolts disposed at the ends of the sills, filler bars disposed on the edges of the sills to

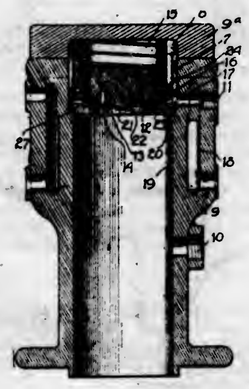
abut said corner iron and overlap said attaching ears, edge straps arranged over said filler bars with their ends abutting the corner iron, and bolts disposed horizontally through said straps, filler bars, attaching ears and sills.

1,354,188. CONTROL SYSTEM. RUDOLF E. HELLMUND, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 7, 1916. Serial No. 76,600. 19 Claims. (Cl. 172—179.)



3. In a control system, the combination with two motors having armature and field windings, and a resistor, of means for short-circuiting portions of said field windings, means for reversing the current flowing through one of said motors, and means for inserting the resistor in the circuit of said motor when the current is reversed therethrough.

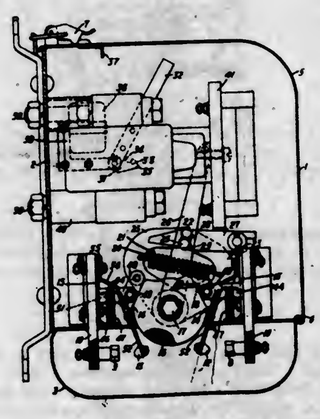
1,354,189. INTERNAL-COMBUSTION ROTARY ENGINE AND THE LIKE. HERBERT GEORGE HOWITT and WYNDHAM JAMES PRICHARD, Merthyr Tydfil, Wales, and JOHN EVANS, Eltham, London, England. Filed May 21, 1920. Serial No. 383,328. 5 Claims. (Cl. 123—16.)



1. A rotary internal combustion engine, comprising a rotor, a stator surrounding the rotor and defining, with the rotor, pairs of chambers for the reception and ignition of explosive charges, conduits in the stator between one chamber of a pair and the next chamber in order of the same pair, means for conducting an explosive charge into the first chamber in order of each pair, means for conducting gases of combustion from the second chamber of each pair, projectable and retractable vanes carried by the rotor with the periphery of the rotor

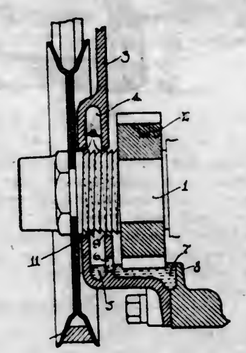
provided with longitudinally arranged grooves each associated with a vane, division members carried by the stator

between each pair of chambers and adapted and having a constant tendency to enter the grooves in the periphery of the rotor.



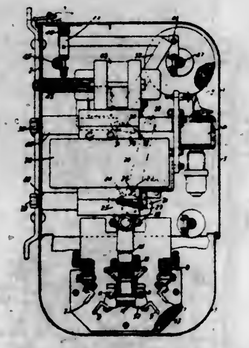
1,354,190. AMMONIA-COMPRESSOR. GEORGE HILGER, Chicago, Ill. Filed Nov. 26, 1919. Serial No. 340,747. 9 Claims. (Cl. 230—34.)

1. In an ammonia compressor, the combination with a cylinder provided with an inlet port and having a chamber provided with an exhaust port, of a cup-shaped head mounted in the chamber, a series of ports in the end of said head opening into the cylinder, a second series of ports in the side wall of said head, valve means within said head for controlling the ports in the end wall thereof, a clamping member for said valve means mounted within said head, said clamping member and head being shaped to provide at opposite ends of the ports in the side wall thereof annular channels, the inner one of which is adapted to receive fluid from the ports in the end wall of the head and the outer one of which communicates with said exhaust port.



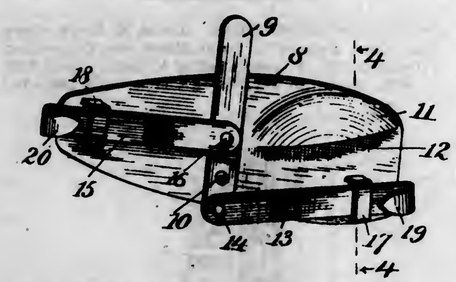
5. In an ammonia compressor, the combination with a cylinder, of a head in the form of a cup-shaped member provided in its bottom wall with a plurality of ports and having clamped on the outer side of said wall a resilient disk for controlling the flow of pressure fluid from the cylinder, said disk being secured in position by a spring pressed clamping member.

1,354,191. CONTROLLER. CHARLES H. HODGKINS, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed June 6, 1916. Serial No. 101,905. 14 Claims. (Cl. 200—6.)



3. In a controller, the combination with a casing, and an actuating member, of a bearing member for said actuating member, and a member molded therein for securing said bearing member to said casing.

1,354,192. PACKLESS JOINT. JAMES M. HOWE, Cleveland, Ohio, assignor to Grant Motor Car Corporation, Cleveland, Ohio, a Corporation of Virginia. Filed Sept. 1, 1917. Serial No. 189,239. 3 Claims. (Cl. 286—10.)

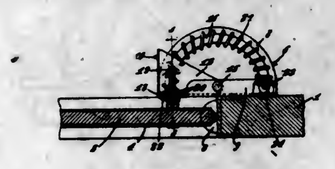


1. In a device of the character described, the combination of a casing having a casing-wall having a pocket therein, and an aperture therethrough, the inner wall of the pocket having an aperture communicating with the interior of the casing, a shaft extending through the apertures in said casing wall, buttress threading formed on said shaft beneath and adjacent to said casing wall and pocket, said threading being formed with clearance within the walls of such aperture and being adapted to actuate lubricant therein away from the outer wall of said casing, such pocket being adapted to collect such lubricant whereby said lubricant will flow back into said casing through such communicating aperture.

1,354,193. CONTROLLER. HENRY D. JAMES, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed May 16, 1916. Serial No. 97,849. 23 Claims. (Cl. 200—6.)

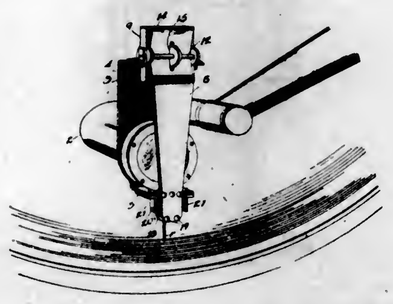
1. In a controller, the combination with a switching device, and a casing therefor comprising a cover member, of means comprising a latching mechanism for controlling said device, and a member connected to said cover member for actuating said controlling means upon the removal of said cover member under predetermined conditions.

1,354,194. FASTENING DEVICE FOR CHAINS. ELMER JOHNSON, Dodgeville, Wis. Filed Oct. 1, 1919. Serial No. 327,644. 6 Claims. (Cl. 24—68.)



4. A fastening and tensioning device for chains comprising a base plate, a hand-operated lever pivoted thereto, arms pivoted to said lever on opposite sides of its pivot, guide loops for said arms, means on the arms for connecting the ends of a chain thereto, and a longitudinally disposed shoulder provided on the plate having one side inclined, said shoulder being designed to lock the lever from movement.

1,354,195. COMBINED COMPASS AND QUADRANT. DAMIAN JOKUBAITIS, Terre Haute, Ind. Filed Oct. 15, 1919. Serial No. 330,708. 2 Claims. (Cl. 33—1.)



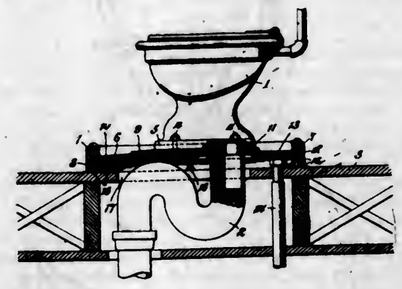
1. In a device of the class described, the combination with a barrel, of a plurality of supports pivotally engaged in one end of said barrel by which it may be supported in a vertical position, and a segment plate adapted to pass through one of the slots whereby the inclination of said barrel may be ascertained.

1,354,196. DOOR-SPRING. MARTIN A. KALTON, Minneapolis, Minn. Filed June 7, 1920. Serial No. 387,265. 3 Claims. (Cl. 16—100.)

2. In a device of the class described, a door frame; a hinged door; a bracket carried by the frame; an arcuate support connected at its ends to the bracket, the bracket including a top plate of sufficient size to shield the support, and a bottom flange below the support; an arm extended between the top plate and the flange and slidable on the support; a pivot element mounted in the top plate and in the flange and constituting a mounting for the arm; a spring on the support and abutting against the arm; an adjustable stop on the arm and lying in the path of the door; and means for holding the stop in adjusted positions on the arm.

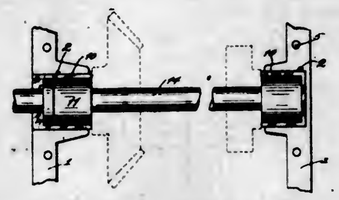
1,354,197. REPRODUCER FOR TALKING-MACHINES. JOHN W. KAUFMANN, Baltimore, Md. Filed July 17, 1919. Serial No. 311,623. 4 Claims. (Cl. 274—35.)

1. In reproducers, a bracket plate supported by the sound box and extending beyond the same at one end of the plate, said plate having at each end a laterally bent portion, a substantially rectangular frame pivoted to one of the laterally bent portions to swing on a central axis transverse to the frame, a needle holder pivoted to the other to swing on an axis parallel with that upon which the frame swings, and a resilient transmitting plate connecting the frame to the needle holder and extending transversely of the diaphragm.



1,354,198. MOLD. WILLARD H. KEMPTON, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 25, 1919. Serial No. 279,128. 4 Claims. (Cl. 18—6.)

3. In a mold, a pressure-applying member formed with a recess in its work-engaging face, a stud slidably mounted in the recess and so proportioned that, in its innermost position, its outer end lies flush with the work-engaging face of the pressure-applying member, a pin extending

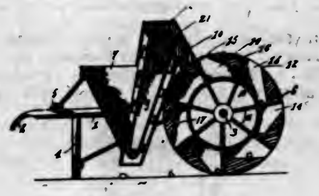


through the pressure-applying member and through a slot formed in the stud to limit the movement of the stud, and a spur projecting from the outer end of the stud.

1,354,199. DRIP-PAN FOR SANITARY CLOSETS. GEORGE W. KETTERINGHAM, La Fayette, La. Filed Jan. 9, 1919. Serial No. 270,333. 3 Claims. (Cl. 4—18.)

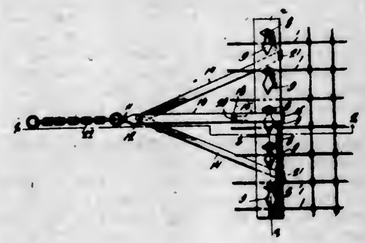
1. In a device of the character described, a base portion having a marginal flange extending around its edges from each side thereof, the upper face of the base portion having a raised portion centrally thereof, the flange of the upper face coöperating with said raised portion to conduct fluids to a predetermined point of said base portion, the lower marginal flange being set upon the floor and spacing the base portion above said floor, said spacing providing room for a trap set in the floor to extend above the same.

1,354,200. BEARING AND METHOD OF CONSTRUCTING THE SAME. JOHN JAMES KNIGHT, Alameda, and MARK LEE, Oakland, Calif. Filed July 22, 1919. Serial No. 312,616. 5 Claims. (Cl. 64—10.)



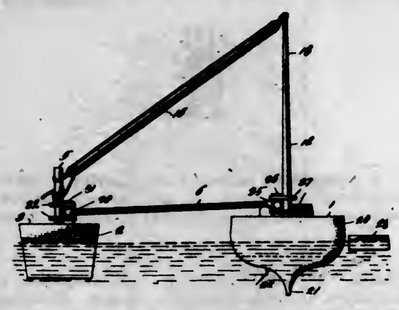
1. The method of making a bearing consisting first in casting a bearing seat within a supporting body, thence positioning therein a mandrel or core of the size of the bearing to be mounted and smaller than said bearing seat to provide a space between the surface of the mandrel or core and the surface of the seat, thence pouring the fluid metal into said space to line said seat and permitting the same to harden, and thence removing the mandrel or core and positioning an anti-friction bearing within the lined seat with the outer shell thereof resting on the surface of the liner.

1,354,201. PACKING-WASHER FOR CAPS OR THE LIKE. HENRY PHILLIP KRAFT, Ridgewood, N. J. Filed Feb. 20, 1915. Serial No. 9,537. 9 Claims. (Cl. 152—12.)



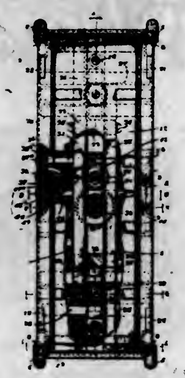
1. A dome-shaped packing washer having a central recess for receiving a valve pin, and having a dome-shaped member of stiffening material fixed throughout thereto.

1,354,202. POTATO-PLANTER. HERMENEGILDE J. H. LAPLECHE, Casselman, Ontario, Canada. Filed Aug. 8, 1919. Serial No. 316,116. 1 Claim. (Cl. 275—2.)



A potato planter comprising a frame, a ground wheel having a hub supported within said frame, said ground wheel formed with inner and outer rims, spokes connecting said hub and rims, blocks secured to said spokes between said rims and forming compartments having outlet openings, said blocks formed with inclined inner surfaces which diverge toward their point of connection with said spokes and the angle of inclination of said blocks, causing the potatoes to drop out of said compartments, when the latter have reached their lowermost position in the travel of the ground wheel.

1,354,203. WIRE-STRETCHER. ANDY W. LORD, Gerster, Mo. Filed Dec. 13, 1919. Serial No. 344,690. 3 Claims. (Cl. 254—83.)



1. In a device of the class described, the combination of clamping means and a pulling frame, a central rod and side rods provided in said frame, one end of said central rod bent so as to form a loop, the end of said loop provided with an aperture adapted to register with an aperture provided in the body portion of said central rod, the ends of said side rods provided with apertures, whereby a rivet may be passed through all of said apertures for holding said rods in pivotal relation with one another.

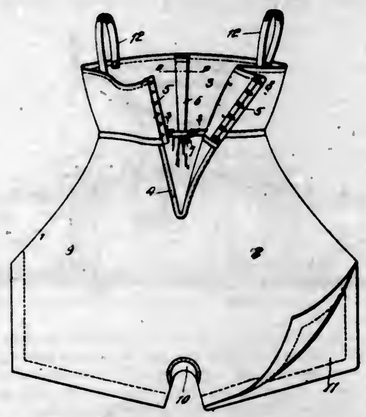
1,354,204. BOAT-LISTING APPARATUS. ALBERT McDOWELL, Los Angeles, Calif. Filed Oct. 16, 1919, Serial No. 330,992. Renewed Aug. 5, 1920. Serial No. 401,562. 11 Claims. (Cl. 114—0.5.)

10. An apparatus adapted for engagement with a boat to list it while in the water and holding it in listed position.

1,354,205. BINDER. FRED L. MANNY, Benton Harbor, Mich., assignor to Baker-Vawter Company, Benton Harbor, Mich., a Corporation of Michigan. Filed Sept. 11, 1917. Serial No. 190,743. 16 Claims. (Cl. 129—13.)

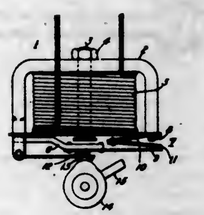
1. In a loose-leaf binder, a back plate, side plates slidingly mounted therein, cross racks secured to said side plates, a longitudinal rack slidingly mounted on said back plate, pinions intermediate said longitudinal rack and cross racks, another pinion geared to said longitudinal rack, a ratchet coupling one member of which is connected to said last mentioned pinion, and manually operable means coöperating with the other member of said coupling for clamping the side plate against interposed sheets.

16. In a loose-leaf binder having extensible side frame plates formed with vertical flanges, post bars secured to said plates and arranged to embrace a body of interposed sheets, a telescoping expansible locking post adapted to be inserted through registering orifices in the flange of the frame plate and post bar on one side, and locking mechanism coöperating with the head of said locking post arranged between such frame plate and post bar.



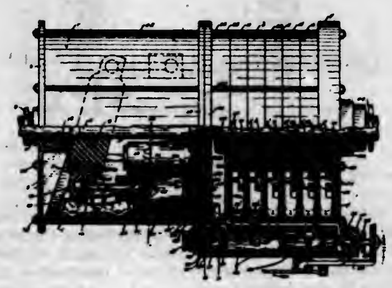
1,354,206. PURSE, HANDBAG, OR THE LIKE. FREDRICK NICKEL, New York, N. Y., assignor to Springmeyer, Pattberg & Co., Hoboken, N. J., a Corporation of New Jersey. Filed Apr. 21, 1920. Serial No. 375,645. 1 Claim. (Cl. 150—3.)

A handle fastening device for bags or the like, comprising a sheet metal member having an aperture near one end, an open transverse U at the other end, one side of the U being provided with a projecting tongue, said sheet metal member being folded upon itself and inclos-



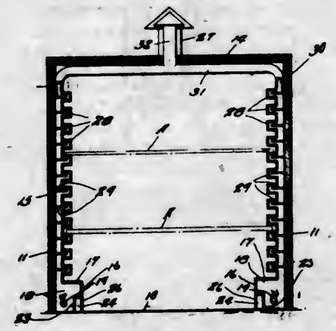
ing a portion of the material of the hand bag or the like including the margin or edge thereof, the tongue passing through the material and aperture and being bent over.

1,354,207. BRASSIÈRE AND DRAWERS. RUTH BLOCH OPPENHEIMER, New Rochelle, N. Y. Filed Sept. 27, 1919. Serial No. 326,858. 1 Claim. (Cl. 2—145.)



A one piece undergarment for stout women composed of a back with a single opening which may be closed by suitable means, which opening is located at the top, a front without an opening, arm straps and leg openings that extend well up at the sides.

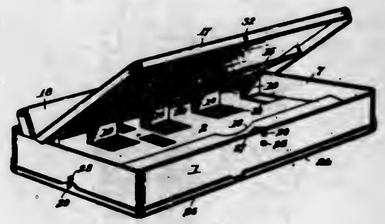
1,354,208. ELECTROMAGNETIC DEVICE. ALFRED H. PACKER, Pittsburgh, and FRANCIS H. PATTEN, Edgewood Park, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 16, 1919. Serial No. 271,469. 8 Claims. (Cl. 200—87.)



1. In an electromagnetic device, an energizing coil, a pivotally mounted armature controlled by said coil, and a resilient stop member mounted independently of, and engaging said armature, said member having a portion thereof composed of two metals having different coefficients of expansion.

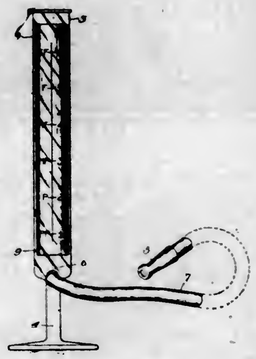
1,354,209. POWER-TRANSMISSION MACHINE. PETER R. PETERSON, Salt Lake City, Utah, assignor to Peterson-Harnden Fluid Clutch Co., Salt Lake City, Utah, a Corporation. Filed Dec. 30, 1918. Serial No. 268,984. 4 Claims. (Cl. 60—53.)

1. In a power transmission machine the combination of a driving shaft; an inclined rotor thereon having annular ball grooves cut in its periphery; an annular member oscillated by said rotor and having annular ball grooves cut in its inner wall; balls in said grooves; pistons connected with and operated by said annular member; chambers in which said pistons are operated; a valve plug in each of said chambers; valves in said plug to direct the flow of oil into and out of said chambers; a driven shaft in alinement with said driving shaft; a plurality of rotors secured on said driven shaft; a plurality of disk plates in which said rotors are operated each having inlet and outlet conduits cut therein; and a valve to direct and control the flow of oil to all or any one of said disk plates as desired.



1,354,210. JAPANNING-OVEN. OTTO PORBECK, St. Louis, Mo. Filed Oct. 4, 1919. Serial No. 328,426. 10 Claims. (Cl. 34—39.)

1. In an oven of the class described, a housing, a corrugated wall arranged within said housing and spaced apart from one of the walls thereof, and there being a chamber formed in the lower portion of the housing and communicating with the space between the wall of the housing and said corrugated wall.

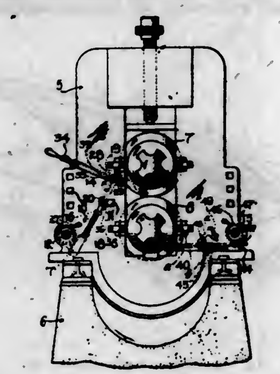


1,354,211. POCKET-CASE. HUGH T. REED, Chicago, Ill. Filed May 6, 1920. Serial No. 379,204. 6 Claims. (Cl. 206—37.)

4. A pocket case having an intermediate partition and a rim extending at opposite sides thereof to form separate compartments opening at opposite sides of the case, lugs cut and bent up in rows on opposite sides of said partition to form sub-partitions dividing each of the opposite compartments into a plurality of sub-compartments, one of

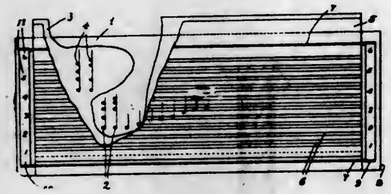
said rows of lugs extending transversely of the case on one side of the intermediate partition, and another of said rows of lugs extending longitudinally of the case on the opposite side of said intermediate partition.

1,354,212. MEANS FOR AND METHOD OF REGULATING BREATHING FOR SINGING AND WIND-INSTRUMENT PRACTICE. JAMES BURLINGTON RIGG, Oak Park, Ill. Filed Feb. 9, 1920. Serial No. 357,117. 9 Claims. (Cl. 128—27.)



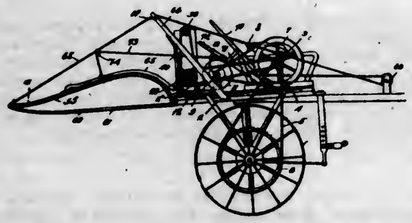
1. The practice-method of controllably regulating breathing, which consists in forcibly exhaling and directing the breath under confinement into a receptacle underneath a body reciprocably confined therein to move said body and cause it to float and to be maintained on the body of air from the breath and at predetermined elevations, and simultaneously venting the air from the receptacle.

1,354,213. ROLL-POLISHING MACHINE. WILLIAM H. RITTBERGER, Granite City, Ill. Filed Apr. 21, 1919. Serial No. 291,469. 11 Claims. (Cl. 80—1.)



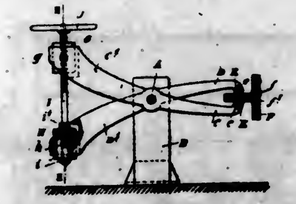
10. The combination with the upper and lower rolls of a rolling mill and a housing therefor, of supporting members mounted on the housing and held from movement parallel to the rolls, there being a pair of supporting members for each roll, each supporting member formed in foldable sections, an abrading element mounted on the

uppermost section of each supporting member for movement relative to the supporting member parallel to the



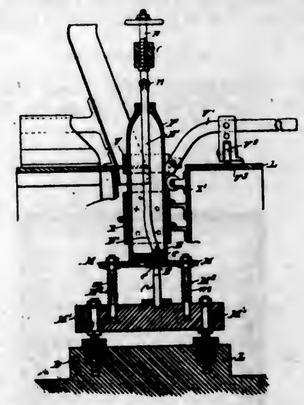
face of the corresponding roll, and means for reciprocating each abrading element against the surface of the corresponding roll.

1,354,214. TRANSPOSING MUSICAL CHART. ROBERT B. ROBINSON, Kansas City, Mo. Filed June 22, 1918. Serial No. 241,424. 3 Claims. (Cl. 84—86.)



1. In a transposing musical chart, a music sheet, notes on said sheet, retainers on said sheet, a transparent sheet with staff lines thereon, circuitously movable bands in the margin of said music sheet, numerals on said bands to indicate the pitch of the octave, said transparent sheet adjustably secured to said music sheet by said retainers.

1,354,215. COTTON-PEST POISONER. JOSEPH M. SALADINER, Bryan, Tex. Filed Jan. 28, 1920. Serial No. 354,749. 9 Claims. (Cl. 43—148.)

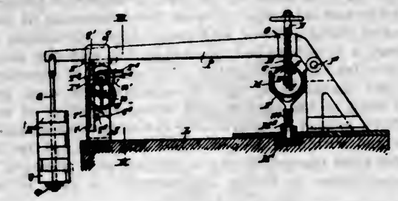


1. A machine of the class described including a movably supported structure, a hood extending therefrom and having a foraminous bottom adapted to be dragged over plants, means for directing a current of air downwardly into the hood, and means for directing a poisonous substance into said air current.

1,354,216. PROCESS AND APPARATUS FOR ASCERTAINING THE HARDNESS OF METAL PARTS. EUGÈNE SCHNEIDER, Paris, France, assignor to Schneider & Cie., Paris, France, a Limited Joint-Stock Company of France. Filed Aug. 21, 1918. Serial No. 250,862. 4 Claims. (Cl. 265—12.)

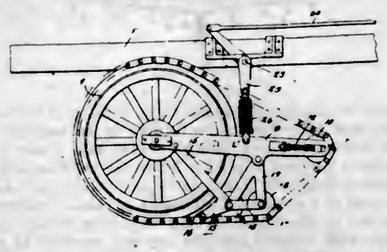
1. The process for testing the hardness of metal plates, walls, and the like which consists in subjecting the same at opposite points on opposite sides of the plate or wall to be tested to the simultaneous action of indentation means impelled by equal forces and adapted to produce indentations increasing in dimension with increase of penetration and then measuring the dimensions of the indentations to determine the degree of homogeneity of the metal at the portion tested.

1,354,217. APPARATUS FOR ASCERTAINING THE HARDNESS OF METAL PARTS. EUGÈNE SCHNEIDER, Paris, France, assignor to Schneider & Cie., Paris, France, a Limited Joint-Stock Company of France. Original application filed Aug. 21, 1918, Serial No. 250,862. Divided and this application filed June 16, 1919, Serial No. 304,650. Renewed Aug. 12, 1920. Serial No. 403,152. 6 Claims. (Cl. 265—12.)



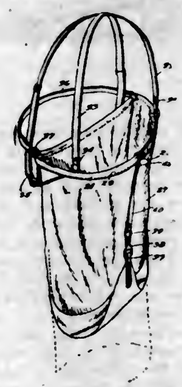
1. In apparatus for testing hardness, the combination of oppositely disposed indenting members one of which is movable and the other of which is stationary, a yieldingly supported platform having an opening for receiving one of said indenting members and for normally supporting the article to be tested and means for applying indenting pressure to said article through said movable indenting member.

1,354,218. PROCESS AND APPARATUS FOR ASCERTAINING THE HARDNESS OF METAL PARTS. EUGÈNE SCHNEIDER, Paris, France, assignor to Schneider & Cie., Paris, France, a Limited Joint-Stock Company of France. Original application filed Aug. 21, 1918, Serial No. 250,862. Divided and this application filed June 16, 1919, Serial No. 304,651. Renewed Aug. 12, 1920. Serial No. 403,153. 3 Claims. (Cl. 265—12.)



1. In apparatus for testing the hardness of hollow articles by producing indentions in opposite surfaces of the

article, the combination of an arm rigidly supported at one end, the free end adapted to enter the cavity of the test article and provided with indenting means, a lever

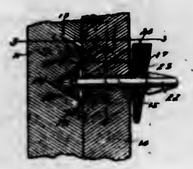


fulcrumed at one end and provided with indenting means in alinement with said first-named indenting means, a yielding support for the article to be tested, and means for applying graduated power to the free end of said lever.

1,354,219. PROPELLING ATTACHMENT FOR TRACTORS. HARRY A. SELTENRIGHT, Toledo, Ohio. Filed May 19, 1919. Serial No. 298,192. 2 Claims. (Cl. 305—8.)

1. The combination with a self-propelled vehicle, of pairs of hanger arms mounted upon the rear axle of the same, a shaft mounted in each pair of hanger arms capable of longitudinal movement therein, a roller rotatable upon each of the shafts, expansible coil springs urging the rollers forwardly, tracks engaged about the drive wheels of the vehicle and passing over the rollers, supporting bars depending from the hanger arms, rollers carried thereby and bearing against the tracks to retain the same in a plane parallel to the roadway, brackets depending from the hanger arms and connected with one end of each of the supporting bars, and means for raising and lowering the hanger arms.

1,354,220. FRUIT-PICKING BAG. ARTHUR W. SHARARD, Chelan Falls, Wash. Filed May 25, 1920. Serial No. 384,197. 4 Claims. (Cl. 150—2.)

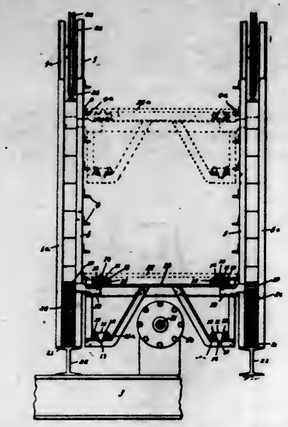


1. A fruit picking bag of the character described, comprising a supporting frame embodying an abdomen engaging portion having upper and lower members, and a suspension element carried by the upper member, a bag portion secured to the upper member and the suspension element, shoulder straps connected with the suspension element at points spaced from the upper member and having their opposite ends connected with the lower member, and a waist-strap connected with the ends of the upper member.

1,354,221. DEMOUNTABLE-RIM VEHICLE-WHEEL. ALVIN H. SHOEMAKER, Seattle, Wash. Filed July 11, 1919. Serial No. 310,092. 3 Claims. (Cl. 21—69.)

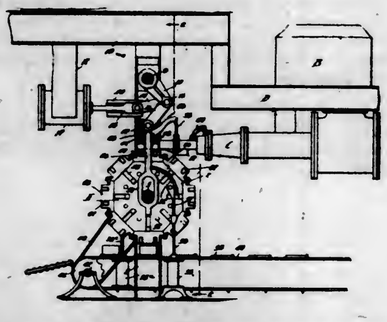
1. In a wheel in combination, a removable rim, a center having a rim section and spokes extending therefrom and divided into two groups which have their inner ends separated axially, and means for drawing together the inner ends of said groups of spokes to thereby expand the rim portion of the wheel center into holding engagement with the removable rim.

1,354,222. STORM-WINDOW FASTENER. CHARLES RUBY SIBLEY, Lynn, Mass. Filed Feb. 10, 1920. Serial No. 357,525. 4 Claims. (Cl. 292—59.)



1. A window fastener comprising the combination with a sash frame having a catch plate secured thereto and provided with an elongated opening, of a window frame having a rotatable and lengthwise movable bolt extending therethrough and forming a permanent part thereof, one end of which bolt is provided with a head elongated in one direction to extend through the opening of the catch plate, said bolt having a head at its opposite end, and a slotted wedge on the bolt between the last mentioned head thereof and the adjacent face of the window frame.

1,354,223. DRIER. CHARLES SLATTERY, Cuyahoga Falls, Ohio. Filed Nov. 6, 1919. Serial No. 335,985. 9 Claims. (Cl. 214—16.)

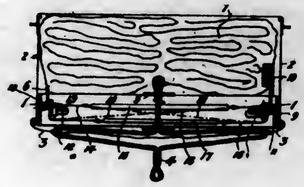


1. A drier comprising a series of supports one above the other, adapted to support pallets or trays, a conveyer

movable up and down beside the supports and adapted to convey said pallets along the respective supports, and

means to raise or lower the conveyer, to register same with the pallets on the supports successively.

1,354,224. BRICK-MOLDING MACHINE. CHARLES SLATTERY, Cuyahoga Falls, Ohio. Filed Nov. 6, 1919. Serial No. 335,986. 6 Claims. (Cl. 25—82.)

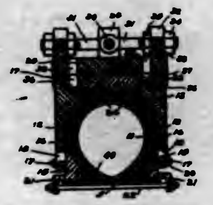


1. In a brick machine, the combination with a wheel of molds, and a plunger coöperating therewith, of a feeding table leading to the molds, and a cutter carried by the plunger and adapted to sever material being fed across the table.

2. In a brick machine, the combination with a rotary drum, molds mounted between the ends of the drum, cross bars projecting through the ends of the drum and slidable in radial guides therein ejecting mold bottoms supported by said bars, a plunger coöperating with the molds, and arms carried by the plunger and engaging with the projectings ends of the cross bars when the plunger advances, to advance the mold bottoms and eject the brick from the molds.

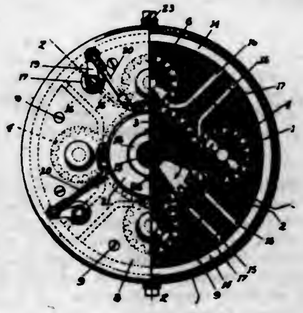
1,354,225. PARACHUTE. ERNEST EDWARD SMITH, Clapham Common, London, England. Filed July 7, 1919. Serial No. 308,979. 4 Claims. (Cl. 244—21.)

4. In a parachute launching device having an open bottomed case and means for fixing said case to the aircraft; the combination with a rigid open frame located within said case and adapted to be withdrawn through the open bottom thereof, a base cover secured to the lower edges of said case and adapted to retain said rigid open frame within said case, a main suspension rope passing through said base cover and fixed at one end to said open frame and means at the other end of said main suspension rope for the attachment of the load, a connection between said cover and said rope to cause the detachment of said cover and withdrawal of said frame upon application of said load, a parachute body located within said case above said open frame, rigging cords attached to said parachute body and connected to said main suspension rope, and spools fixed to the edge of said parachute body; of two oppositely located members each extending diametrically across and within said open frame and adjacent to the opposite sides thereof, hinges to connect said members to said open frame to permit said members to turn in the



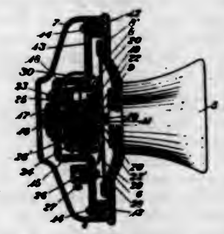
direction of the parachute, means on said open frame to prevent said hinged members turning in an opposite direction toward the load, pins to engage said spools with said hinged members when the latter are substantially in the plane of said open frame, and a tension member adapted to break at a predetermined degree of tension connected at one end to one hinged member extending beneath said members and connected to the opposite member to prevent said members turning on their hinges in the direction of the parachute and adapted to free said members to simultaneously release said spools upon the parachute offering sufficient resistance to descent and thereby increasing the tension of said tension member.

1,354,226. APPARATUS FOR STORING COAL, ORE, AND OTHER MATERIALS. FRANCIS LEE STUART, Washington, D. C., assignor to International Conveyor Corporation, New York, N. Y. Filed Mar. 19, 1918. Serial No. 223,302. 4 Claims. (Cl. 193—3.)



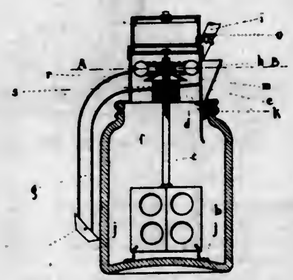
1. Apparatus for storing materials, comprising a truck-supported frame having a horizontally arranged wheel-supported lower portion and an inclined upper portion, an endless inclined conveyer belt having a delivery portion arranged above the inclined part of the frame and a return portion arranged immediately below said inclined part of the frame, pulleys at the upper and lower ends of said frame around which the endless conveyer belt passes, motor mechanism on said frame for driving said belt, a delivery conveyer associated with said inclined conveyer belt and receiving material from its upper end, an automobile truck connected with said before-mentioned conveyer frame, a turn-table on said truck, motor mechanism for operating the turn-table, a frame supported by the turn-table to which the delivery conveyer is connected to move about a horizontal axis, and motor mechanism for thus turning the delivery conveyer.

1,354,227. TIRE-MOLD. ALBERT R. THOMPSON, Tacoma, Wash. Filed Mar. 27, 1919. Serial No. 285,502. 12 Claims. (Cl. 18—42.)



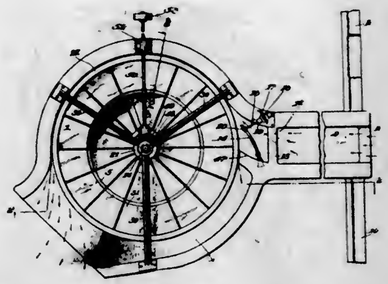
1. In a tire mold, a tread rim, side plates arranged for adjustment laterally within said rim, and a bead rim arranged to be adjustably secured to each said side plate.

1,354,228. FLUID-PRESSURE TRANSMISSION. GEORGE E. THOMPSON and PHILLIP A. UDALL, Stockton, Calif. Filed Feb. 24, 1919. Serial No. 278,962. 1 Claim. (Cl. 192—18.)



A fluid pressure transmission comprising a casing, covers thereon, a drive shaft passing into the casing, a gear secured thereon having a width exactly that of the casing, pinions meshing with the gear the same width thereas and mounted on the covers, the gear and pinions being closely and entirely surrounded by metal, a narrow peripheral fluid-filled annular passageway inclosed in the casing, and narrow passageways similarly inclosed on each side of each pinion leading from the annular passage to the points of divergence of the gear therewith, there being valves interposed in the alternate ones of the passageways which may be simultaneously turned to close the same.

1,354,229. TELEPHONE-TRANSMITTER. GEORGE K. THOMPSON, Maplewood, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 21, 1918. Serial No. 255,133. 3 Claims. (Cl. 179—124.)

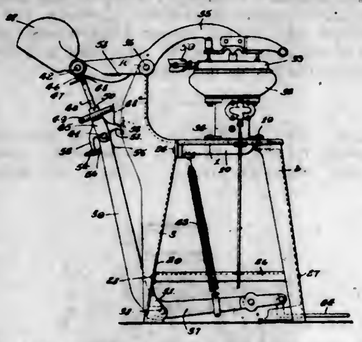


3. In a variable resistance chamber, a diaphragm, movable electrodes fixed to the diaphragm, fixed electrodes, a flexible diaphragm between said movable and fixed electrodes, and independent bodies of granular conducting material between the movable electrodes and fixed electrodes and the flexible diaphragm respectively, and circuit connections whereby the current flows through the two bodies of granular material in series and in a direction parallel to the flexible diaphragm.

1,354,230. BUTTER-MIXER. HENRY S. WALTHER and GUSTAVE HENCHOZ, Yverdon, Switzerland. Filed Feb. 3, 1919. Serial No. 274,759. 1 Claim. (Cl. 259—122.)

In a mixer, a container, a detachable cover therefor, a casing on said cover, a revoluble stirrer having a shaft mounted in said casing and provided with a water wheel also arranged in said casing, means to discharge water against said water wheel in said casing, a water discharge conduit leading downwardly from said casing, and a deflecting element pivoted to the lower end of said conduit and adapted to be arranged to cause water from the conduit to be directed against the exterior of the container to cool the same.

1,354,231. HYDRAULIC MOTOR. GEORGE WEBER, Stuart, Nebr. Filed Oct. 17, 1919. Serial No. 331,256. 12 Claims. (Cl. 170—116.)

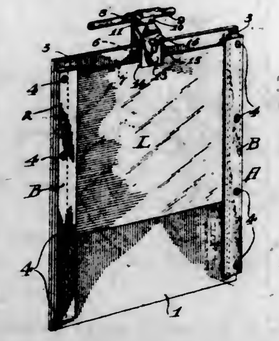


1. A device of the class described including a water wheel provided with an annular series of depending buckets comprising relatively fixed stationary sections or members and movable sections or members hinged to the fixed sections or members, and means for normally urging the movable sections upwardly whereby the said movable sections will be elevated automatically when not subjected to the action of the water.

1,354,232. PRESSING-MACHINE. ALLEN CLYMER, AUSTIN, Syracuse, N. Y. Filed Sept. 9, 1916. Serial No. 119,197. 13 Claims. (Cl. 68—9.)

1. A machine frame comprising a table, legs supporting the table and being detachably secured thereto, the table

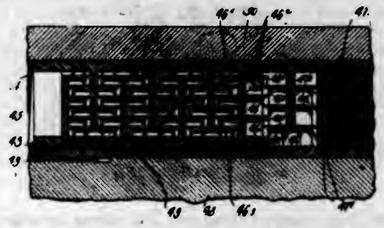
being formed with bearing faces inclining inwardly and downwardly and the legs being formed with complemental



bearing faces, substantially as and for the purpose set forth.

1,354,233. PREPARING PUMICE-STONE FOR USE IN CONCRETE. ERIK CHRISTIAN BAYER, Copenhagen, Denmark. Filed Nov. 15, 1919. Serial No. 338,405. 2 Claims. (Cl. 106—24.)

1. Method of treating pumice stone so that it is rendered suitable for light concrete, characterized in that the pumice stone is crushed, and the separate fragments are subjected to a temperature of about 1000° C. and higher up to melting point, whereby there occurs a contraction in each separate fragment, which contraction according to the height of temperature, increases the hardness until glass-hardness and whereby the outer pores in reaching the melting point are completely closed through a superficial melting while each separate piece still remains porous inside.

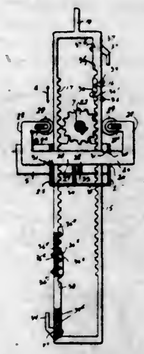


1,354,234. HOLDER FOR ELECTROPLATING. HARRY M. BLAETZ, Philadelphia, Pa., assignor to Royal Electrotype Company, a Corporation of Pennsylvania. Filed Jan. 17, 1920. Serial No. 352,030. 8 Claims. (Cl. 204—5.)

3. A device of the class described comprising a board-like body portion, slotted retaining guides carried by the body portion and a spring clamping member carried on the body portion and adapted to engage and clamp the plate against such body portion.

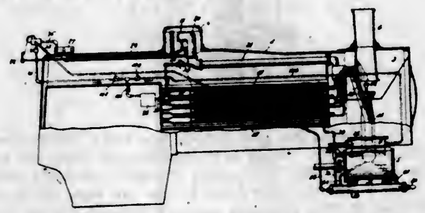
1,354,235. LABYRINTH PACKING. ALFRED BONOM, Paterson, N. J. Original application filed Dec. 26, 1918, Serial No. 286,862. Patent No. 1,313,058, dated Aug. 12, 1919. Divided and this application filed Nov. 10, 1919. Serial No. 336,983. 7 Claims. (Cl. 286—9.)

1. The herein described labyrinth packing for high speed rotary engines, comprising a pair of coaxial mating rings carried by the members between which there is relative rotation, each ring including a radial web and a plurality of coaxial flanges projecting laterally therefrom,



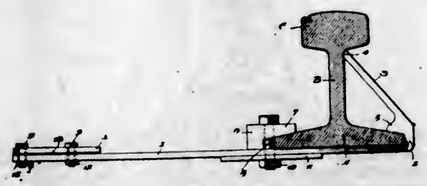
the flanges of each ring coöperating with the web of the other ring, and fins provided upon the flanges for co-operation with adjacent flanges, substantially as and for the purpose set forth.

1,354,236. SAFETY-FASTENING FOR HAIR-SLIDES. LUCIEN PAUL BOUR, Paris, France. Filed Sept. 20, 1919. Serial No. 325,151. 3 Claims. (Cl. 132—22.)



1. A fastening device for hair slides comprising a slide, a pin pivoted to one end of said slide, a pin retaining device at the other end of the slide and movable longitudinally with respect to the slide, and a plate spring having its ends connected to the slide and retaining device and serving to simultaneously lock the hair against the pin and to maintain the retaining device in a closed position with respect to the pin.

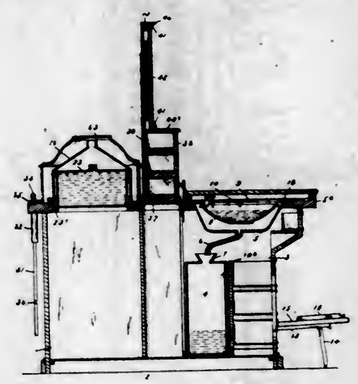
1,354,237. PUMP-JACK. GEORGE W. BOYD, Rector, Ark. Filed Apr. 2, 1919. Serial No. 286,836. 3 Claims. (Cl. 74—27.)



1. The combination with a pump provided with a reciprocating pump rod, of a driven shaft revoluble in one direction only and provided with a gear, a supporting frame for said shaft, a rack frame mounted in the supporting frame and having opposite sets of gear teeth, one set meshing with the gear when the rack frame moves in one direction, the other set meshing with the gear when the frame is moving in the opposite direction, means at diagonally opposite ends of the rack frame coöperating with the gear to tilt the rack frame, a locking member mounted in openings of the supporting frame and having interlocking connections with the sides of said openings, said locking member having means between which the rack frame engages to guide the rack frame and being shiftable with the rack frame, spring means for holding the locking member inter-locked with the sides of the said openings, means at each end of the rack frame to engage the guiding means of the locking member to tilt it at the end of each stroke of the rack frame to disengage the interlocking connections.

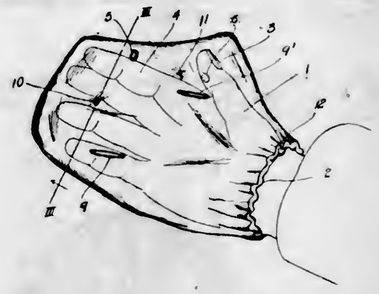
1,354,238. LOCOMOTIVE. ARTHUR L. BRIDGHAM, Boston, Mass., assignor of one-half to Charles H. Sherburne, Boston, Mass. Filed May 10, 1917. Serial No. 167,706. 10 Claims. (Cl. 60—90.)

1. In a steam locomotive, the combination with the boiler, cylinders and pistons, steam connections through which steam from the boiler is directed to the cylinders for actuating the pistons, a throttle valve in said connections, and exhaust connections from the cylinders, including a draft creating device, of means whereby steam may be supplied to the cylinders when the throttle valve is closed, means whereby the steam thus supplied will have access to opposite sides of the pistons within the respective cylinders and afterward pass to the exhaust connections and draft creating device, and means for preventing the free escape of steam, supplied and exhausting as aforesaid when the throttle valve is closed, from the draft creating device until pressure has been obtained by accumulation of steam therein.



1,354,239. RAILROAD-RAIL BRACE. HORRY C. BUNNELL, Westport, N. Y. Filed May 10, 1920. Serial No. 380,092. 1 Claim. (Cl. 238—51.)

In a brace of the kind described, the combination with a rail, a brace bar passing under the rail base and angled to engage the outer edge of the base, said bar having an arm extending upwardly and inwardly and bearing against the rail at the juncture of the web and tread, a lug formed on the bar engaging the outer face of the base, a block secured to the bar and engaging the inner face of the base, and a longitudinally extending reinforcing plate secured on the under side of the bar and below said block and partly under the rail base.

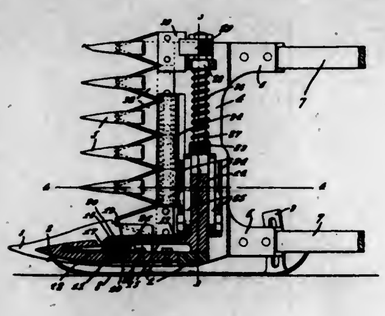


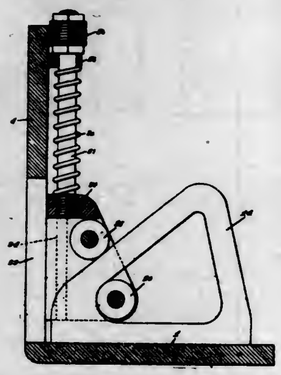
1,354,240. TOILET-CABINET. JOHN BURAKY, Windsor, Ontario, Canada. Filed Feb. 26, 1919. Serial No. 279,373. 2 Claims. (Cl. 45—38.)

1. A toilet cabinet comprising in combination a casing divided into a plurality of compartments, one of the panels of said casing being hingedly secured thereto and adapted to be turned downwardly and having a supporting bracket hinged thereto, a top on said casing, a basin adjustably supported above the foremost of said compartments and emptying into a draining pan located therebelow, a tank for receiving the water from said draining pan, a plurality of water receptacles supported above the rearmost of said

compartments and communicating with said basin through pipes, an adjustable covering for said basin, and a dresser slidable vertically in the center compartment by means of cables secured to the lower ends thereof and operating on spools supported from said casing and operable by means of handles secured on the outer sides of said casing, the frame of said dresser being adapted to support a towel rack slidable horizontally therein.

1,354,241. GLOVE. JAMES H. CARMEAN, Kansas City, Mo. Filed May 3, 1920. Serial No. 378,355. 2 Claims. (Cl. 2—102.)

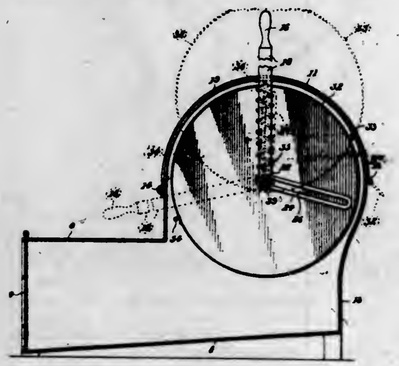




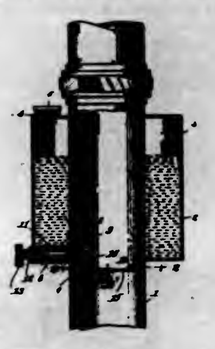
1. A glove comprising a bag-shaped member having an opening in its inner wall and an opening in its outer wall, said openings coöperating to support a pencil, the intermediate portion of the pencil being adapted to be grasped by the digits of the operator within the glove.

1,354,242. SICKLE-BAR ATTACHMENT FOR MOWING-MACHINES. EDWARD CARRAU, Moxee City, Wash. Filed Feb. 7, 1920. Serial No. 356,885. 2 Claims. (Cl. 56—316.)

1. The combination with a horizontal finger bar, a sickle bar mounted for reciprocation thereon, a shoe at one end of the finger bar, a standard upstanding from the shoe, guard fingers extending forwardly from the standard, of an upstanding sickle bar mounted for recipro-

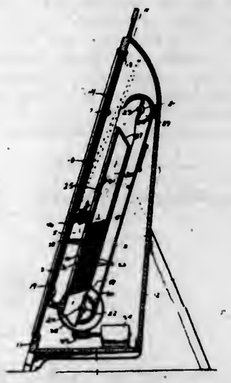


cation on the standard, a cam movable with the horizontal sickle bar, a member movably engaged and actuated by the cam, vertical guides for said member, yielding means



engaging the member for holding it normally depressed against the cam, and a detachable connection between said member and the vertical sickle bar.

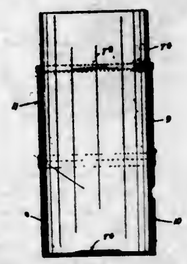
1,354,243. ASH-SIFTER. JOSEPH CHYTRACEK, Clifton Mills, W. Va. Filed June 4, 1920. Serial No. 386,525. 5 Claims. (Cl. 83—60.)



1. An ash sifter of the type described comprising a casing, a sifting drum revolubly mounted within the casing, and movable means for supporting the drum adapted upon shifting movement thereof automatically to project the drum from the casing.

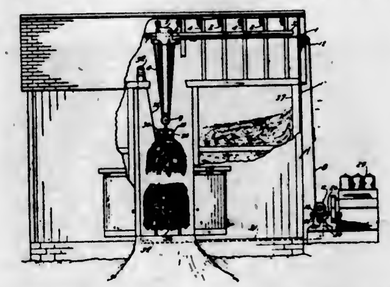
1,354,244. DISINFECTING APPARATUS. HARLON ASHLEY CLIFFORD, Greenfield, Mass., assignor of one-half to James W. Cobb, Greenfield, Mass. Filed Apr. 25, 1918. Serial No. 230,739. 3 Claims. (Cl. 137—152.)

1. The combination with a flush pipe and a disinfectant holder, of a valve casing in communication with the interior of the holder and having a nozzle extending into the pipe, a tiltable plate hung within the pipe, weighted means for holding the plate normally pressed against the nozzle to close the end thereof, said plate being shiftable out of normal position by the pressure of water flowing through the pipe.



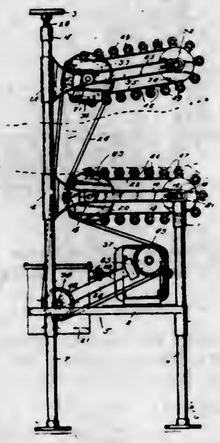
1,354,245. PICTURE-DISPLAY DEVICE. ATANAS P. DULGEROFF, Paducah, Ky. Filed July 16, 1919. Serial No. 311,244. 1 Claim. (Cl. 40—36.)

A device of the character described comprising an inclined front member having a display opening, a pair of inclined parallel guide members disposed behind the display opening in parallel relation thereto, each of said members having a portion of its inner surface and one of its front longitudinal edges reduced, a longitudinal marginal flange projecting from the rear of the inner confronting surface of each guide member, said flange forming a guide, each of said guide members having a slot extending through the marginal edge of its reduced portion, an endless channel in said reduced portion communicating with the slot, said channel inclining with the guide members, said guide flange forming one portion of the wall of said endless channel of each guide member, the other portion of the channel communicating with the slot, a support extending between said guide members in spaced relation to the channel, said support inclining upwardly from the lower portion of the display opening, picture holders having trunnions projecting from the sides thereof and movable in said channel, and power operated means adapted to enter the slot and communicating portion of the channel for engagement with the



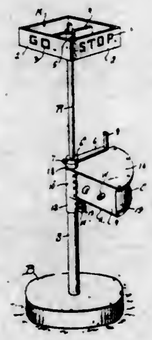
trunnions of the adjacent holder to move said trunnions through the channel, said holder assuming a vertical position after leaving the display opening and traveling in a vertical position into engagement with the inclined guide flanges, said guide flanges causing the holder to assume an inclined position and slide down the flanges in back of the preceding holders, said channel coöperating with the inclined support to cause the holders to move toward the display opening.

1,354,246. APPARATUS FOR DISPENSING ICE-CREAM OR OTHER MATERIAL IN PAPER CARTONS. ROBERT FERRIS, Yankton, S. D. Filed Apr. 8, 1920. Serial No. 372,177. 5 Claims. (Cl. 93—2.)



1. An apparatus for dispensing ice cream or other materials in paper cartons formed at the time needed for use, and which apparatus comprises a cup-shaped former on which the paper may be rolled and against the base of which its lower ends are adapted to be folded to produce a carton of cup-like shape, and a carton holder comprising an expansible and contractible approximately cylindrical shell, and a non-expansible shell container which, when applied around said shell, limits the expansion of said shell to such size that its interior is of but slightly greater diameter than the exterior of said former.

1,354,247. HAY-HANDLING APPLIANCE. EDWARD CHARLIE FREDRICKSON, Chetek, Wis. Filed Feb. 1, 1918. Serial No. 214,804. 1 Claim. (Cl. 212—79.)

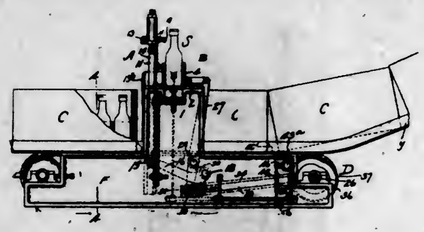


In a hay handling apparatus, an overhead runway, a carriage mounted for travel thereon, a supporting frame, upper and lower shafts journaled in the frame and provided with gears, winding drums mounted for rotation on the shafts, a bracket secured to the supporting frame near the lower drum, a shaft journaled in the bracket, a sheave secured to said shaft, a cable operatively connected with the carriage and upper winding drum respectively, a fork supported by the cable and including a trip device, a second cable operatively connected with the trip device and extending over the sheave on said shaft and connected with the lower winding drum, a worm interposed between and meshing with both gears for operating the same, and means for selectively operating the drums.

1,354,248. MACHINE FOR TREATING LIMBS. JAMES P. GARDNER, Chicago, Ill. Filed Jan. 27, 1919. Serial No. 273,349. 10 Claims. (Cl. 128—58.)

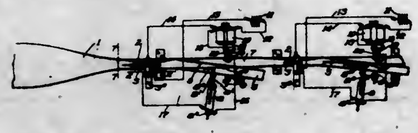
10. In a massage machine, the combination of a horizontally movable massage device, a second horizontally movable massage device positioned above the first-named device, means for actuating said devices, and means for adjusting the entire devices relatively to each other.

1,354,249. TRAFFIC-SIGNAL. DANIEL W. GORE, Buffalo, N. Y. Filed Dec. 6, 1919. Serial No. 343,005. 7 Claims. (Cl. 116—63.)



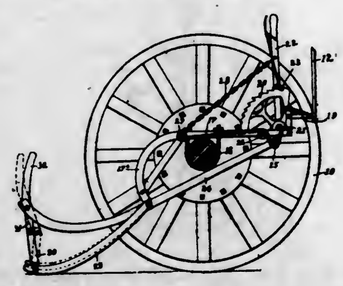
4. A signal of the class described comprising a standard supported for rocking movement, an indicating means coacting with the standard, a casing supported independently of the standard, a piston mounted within the casing and moving upon rotation of the standard, and a pneumatic signal in communication with the casing at opposite sides of the piston, said casing at each side of the piston being provided with a check control induction opening.

1,354,250. CRATING APPARATUS. LOUIS A. HAWTHORNE, Newark, N. J., assignor to Steel Utilities Incorporated, a Corporation of New York. Filed Dec. 28, 1918. Serial No. 268,738. 18 Claims. (Cl. 226—14.)



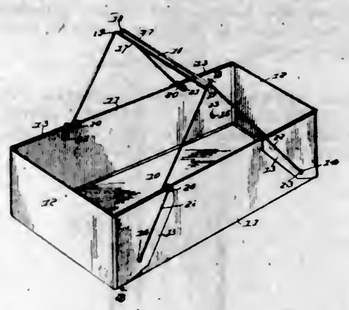
1. A crating apparatus including crate feeding means, a container collecting station above the crate feeding means, a transfer device for receiving the group of con-

tainers from the collecting station and holding the same therein, and an operating unit having synchronized oper-



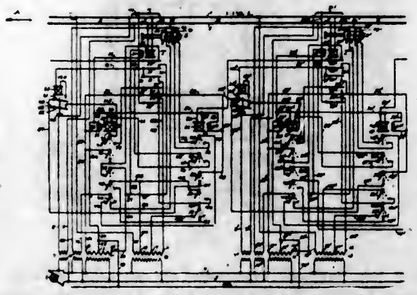
ating connections respectively with the crate feeding means and transfer device for lowering the latter toward the crate.

1,354,251. SARDINE SIZING AND SELECTING APPARATUS. FRANK HEATH, National City, Calif. Filed Feb. 13, 1919. Serial No. 276,819. 8 Claims. (Cl. 83—92.)



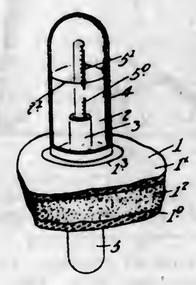
1. The herein described method of selecting sardines consisting in sliding said sardine past a flexible contact to be operated in accordance with its size then operating a solenoid, then opening a gate and passing said sardine into a side chute, then engaging a switch operating said solenoid and closing said gate.

1,354,252. TRACTOR ATTACHMENT. HIO JACOB HELMERS, Sibley, Iowa. Filed Feb. 10, 1920. Serial No. 357,671. 4 Claims. (Cl. 180—82.)



1. The combination of a tractor having a clutch control device, with an attachment comprising a member adapted to coact with the ground, and to be moved thereby when the front end of the tractor is tilted upwardly, a second member adapted when moved to one position to move the clutch control device, for rendering the clutch inoperative, and mechanism for operatively connecting said members for causing the second member to be actuated when the front end of the tractor is tilted upwardly said mechanism including a flexible device operatively connected with said first member, a lever for holding said flexible device taut fixed on said member, and a pawl and ratchet device arranged for holding said lever in any position to which it may be moved by the operation of said member.

1,354,253. FOLDABLE BASKET AND HANDLE THEREFOR. THOMAS M. HOUSE, Richmond, Va., assignor of one-half to Albert S. Kellam, Richmond, Va. Filed Feb. 21, 1920. Serial No. 360,279. 4 Claims. (Cl. 229—52.)



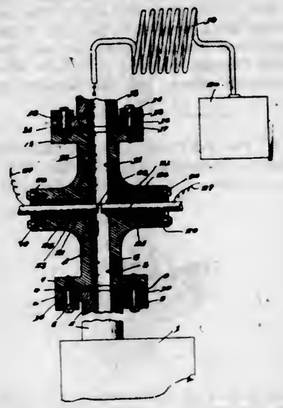
1. A basket comprising a body having a bottom, side walls and end walls all foldable upon the bottom or movable into planes at right angles thereto, the end walls having flaps overlapping the outer faces of the side walls, and said flaps and side walls being perforated adjacent the bottom, and a handle extending transversely over the body and having at each end downwardly, divergent hangers disposed on and bearing against the outer faces of the flaps, the lower extremities of said hangers being hooked to engage through the perforations, and the intermediate portions of the hangers being formed with inwardly and downwardly extending clips adapted to embrace the upper edges of the said flaps and the side walls and extending downward against the inner faces of the side walls, said clips forming the sole means for engaging the upper edges of the side walls with the upper edges of the flaps.

1,354,254. SYSTEM FOR GOVERNING RAILWAY TRAFFIC. WINTHROP K. HOWE, Rochester, N. Y., assignor to General Railway Signal Company, Gates, N. Y., a Corporation of New York. Filed Nov. 16, 1915. Serial No. 61,789. 15 Claims. (Cl. 246—39.)

3. In a system for controlling railway traffic, in combination: a plurality of electrically isolated track circuited blocks, each having a track relay; an insulated ramp at the entrance of each of said blocks; a source of electrical energy for creating a difference of potential between each of said ramps and the track rails; and means for controlling the connection between said source and said ramp governed by the track relays associated with the next two blocks in advance of the corresponding block.

1,354,255. BATTERY-CELL HYDROMETER. PERCY DOUGLAS IVEY, Guelph, Ontario, and ALFRED JAMES SALISBURY, Toronto, Ontario, Canada, assignors, by direct and mesne assignments, to The Ivey Storage Batteries, Limited, Toronto, Canada, a Corporation of Ontario. Filed Apr. 14, 1919. Serial No. 290,050. 3 Claims. (Cl. 204—29.)

2. In a storage battery, the combination with the lid and guide-way extending therethrough, and a hydrometer extending up through the guide-way, of a transparent dome secured to the lid and extending over the guide-way and hydrometer, and a cover for the dome suitably secured in position thereon.

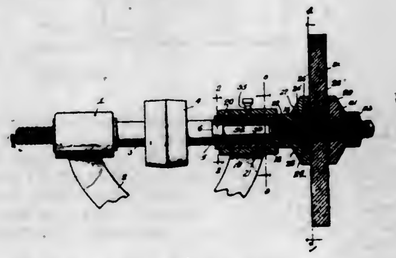


1,354,256. BATTERY-CELL. PERCY DOUGLAS IVEY, Guelph, Ontario, and ALFRED JAMES SALISBURY, Toronto, Ontario, Canada, assignors, by direct and mesne assignments, to The Ivey Storage Batteries, Limited, Toronto, Canada, a Corporation of Ontario. Filed Apr. 14, 1919. Serial No. 290,051. 2 Claims. (Cl. 204—29.)

1. In a storage battery cell, the combination with the walls and supporting ribs or bridges at the bottom of the cell, and the plates, of tie members extending across the cell and secured to the wall thereof and adapted to hold the plates rigidly on to the lower supporting ribs.

1,354,257. PROCESS FOR TREATING MINERAL OILS. WALTER JOHNSON, North Loup, Nebr. Filed Apr. 25, 1916. Serial No. 93,422. 2 Claims. (Cl. 204—5.)

1. The process of making lighter hydrocarbon oils which comprises vaporizing heavier mineral oil, and passing said vapors alone through a zone energized by the passage of electricity from one electrode to another to



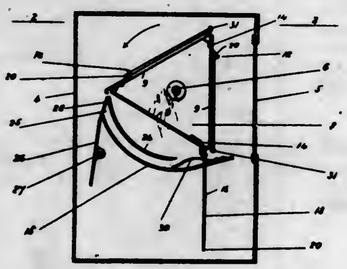
such a degree as to be capable of superheating and cracking the oil vapor.

1,354,258. RAILWAY-CROSSTIE. JOSEPH LEVENTRY, Johnstown, Pa. Filed Nov. 18, 1919. Serial No. 338,808. 5 Claims. (Cl. 238—38.)

3. The combination with a pair of parallel base sections having intermediate upstanding flanges along their inner longitudinal edges, said flanges having their opposed sides flatly in contact, lugs carried by said base sections and cooperating with said flanges for engaging parallel rails, a wedge support carried by each base section and slidably receiving the adjacent lug, and a wedge carried by each wedge support for forcing said lugs and said flanges into rigid contact with said parallel rails.

1,354,259. SHAFT-BEARING. RAYMOND F. LUSK, Lima, Ohio, assignor of one-half to John H. Monroe, Lima, Ohio. Filed Feb. 25, 1919. Serial No. 279,047. 2 Claims. (Cl. 64—10.)

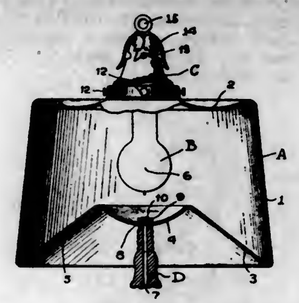
1. In a shaft bearing, a bearing head, a bushing removably fixedly held in the head, a shaft provided with a shoulder and beyond the shoulder with a threaded portion, a bushing rotatably fitted within the first-mentioned bushing around the said shaft and bearing at its inner end against the shoulder upon the shaft and having its outer end extending partly over the threaded portion of the



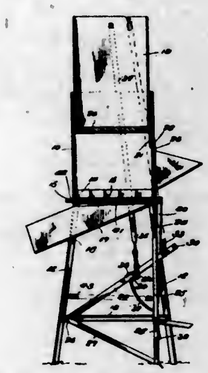
shaft, and an element threaded onto the shaft and bearing against the outer end of the last-mentioned bushing to clamp the same against the shoulder on the shaft whereby it will rotate with the shaft, the opposed faces of the bushings being parallel to the axis of the shaft and the first-mentioned bushing being shorter than the second-mentioned bushing whereby it will be out of contact with the clamping element and the shoulder on the shaft.

1,354,260. BUTTON-BUCKLE FOR GARMENTS. CLARA ALTA MARTIN, Pasadena, Calif. Filed Sept. 13, 1917. Serial No. 191,490. 3 Claims. (Cl. 24—201.)

1. The new article of manufacture set forth, to wit, a button buckle; the same consisting of two pieces that are separable; one of said pieces being a link, to one limb of which a strap-end may be fastened, and the other being a housing having a closed front and an open flat back and an edge between said front and said back, and having a passage with two openings; and a bar, to which bar another strap end may be fastened within the housing, said bar separating the openings and being in the same plane as the back of the housing; said housing being adapted to pass through the link endwise but not sidewise or when the back of the housing is in a plane oblique to the longitudinal axis of the link.



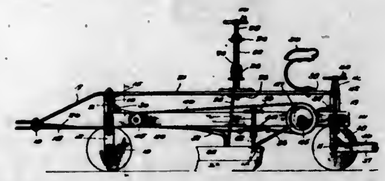
1,354,261. CARD-EXHIBITOR. MARION MATHER, Olean, N. Y. Filed June 10, 1920. Serial No. 387,927. 4 Claims. (Cl. 40—78.)



1. In a card exhibitor, revoluble frames provided with pivoted hooks for engaging with the cards, curved supporting bars and guide bars for the cards, cards provided with lugs which pass between the said bars, and pivoted reversing levers normally closing the entrance opening between the said bars and operated by the said lugs and enabling the fronts and backs of the cards to be displayed alternately.

1,354,262. GLOBE FOR LIGHTING-FIXTURES. FREDERICK W. MATHIEU, New York, N. Y. Filed June 23, 1919. Serial No. 306,051. 8 Claims. (Cl. 240—100.)

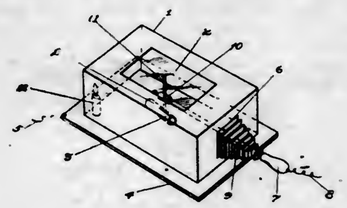
1. A globe for lighting fixtures having an outer, frustoconical reflecting and diffusing member, a substantially horizontal reflecting and diffusing member at one end of said outer member, and an inwardly extending diffusing and reflecting member at the other end of said outer member, said inwardly extending member comprising a central convex portion and a peripheral frusto-conical portion.



1,354,263. SEED-POTATO CUTTER. CARL P. MILLER and RALPH R. LEE, Fargo, N. D. Filed Aug. 13, 1919. Serial No. 317,367. 16 Claims. (Cl. 146—7.)

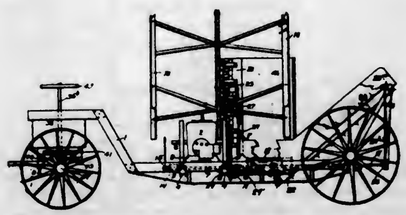
1. A device of the character described including a casing, a plunger shiftable therein, a cutting knife carried by the casing, means for shifting the plunger toward the cutting knife, means for releasing the plunger from said first-mentioned means before the plunger reaches the cutting knife, and a second cutting knife shiftable relative to the first knife.

1,354,264. ROAD-GRADER. CARL P. MILLER, Fargo, N. D. Filed Aug. 13, 1919. Serial No. 317,368. 9 Claims. (Cl. 37—7.)



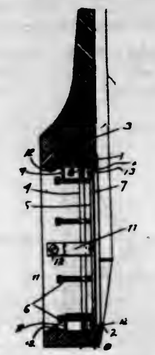
8. A grading machine including a frame, arms pivotally connected with the frame, companion blades freely mounted upon said arms, means coupled with the blades for elevating or lowering the blades, means for rotating the blades upon the arms to position the blades in angular relation to each other, and means connected to corresponding end portions of the blades for rocking the blades upon the arms and tilting the blades longitudinally.

1,354,265. SHUTTLE. JAMES H. OLIVER, New Bedford, Mass. Filed Mar. 15, 1920. Serial No. 365,756. 10 Claims. (Cl. 139—27.)



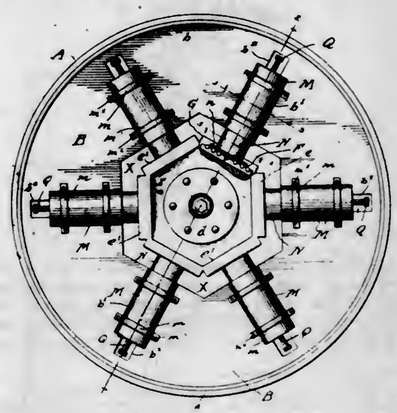
2. In a shuttle, a plate having a pair of spaced eyes each having communication with the front side edge of the plate, an arm connected to the outer end of the plate, and thread engaging means borne by the arm and by the plate to limit transverse movement of the thread.

1,354,266. METHOD OF ELECTRICALLY WELDING STEEL. JOHN W. PLANT, San Mateo, Calif. Filed Apr. 29, 1919. Serial No. 293,459. 2 Claims. (Cl. 219—8.)



1. The improvement in the art described, which consists in introducing the part to be welded and an electrode formed of corresponding material within a welding chamber, expelling the oxygen from said chamber so as to provide a surrounding non-oxidizing atmosphere, thence passing an electric current through the confined parts for a fusing of the electrode with the metal to be welded or repaired without causing oxidization of the metal in the arc formed on the electrode being brought into contact with the metal to be treated.

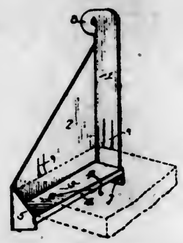
1,354,267. TREE TRIMMING AND HARVESTING MACHINE. G ARCHIE RUSSELL, Orlando, Fla. Filed Apr. 16, 1918. Serial No. 228,939. 1 Claim. (Cl. 56—23.) (Filed under the act of March 3, 1883, 22 Stat. L., 625.)



A tree trimming and harvesting machine comprising a vehicle, a motor mounted thereon, a reel having shafts and gears connecting the same with said motor, cutting mechanism, the lower end of which is secured to a rocker arm, said rocker arm in turn forming contact with a pitman rod which is connected with said motor by gear wheels and shafting, and means for catching branches and twigs of trees severed by the operation of said reel and said cutting mechanism and for conveying said cut branches and twigs to the rear of said vehicle.

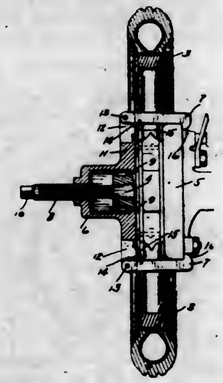
1,354,268. BANJO. GEORGE SANDSTROM, Oakland, Calif. Filed Dec. 12, 1917. Serial No. 206,746. 2 Claims. (Cl. 84—269.)

1. A tightening device for banjo heads and other musical instruments having an open rim, a flexible head interposed within the opening of the said rim, an annular lip integral with the said rim, and projecting inwardly from the top thereof, a flat top ring fixedly attached by screw 13 and by bracket 11, to the inside circumference of the said rim over which the said head is drawn, a bottom flat ring interposed parallel to the said top ring and having in its outside circumference an annular groove, a cord embedded therein, the outer edge of the said flexible head passing within the said groove and being firmly held by the said cord; a ring provided with holes and interiorly threaded, a multiplicity of set screws in the said holes and engaging with the threads thereof, and the points of the said set screws resting against the lower surface of the said top ring, by which the said flexible head is pressed firmly against the said annular lip in the said rim.



1,354,269. VEHICLE-WHEEL. THOMAS VICTOR WASHBURN, Carbondale, Pa., assignor of one-half to Patrick Joseph Murray, Carbondale, Pa. Filed Feb. 25, 1920. Serial No. 361,235. 4 Claims. (Cl. 152—48.)

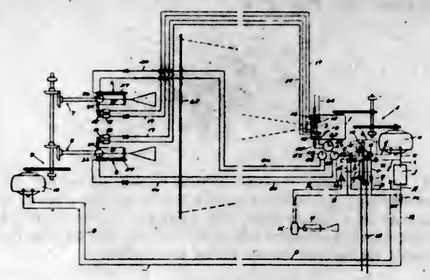
2. A vehicle wheel comprising a rim, a hub, a connecting member secured to the hub and having a chambered periphery, roller bearings arranged in said chambers and comprising a series of rollers in each chamber arranged tangentially with reference to the hub, and spokes connecting the rim with the connecting member comprising an outer



set of cylinders rigidly connected with the rim, an inner set of cylinders telescoping with those first mentioned and which bear at their inner ends on the roller bearings, and cushioning means within the cylinders.

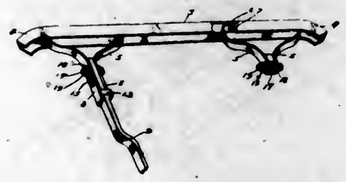
1,354,270. SHELF-BRACKET. CHARLES F. WOOD, Chicago, Ill. Filed May 8, 1919. Serial No. 295,556. 9 Claims. (Cl. 248—18.)

1. A bracket formed from sheet material and including a vertical web, a hanger strip adjacent to one edge thereof and disposed at right angles to the web, and a horizontal ledge adjacent to the web, the hanger strip having a portion engaged by the ledge for supporting the latter.



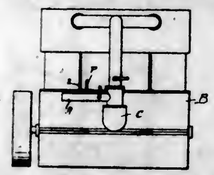
1,354,271. WHEEL-PULLER. ARMIN G. ALBRECHT, St. Paul, Minn. Filed Oct. 16, 1919. Serial No. 331,046. 4 Claims. (Cl. 29—86.)

1. A wheel puller comprising a cap having a wheel hub-engaging surface, a plurality of circumferentially spaced grapple hooks pivoted to the cap, springs under strain to swing the grapple hooks radially inward, and a screw having screw-threaded engagement with the cap.



1,354,272. APPARATUS FOR PRODUCING TALKING-MOTION-PICTURE ENTERTAINMENTS. CYRUS NEWTON ANDREWS, Yucaipa, Calif. Filed Sept. 23, 1915, Serial No. 52,306. Renewed May 13, 1920. Serial No. 381,211. 18 Claims. (Cl. 88—16.2.)

1. The combination with an auditory record having indicia thereon, of a motion picture film having corresponding indicia, a dial adapted and arranged to be actuated in synchronism with both the auditory record and the picture film to indicate the position of the active portion of the

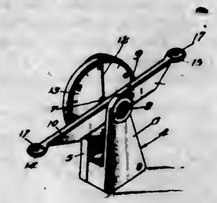


auditory record, and means to effect synchronism between said record and film.

1,354,273. AUTOMOBILE-BUMPER. ERNEST A. ARNOLD and BRUNO E. ROTHIG, Eau Claire, Wis. Filed Mar. 29, 1920. Serial No. 369,698. 4 Claims. (Cl. 293—55.)

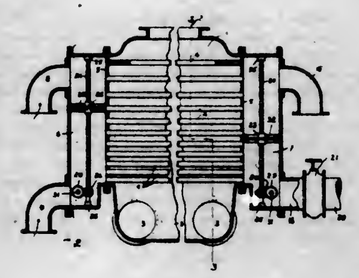
3. An automobile bumper, comprising a bumper bar, brackets, each bracket comprising two members, the free ends of said members being positioned parallel to one another and provided with horizontal slots, an automobile chassis, arms secured to said chassis and projecting forwardly therefrom, the free ends of said arms being apertured and adapted to lie between the parallel ends of said brackets, bolts pivotally connecting said brackets to said arms and coöperating with said pivots to position the bumper bar substantially horizontal, as and for the purpose set forth.

1,354,274. INTERNAL-COMBUSTION ENGINE. CHARLES B. ASHWORTH, Detroit, Mich. Filed Dec. 13, 1919. Serial No. 344,656. 3 Claims. (Cl. 123—119.)



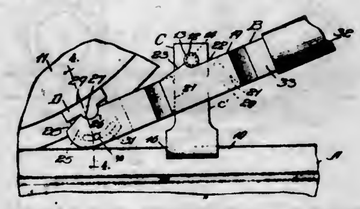
1. The combination with a crank case of an internal combustion engine and the air intake of a carbureter coacting with said structure, a conduit substantially V-shaped in form with its apex upwardly directed, one end portion of the conduit being in communication with the crank case through the top wall thereof and secured to said top wall, the opposite end portion being in communication with the air intake secured to a wall thereof.

1,354,275. BALANCE. WILLIAM F. BACHMAN, Chicago, Ill. Filed Sept. 13, 1919. Serial No. 323,568. 2 Claims. (Cl. 265—49.)



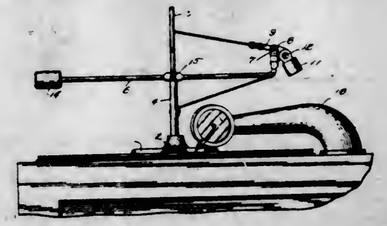
1. A balance for the purpose specified comprising a beam, a pivotal mounting in the central portion of the

same, a pointer in conjunction with said pivotal mounting, and a scale in conjunction with said pointer for showing the condition of balance or unbalance of the beam, there being a concave cup on each end of the beam, said cups being located equidistant from the pivotal center



of the beam, and each cup having its concavity facing upwardly and being provided in the lower central portion of its concavity with a downwardly extending perforation or recess for the accommodation of the shank of a screw under test, substantially as described.

1,354,276. SURFACE CONDENSER. PAUL A. BANCEL, Nutley, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Mar. 2, 1918. Serial No. 220,081. 11 Claims. (Cl. 257—43.)

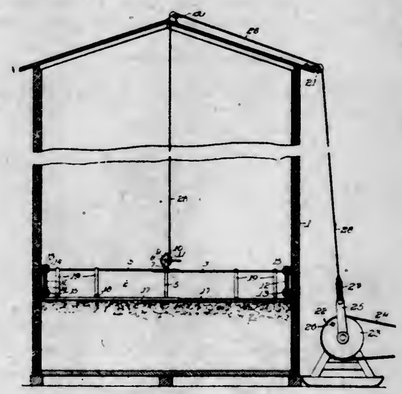


1. A surface condenser comprising spaced apart water chambers, tubes connecting said chambers, inlet and outlet connections for said chambers, an element in one of said chambers for dividing the flow of fluid through said tubes into two streams and means for varying the position of said element to vary the relative number of tubes carrying the said streams.

1,354,277. CAR-MOVER. WILLIAM A. BOCK, Chicago, Ill. Filed Sept. 19, 1919. Serial No. 324,827. 3 Claims. (Cl. 254—37.)

1. In a car mover, the combination with an operating lever having an elongated slot therein intermediate its ends, of a wheel engaging shoe pivotally mounted on the inner end of said lever, the opposite end of said lever being adapted for manual operation, and adjustable means for clamping a rail tread, said means comprising a pair of clamping elements having flanges adapted to engage the opposite sides of a rail tread, a pin on which said elements are loosely mounted, said elements extending through said slot of the lever and adapted to be pressed toward each other when the outer end of the lever is depressed to thereby effect clamping of the rail, said clamp acting as a fulcrum for the lever in the continued movement thereof.

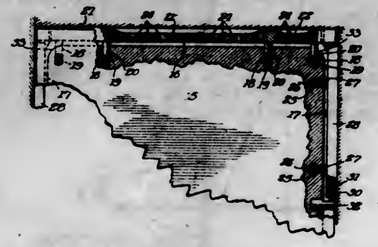
1,354,278. SPEED-INDICATOR. JOSEF BRANDSTETTER, Chicago, Ill., assignor to Acme Engineering & Mfg. Co., Chicago, Ill., a Corporation of Delaware. Filed Mar. 8, 1920. Serial No. 364,205. 5 Claims. (Cl. 264—20.)



1. In a speed indicator for phonographs, a base equipped with means for engaging the spindle of the phonograph table, a stem carried by the base in alinement with the spindle, a transverse arm fast on the stem, and a weighted lever pivoted on the free end of the arm, the stem having a peripheral groove and the lever having a forked end straddling the stem and adapted to aline with the groove in the stem when the lever is swung to a predetermined position by centrifugal action on the weighted portion thereof.

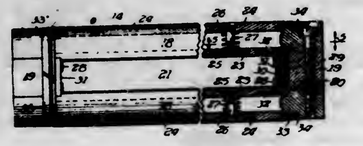
1,354,279. PROCESS OF DEHYDRATION. ARTHUR W. BROWNE, Ithaca, N. Y. Filed May 31, 1917. Serial No. 171,937. 11 Claims. (Cl. 23—13.)

1. The process of dehydration consisting in treating a water containing material with a dehydrating agent in a non-aqueous liquid solution.



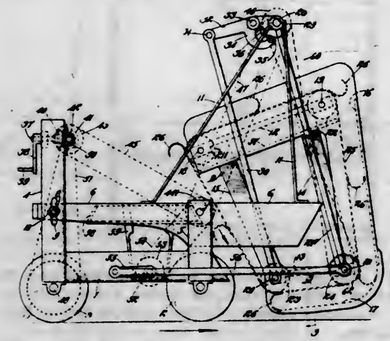
1,354,280. SILO-PACKER. EDWARD W. BURGESS, Chicago, Ill., assignor, by mesne assignments, to International Harvester Company, a Corporation of New Jersey. Filed Apr. 6, 1914. Serial No. 829,866. 16 Claims. (Cl. 100—57.)

1. A silo packer adapted to have a rising and falling movement within a silo, and means whereby the packer may be slidably adjusted for use in silos having different diameters.



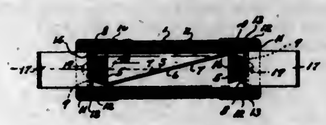
16. A silo packer adapted to move within a silo, and having yielding means for guiding purposes.

1,354,281. PISTON-VANE. JOHN D. CARROLL, West Lafayette, Ind., assignor to Turbo Rotary Engine Company, Evansville, Ind., a Corporation of Indiana. Filed Jan. 20, 1919. Serial No. 272,021. 7 Claims. (Cl. 121—88.)



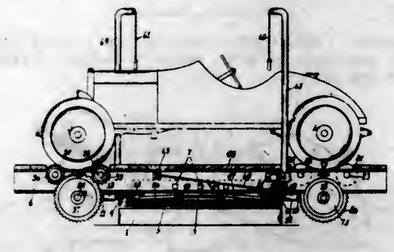
1. A piston vane having a channeled outer edge and formed with sockets in the bottom wall of said channel, springs seated in said sockets, thrust pins also seated in said sockets and pushed outwardly by said springs, and a packing strip mounted in said channel with its inner edge lying in contact with the outer ends of said pins.

1,354,282. ROCKER FOR PISTON-VANES. JOHN D. CARROLL, West Lafayette, Ind., assignor to Turbo Rotary Engine Company, Evansville, Ind., a Corporation of Indiana. Filed Jan. 20, 1919. Serial No. 272,022. 7 Claims. (Cl. 121—88.)



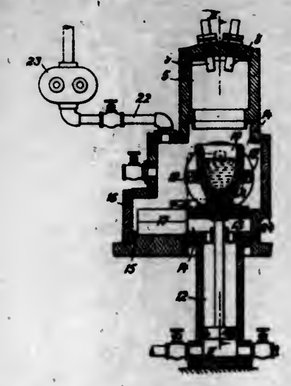
1. A rocker for piston vanes, consisting of a cylindrical body formed with a central longitudinal slot to accommodate a piston vane and with longitudinal slots in the sides of said body in a plane at right angles to said first-named slot, inner and outer packing strips lying in each of said last-named-slots, springs between said packing strips forcing them apart, and means for limiting the extent of outward movement of each of said packing strips.

1,354,283. CRANBERRY-PICKER. WILLIAM B. CLAPP, Abington, Mass. Filed Nov. 29, 1918. Serial No. 264,515. 11 Claims. (Cl. 56—330.)



1. A cranberry picking machine having wheels on which it is mounted, means for actuating the wheels and thereby propelling the machine on the surface of the ground, picker fingers oscillatably mounted in such manner that on their stripping stroke they will move in a direction opposite to the direction of travel of the machine on the ground, a series of scoops mounted to travel just above the picker fingers, means whereby the mechanism for driving the wheels which propel the machine also actuates the picker fingers and the scoops, and means whereby the scoops travel in the opposite direction to the direction of the forward movement of the picker fingers.

1,354,284. REFILLABLE CARTRIDGE-FUSE. FRANK L. COOLEY, Brooklyn, N. Y. Original application filed Jan. 8, 1919, Serial No. 270,113. Divided and this application filed Sept. 11, 1919. Serial No. 323,102. 4 Claims. (Cl. 200—132.)

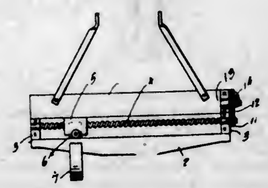


1. A refillable cartridge fuse comprising a tubular casing, transverse cross nuts fixed within the open ends of said casing, a fuse link having end terminals engaged over said cross nuts, removable ferrules slidable over the ends of said casing, said ferrules having diametrically disposed slots in their end walls, detachable knife-blade contact elements having oppositely and laterally directed foot-pieces at their inner ends, said knife-blade contact elements being adapted to be passed outwardly through said slots, and fastening means adapted to pass through said end walls of said ferrules and through said foot-pieces of said knife-blade contact elements to engage said cross nuts to clamp said foot-pieces in electrical contact with the end terminals of said fuse link.

1,354,285. TURNTABLE. ADOLPH COUPEE and ALFRED KRAFT, Oakland, Calif. Filed Jan. 24, 1920. Serial No. 353,791. 5 Claims. (Cl. 104—41.)

1. In a turntable, a stationary gear, a turnable automobile supporting frame, a pair of rollers journaled in said frame, gears on the shafts of said rollers, a shaft journaled in said frame, a gear on said shaft meshing with said roller gears, a beveled gear on said shaft, a pinion shaft journaled upon said frame, a pair of pinions on said shaft, one of said pinions meshing with said stationary gear and the other pinion meshing with the beveled gear on said shaft.

1,354,286. METHOD OF AND APPARATUS FOR MELTING AND CASTING METALS. JEAN HUBERT LOUIS DE BATS, Stonehem, Mass., assignor to New Process Metals Corporation, Wilmington, Del., a Corporation of Delaware. Filed Mar. 27, 1919. Serial No. 285,609. 5 Claims. (Cl. 22—209.)

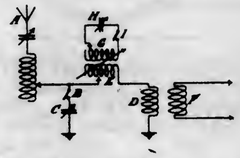


2. The method herein described which consists in melting and casting in a single integral structure from which air is excluded.

1,354,287. PISTON PACKING-RING. ROBERT I. ERLICHMAN, Philadelphia, Pa. Filed May 14, 1919. Serial No. 297,171. 8 Claims. (Cl. 74—109.)

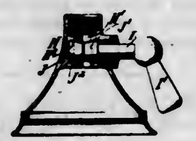
7. A piston packing ring, comprising a member having a cylindrical outer surface and transversely severed to permit expansibility and compressibility of the ring, and the said surface being provided with a circumferential groove wandering alternately from one to the other of the laterally opposite sides of said member and defined by two laterally opposite surfaces converging inwardly at an acute angle, and the bisector of said angle extending at an acute angle with the said outer surface.

1,354,288. PLOW-HITCH. THOMAS G. EUBANKS and JOHN B. BENNETT, Walla Walla, Wash. Filed May 14, 1919. Serial No. 297,058. 2 Claims. (Cl. 213—67.)



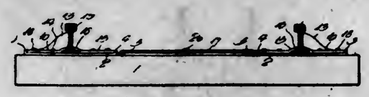
1. In a plow hitch, the combination of a slotted frame having a front and rear plate and having a worm operably mounted in said frame, and a block operably mounted on said worm and slidably mounted on said plates, a roller mounted in said block and positioned to engage the inner side of said rear plate, and a clevis mounted on said roller and positioned slidably astride said rear frame in a manner to maintain a relatively horizontal position thereto and to act as a guide to said block against disalinement.

1,354,289. GARMENT. STERLING E. FEIGE, Akron, Ohio. Filed Feb. 10, 1919. Serial No. 276,158. 3 Claims. (Cl. 2—144.)



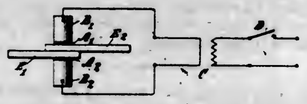
1. A garment, comprising trousers provided with shoulder straps having adjustably connected apron supporting elements at their front, a protecting apron having a section extending over and a second section extending upwardly from the front of said trousers, said second upwardly extending section being provided at its edges with coupling elements detachably connected with said apron supporting elements, and a waist band secured to the sides of said apron and substantially spaced from and below said coupling elements.

1,354,290. RECEIVER OF WIRELESS SIGNALS. ERNEST EDWARD FRANKIS, Helston, England, assignor to Radio Corporation of America, a Corporation of Delaware. Filed June 19, 1920. Serial No. 390,189. 7 Claims. (Cl. 250—20.)



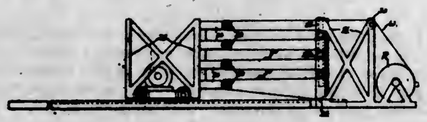
1. In a receiver for wireless signals, the combination of an aerial, two parallel earth connections thereto, an oscillatory circuit coupled to one only of the connections and a receiving circuit coupled to the same connection and independent of the other earth connection.

1,354,291. COMBINED MIXING AND DELIVERY VALVE SYSTEM. JAMES FRASER, Wilmington, Del., assignor to Speakman Company, Wilmington, Del., a Corporation of Delaware. Filed June 12, 1920. Serial No. 388,422. 3 Claims. (Cl. 277—56.)



2. In combination with pipes for conducting hot and cold water to a mixing valve, a mixing valve, a delivery pipe leading from said valve and a plug cock for controlling flow through said delivery pipe formed with a supplemental port of restricted area which remains open when the cock is closed.

1,354,292. RAIL-FASTENING DEVICE. LOUIS FRITZ, Los Angeles, Calif. Filed Oct. 21, 1919. Serial No. 332,327. 2 Claims. (Cl. 238—288.)



1. A device of the class described comprising a pair of substantially rectangular base plates having their outer ends upturned and their inner ends provided with lateral extensions and upturned portions, outer rail braces riveted to the outer ends of said base plates and having their outer edges abutting the upturned outer ends of said base plates, inner rail braces secured to the inner ends of said base plates and having their inner edges abutting the upturned inner ends of said base plates and the adjacent ends of said braces being shaped to receive and clamp rail sections thereunder, and a tie plate having its ends coupled to the extensions of said base plates.

1,354,293. SLUG-WELDING. JAMES H. GRAVELL, Elkins Park, Pa., assignor to Thomson Spot Welder Company, Boston, Mass., a Corporation of Massachusetts. Filed Aug. 20, 1919. Serial No. 318,654. 7 Claims. (Cl. 219—4.)

1. In an apparatus of the character described, an electrode having its contact end or surface provided with means for locating the slug and combined with magnetizing means surrounding said electrode to hold the slug when located in position.

1,354,294. CLOTH-FOLDING APPARATUS. WILLIAM M. GUSTIN, Hingham, Mass., assignor of one-half to Elden H. Jennison, Weston, Mass. Filed Apr. 6, 1920. Serial No. 371,673. 4 Claims. (Cl. 270—30.)

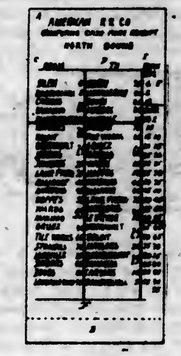
1. Cloth folding apparatus, comprising a relatively stationary frame equipped with a series of horizontal rolls spaced apart vertically and mounted for swinging movement from one end thereof, a table to receive the cloth folds, and a car mounted to operate on a track over said table, said car bearing a series of horizontal rolls vertically spaced apart and mounted so as to pass between the rolls on said frame to a position inward thereof, said car rolls having a mounting to swing from one end thereof.

1,354,295. GAS-BURNER FOR WATER-HEATERS. PAUL H. HAMILTON, New York, N. Y., assignor to Esda Manufacturing Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 6, 1918. Serial No. 220,715. 5 Claims. (Cl. 158—112.)

1. A burner of the character specified, comprising in combination, a vertical body portion having gas and air inlets in the lower end thereof, said body portion being provided with a vertical commingling bore forming the passageway for the air and gas, a mixing screen covering the upper end of said commingling bore, said mixing screen comprising a cylinder having one end flattened and closed to provide upwardly and inwardly inclined walls, the upper

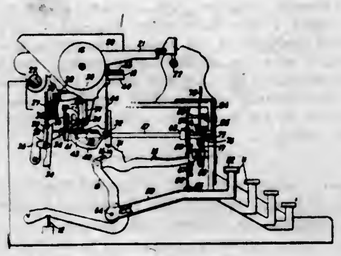
part of said body portion being enlarged to form a mixing chamber around said mixing screen and out of contact therewith, and a burner head above said mixing screen and also out of contact therewith.

1,354,296. GAGE-GLASS GUARD. ANDREW L. HATFIELD, Hillside, N. J., assignor to The Strong Machinery & Supply Co., a Corporation of New York. Filed June 6, 1919. Serial No. 302,211. 2 Claims. (Cl. 73—54.)



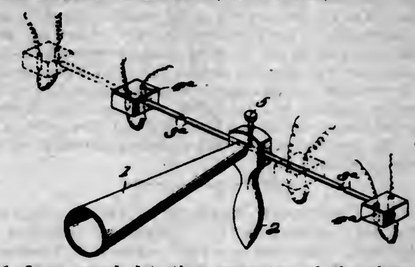
1. A gage glass guard comprising an enveloping spirally convoluted body having longitudinally contractible end portions, and a rigid bracing strip extending through said body to which the intermediate portion of the latter is secured to retain the same against longitudinal contraction.

1,354,297. RAILWAY-FARE-RECEIPT TICKET. CLARENCE W. HEATH and WILLIAM P. CONLIN, Bellevue borough, Pa. Filed Jan. 19, 1920. Serial No. 352,293. 6 Claims. (Cl. 283—30.)



1. A railway fare receipt ticket comprising a strip of paper having its intermediate portion slit to form parallel columns, one column being the departure column, containing the station names in sequence of travel, and the

other column being the destination column, containing the station names in reverse sequence, and numbers associated in parallelism with the station names in each column, the relative values of said numbers being such that the difference between the number associated with a station name in the departure column and the number associated with a station name in the destination column equals the fare between said stations, and in case of a constant overlap the common number of said overlap

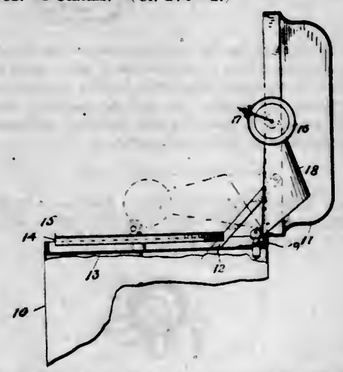


group of stations being printed but once opposite said group, whereby when the departure column is severed under the number of the departure station in the departure column and under the number of the destination station in the destination column the upper detached portion of the ticket forms a fare receipt wherein the difference between the last number in the departure column and the last number in the destination column is the amount of fare collected.

1,354,298. TYPEWRITING-MACHINE. WILLIAM F. HELMOND, Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 19, 1917. Serial No. 163,111. 31 Claims. (Cl. 197—157.)

1. In a typewriting machine, the combination with a ribbon-vibrator and actuating means therefor, of shifting means for said actuating means, said shifting means comprising a key, a shiftable element with two inclined surfaces thereon, a pivoted element engaging with either one of said inclined surfaces to guide said pivoted element into engagement with hook-like portions at the end of said inclined surfaces, said pivoted element engaging with said hook-like portion to move said shiftable element to change the setting of said actuating mechanism, and a return spring which swings said pivoted element during its initial effective movement to engage with the proper inclined surface of said shiftable element.

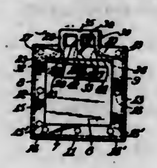
1,354,299. SOUND-DIRECTION INDICATOR. WILLIAM S. HOGG, Washington, D. C. Filed Mar. 14, 1919. Serial No. 282,651. 18 Claims. (Cl. 181—0.5.)



1. In a sound detecting apparatus of the character specified, a sound wave receiver, a tuning element connected therewith, and a sound amplifier connected with the tuning element.

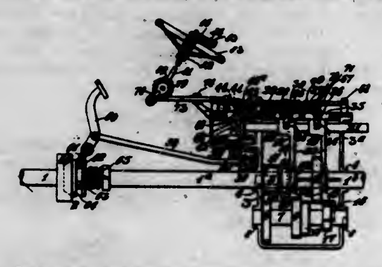
1,354,300. STEM-WINDING AND STEM-SETTING WATCH. ERNEST H. HORN, Waterbury, Conn., assignor to Waterbury Clock Co., Waterbury, Conn., a Corporation. Filed Feb. 13, 1920. Serial No. 358,317. 5 Claims. (Cl. 58—68.)

1. In a stem-winding and stem-setting watch of the push-in-to set type, the combination with the winding-ratchet and the winding-and-setting stem thereof, of a spring for operating the said winding-ratchet from opposite sides of the said stem, and an independent spring for operating the said stem.



1,354,301. TALKING-MACHINE. PERCY A. HORAWELL, Cleveland, Ohio, assignor, by mesne assignments, to The Cleveland Phonograph Company, Cleveland, Ohio, a Corporation of Ohio. Filed Mar. 17, 1916. Serial No. 84,762. 4 Claims. (Cl. 274—2.)

1. In a talking machine, a cabinet comprising a body portion having a hinged cover adapted to be swung down-

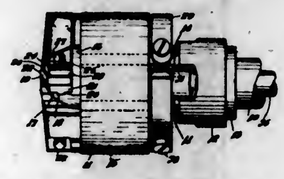


wardly to closed position and upwardly to elevated position, a horizontal platform at the upper part of the cabinet, a sound reproducer and a sound conveying means connected at its forward end to the reproducer and extending substantially horizontally rearward therefrom, said sound conveying means when in operative position having its rear open end directed toward the cover when the latter is elevated and adapted to be swung upwardly to inoperative position into the cover, said end being inclined from its lower rear portion upwardly and forwardly away from the cover to permit said swinging movement to inoperative position.

1,354,302. STORAGE-BATTERY CASE. ALBERTSON HOWARD, Indianapolis, Ind., assignor of one-third to Melvin F. Lane, and one-third to Floyed T. Peterman, Indianapolis, Ind. Filed Feb. 28, 1920. Serial No. 361,937. 7 Claims. (Cl. 217—65.)

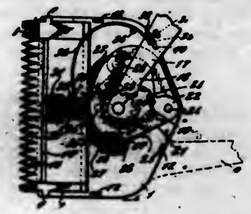
1. A case including a plurality of parts connected together to form corners, each of the parts adjacent to each corner having lugs embedded therein and having also a binder plate on the outer side thereof and integral with the lugs, the plates on adjacent parts being integrally connected each to the other and also to the plates on the other adjacent parts of the case.

1,354,303. SPEED-CONTROLLING MECHANISM FOR AUTOMOBILES. MERION J. HUGGINS and WILLIAM C. DAESSLER, New York, N. Y.; said Huggins assignor of his right to Automotive Development Co., Inc., New York, N. Y., a Corporation of New York. Filed Aug. 5, 1916. Serial No. 113,283. 30 Claims. (Cl. 74—58.)



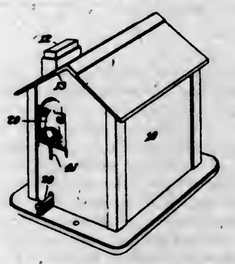
1. In an automobile, the combination of speed changing gears, a movable member, mechanism to move said member to positions in opposite directions from a neutral position and to restore the member to neutral position, means to lock any one of said gears to said member, and means to lock said member to said mechanism.

1,354,304. RESILIENT WHEEL. BENJAMIN JENDRYKE, San Francisco, Calif. Filed Jan. 29, 1918. Serial No. 214,273. 2 Claims. (Cl. 152—8.)



2. In a resilient wheel of the character described, the combination of a casing with an inner tube, a strip forming said inner tube, loops secured to the oppositely disposed contiguous edges of said strip and a lacing cord threaded through all of said loops, a spring within said tube composed of a plurality of convolutions pressed in opposite directions to closely fit against the inner wall of said tube, said lacing cord controlling the resiliency of each of said convolutions, substantially as described and for the purpose set forth.

1,354,305. THREADING ATTACHMENT. CHARLES A. JOHNSON, Unionville, Conn. Filed Dec. 12, 1917. Serial No. 206,734. 15 Claims. (Cl. 10—100.)



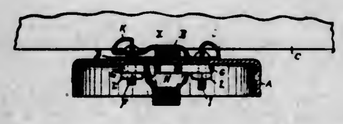
2. A threading attachment including a body part, a die holder movably mounted in the body part and having an opening for a thread cutter, a clamp mounted for rocking clamping action in said opening and extending lengthwise thereof and of a cutter therein to clamp said cutter, and means at one end of the clamp to force its opposite end into contact with the cutter.

1,354,306. MANUALLY-OPERATED HAIR-CLIPPERS. JOHN N. JOHNSON, Albuquerque, N. Mex. Filed Dec. 24, 1919. Serial No. 347,107. 6 Claims. (Cl. 30—1.)

1. A clipper comprising a base having a slot in the front edge thereof, a stationary cutter disposed in said slot and pivotally mounted on the base, a movable cutter adapted to contact with the pivoted cutter and by means of the pivotal mounting of the latter lie flat thereagainst, and a cover for holding the movable cutter in position and uiding it in its excursions along the face of the stationary cutter.

1,354,307. CABINET FOR CIGARETTES. CHARLES T. JOSLIN, Feura Bush, N. Y. Filed June 3, 1920. Serial No. 386,197. 18 Claims. (Cl. 211—8.)

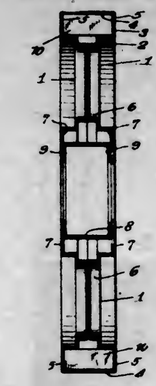
1. In a device of the kind described, a magazine, an ejector for ejecting articles therefrom, a manual member to actuate said ejector and adapted to be shifted manually into and out of operative connection therewith.



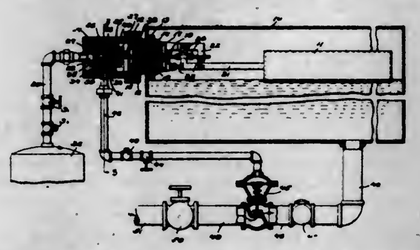
3. In a device of the kind described, a magazine in the cabinet, an ejector for ejecting articles from the magazine, a normally concealed device movable into and out of view, and a manual member for actuating the ejector or the normally concealed device at will.

1,354,308. METHOD OF AND APPARATUS FOR AFFIXING OBJECTS ON CARDS OR LIKE SUPPORTS. EMIL KOLLMAR, Pforzheim, Germany, assignor to The Corporation of Kollmar & Fourdan A.-G., Uhrkettenfabrik, Pforzheim, Baden, Germany. Filed Dec. 2, 1915. Serial No. 64,651. 3 Claims. (Cl. 112—104.)

1. In an apparatus of the character described, the combination of a needle carrying a thread adapted, in its reciprocations, to lay the thread around an object, grippers to hold said thread, movable pincer jaws to loop said thread, means to pass the loosened ends through the loop thus formed and means to draw the knot taut.



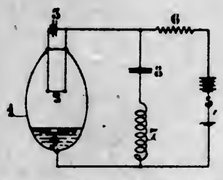
1,354,309. SUPPORT FOR OUTLET-BOXES. EDWARD H. KRUSE, Fort Wayne, Ind. Filed Dec. 17, 1917. Serial No. 207,476. 1 Claim. (Cl. 248—35.)



In a device for mounting outlet-boxes, a supporting bar; a clip having a base and tongue; and two bolts having slotted heads, one of which extends through the base and the other through the tongue, the respective ends of the base and tongue being bent over the heads of the corresponding bolts with their extremities extending into the slotted heads thereof, said bar being adapted to be clamped between the tongue and base when the outlet-box is secured upon said bolts.

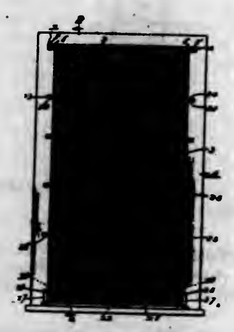
1,354,310. SHEET-METAL WHEEL. MAURICE LACHMAN, New York, N. Y., assignor, by mesne assignments, to Bethlehem Steel Company, Bethlehem, Pa., a Corporation of Pennsylvania. Filed Dec. 12, 1918. Serial No. 266,418. 3 Claims. (Cl. 21—69.)

1. A sheet metal wheel comprising a pair of sheet metal plates assembled back to back, said wheel having a hollow rim, a hollow hub, struck up bosses intermediate the hollow rim and hub and connected thereto by offset portions forming a step-like connection between the bosses and rim and hub.



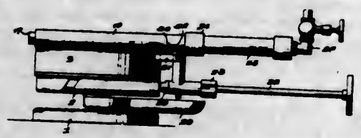
1,354,311. AUTOMATIC LIQUID-LEVEL CONTROLLER. FRANCIS H. LANDRUM, Columbus, Ohio. Filed Sept. 4, 1915. Serial No. 49,104. 1 Claim. (Cl. 137—68.)

The combination with a receptacle, of a packing gland extending through a wall of the receptacle, a valve casing secured to the packing gland and provided with a valve chamber having oppositely disposed seats, a nut secured in said chamber, one of said seats being arranged in said nut, a ball valve vibratile between the seats, a cage on the nut retaining the valve in position, a pressure regulating tank communicating with one of said seats and adapted to be closed off by the valve when in one position, a float in said receptacle provided with an operative connection to the ball valve, a fluid supply pipe leading to said receptacle, a valve in said supply pipe controlled by fluid pressure and a branch pipe leading from one side of the chamber intermediate the valve seats and communicating with the valve controlling the fluid supply pipe.



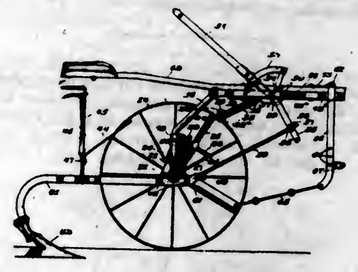
1,354,312 GENERATOR OF SUSTAINED ELECTRIC WAVES OR OSCILLATIONS. MARIUS LATOUR, Paris, France. Filed Nov. 25, 1916. Serial No. 133,391. 4 Claims. (Cl. 250—36.)

1. A generator of sustained waves of very low intensity for receiving in the heterodyne system of wireless teleg-



raphy, comprising a vacuumized bulb, a vapor emitting metal within the bulb, anode and cathode wires passing into the bulb, a filament connecting the cathode wires within the bulb and a source of current connecting these wires without the bulb, and a source of continuous current and an oscillating circuit each connected between said anode and cathode wires.

1,354,313. ROLLING SCREEN. WILLIAM F. LEACH, Childress, Tex. Filed Nov. 12, 1918. Serial No. 262,186. 2 Claims. (Cl. 156—39.)



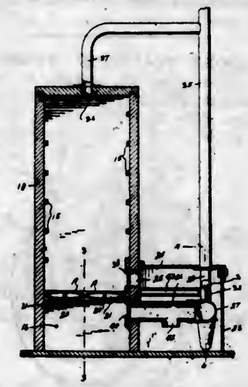
2. A rolling screen consisting of a spring actuated roller and means for mounting the same in a window frame, a wire mesh screen carried by the said roller, a rail connected with the screen at the end remote from the roller and projecting laterally beyond the side edges of the screen, and L-shaped members for pivotal mounting on the window frame, one leg of each of said members being of U-shaped construction at its extremity for engagement over one of the projecting ends of the bottom rail, the remaining leg of each of said members lying normally in a horizontal plane and being disposed behind the screen between it and the window frame, whereby the L-shaped members may be shifted on their pivotal connections to engage the projecting ends of the bottom rail for release therefrom.

1,354,314. OIL-BURNER. WILLIAM C. LEIST and CHARLES WAGNER, Wauseon, Ohio. Filed July 29, 1919. Serial No. 314,159. 10 Claims. (Cl. 158—65.)

7. A burner comprising a ring-like body having arcuate jet slots in one face and a tubular mixing chamber extending diametrically across its opposite face, said chamber at one end entering the body and having its opposite end opening beneath the body adjacent its periphery, the latter being provided above the opened end with a bracket, a unitary retort structure extending across the first face of the body and secured to the bracket, said retort structure having two bores therethrough opening into a communicating chamber, a closure member for the chamber, a filler of fibrous material for the chamber compressed therein by the closure member, and a nozzle connected to the retort and discharging into the mixing chamber.

1,354,315. CULTIVATOR. ALEXUS CONRAD LINDGREN, Hamilton, Ontario, Canada, assignor, by mesne assignments, to International Harvester Company, a Corporation of New Jersey. Filed Oct. 12, 1917. Serial No. 196,317. 8 Claims. (Cl. 97—35.)

1. In a wheeled cultivator, a frame, a tongue mounted thereon, arch axles hingedly connected at their upper portion to the frame, hinged mountings carried by the lower portion of each arch axle, wheels journaled thereon, arms secured to the hinged mountings, an alining bar connecting said arms, a cultivator beam attached to the lower portion of each arch axle, and means for adjusting the arch axles and beams at various positions to position the cultivator beams and wheels.

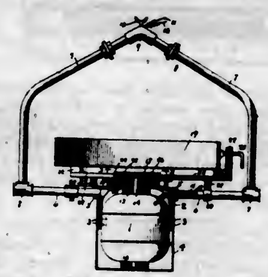


1,354,316. DIESTOCK. WILLIAM LINK, Tulsa, Okla., assignor of one-third to Otho G. Allison and one-third to Max Hurst, Kansas City, Mo. Filed Jan. 11, 1918. Serial No. 211,416. 1 Claim. (Cl. 10—126.)

A die stock having a hollow handle adapted to form an oil receptacle and having an oil outlet at its inner end and at its other end having a removable closure provided with an air inlet, a conductor connected with said outlet and arranged to discharge into a die, a valve for closing said outlet having a stem slidably mounted in said closure, a thumb button attached to the outer end of said stem, a spring bearing on said closure and against said button for closing said valve, a second valve for closing said air inlet having a stem normally disconnected with said button but adapted to be forced by the latter to the open position when the button is forced to the open position, and a spring for normally closing said second valve.

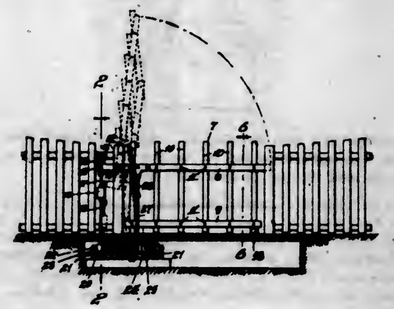
1,354,317. SMOKEHOUSE. JOHN D. LINSS, Oklahoma, Okla. Filed Dec. 24, 1919. Serial No. 347,070. 8 Claims. (Cl. 99—2.)

4. A smoke house, a fire box thereunder, dampers disposed between the fire box and the smoke house and shiftable to entirely separate the smoke house from the fire box or permit the direct passage of heat from the fire box into the smoke house, a smoke and heat separator, the separator having a duct leading into the smoke house at the lower end thereof above the fire box dampers and controlled by a damper, a pipe leading from the fire box into the separator and controlled by a damper, said pipe at its outer end having two branches, one opening into the separator and the other communicating with an upwardly extending flue, a stack into which said flue opens, a branch pipe leading from the top of the smoke house into said stack, and means for opening communication directly between the interior of the separator and said flue, said means comprising an opening in the flue, and a manually



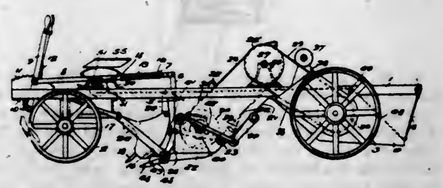
shiftable damper normally closing said opening but adapted to be shifted away from the opening to permit the passage of smoke through said opening into the flue.

1,354,318. VALVE. FREDERICK V. D. LONGACRE, Yonkers, N. Y., assignor to The Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Aug. 9, 1919. Serial No. 316,364. 8 Claims. (Cl. 251—119.)



1. In a multi-ported valve for fluid compressors or pumps, a valve seat, a cover plate held in position against the valve seat, an annular valve plate having its seat engaging surface convexly contoured and extending partly within the passage in the valve seat, said valve plate having a limited movement between said seat and cover plate, and said valve seat, valve plate and cover plate being adapted to permit a continuous stream line flow of fluid entirely through the multi-ports of the valve.

1,354,319. SAND-SIFTER. ROBERT G. LOWE, Clawson, Mich. Filed June 17, 1920. Serial No. 389,602. 6 Claims. (Cl. 83—56.)

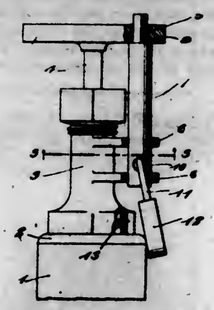


2. In combination, an electric motor embodying a vertical armature shaft, a support for the motor embodying tubular arms connected at their upper ends, an eccentric on the upper end of the shaft, a sleve mounted above the motor and movable relative to the motor support, a ring connected to said container into which the eccentric extends, arms extending from the ring to said container, and springs between the motor support and said arms to receive the weight of the container.

1,354,320. AUTOMATIC GATE. DANIEL W. MCCALLUM, St. Louis, Mo. Filed Nov. 29, 1918. Serial No. 264,575. 2 Claims. (Cl. 39—50.)

1. An automatic gate comprising a pair of horizontal bars, two vertical standards, the uppermost horizontal bar being pivotally attached to one of said vertical standards, cables swivelly attached to the uppermost horizontal bar, a roller around which said cables are wound, a shaft carrying said roller, a spring interposed between the roller and shaft, a second roller securely mounted on said shaft, a cable wound around said second roller, a lever mechanism to which said second mentioned cable is attached, and means for operating the lever mechanism to revolve both rollers.

1,354,321. STONE-DIGGING MACHINE. MERT MCQUEEN, Van Hook, N. D. Filed Jan. 9, 1919. Serial No. 270,307. 4 Claims. (Cl. 55—17.)

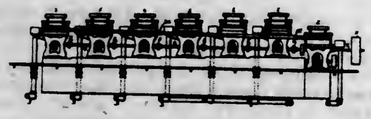


1. In an apparatus of the class described, a supporting frame, a plurality of members having digging tools and suspended from said frame, a scoop device rearwardly of the suspended members and having scraper elements, a plurality of spring pressed guard members extending rearwardly of the suspended members and coacting with the scoop device, and means for removing the gathered material from the scoop.

1,354,322. GATE-VALVE LOCK. LEONARD B. MADRIN, Houston, Tex. Filed Apr. 28, 1919. Serial No. 293,207. 2 Claims. (Cl. 70—125.)

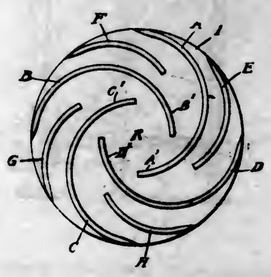
1. The combination with a valve including a rotary stem and a guide through which the stem passes; of a hand wheel on said stem, said wheel having a plurality of spaced apertures therein, a pair of laterally directed vertically spaced apertured lugs on said guide, and a locking pin slidable through said lugs, said pin being de-

creased in diameter at one end for reception in one of said apertures, said pin having a transverse opening adjacent



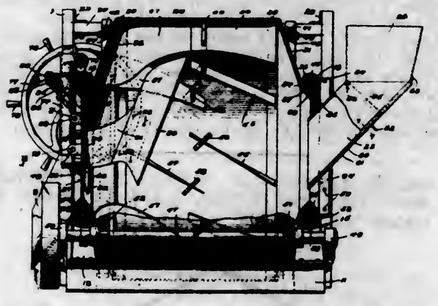
its lower end and capable of being positioned above or below the uppermost lug to receive the shackle of a padlock to lock the pin in operative position.

1,354,323. BATTERY HAND-LAMP. LORENZ MAISEL, Madison, Wis., assignor to Burgess Battery Company, Madison, Wis., a Corporation of Wisconsin. Filed Aug. 26, 1918. Serial No. 251,389. 17 Claims. (Cl. 240—8.5.)



17. In a battery hand lamp, the combination, with a battery case having a lamp and a pair of conductors, at least one conductor being in the form of a narrow metal strip provided with a bent terminal projecting through the case; of a device for establishing electrical connection between said conductors to light the lamp, said device embodying a member mounted on the exterior of said case in position to be manipulated by the hand in which the lamp is grasped, and adapted to rotate into and out of engagement with said bent terminal about an axis eccentric to the axis of the case.

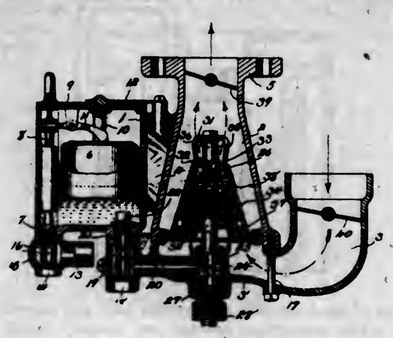
1,354,324. SCREEN-BOX FOR PAPER-MAKING MACHINES. FRANK P. MILLER, Downingtown, Pa. Filed Jan. 2, 1919. Serial No. 269,228. 9 Claims. (Cl. 92—32.)



1. The combination in a paper making machine, of a series of screen boxes each having independent suction mechanism, said boxes being arranged at different levels and located side by side; a shaft extending under the several boxes and having an eccentric at each box and an eccentric rod coupling each eccentric to a suction mechanism.

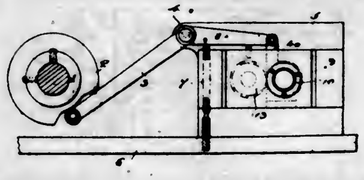
1,354,325. STONE-POLISHING WHEEL. JAMES R. MITCHELL, Montpelier, Vt., assignor to Lane Manufacturing Company, Montpelier, Vt., a Corporation of Vermont. Filed July 9, 1919. Serial No. 309,676. 3 Claims. (Cl. 51—11.)

1. A polishing wheel comprising a rotatable disk having upon its working face two sets of segmental flanges, the flanges of one set being substantially the extent of a half-circle and the flanges of the other set being substantially the extent of a quarter circle and being individually interposed between the flanges of the first-named set, all flanges starting at spaced points about the periphery of the disk and curving inwardly toward the center of the disk to provide a multiplicity of independent feed channels each having its intake opening at the periphery of the disk and the longer flanges constituting a substantially completed barrier about the center of the disk adapted to prevent escape of the abrasive by centrifugal action.



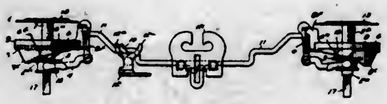
1,354,326. FERTILIZER-MIXER. JAMES WAYNE MOORE, East Point, Ga., assignor to Atlanta Utility Works, East Point, Ga., a Corporation of Georgia. Filed Oct. 23, 1919. Serial No. 332,625. 23 Claims. (Cl. 259—3.)

1. In a device of the class described the combination of a rotary mixing drum having a circular discharge outlet, of a movable non-rotatable door fitting said outlet when in closed position and a downwardly and inwardly inclined apron secured to said door on its inner lower portion to protect the bearing connection between said drum and door from falling material.



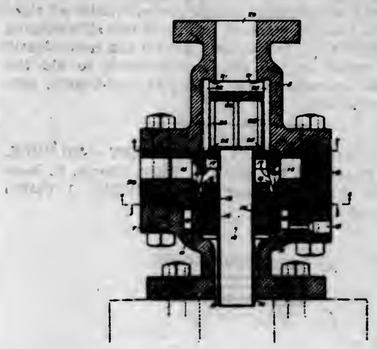
1,354,327. CARBURETER. MILLICENT MORDEN, Brooklyn, N. Y., and WILLIS C. HESS, Toledo, Ohio. Filed Oct. 6, 1917. Serial No. 195,107. 2 Claims. (Cl. 261—44.)

1. In a mixing device of the class described including a mixing chamber having an air intake, a fuel supply tube extending into said mixing chamber, a flanged ring disposed in said mixing chamber between the intake and outlet therefrom, the flange on said ring being secured to the wall of the chamber, inwardly extending converging fingers formed on the ring, a tapered sleeve formed of a coiled



wire disposed around said fingers and having its large end secured to the ring, a second sleeve secured to the restricted end of the tapered sleeve, the end of the second sleeve being adjacent the outlet opening of said fuel supply tube, whereby the air from the intake will be reduced in volume adjacent said outlet opening.

1,354,328. LOOPER MECHANISM FOR TENSION-ENVELOP MACHINES. JENS MORTENSEN, New York, N. Y., assignor to Fred Goat Company, Brooklyn, N. Y., a Corporation of New York. Filed May 1, 1920. Serial No. 378,069. 21 Claims. (Cl. 93—61.)

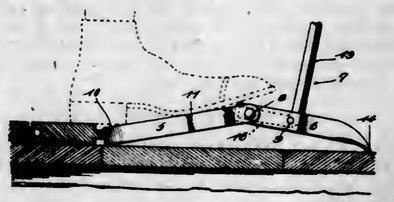


1. A looper mechanism for tension envelop machines comprising a rotatable body provided with an orifice in the peripheral wall thereof, and a movable portion supported by said body and movable axially relative to said body, to open and close said orifice, and means for periodically moving said movable portion.

1,354,329. TYPEWRITING-MACHINE. ALBERT F. MOSER, Groton, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed Jan. 6, 1919. Serial No. 269,834. 14 Claims. (Cl. 197—160.)

4. In a typewriting machine, the combination of a pair of ribbon spools, means for rotatably supporting the spools, a pair of gears rotatable with the spools and shiftable relatively thereto, driving means for the gears, and ribbon controlled means for simultaneously shifting said gears in opposite directions to operatively connect first one and then the other of said gears with its driving means.

1,354,330. LIQUID-ELEVATING DEVICE. THOMAS W. MURPHY, Philadelphia, Pa. Filed Apr. 8, 1920. Serial No. 372,193. 16 Claims. (Cl. 103—3.)



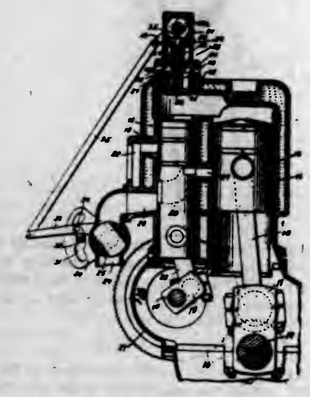
1. The combination in a liquid elevating apparatus of a source of liquid; a blow tank; a casing connected to the blow tank; a valve in said casing for controlling the delivery of compressed air to the blow tank; a conduit extending through the valve for delivering liquid from said source to said blow tank; and a delivery pipe from said tank.

1,354,331. METHOD OF FORMING DOLLS FROM TUBULAR BLANKS. HARRY NELKE, Philadelphia, Pa. Filed Feb. 7, 1920. Serial No. 356,857. 7 Claims. (Cl. 46—40.)

1. The method of forming a doll from a tubular blank, which comprises forming an opening in the side thereof, closing the open ends of said blank, stuffing the blank with a filler, and securing a face piece across said opening to close the same, substantially as described.

1,354,332. FLOOR-LAYING JACK. WILLIAM A. NEVILLE, Kewanee, Ill. Filed Apr. 24, 1919. Serial No. 292,386. 4 Claims. (Cl. 254—15.)

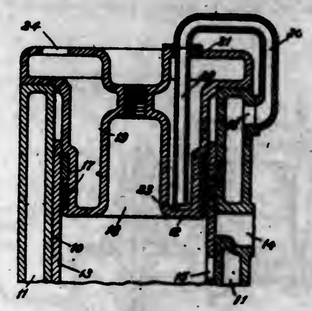
1. In a floor-laying jack, a floor-board pusher, and a rigid structure including a sill-engaging member having a sill-



engaging element at one end and a pivot at its other end portion, said pusher being movably secured to said sill-engaging member by said pivot, said rigid structure also including a handle-bar which extends from the middle portion of the sill-engaging member substantially at right angles to the common plane of said pivot and sill-engaging element, whereby the foot of an operator can conveniently be pressed down on the pivotal connection to aid the hands of the operator in the laying of floor-boards, substantially as shown.

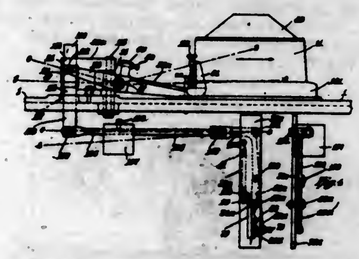
1,354,333. CLOSURE FOR CONDIMENT-HOLDERS. LUIS M. ORTIZ and LAURENCE E. REED, Chama, N. Mex. Filed Feb. 17, 1920. Serial No. 359,329. 1 Claim. (Cl. 65—45.)

A closure for a condiment holder comprising a cap having a plurality of perforations in the top thereof, a transversely slidable and perforated disk pivotally mounted at one side to the cap and having a handle at its diametrically opposite side movable through the cap, said disk being adapted to cover and uncover the perforations of the cap, said disk having an angularly extending lug on one side, and a bowed spring having its ends anchored in the cap and having its center notched to receive the lug of the cap and whereby said disk is yieldably held in one limit of its pivotal movement.



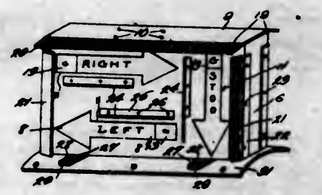
1,354,334. INTERNAL-COMBUSTION ENGINE AND VALVE MECHANISM THEREFOR. ALDEN E. OSBORN, New York, N. Y. Filed Sept. 22, 1916. Serial No. 121,531. 20 Claims. (Cl. 123—59.)

1. In an internal combustion engine, the combination with a cylinder having valve controlled inlet and exhaust ports, a piston therein and a throttle valve, of an auxiliary valve controlling an independent opening into the cylinder and means dependent upon the throttle valve under predetermined conditions, for positively controlling the opening of said auxiliary valve.



1,354,335. INVERTED-HEAD-ENGINE WATER-JACKET. ALDEN E. OSBORN, New York, N. Y. Filed Jan. 14, 1920. Serial No. 351,344. 3 Claims. (Cl. 123—173.)

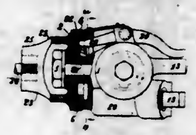
3. An internal combustion engine comprising a cylinder having a water jacket and an exhaust port, a water jacketed inverted head, a sleeve valve arranged to move between said cylinder and said head and to control the exhaust port, a tube connected to admit water from the water jacket of the cylinder to the lower part of the water



jacket of the head near the exhaust port, and providing a sole water connection between the cylinder jacket and head jacket and therefore forming part of a siphon by means of which the water may be drained from the jacket of the head into the jacket of the cylinder.

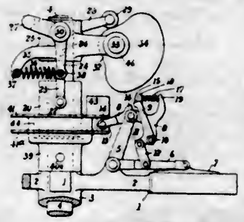
1,354,336. WIRE-DRAWING MACHINE. WILLIAM D. PIERSON, Waterbury, Conn., assignor to The Waterbury Farrel Foundry & Machine Company, a Corporation of Connecticut. Filed Mar. 13, 1919. Serial No. 282,399. 10 Claims. (Cl. 205—16.)

1. In a wire-drawing machine, the combination with the rotatable drawing block, the die-holder, means whereby the die-holder moves away from its wire-drawing position when the tension of the wire is released, and the driving means for the drawing-block, of means for braking the rotation of the block, and operating connections between the die-holder on one hand, and the driving and braking means on the other, said connections being arranged to be operated by said movement of the die-holder to disconnect the driving means from the drawing block and to apply the braking means thereto.



1,354,337. ELECTRIC SIGNAL APPARATUS. FRANCIS A. PUACELL, Brooklyn, N. Y. Filed May 8, 1920. Serial No. 379,957. 2 Claims. (Cl. 40—132.)

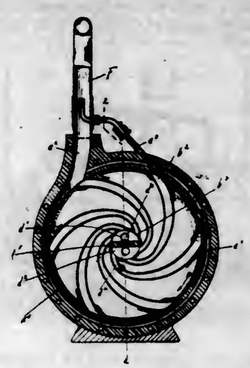
1. Signaling apparatus having a box provided with a plurality of illuminable signal means in its side walls, a



cover projecting laterally at an inclined portion to shade said means, partition means within the box to provide independent signal chambers, bolts to secure the cover in place passing through said partition means, said means consisting of arrow shaped slots, a transparent panel behind said slots, said panel at the ends of the slots opposite to the arrow heads being colored to contrast with the heads, and additional shade means for the signal means extending laterally from the side walls of the box.

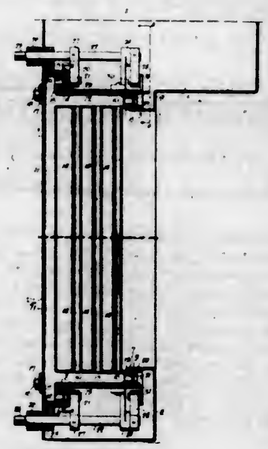
1,354,338. LIFTING-JACK AND THE LIKE FOR USE ON MOTOR ROAD AND OTHER VEHICLES. FREDERICK LIONEL RAPSON, Liverpool, England. Filed June 11, 1919. Serial No. 303,410. 6 Claims. (Cl. 254—86.)

2. A lifting jack for vehicles including a supporting means adapted to be secured to a fixed part of the vehicle, a jack rotatably mounted with relation to said supporting means, a spring pressed locking lever to automatically secure the jack in either one of a plurality of positions relative to the supporting means, and means for operating said lever to release the jack for rotative movement with respect to this supporting means.



1,354,339. BAG-MACHINE. WILLIAM ROSE, Gainsborough, England, assignor to Rose Brothers (Gainsborough) Limited, Gainsborough, England. Filed Feb. 12, 1920. Serial No. 358,242. 6 Claims. (Cl. 93—8.)

2. In apparatus for making paper bags, a former on which the bag is made, a presser foot pivotally connected to the former and adapted to press against a bag on the former, means for operating said presser foot, and comprising a toggle driver connected to the presser foot and having elements separating when the presser foot is in operating position.

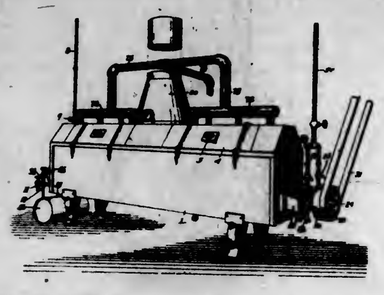


1,354,340. CENTRIFUGAL VACUUM-PUMP. VICTOR ROSENHAGEN, Bellevue, Ky. Filed Aug. 18, 1919. Serial No. 318,166. 1 Claim. (Cl. 230—14.)

In a centrifugal vacuum pump the combination of a casing, a rotor mounted in the casing, the casing having in it a discharge channel which extends throughout a portion only of the interior surface of its peripheral wall, said casing contacting with the periphery of the rotor at points between the ends of the channel, the rotor having at its center a water chamber and an air chamber, and a series of tubes extending from its center to its periphery, a water supply tube connecting with the water chamber and an air supply tube connecting with the air chamber, the inner ends of the tubes being adapted to register with the water chamber while their outer ends are closed

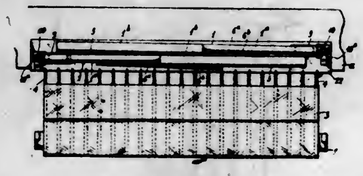
by contact with the casing and to register with the air chamber while their outer ends are open to the discharge channel.

1,354,341. RADIATOR. GIACINTO ROSSI, Philadelphia, Pa. Filed Sept. 9, 1919. Serial No. 322,618. 11 Claims. (Cl. 257—129.)



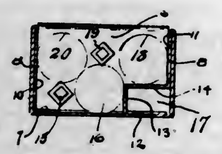
1. The combination in a radiator of two body portions having lines of openings; radiator sections removably connecting said body portions and communicating therewith through the openings; with valves for simultaneously closing the openings of the body portions at will.

1,354,342. EVAPORATOR AND PASTEURIZER. JOHN F. RUFF, Port Huron, Mich. Continuation of application Serial No. 208,853, filed Dec. 26, 1917. This application filed Jan. 16, 1919, Serial No. 271,382. Renewed July 26, 1920. Serial No. 399,159. 16 Claims. (Cl. 99—5.)



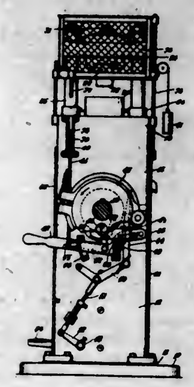
2. In combination, a vat, a plurality of rotatable heating drums arranged parallel to one another therein, and cleaning means for the drums comprising cleaner bars, one for each drum, bearing on the corresponding outer surface thereof, said cleaning means also comprising cross connections between the bars whereby the cleaning means corresponding to a given longitudinal portion of the drums may be removed as a unit.

12. The process of evaporating and pasteurizing milk and liquid milk products which consists in subjecting individual particles of the liquid to repeated momentary contacts with a hollow rotating drum containing live steam at considerable pressure in direct contact with the



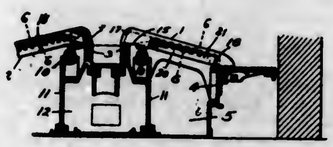
inner surface of the outer wall of the drum, repeatedly cleaning the outer surface of said wall while in contact with the liquid, and blowing air through the liquid in quantities sufficient to pervent the temperature from rising materially above that at which pasteurization takes place.

1,354,343. COLLAPSIBLE BED. LOUIS F. SCHILLING, Salem, Ohio. Filed Feb. 5, 1916. Serial No. 76,409. 20 Claims. (Cl. 5—72.)



1. In a collapsible bed, a frame comprising a horizontal end bar constituting a support, side bars, each having a swiveling connection at its inner end with said support, said side bars being thereby foldable through an angle of ninety degrees whereby they may be projected in parallel relation to one another and at a right angle to said support or may be disposed to rest on said support in parallel relation to one another, and a second end bar connecting the outer ends of said side bars, and being detachable therefrom prior to the folding of said side bars, said second end bar, when assembled, being parallel to said support.

1,354,344. FOLDING PAPER CARTON. EDWARD A. SCOTT, Stratford, Conn., assignor to Winchester Repeating Arms Co., New Haven, Conn., a Corporation. Filed Mar. 13, 1920. Serial No. 365,485. 1 Claim. (Cl. 229—34.)

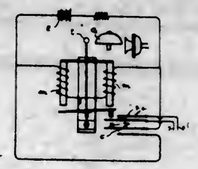


A folding one-piece paper carton-body having an internally arranged longitudinal shelf, located in one corner of the body below the median horizontal plane thereof, the ends of two of the shelf-flaps co-acting with notches in flaps formed at the ends of the bottom-member of the body, whereby the folded shelf is held in place, thus reducing the space upon the bottom of the carton-body and adapting it for the packing of articles in groups of five.

1,354,345. SAFETY DEVICE FOR POWER-OPERATED MACHINES. HENRY E. SEAVER and CHARLES L. BOWERS, Hartford, Conn., assignors to Daniel M. Wright, Hartford, Conn. Filed July 10, 1918. Serial No. 244,139. 7 Claims. (Cl. 74—46.)

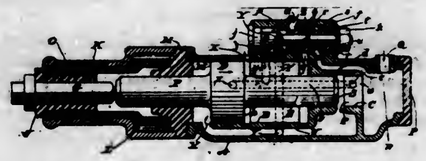
1. In combination with a member to start and stop a machine, a vertically movable cage completely surrounding active members of said machine and of a height, when it is in its lowermost position, to effectually prevent inadvertent access to the danger zones of said active members, and a connection between said cage and said starting and stopping member and including a lock to positively prevent operation of said member to start the machine when the cage is in a raised position.

1,354,346. FURNACE AND GRATE-BAR THEREFOR. JOHN S. SKELLY, Monongahela, Pa., assignor to Combustion Engineering Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 16, 1919. Serial No. 330,952. 5 Claims. (Cl. 110—47.)



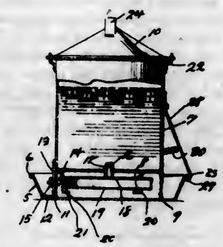
1. A tubular grate bar provided with inlet and outlet openings in its bottom and having in the upper portion of one side a plurality of elongated recesses arranged at acute angles to the longitudinal axis of the bar and on the other side adjacent to the bottom of the bar a longitudinal recess parallel to the longitudinal axis of the bar, and adapted to communicate with the elongated recesses of a similar bar when placed adjacent thereto.

1,354,347. RINGING-TONE CIRCUITS. FRANK M. SLOUGH, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Dec. 1, 1916. Serial No. 134,227. 12 Claims. (Cl. 179—72.)



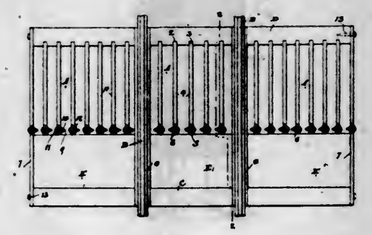
12. The method of producing a signaling tone current consisting of intermittently agitating a vibratile body

causing successive mechanical trains of forced and free vibrations, and then translating only the portion of each



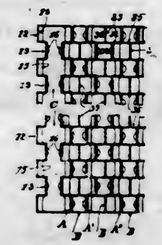
train which consists of free mechanical vibrations, into corresponding electrical pulsations.

1,354,348. FLUID-ACTUATED RECIPROCATING MOTOR. WILLIAM A. SMITH, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Feb. 24, 1920. Serial No. 360,601. 6 Claims. (Cl. 121—18.)



1. In a fluid actuated reciprocating motor, the combination of a cylinder, a piston therein, a main passage controlled by the piston for intermittently supplying fluid pressure in front of the piston, main exhaust means for exhausting the cylinder from both ends of the piston, a second main passage for intermittently supplying fluid pressure behind the piston, a differential valve having larger and smaller pressure areas for controlling said second main passage and for controlling auxiliary exhaust means from both ends of the cylinder, said valve being actuated in one direction by constant pressure on its smaller area, and in the other direction by intermittent pressure on its larger area, a combined auxiliary supply and exhaust passage controlled by the piston for supplying pressure to, and exhausting pressure from, the larger area of said valve, and an additional auxiliary supply and exhaust passage permitting the pressure supplied to said larger area of the valve to pass to the front end of the cylinder and also affording an auxiliary exhaust for the front end of the cylinder.

1,354,349. AUTOMATIC DRINKING-FOUNTAIN. LUCIUS H. SOLOMON, Tiffin, Ohio. Filed June 19, 1919. Serial No. 305,445. 2 Claims. (Cl. 119—80.)

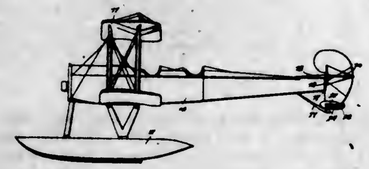


1. A drinking fountain, the combination with a pan having a beaded edge constituting a trough and a receptacle supported thereby, of a plurality of elongated angularly extending spring keepers permanently affixed to the receptacle, hooks on the keepers for engaging about the beaded edge of the trough for retaining the receptacle therein, and a hinged elongated angularly extending keeper mounted on the receptacle and engaging the trough for releasably retaining the receptacle therein, and a coil spring for normally holding the hinged keeper in a retaining position relative the receptacle and the trough.

1,354,350. CATTLE-GUARD. JOHN ALEXANDER SPARROW and WILLIAM HARLE, Sedgewick, Alberta, Canada. Filed June 10, 1920. Serial No. 388,025. 3 Claims. (Cl. 256—14.)

1. A cattle guard placed over a pit having an inclined rear wall comprising sills located at each side of said pit and extending transversely of the rails; a plurality of spaced vertical posts mounted in said pit at the foot of said sloping wall, and a plurality of stringers each supported at one end by one of said sills and at the other end by one of said posts thus leaving the said sloping wall uncovered, as set forth.

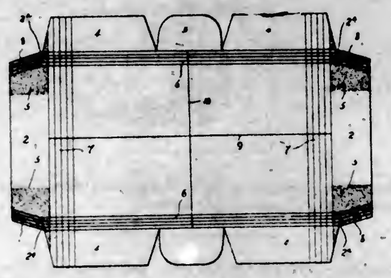
1,354,351. RADIATOR FOR MOTOR-DRIVEN VEHICLES. CHARLES F. SPERY, Chicago, Ill. Filed June 28, 1919. Serial No. 307,326. 6 Claims. (Cl. 257—130.)



1. In a radiator for motor driven vehicles, a core, said core comprising a multiplicity of vertically disposed, spaced apart, water tubes, and a spacer between adjacent water tubes, said water tubes consisting each of a pair of plates placed face to back, there being on the longitudinal margins of each plate a multiplicity of projections each of which affords one half of a square, there being transversely between these projections shallow, flat, projections of the same width as the marginal projections, said shallow projections terminating in the marginal projections by an easy sweep, said marginal and the intermediate shallow projections alternating with flat portions or lands, there being in said lands approximately semi-cylindrical depressions of approximately the same length as the intermediate shallow projections to afford on the opposite side of the tube corresponding depressions, the sides of the marginal projections of the tube sheets being slightly converging to enable the tube sheets being nested one into the other to afford between the plates an alternately constricted and then enlarged through passage.

1,354,352. COMBINATION-GARMENT. WALTER J. STOOKEY, Vallejo, Calif. Filed Apr. 10, 1919. Serial No. 289,008. 1 Claim. (Cl. 2—54.)

A combination garment comprising a front apron having at its upper end a half vest front whose upper end is provided with a narrow lateral extension, the upper edge of said half vest front and its extension passing completely over one shoulder, and diagonally down the front of the garment to one edge of said front apron, a second vest front half co-acting with that aforesaid to form a complete vest front said second half having a narrow lateral extension on its upper end passing completely over the other shoulder and stitched to the aforesaid extension at the back of the neck opening, a vest back attached to said extensions and to said vest front halves, and terminating at the waist line, and fasteners for securing said halves together, said second half having a diagonal lower edge to overlap said diagonal upper edge of the other half.



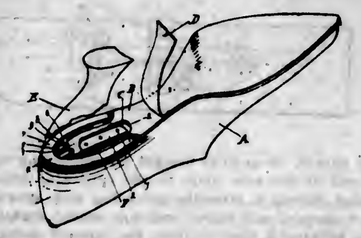
1,354,353. RUDDER FOR HYDROAEROPLANES. MAX STUPAR, Buffalo, N. Y., assignor to Abraham J. Elias, Buffalo, N. Y. Original application filed June 25, 1919, Serial No. 306,613. Divided and this application filed Dec. 10, 1919. Serial No. 343,750. 5 Claims. (Cl. 244—2.)

1. In a flying machine, an air directional rudder, a float at the lower portion of said rudder, and rigid planing fins outstanding from the sides of said float in the plane of its axis for action when on the water.

1,354,354. ADJUSTABLE BOOK-COVER. THOMAS L. TOLAND, Dallas, Tex. Filed Feb. 9, 1920. Serial No. 357,394. 1 Claim. (Cl. 281—34.)

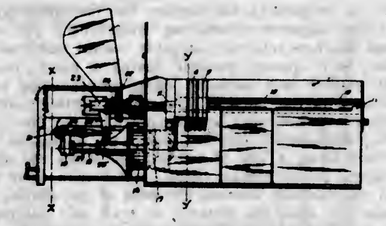
A book cover in one piece having top and bottom flaps and wings on its sides, said wings having gummed ends, the body of the cover provided with horizontal and perpendicular lines on its sides, bottom and top extending onto the flaps and wings, and a horizontal and a perpendicular line intersecting each other at the center of the cover, said lines to assist in folding the flaps to reduced size to fit a book, the lines on the gummed surface of said

wings having an oblique relationship to the horizontal and perpendicular lines for indicating a portion to be cut off from said gummed surface.



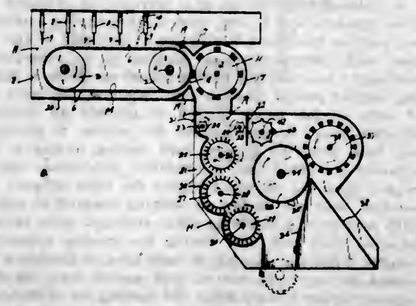
1,354,355. SIGNAL DEVICE. EDWARD E. TRYON, Hartford, Conn., assignor to The Auto Supply Manufacturing Company, Hartford, Conn., a Corporation of Connecticut. Filed Dec. 5, 1919. Serial No. 342,621. 2 Claims. (Cl. 116—34.)

1. A device of the class described comprising a hollow body provided with means for its detachable connection with the stem of a tire tube and also provided with means for the lateral connection therewith, of a tire inflating device, the body being provided interiorly with a wall having a port, a spherical valve when closed to fit against the wall and covering the port, an elongated stem having at its inner end a rectangular head spaced from the inner wall of the body and furnished with a concavity to receive said valve, a barrel surrounding the upper end of the body and having its outer end closed and also having co-axial tubes extending oppositely from the closed end thereof, a spring surrounding the stem and bearing at one end against said head, and a partition in one of the tubes against which the other end of the spring bears, the outer of the tubes having an opening, the wall of which is slotted to produce a whistle tongue.



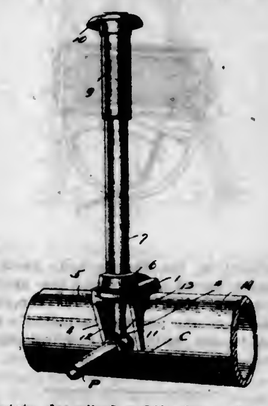
1,354,356. HEEL-FASTENING MEANS. ANTON VOMELA, St. Paul, Minn. Filed Mar. 8, 1920. Serial No. 364,127. 4 Claims. (Cl. 36—34.)

1. In heel fastening means, the combination with the heel and the body of the shoe, of a strap of metal firmly secured flatwise longitudinally on the bottom of the body of the shoe at the heel portion thereof, the rear portion of said strap being formed with a hook the jaw thereof facing forwardly the free end of said hook being bifurcated, locking means on the heel adapted to engage said hook



to be slid into said bifurcation to lock the heel to said body of the shoe, said hook being perforated to the rear of said bifurcation whereby the body of the shoe may be firmly secured thereto irrespective of the heel for the purpose set forth.

1,354,357. MECHANICAL STOKER. JUDSON E. WAGONER, Monongahela, Pa., assignor to Combustion Engineering Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 19, 1918, Serial No. 229,484. Renewed July 24, 1920. Serial No. 398,782. 5 Claims. (Cl. 110—47.)



1. The combination of a rocking-bar, grate-bars actuated thereby, a piston and a cylinder therefor each having its axis parallel to said rocking bar, connecting means between said piston and rocking-bar comprising an oscillating lever, means for varying the effective length of said lever, and means for adjusting the connecting means between said rocking-bar and piston so as to change the angular position of said rocking-bar in relation to any given position of the piston.

1,354,358. COTTON-BOLL EXTRACTOR AND COTTON-CLEANING MACHINE. HORACE E. WALKER, Norman, Okla. Filed Mar. 10, 1920. Serial No. 364,610. 6 Claims. (Cl. 13—12.)

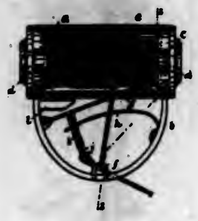
5. A machine of the class described comprising a rotary member, teeth extending outwardly from the periphery of said member, rotary beaters arranged at one side of the rotary member for forcing the material to be treated toward the rotary member, means for freeing from the teeth of the rotary member the material carried thereby, and feeding rolls positioned above the rotary beaters for forcing the material in a direction toward said beaters and the rotary member.

1,354,359. SADDLE FOR MAINS. GEORGE P. WARTCHOW, Minot, N. D. Filed Mar. 23, 1920. Serial No. 368,058. 5 Claims. (Cl. 137—73.)

1. The herein described saddle for mains comprising a casing arched on its under side to fit over the main and having a single toe at one end and spaced arms at the other end, a web connecting the upper end of said arms and with them forming a cavity, and a set screw threaded inward through said toe.

1,354,360. ROOF. CHRISTOPH KARL WEISS, Nuremberg, Germany. Filed May 28, 1919. Serial No. 300,420. 5 Claims. (Cl. 108—1.)

1. A building having a roof, sky-lights, roof-covering between said sky-lights, trusses in said sky-lights including upper and lower booms, purlins carrying said roof-covering between said sky-lights and connected to the trusses projecting above the roof-covering about at the height of the lower boom and suspension-rods whereby said purlins are suspended from said trusses substantially as shown and described.



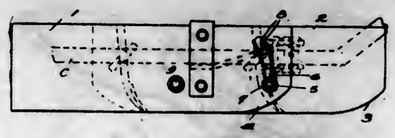
1,354,361. SPARK-PLUG. ALBERT A. WELLS, Detroit, Mich. Filed Sept. 26, 1919. Serial No. 326,495. 4 Claims. (Cl. 123—169.)

1. A spark plug, comprising an outer shell adapted to be attached to the cylinder of an internal combustion

engine, an insulator carrying the central electrode of the plug adapted to enter the outer shell with the central electrode in sparking relation with a grounded electrode, clamping means including a cam for urging the outer shell and the insulator toward one another and for maintaining said shell and insulator together, said clamping means also providing means for holding the lead wire to the plug.

1,354,362. SHUTTLE TENSION. WILLIAM S. WELLS, South Bethlehem, Pa. Filed Dec. 9, 1919. Serial No. 343,598. 8 Claims. (Cl. 139—46.)

1. In combination, the shuttle body having means to support a rotary thread package and also having a thread guide, and means, controlled by the thread, to exert braking pressure on the package including a spring member attached to the body and a spiral spring thread guiding device screwed into said member.



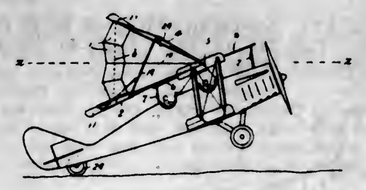
1,354,363. COMBINED RESILIENT TIRE AND MOUNTING. GILBERT N. WIDENHOFER, Butler, Pa. Filed Sept. 15, 1919. Serial No. 323,713. 5 Claims. (Cl. 152—8.)

4. In a wheel structure, a pair of bead elements, a series of wires having portions embracing each of the bead elements at spaced intervals, a set of seat-members adapted to fit on and extend across a wheel-rim, each of these seat-members having an outwardly turned end portion and an inwardly turned portion, the latter being apertured and formed with spaced shoulders, the outwardly turned end portion being formed with spaced grooves in which are seated the respective contiguous wire portions which embrace said bead elements, a second set of seat members, each having an aperture registering with that of one of the first said seat-members, and bolts extending through said apertures to secure said seat-members to one another and to a wheel-felly, each of said second seat-members being formed with grooves to receive the contiguous bead-embracing wire portions, each of said second seat-members having a portion confined between the contiguous shoulders of one of the first said seat-members.

1,354,364. CULTIVATOR ATTACHMENT. ROY W. WILLIAMS, Utica, S. D. Filed June 15, 1918. Serial No. 240,124. 1 Claim. (Cl. 97—13.)

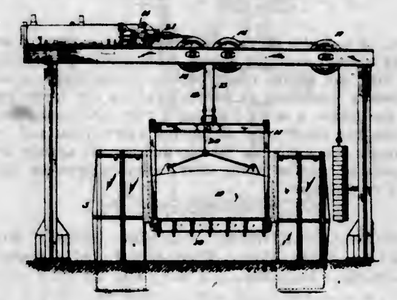
A cultivator fender comprising two longitudinally disposed plates lapping at their meeting ends, one of the meeting ends of said plates having an arcuate transversely extending slot, a bolt carried by the other plate extending through said slot to adjustably connect said plate ends, a bolt pivotally connecting said lapping ends in rear of said slot and bolt connection, the lower edges of said meeting ends being curved or rounded longitudinally, the front end of the front plate being also similarly curved, an angular bracket for connecting the meeting end of the rear plate to the cultivator frame, said bracket having a laterally extending arm spanning the upper edges of said lapped ends and spaced slightly therefrom forming a stop to limit the upward swing of the front plate.

1,354,365. WIRE-STRIPPING PLIERS. SOLOMON E. AARON, Boston, Mass. Filed Apr. 17, 1919. Serial No. 290,842. 8 Claims. (Cl. 81—9.5.)



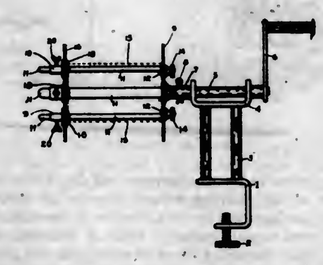
7. An instrument for slitting the insulation-covering of round insulated conductors, comprising a pair of opposed members relatively movable toward and from each other, each opposed member having a notch, provided with guiding and centering sides, corresponding to and mating with the notch of the other, a slitting tooth projecting from the apex of each notch in the direction of a line substantially bisecting them, the dimension of the notches along a line bisecting them when the opposed members are in contact being greater than their width, and the distance between the ends of the slitting teeth being less than the distance between said guiding and centering sides when said members are in contact.

1,354,366. RAILROAD-TIE CONSTRUCTION. FLORYAN ADAMCZYK, Coupon, Pa. Filed May 11, 1920. Serial No. 380,631. 1 Claim. (Cl. 238—31.)



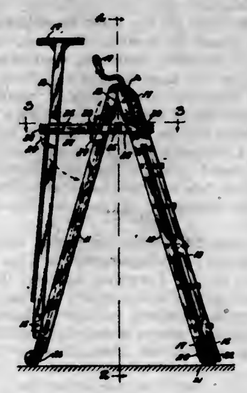
A railroad tie made up of a plurality of identical sections arranged end to end, each section having a reduced end portion forming a continuity at one side of the section, said reduced portions adapted to be arranged in overlapped relation and having alined openings, a fastening element passed through said openings, the outer end of each section being formed to provide an inwardly directed flange arranged above the section to provide a rail base receiving groove, said section having a bore adjacent its outer end, a combined reinforcing bar arranged upon the tie and bridging the joint between said sections, said bar having an opening adapted to register with said bore, a retaining plate arranged upon said bar adjacent each end, and having an opening adapted to register with the opening of said bore, a fastening bolt passed through said bore of said section into the openings of the bar in said plate and holding all of said parts fixed relatively, and said bar having its ends reduced and overlying the adjacent face of the rail as described.

1,354,367. SAFETY DEVICE FOR AIRCRAFT. GAETAN AJELLO, New York, N. Y. Filed Feb. 1, 1919, Serial No. 274,444. Renewed Mar. 17, 1920. Serial No. 366,675. 22 Claims. (Cl. 244—21.)



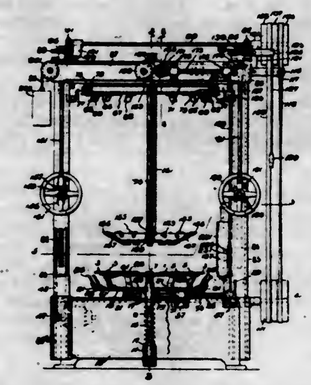
1. In an aircraft, an air resistance member, a universal joint connection between the resistance member and the aircraft, a track fixed to the aircraft concentric with said joint, and supports between the resistance member and said track including a spring roller movable along the track.

1,354,368. PIPE-BALL-ANNEALING FURNACE. EDWARD E. ALEXANDER and JOHN T. PIGGOTT, High Bridge, N. J., assignors to Taylor-Wharton Iron and Steel Company, High Bridge, N. J., a Corporation of New Jersey. Filed Jan. 28, 1919. Serial No. 273,555. 3 Claims. (Cl. 266—4.)



1. In an apparatus of the type recited, the combination with a heating furnace, of a dipping tank in proximity therewith, the bottom of the furnace being mounted for swinging movement to afford a direct conveyer from the furnace to the dipping tank.

1,354,369. MACHINE FOR WINDING RIBBON. LUTHER H. ANDERSON, Seattle, Wash. Filed Feb. 14, 1920. Serial No. 358,576. 5 Claims. (Cl. 242—61.)



1. A machine for winding ribbon, comprising a rotatable guide plate, a plurality of winding bars connected with said plate and radially adjusted relatively thereto, an adjustable guide plate and means for securing said winding bars to the adjustable guide plate.

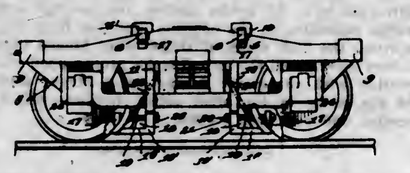
1,354,370. STEPLADDER. LUIGI ANECHIARICO, Asbury Park, N. J. Filed Apr. 14, 1919. Serial No. 289,979. 4 Claims. (Cl. 228—17.)

1. In a ladder the combination with a ladder section and a prop section hinged thereto, of a foldable ledge mounted on the ladder section and prop section, said ledge consisting of a series of strips extending in one direction from the ladder section and another series of strips extending in the opposite direction from the prop section, the first series of strips being hinged upon the ladder section and the second series hinged upon the prop section with the strips in one series hinged relatively to the strips in the other series, between said ladder section and said prop section.

1,354,371. METHOD OF WRAPPING TIRES AND THE LIKE AND MACHINE FOR PRACTISING THE SAME. EDWARD H. ANGIER, Framingham, Mass. Filed Nov. 25, 1916. Serial No. 133,467. 34 Claims. (Cl. 93—2.)

1. In a machine of the class described a pair of relatively movable concaved members adapted to fit over the ends of an article and hold wrapping material thereabout, a strip supply and means for effecting relative movement of revolution between said member about an axis connecting the ends of said article and said supply whereby a connecting strip may be drawn around the article between the ends to secure such wrapping material.

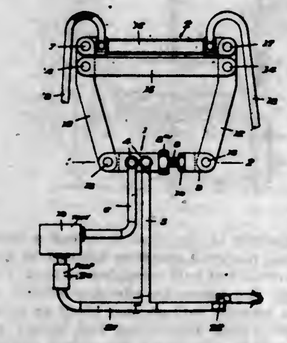
2. In a machine of the class described a pair of relatively movable concaved members adapted to fit over the ends of an article and hold wrapping material thereabout, a strip supply and means providing for bodily rotation of



said members about an axis extending in the direction of compression whereby a connecting strip may be drawn around the article between the ends to secure such wrapping material.

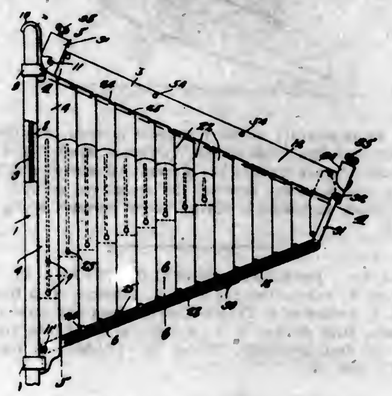
3. In a machine of the class described an article support having means for rotating the same, an opposed plunger having a rotatably-mounted, work-engaging face and means to move the same toward and from the support in the general direction of the axis of rotation.

4. In a machine of the class described a cup-like article receiver having means for rotating the same, a displaceable support normally positioned adjacent the top of the cup, an opposed plunger having a rotatably-mounted, work-engaging face and means to move the same toward and from the support in the general direction of the axis of rotation.



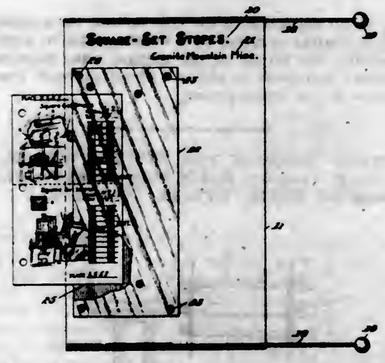
5. In a wrapping machine an article support having upturned marginal portions adapted to wipe along the sides of an article to fold wrapping material thereover, an opposed presser acting substantially in line with the bases of said portions whereby to effect smooth folding, and pressure-retaining means acting on the article inwardly of the margins to permit withdrawal of the presser.

1,354,372. BRAKE-BEAM GUARD. MARSHALL ARMSTRONG, Hagersville, Ontario, Canada. Filed June 2, 1917. Serial No. 172,456. 3 Claims. (Cl. 188—210.)



1. A brake beam guard comprising a plurality of drop cross frames, spaced perpendicular supporting-bars secured to each of the frames and provided with integral offset lower ends, a brake beam slidably supported in the lower offset end of each of the supporting bars and brake shoes associated with the opposite end of said brake beam.

1,354,373. AUTOMATIC FLUID-CONTROLLER. HARTLEY O. BAKER, Pueblo, Colo., assignor to The Baker Steam Motor Car and Manufacturing Co., Inc., Pueblo, Colo. Filed Jan. 3, 1919. Serial No. 269,433. 4 Claims. (Cl. 236—33.)

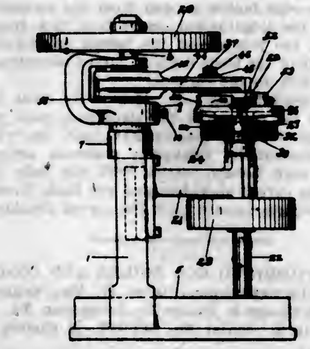


2. An automatic controller comprising a thermostat, a stay, a pair of levers pivotally connected with opposite ends of the thermostat and with said stay to be swung toward and away from one another by the change in length of the thermostat with respect to the stay, and a controlling valve having a casing and valve member, the casing being connected to one lever to move therewith and the valve being connected to the other lever to move therewith.

1,354,374. STORM-SHIELD. JOHN BAUER, Detroit, Mich. Filed Jan. 16, 1920. Serial No. 351,764. 7 Claims. (Cl. 20—40.5.)

1. In a device of the class described, a frame provided with support-engaging means, a top pivotally supported at its rear end on the upper portion of the frame, a bottom pivotally supported at its rear end on the lower portion of the frame, a latch forming a releasable connection between the outer ends of the top and bottom and constituting a brace holding the top and bottom against pivotal movement and movable sides extended between the top and the bottom.

1,354,375. FACTORING DEVICE. NORMAN BLYTHE BRALY, Butte, Mont. Filed July 7, 1919. Serial No. 308,969. 3 Claims. (Cl. 235—89.)

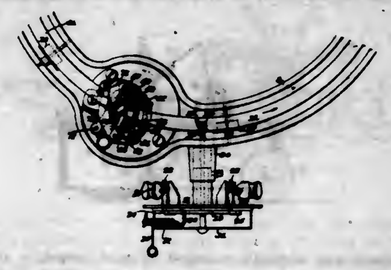


1. In apparatus for the purpose set forth the combination with a card having defined spaces for respectively receiving the records of predetermined operations, of a factoring device comprising a body, a transparent sheet over the body having factors thereon for the respective records to be entered on the card, and means interposed between the body and transparent sheet for spacing the two, said spacing means constituting a stop for positioning a card placed beneath the transparent sheet with the different spaces of such card associated with the proper factors therefor on the transparent sheet.

1,354,376. METHOD AND PROCESS OF MAKING LANOLIN. WILLIAM C. BROADGATE, New Haven, Conn., assignor to Frank W. Harmon, New Haven, Conn. Filed Mar. 26, 1919. Serial No. 285,301. 3 Claims. (Cl. 87—26.)

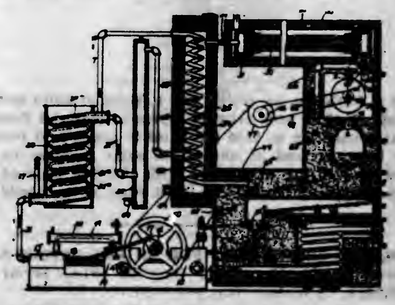
1. A method or process of making lanolin from wool grease, wherein the wool grease is heated to a point that will produce a thin even mixture and adding thereto a quantity of alkali metal peroxid, as a bleaching agent, after which the whole mass is agitated to permit the bleaching agent to mix evenly throughout, allowing the mass to stand until said bleaching agent has entirely bleached the same and then by centrifugal means separating the lanolin from the remainder of the mass.

1,354,377. STAMPING-PRESS. ZENAS P. CANDEE, Waterbury, Conn., assignor to The Waterbury-Farrel Foundry and Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed May 1, 1919. Serial No. 294,124. 28 Claims. (Cl. 74—14.)



2. In mechanism of the character described, the combination with the screw; of a continuously rotating element; a make and break device interposed between said screw and rotating element; and a connection between said screw and make and break device, said connection in part actuating said make and break device according to the direction of rotation and relative speed of said screw.

1,354,378. ADJUSTABLE CLAMP. ROBERT H. CARPENTER, Chicago, Ill. Filed Nov. 24, 1919. Serial No. 340,310. 1 Claim. (Cl. 144—209.)

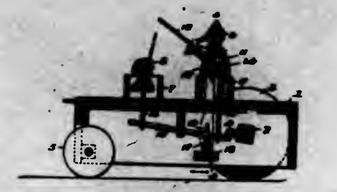


A clamp of the character described comprising a plurality of beams arranged end to end, each beam having notches in its opposed longitudinal edges, with the notches in one edge being staggered with relation to the notches in the other edge, a substantially U-shaped member forming a connector for the adjacent ends of said beams, spaced pairs of pins carried by said member, one pair of said pins being provided for each beam and diagonally disposed to be received within the adjacent notches in the opposed edges of said beam, said beams being reversible, opposed jaws mounted upon said beams for movement toward and away from each other, and an adjusting screw carried by one of said jaws.

1,354,379. STOP-MOTION. FRANK CRAWFORD, Sr., New Brunswick, N. J., assignor to The Crawford Manufacturing Company, New Brunswick, N. J., a Corporation of New Jersey. Filed Jan. 22, 1919. Serial No. 272,536. 12 Claims. (Cl. 66—7.)

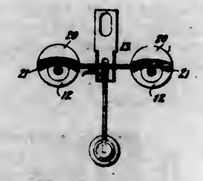
1. The combination in stop motions for knitting machines, of a casing; a ring mounted in the casing; means for supporting the ring; trip mechanism connected to the mechanism for stopping the machine; a series of spindles, each spindle engaging the ring; and means supported by a thread so arranged that when a thread breaks the thread-supporting means will actuate the ring and the trip mechanism through a spindle.

1,354,380. APPARATUS FOR PRODUCING LIQUID OXYGEN. CHARLES F. CROMMETT and ORRIN J. CROMMETT, Chelsea, Mass., assignors, by mesne assignments, to Godfrey L. Cabot, Cambridge, Mass. Filed Jan. 7, 1914, Serial No. 810,795. Renewed July 1, 1916. Serial No. 107,102. 7 Claims. (Cl. 62—123.)



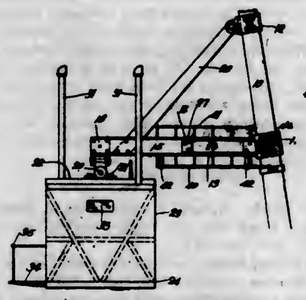
1. An apparatus of the character stated comprising an air conduit inclosing a separator casing, a cooling conduit having a portion extending through the separator casing and a portion inclosing the air conduit outside said casing, means for forcing air at high pressure through the air conduit, and means for delivering nitrogenous gas at a temperature below freezing to the cooling conduit, whereby the temperature of the high pressure air is preliminarily reduced, and moisture is frozen out of it in the separator casing.

1,354,381. TOY. ALBERT DAYON, Dollard, Saskatchewan, Canada. Filed Dec. 19, 1919. Serial No. 345,965. 2 Claims. (Cl. 46—45.)



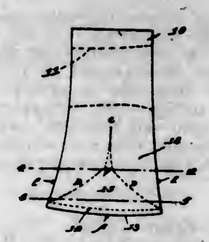
1. A toy comprising a casing-like body open at its under side, a transverse shaft or axle journaled in the side walls of the body and provided with ground wheels and a tappet, hollow projections on the upper side of the body, a fixed figure in one of said projections, a vertically movable figure in the other projection, a rock-shaft journaled in the fixed figure and having a forwardly extending rod and also having a rearwardly extending crank, a rod connected to the vertically movable figure and extending downwardly through the top wall of the body into the interior thereof, a rod connected to the crank of the rock-

shaft and extending downwardly through the top wall of the body and into the interior thereof, a vertically swinging lever fulcrumed at an intermediate point of its length in the body and having its arms connected to said rods and also having one of its arms arranged to be engaged and



depressed and suddenly released by said tappet, a cross-bar in the body below said arm, a pin carried by said cross-bar and extending upwardly and loosely through said arm, and a spring surrounding the pin and interposed between said cross-bar and the under side of said arm.

1,354,382. DOLL'S EYE. OTTO E. DENIVELLE, Mount Vernon, N. Y. Filed Feb. 11, 1919. Serial No. 276,250. 1 Claim. (Cl. 46—40.)



In a doll's eye, an eyelid, and a fringe of hairs secured at one of their ends between layers of material forming a flat foundation to hold the hairs in place, said foundation being secured at one of its outer surfaces to the inner face of the said eyelid with the free ends of the hairs projecting beyond the lower edge of the eyelid.

1,354,383. CROW'S-NEST FOR SHIPS. ARTHUR E. DE SAVE, Mobile, Ala. Filed Mar. 22, 1918. Serial No. 223,961. 1 Claim. (Cl. 114—191.)

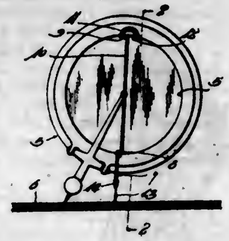
In combination with a ship having a mast, a universal joint having two members, a block secured to the mast, two beams having one set of ends disposed at the sides of and secured to the block and their other set of ends disposed at the sides of a member of the universal joint and secured thereto, and a crow's-nest secured to the other member of the universal joint.

1,354,384. AX. CHESTER M. DOOLITTLE, Kingston, N. Y. Filed Dec. 15, 1919. Serial No. 344,846. 2 Claims. (Cl. 145—2.)

1. An ax head having its blade tapered at one edge whereby to define a cutting edge and having its faces adjacent the edge hollow ground from the corners to a point along the longitudinal center line back from the cutting edge, the juncture of the hollow ground portion with the body of the blade defining curved shoulders leading substantially to the corners.

2. An ax head having both sides of its blade hollow ground from the corners of the blade to a point spaced from the edge along the longitudinal center line whereby to define substantially triangular concaved areas, the juncture of each hollow portion with the body of the blade defining curved shoulders and the blade having its opposite side edges tapered from the curved shoulders.

1,354,385. COMBINED EGG BOILER AND POACHER. WILLIAM EICHELBERGER, Pierce, W. Va., assignor of one-half to George B. Somerville, Johnstown, Pa. Filed July 21, 1919. Serial No. 312,347. 2 Claims. (Cl. 53—1.)

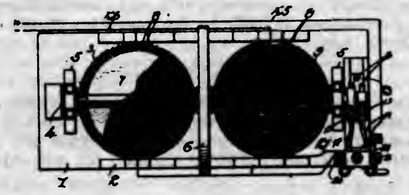


1. A device of the character described including in combination with a support having openings therethrough, of a plurality of egg holders for removable disposition through the openings, each of the holders including a cylindrical body having a tapered and closed bottom and having the upper portion enlarged to form a supporting shoulder and a neck, a closure cap on the neck, and a cutter carried by and depending from the cap.

1,354,386. RECORD-CLEANER FOR SOUND-REPRODUCING MACHINES. GUSTAV AUGUST FANDREY, Cedar Rapids, Iowa. Filed Oct. 20, 1919. Serial No. 331,805. 3 Claims. (Cl. 274—1.)

1. In a record cleaner attachable to a reproducer of a sound reproducing machine, a brush carrying attachment, a pair of reproducer-engaging elements, and a spring connecting said reproducer-engaging elements and adapted

to press them away from one another to a distance slightly greater than the internal diameter of the diaphragm-



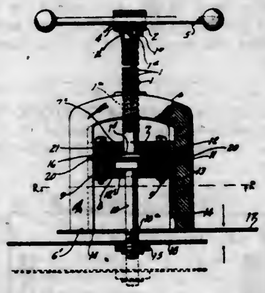
holding flange of the reproducer, whereby the said reproducer-engaging elements may have spring-pressed engagement with the internal surface of said flange.

1,354,387. FASTENER FOR TIPS OF BILLIARD-CUES. WILLIAM FEHLHABER and CHARLES L. SMITH, Highlands, N. J. Filed Nov. 3, 1919. Serial No. 335,561. 8 Claims. (Cl. 46—9.)

1. In a billiard cue tip fastener, the combination of a ferrule projecting from the cue, a tip having a bearing against said ferrule and provided with a lug, a block adapted to enter said ferrule and having formed therein a groove for the reception of said lug, said ferrule surrounding said block and lug whereby lateral movement of the tip is prevented.

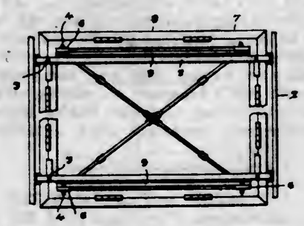
1,354,388. ELECTRIC MOTOR. FRANCIS C. C. FOX, Sawtelle, Calif. Filed June 16, 1917. Serial No. 175,178. 1 Claim. (Cl. 172—36.)

An electric motor comprising a plurality of alined spherical field windings the convolutions of which are coaxial, a shaft extending through all of the windings parallel to the convolutions thereof, armatures mounted upon the shaft each within a winding at angles to each other, and means for energizing the windings alternately.



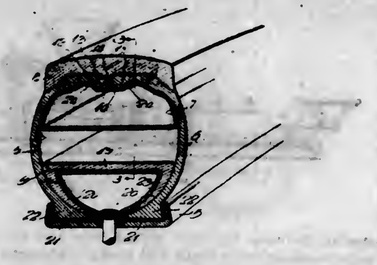
1,354,389. ELECTROMAGNETIC SOUNDING DEVICE. HUGO GERNSBACK, New York, N. Y. Filed Dec. 11, 1917. Serial No. 206,636. 1 Claim. (Cl. 178—115.)

A device for producing sounds in imitation of wireless telegraphic signals, comprising an electro-magnet, a paramagnetic member in the field force between the poles of the electro-magnet and capable of absorbing a portion only of the magnetic lines of force of the field of the magnet and spaced at one end from a pole of the magnet, a diaphragm in the field of the electro-magnet across the



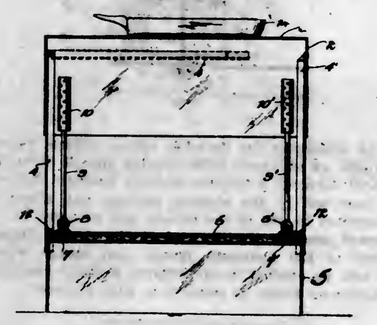
spacing between the last named pole and the paramagnetic member and a make and break mechanism in circuit with the electro-magnet and subject to lines of force exterior to the paramagnetic member.

1,354,390. APPARATUS FOR DRAWING TOGETHER SHIP-PLATES. SAMUEL R. GILMORE, Seattle, Wash. Filed Jan. 17, 1919. Serial No. 271,731. 5 Claims. (Cl. 20—84.)



4. An apparatus for drawing spaced objects together, comprising an abutment frame having spaced clamping or abutment surfaces, a member slidably mounted thereon, a bolt connected to the slidable member and adapted to be connected to one of the objects and actuated to draw it toward another resting against the spaced clamping surfaces of the abutment frame, and means whereby force may be applied to the member slidably mounted in said abutment frame to cause it to slide thereon.

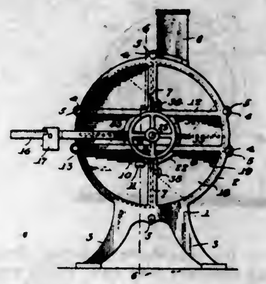
1,354,391. GLASS-DRAWING MACHINE. FELIX L. GOFFAUX, Arnold, Pa. Filed Apr. 12, 1919. Serial No. 289,634. 3 Claims. (Cl. 49—17.1.)



1. A device of the class described comprising an elevator, a bait of rectangular form carried by said elevator, a vertically movable supporting member and rollers carried by said member for engaging the glass tube being formed.

1,354,392. RESILIENT TIRE. MORGAN A. GREENE, Rupert, Idaho. Filed July 14, 1919. Serial No. 310,577. 4 Claims. (Cl. 152—8.)

2. In a tire, a casing comprising two primarily separate annular sections each formed with a rim-engaging portion and a tread portion, each tread portion having an annulus extending radially inward therefrom, each annulus having inwardly projecting laterally extending ridges, a filler member formed with an annular groove and with laterally extending grooves, the annulus of each of said sections being fitted in the annular groove of said filler member while said ridges are seated in said lateral grooves, and a tread band co-acting with said filler member to prevent displacement of said sections relative to one another.



1,354,393. FOLDING GASOLENE-STOVE WITH UTENSILS. CHARLES W. GROOT, Rochester, N. Y. Filed Nov. 19, 1919. Serial No. 339,224. 1 Claim. (Cl. 126—38.)

A cooking kit comprising in combination a case, a collapsible stove adapted to be inclosed in said case, comprising two telescoping parts having tops and sides, the larger of said parts having a foraminous top and provided with legs pivoted within and near the top, the smaller of said parts having a fuel container formed with its top and a plurality of burners pivotally connected to said fuel container on its top, said part being adapted to form with said case a container for cooking utensils and dishes and said folding legs and folding burners contained between said telescoped parts, substantially as specified.

1,354,394. AUTOMATIC ROTARY WEIGHING-SCALE. ROBERT L. HENDERSON, West, Tex. Filed Feb. 10, 1919. Serial No. 276,073. 3 Claims. (Cl. 249—19.)

1. In a revoluble automatic scale, a support, a balancing frame provided with weighing means, a revoluble element mounted on the balancing frame and having material receiving compartments, radially arranged stops movable revolubly and vertically with the revoluble member and fixed stops arranged one in the path of the revoluble stops when the revoluble member is raised by the balancing

frame and the other in the path of the revoluble stops when the revoluble member is lowered by the weight of its contents.

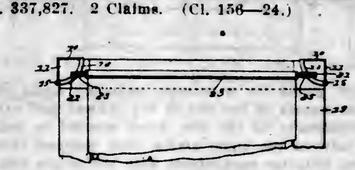
1,354,395. COOK-BOOK AND THE LIKE. DORA L. HERRMANN and ARTHUR A. JOHNSON, Washington, D. C. Filed June 19, 1920. Serial No. 390,233. 11 Claims. (Cl. 283—1.)

1. A recipe sheet for cook-books and the like having thereon means comprising pictorial illustrations to indicate the ingredients entering into the product covered by the recipe and also having thereon means comprising pictorial illustrations, associated with said pictorial ingredient illustrations, to indicate the quantities of the ingredients to be used.

1,354,396. FASTENING DEVICE. HARRY EDUARD HOENIG, East Liverpool, Ohio, assignor of one-half to Josiat T. Smith, East Liverpool, Ohio. Filed Oct. 20, 1915. Serial No. 56,984. 8 Claims. (Cl. 173—314.)

1. A device of the character described comprising a member with a passage; a member for attachment to a support and having a fixed head, the body of said attachment member extending through said passage, said fixed head positively preventing accidental withdrawal of the first-mentioned member from one end of said attachment

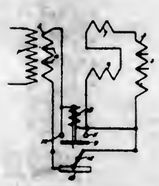
member; and means to positively limit, at a predetermined point, movement of the first-mentioned member toward the tip of said attachment member.



2. In combination in an insulator, base and cap portions having perforations extending therethrough, and a metal fastening member comprising a shank extending through the perforations and provided at the end carrying the cap with an integral head which will not pass through the perforations in the cap provided at the other end with a point, the said shank being provided with a struck-up portion positioned so as to engage the base and prevent the withdrawal of the fastening member therefrom.

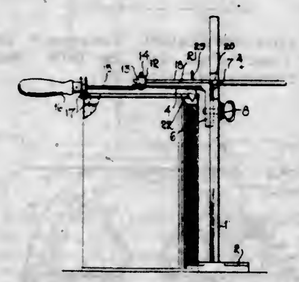
3. An insulator comprising cap and base portions formed with perforations, and a nail extending through said perforations, and having a head at one extremity and means adjacent the other extremity to positively retain the cap and base on the nail and permit a substantial movement of the two along the nail.

4. An insulator comprising cap and base portions formed with perforations, and a nail extending through said perforations and having a head at one extremity and means adjacent the other extremity to positively retain the cap and base on the nail and permit a substantial movement of the two along the nail, the said means offering practically no resistance to the entrance of the nail into a support.



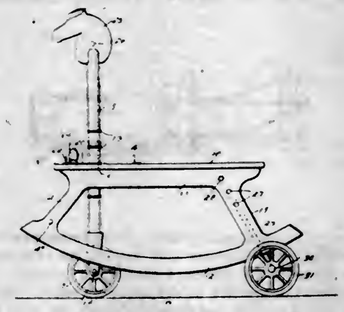
5. The combination with a holding element, of a fastener passing loosely through the same and formed with a terminal point penetrable into a support, the fastener having spaced positive stops permanently assembling it and the holding element and at the same time permitting a substantial movement of the holding element longitudinally of the fastener.

1,354,397. WINDOW-SHADE BRACKET. FRANK G. HOGUE, Birmingham, Ala. Filed Nov. 13, 1919. Serial No. 337,827. 2 Claims. (Cl. 156—24.)



2. A window shade bracket having angularly disposed arms or members for contact respectively with the top and side edges of a window casing and a connecting arcuate or segmental member extending between the extremities of said angularly disposed arms or members, a bolt carried by said arcuate or segmental member at an intermediate point thereof, a roller bearing member having a longitudinal slot engaged with said bolt, and a thumb nut engaged with the bolt for securing said bearing member in adjusted position with relation to the arcuate or segmental member.

1,354,398. WELDING SYSTEM. CLAUDE J. HOLSLAG, South Orange, N. J. Filed Dec. 13, 1919. Serial No. 344,647. 18 Claims. (Cl. 219—15.)

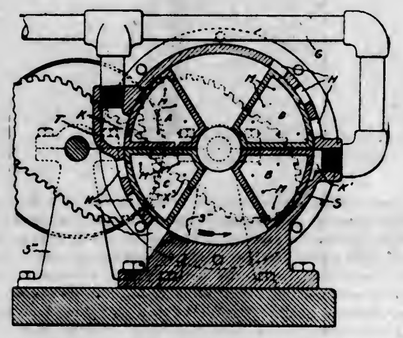


1. In an arc welding system including a movable electrode and utilizing a source of current having a relatively high open circuit voltage, means for reducing the open circuit voltage normally applied to the movable electrode, consisting of a switch having an electromagnetic winding and having contacts disposed in the welding circuit but normally holding the said circuit open at a point such that only a portion in value of the open circuit voltage is on the movable electrode and means for energizing said winding to operate said switch whereby the arc may be established at the electrodes.

1,354,399. CAN-OPENER. JOHN D. HOUCK, Chicago, Ill. Filed Oct. 15, 1919. Serial No. 330,746. 1 Claim. (Cl. 30—3.)

A can opener comprising the combination of a longitudinally slotted and longitudinally grooved standard, a bracket having an angled extension provided with a longitudinally extending rib, slidably engaging said groove in the standard, means for holding said bracket at any point in adjustment, longitudinally of said standard, the upper surface of the bracket having marginal longitudinally extending ribs, a lever positioned between said ribs, and having a longitudinally extending slot, registering with the slot of said bracket, a spur carrying member, means for moving the spur carrying member longitudinally of said bracket, comprising a screw carried by said spur member, and passing through said registering slots and carrying an integral thumb piece, and cutter carrying means pivotally secured to the end of said bracket.

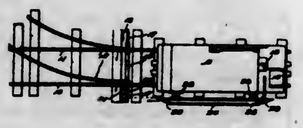
1,354,400. TOY ROCKER-CARRIAGE. FRANK HUMPHREVILLE, Atlantic City, N. J. Filed Nov. 12, 1919. Serial No. 337,432. 4 Claims. (Cl. 208—165.)



1. A toy rocker-carriage comprising a seat, means associated with said seat adapted to permit said seat to be rocked, means associated with said seat adapted to permit said carriage to be propelled along the ground, and a steering post journaled in said carriage for steering said

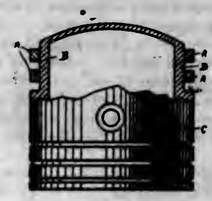
carriage as it is propelled along the ground, said steering post being provided with means for adjusting said post in a plurality of vertical positions relative to said seat.

1,354,401. NITRO-CELLULOSE FILM OF LOW INFLAMMABILITY. JOHN G. JARVIS, Stamford, N. Y. Filed Mar. 13, 1919. Serial No. 282,490. 1 Claim. (Cl. 106—37.)



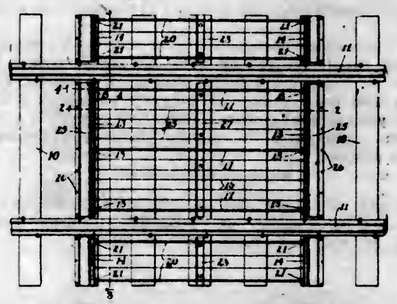
A composition for making pyroxylin sheets having the characteristic of low inflammability, consisting of nitro-cellulose and acetyl-cellulose, to which solution is added an acetone collodion and chloral hydrate with cinchonin.

1,354,402. AIR-COMPRESSOR. CHARLES F. JOHNSON, Hartford, Conn. Filed July 29, 1919. Serial No. 313,964. 2 Claims. (Cl. 230—30.)



1. A device of the class described comprising a cylinder with closed ends having two sets of ingress and exhaust ports 180 degrees apart, rotary pistons within the cylinder, fitting into each other and having a common axis of rotation, and means for causing the pistons to move with variable velocities and to approach and recede from each other twice in each rotation.

1,354,403. AUTOMATIC FLYING-SWITCH MECHANISM. THOMAS J. JONES, Herrin, Ill. Filed Dec. 15, 1919. Serial No. 345,079. 1 Claim. (Cl. 246—341.)

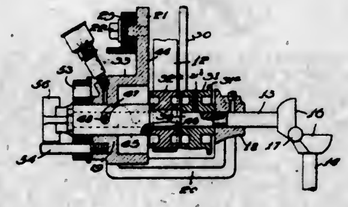


A switch including pivoted track members, a bridle connecting said members and having its extremities offset in opposite directions, a stationary bracket, a spring connecting the bracket to the adjacent offset extremity of the bridle, a switch operating member, an arm pivotally connected with the track member and slidable through an opening in the adjacent offset extremity of the bridle, said arm having an enlarged end portion, a spring encircling said arm and arranged between the enlarged end portion and the adjacent extremity of the bridle, in combination with car carrying means adapted to engage the switch operating member as and for the purpose specified.

1,354,404. CONSTRUCTION OF PACKING FOR PISTON-RINGS. THOMAS DANIEL KELLY, Hove, England. Filed Oct. 4, 1918. Serial No. 256,833. 1 Claim. (Cl. 286—12.)

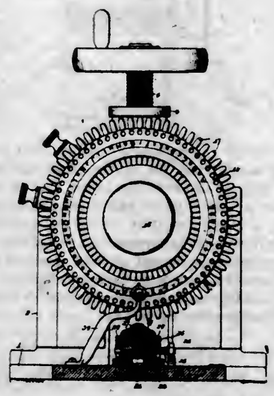
A metallic packing ring for relatively movable members, comprising a split ring screw-threaded to one of said members and having a bearing surface with the other of said members.

1,354,405. CATTLE-GUARD. CHARLES KING, Mount Sterling, Ohio. Filed Dec. 28, 1918. Serial No. 268,634. 1 Claim. (Cl. 256—14.)



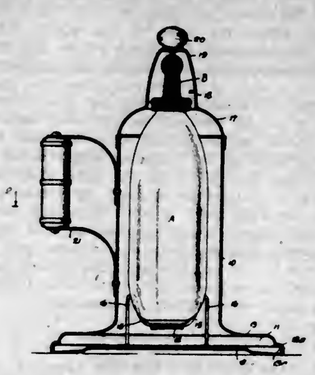
A cattle guard for a railway including angle plates secured to certain of the ties of the railway and extending longitudinally of the ties, wires secured to and extending between the angle plates, rods disposed through the plates, nuts for engagement with the plates and disposed on the ends of the rods to regulate the tension of the wires, and inclined protecting plates secured to the angle members and to the said certain ties.

1,354,406. BELT-SHIFTER. FRANK G. KLECKLER, Bath, N. Y. Filed Nov. 14, 1919. Serial No. 337,964. 3 Claims. (Cl. 64—4.)



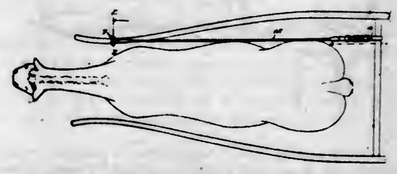
1. The combination with a pair of cone-pulleys, of a belt connecting said pulleys, a belt-shifting lever for each of said pulleys, a manually-operated lever for actuating said belt-shifting levers, a supplementary belt-shifting member pivoted on each of said main shifting levers and having gear-teeth near its pivot, and a weighted arm pivoted on each main shifting lever and having gear-teeth adapted to mesh with the teeth of said supplementary member to actuate said member and shift the belt to a higher step after the actuating lever has shifted the belt to a lower step on the other pulley.

1,354,407. BELT TRANSMISSION. HENRY KOCOUREK, Chicago, Ill., assignor to Chicago Flexible Shaft Company, Chicago, Ill., a Corporation of Illinois. Filed May 5, 1919. Serial No. 294,828. 10 Claims. (Cl. 64—4.)



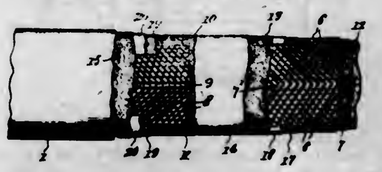
1. The combination of a driven shaft with a tight pulley and a loose pulley thereon, supports in which the shaft is mounted spaced apart by the combined width of said pulleys plus the width of one of them, a belt and guiding means arranged to confine the travel of said belt to the middle portion of the space between said supports, and means for axially shifting the pulleys to bring one or the other of them into said middle portions for engaging the belt.

1,354,408. STAMPING-MACHINE. HENRY LASKO, New York, N. Y. Filed Aug. 8, 1919. Serial No. 316,167. 7 Claims. (Cl. 101—21.)



1. A stamping machine, including a base, a pair of standards upon such base, dies associated with such standards and movable with respect thereto, means for heating such dies, a carriage adapted to receive the device upon which the imprint is to be made, such carriage comprising side walls, a base between such side walls, and means associated with such carriage for retaining the device upon which an imprint is to be made upon such base.

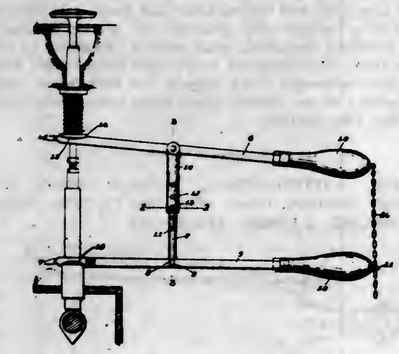
1,354,409. BOTTLE WARMER AND STERILIZER. WILLIAM EARL LAWSON, Rahway, and WALTER RULON SMITH, Westfield, N. J. Filed Sept. 5, 1919. Serial No. 321,988. 6 Claims. (Cl. 126—261.)



1. A bottle warmer including a tubular body and a broadened water holding bottom portion, said bottom portion consisting of a separate bottom plate and an integral outwardly directed annular flange on the lower end of said body and spaced from said plate, said bottom plate having an upwardly directed edge portion and said flange having a depending edge portion extending to the bottom plate for sustaining said flange spaced from said plate while affording rigid support for said flange, said edge portion of the bottom plate being turned over said depending edge portion.

1,354,410. GAITING-STRAP. MAURICE PATRICK MCCARTHY, Hartford, Conn. Filed Dec. 11, 1919. Serial No. 344,212. 2 Claims. (Cl. 54—2.)

1. A gaiting strap to restrain a horse undergoing training from side swinging in the shafts of a training sulky, said gaiting strap comprising a flexible member, a clamp fixed to one end of the flexible member, a loop made on the other end of the flexible member, a roller yoke confined in the loop, and an attachment loop fastened to the roller yoke.



1,354,411. AUTOMOBILE-TIRE. EUGENE Y. MALONE, Mobile, Ala. Filed Jan. 5, 1920. Serial No. 349,417. 1 Claim. (Cl. 152—18.)

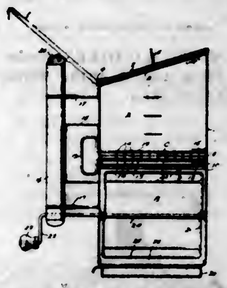
A tire of the character described including an inner portion having beads, a backing secured over the inner portion, an armor sheet on said backing including nu-

merous small metal plates of substantially rectangular form having rounded edges, secured to the backing in overlapped relation, the plates being smaller at the circumferential edges of the sheet and increasing in size toward the center, the enlarged center plates being made to overlap the plates of adjacent rows on both sides thereof, the transverse rows of the plates being arranged in two diagonal directions across the tire and meeting at substantially right angles at the central enlarged plates, a layer of canvas vulcanized over the inner sheet, a layer of vulcanized rubber placed over said canvas layer, a second backing secured over said rubber layer, an outer metal armor sheet secured to said backing and made up of numerous small metal plates, said sheet being narrower than the inner sheet and the plates being overlapped in opposite directions as compared with the first sheet, a layer of canvas vulcanized over the outer sheet, a rubber tread secured over said last mentioned canvas layer, and canvas and rubber strips secured to the backings and overlapping the edges of the sheets, the edges of the sheets being trimmed off in straight lines, substantially as described.

1,354,412. VALVE-SPRING LIFTER. JOHN B. MEILER, New York, N. Y., assignor to Richard A. Percival, New York, N. Y. Filed June 14, 1919. Serial No. 304,227. 3 Claims. (Cl. 29—87.1.)

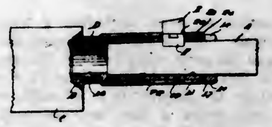
1. A valve spring lifter comprising a pair of levers, a post rotatably supported from one of said levers, a socket member slidable over said post and supporting the other lever for rocking movement, the said post serving to permit said other lever to be rotated in a horizontal direction, and means for holding the socket member fixed to the post.

1,354,413. FOLDED PAPER-BOARD FILLER FOR BOXES. SEYMOUR MORRISON, Indianapolis, Ind. Filed Dec. 1, 1919. Serial No. 341,804. 6 Claims. (Cl. 229—42.)



1. The combination, with an instrument case, of a filler formed out of paper board scored and bent at the scores to form a plurality of tables laterally of each other and table supports, and integral reinforcing tongues folded against one or more of said table supports to increase the thickness and strength of the latter.

1,354,414. HAIR-WAVING. MAX MULLER, New York, N. Y. Filed Jan. 14, 1919. Serial No. 271,094. 1 Claim. (Cl. 132—10.)



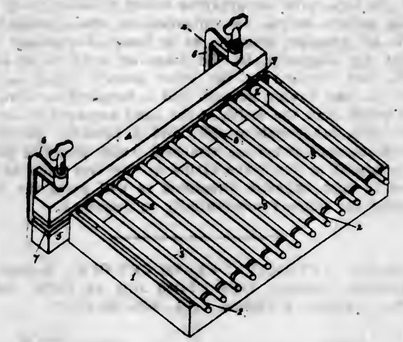
In an apparatus for waving natural hair on the head, a waving tool of an approximately U-shape and upon the side members of which a strand of hair of the head is adapted to be wound by passing the hair repeatedly around one side member, then between the members and around the other member to arrange the hair in a sidewise extending serpentine line, and a tubular covering of a heat insulating material covering the bend of the said waving tool and terminating at its ends at the side member of the tool to hold the hair against sliding off this end of the waving tool, the said covering being adapted to abut against the side of the head of the user to protect the head against being burned by the heated tool.

1,354,415. FLOUR-SIFTER. CARL OSCAR NEPSTAD, Watford, N. D. Filed Dec. 24, 1919. Serial No. 347,129. 5 Claims. (Cl. 83—60.)

3. A flour sifter, comprising a casing, feet at one end of the casing supporting the latter, said casing open at both ends, a sliding cover at the lower end of the casing, a hinged cover at the oupper end of the casing, a screen in the casing, a sliding shutter below the screen dividing the casing into two compartments, reciprocating agitators in the upper compartment at both sides of the screen, a rotary agitator in the lower compartment, a handle secured to the casing, and means adjacent the handle for operating the respective agitators.

1,354,416. SILENCER-COUPLING. STACY OLIVER, Avalon, Pa. Filed Oct. 21, 1919. Serial No. 332,256. 7 Claims. (Cl. 89—31.)

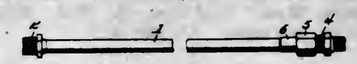
1. In a silencer coupling, the combination, of an inner sleeve bored for a part of its length to fit the muzzle end



of a gun barrel, an annular shoulder formed at the outer terminal of the gun barrel fitting bore, an outer sleeve rotatably mounted upon the inner sleeve, having a beveled edge adapted to engage the fore sight of a gun to force the muzzle end thereof into engagement with said annular shoulder.

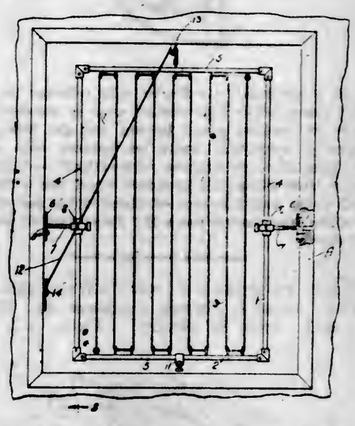
1,354,417. AUTOMATIC STEERING ATTACHMENT FOR MOTOR-VEHICLES. BENJAMIN H. PEGRAM, Lincoln, Ill. Filed Sept. 18, 1919. Serial No. 324,381. 2 Claims. (Cl. 280—87.)

1. An attachment for tractors for exerting a yielding pull on the steering mechanism to turn the guiding wheels in one direction comprising a clamp having jaws to engage a stationary part of the tractor, a clamping bolt extending through the jaws near the inner ends thereof, and an apertured lug projecting from the body portion of the clamp; together with a spiral spring attached at one end to the apertured lug on the clamp and formed into a hook at its other end, and a detachable fixture for attachment to a part of the steering mechanism consisting of a plate with an eye to receive the aforesaid hook on the spring, and means on the plate for securing the same to said steering mechanism.



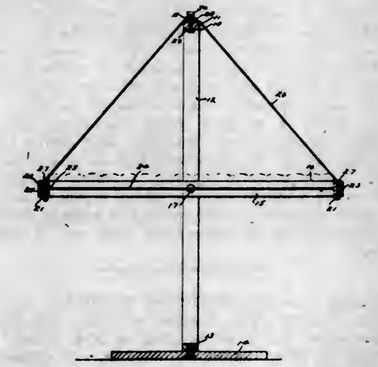
1,354,418. HOLDER FOR USE IN COATING RODS FOR ELECTRIC WELDING. FRANK W. PERSHING, Moline, Ill. Filed Feb. 6, 1920. Serial No. 356,768. 2 Claims. (Cl. 91—60.)

1. In a device of the character described, the combination with a frame having spaced notches on two of its opposite sides to receive rods, of a holder including two members one above the other and adapted to receive ends of rods between them, a resilient material secured on the opposing surfaces of said members and in contact above and below with said rods, and clamping means operable to press said members together and hold the rods therebetween spaced apart by action of the resilient material.



1,354,419. FLEXIBLE CONNECTION FOR STOVES AND THE LIKE. HARVEY B. REPPETTO, Wheeling, W. Va., assignor to The Wheeling Stove & Range Company, Wheeling, W. Va., a Corporation of West Virginia. Filed July 5, 1919. Serial No. 308,815. 2 Claims. (Cl. 285—74.)

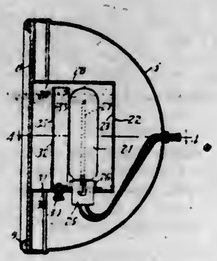
1. As a new article of manufacture, a flexible metal tube connection for stoves and the like, comprising a soft-metal tube having one end flared to form a bell, a band of relatively harder metal rigidly carried in embracing relation to said end of said tube behind said bell and having its outer end shaped to form a shoulder which conformably seats against said bell for reinforcing the latter, a nipple having one end adapted for seating against the



interior face of said bell and carrying screw threads, and a coupling sleeve slidably mounted on said reinforced end and having an internal flange adapted for assuming seated relation to the shoulder of said band, said sleeve also having threads for engagement with those of said nipple.

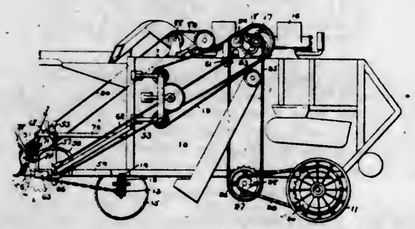
1,354,420. CLOTHES-DRIER. PATRICK D. RIORDAN, New York, N. Y. Filed Mar. 1, 1919. Serial No. 280,047. 3 Claims. (Cl. 68—34.)

1. In a clothes drier, a frame having substantially parallel side bars and two supporting means for the frame, each having cross tubes disposed side by side, the axis of a tube of each supporting means being disposed for rocking on posts mounted on a window frame, the side bars being slidably disposed in the other tubes.



1,354,421. CLOTHES-DRIER. PATRICK D. RIORDAN, New York, N. Y. Filed Oct. 30, 1919. Serial No. 334,500. 3 Claims. (Cl. 68—34.)

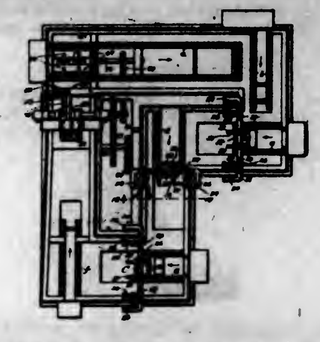
1. In a clothes drier, an open frame, a second open frame smaller than the first frame and pivoted intermedi



ate of its ends in the first frame, a clothes line carried by the second frame, a cord secured at its ends to the second frame and means on the first frame to clamp the cord.

1,354,422. NON-GLARE HEADLIGHT. LLOYD B. SALT, Dedham, Mass. Filed Jan. 16, 1919. Serial No. 271,502. 3 Claims. (Cl. 240—41.)

1. In a headlight, a reflector, said reflector in its horizontal plane being constructed upon a parabolic curve, and in its vertical plane having straight sides, a pair of parallel horizontal walls intersecting said parabolic curve adapted to confine the rays of light reflected therefrom, a slide adjustably mounted upon one of said horizontal walls, and a source of illumination mounted upon said slide and located upon the focal axis of said parabolic curve.

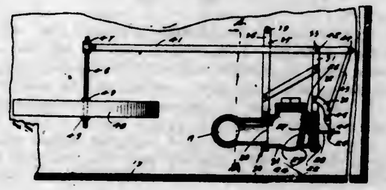


1,354,423. PROPELLING MECHANISM FOR VEHICLES. JAMES L. SIPPLES, Cynthiana, Ky. Filed Jan. 23, 1917. Serial No. 143,905. 1 Claim. (Cl. 74—59.)

A driving mechanism for a vehicle carrying a separator comprising, a source of power, a power shaft connected therewith and traversing the vehicle, means for operating the separator from the power shaft, a counter-shaft extending parallel to said power shaft, a driven shaft traversing the vehicle and disposed adjacent the rear wheels of the same, sprocket wheels arranged on each of said three shafts, a sprocket chain connecting said three sprocket wheels, means connecting said driven shaft to said rear wheels, the sprocket wheel on said power shaft being loosely mounted thereon, a clutch coacting with said loosely mounted sprocket wheel, a pair of intermeshing gears mounted on said power and counter shafts, and a second clutch for coöperation with one of said gear wheels.

1,354,424. RACK-ASSEMBLING MACHINE. OSCAR SLIGER, Louisville, Ky., assignor to Mengel Box Company, Louisville, Ky., a Corporation of New Jersey. Filed June 11, 1920. Serial No. 388,358. 15 Claims. (Cl. 144—2.)

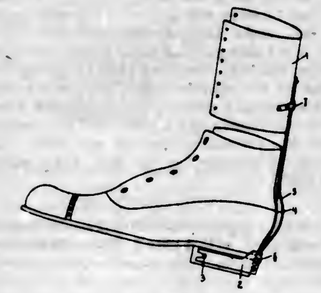
1. In a rack assembling machine, the combination of a plurality of hoppers adapted to hold the separate component rack elements; a form having means therein to receive the elements and to properly space and position



the same; means for successively moving the form beneath the hoppers; and an automatically operated hammer for forcing the rack elements into locking relation.

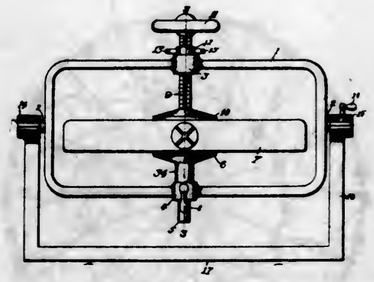
1,354,425. MANUFACTURE OF PNEUMATIC TIRES. THOMAS SLOPER, Devizes, England. Filed May 5, 1920. Serial No. 378,946. 14 Claims. (Cl. 18—42.)

1. In apparatus for applying radial pressure to an annular article during its vulcanisation, the combination, with an annular support, of a band of resilient material for disposing in the form of a circle co-axial with, and situated in the same general plane as the support, and having at each end a longitudinal strip of less width than the width of the band arranged to extend past each other side-by-side, and a pressure device to which the said strips are attached, which pressure device is arranged to force the strips at the two ends of the band in such opposite directions as will press the band against the support substantially as described.



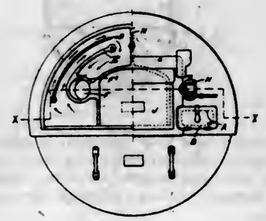
1,354,426. AUTOMATIC VALVE CUT-OFF. ROBERT W. SNYDER, Bigheart, Okla. Filed July 18, 1919. Serial No. 311,707. 5 Claims. (Cl. 137—68.)

1. In a device of the class described, an automatic valve including a valve casing, a valve seated in said casing adjacent the inlet end thereof, a flat valve pivotally secured in the casing and arranged to fit on said seat, a pair of supports secured to the casing and extending above the same, an operating rod pivotally secured to one of said supports adjacent to the rear end of said rod, a float carried by the outer terminal of said rod, an outwardly extending rod pivotally secured to the valve, an



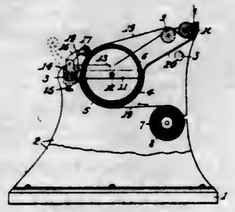
arcuate lever slidably receiving said rod, the upper terminal of said lever being pivotally secured to one of said supports, a stop carried by said last mentioned rod and arranged to engage the outer face of said arcuate lever, and a connecting link pivotally secured to the free end of said actuating rod and the arcuate lever, as and for the purpose specified.

1,354,427. WALKING APPARATUS FOR THE LAME. JOHANNES FRANCISCUS WELTER, Utrecht, Netherlands. Filed Apr. 9, 1920. Serial No. 372,488. 1 Claim. (Cl. 128—80.)



Walking apparatus for the lame, comprising a calf-piece, a piece for attachment to the heel of a shoe, a spring bar attached to said calf-piece and said heel piece, said spring bar having a rearwardly offset bent portion at a point between the heel of the shoe and the ankle of the wearer, and causing said spring to press the foot constantly forward and somewhat upwardly, a second spring bar also attached to the calf piece and heel, arranged on the first named spring bar and having a rearwardly offset bent portion spaced from that of said first named spring bar.

1,354,428. RADIATOR-STAND. ANTON ALBERT WORZEN, Brownsville, Pa. Filed Dec. 23, 1919. Serial No. 347,043. 4 Claims. (Cl. 29—89.)

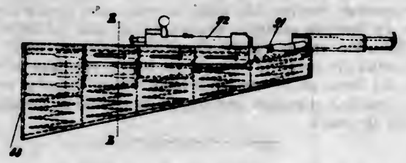


1. A device of the character specified comprising a frame having means for engaging the upper and lower faces of a radiator, said means being adjustable laterally with respect to the plane of the frame, and means for supporting said frame to rotate on a transverse axis parallel with the plane of the radiator when held by the engaging means, said engaging means comprising heads, each of the said heads being adjustable with respect to the frame, and one of the heads having threaded engagement with the frame.

1,354,429. FURNACE-FRONT. CORNELIS ZULVER, London, and LAUNCELOT EUSTACE SMITH, South Shields, England. Filed Aug. 11, 1919. Serial No. 316,733. 1 Claim. (Cl. 110—172.)

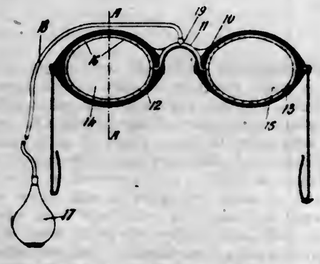
A furnace front having a front-plate and a baffle plate rearwardly thereof, the space between said plates forming an air heating chamber around an opening for solid fuel, concentric vanes on the inner face of said back plate forming air channels between air supply openings provided in the front plate, air tubes transversely disposed in said air heating chamber, and liquid fuel burners mounted in said air tubes.

1,354,430. WALL-PAPERING DEVICE. STEVE G. CANELLOS, Connellsville, Pa. Filed Jan. 22, 1920. Serial No. 353,144. 2 Claims. (Cl. 91—14.)



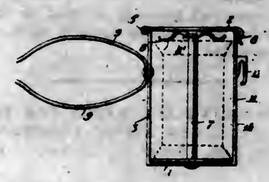
1. A paste-applying device for wall paper, comprising a frame, a paste reservoir of open trough form carried by said frame, a hollow paste-applying roller mounted for rotation within said reservoir and having a paste-carrying covering, said roller having a diameter approximating the interior diameter of said reservoir, guide rollers journaled on said frame in front of said reservoir, a roller for carrying a roll of paper journaled in said frame below the level of said paste-applying roller and from which paper passing to said guide rollers is drawn over said paste-applying roller, and a transversely adjustable cutter whereby paper drawn over said paste-applying roller may be split, said cutter comprising a spring pressed arm movable to and from overlying relation to said paste-applying roller, and a rotary disk having a peripheral cutting edge carried by said arm.

1,354,431. TIRE. WILLIAM CLENDENNING, Philadelphia, Pa. Filed Apr. 14, 1920. Serial No. 373,703. 4 Claims. (Cl. 152—8.)



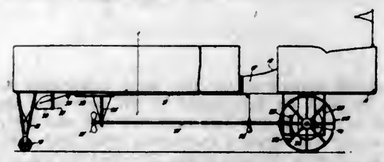
3. In a wheel tire, a body composed of concentric hollow shells embodying adjacent walls and resilient posts intervening said walls and joining the same, said posts being curved and forming resilient bearings for said shells.

1,354,432. MAGAZINE-FEED AND GUN FOR USING SAME. CARLO DE-FELICE, New York, N. Y. Filed Mar. 15, 1918. Serial No. 222,607. 15 Claims. (Cl. 42—49.)



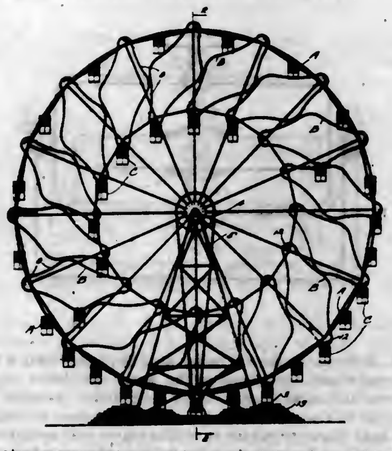
8. A removable magazine feed box provided with a plurality of upwardly directed partitions dividing the same into a plurality of cartridge holding chambers, said partitions leaving a free space at the upper part of said box, a longitudinal running slot through said upper part, sets of cartridges arranged column like in a longitudinal direction within said chambers, a removable bottom for said box, springs inserted between said bottom and the lower cartridge of each set forcing each set of cartridges against the upper part of said box and a feed bar operating through said slot feeding the longitudinal upper row of cartridges in an axial direction away from said box.

1,354,433. LENS-CLARIFYING APPARATUS. CARLO DE-FELICE, New York, N. Y. Filed Aug. 5, 1919. Serial No. 315,537. 4 Claims. (Cl. 2—149.)



1. In a device of the class described and in connection with a glass member mounted in the line of vision, a tubular frame having perforations close to the surface of said glass member and means causing air under pressure to issue through said perforations.

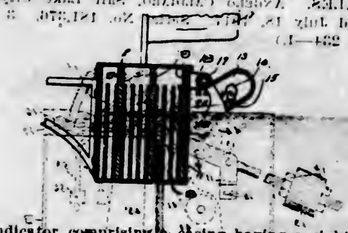
1,354,434. TWINE-HOLDER. PETER G. FASSOULIS, Syracuse, N. Y. Filed Apr. 20, 1918. Serial No. 229,797. 1 Claim. (Cl. 242—136.)



A twine holder comprising a bottom disk, a U-shaped member having its cross piece extending across the disk and its legs forming side pieces, a top disk hinged to one of said side pieces, latch means connecting said top disk with the other side piece, a spool spindle passing through the bottom disk and the cross piece, a spring clip on the upper end of the spindle and acting as a brake for the spool placed on said spindle, one of said side pieces having a vertical slot therein and a horizontal slot communicating therewith and extending through one edge of said piece and a cutting member on said side piece adjacent said vertical slot.

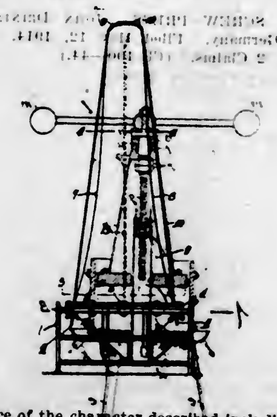
1,354,435. SWIMMING-BOAT. AUGUST GARDELAS, Princeton, N. J. Filed May 8, 1920. Serial No. 379,927. 4 Claims. (Cl. 9—18.)

1. A device of the character described comprising a boat structure upon which an operator may lie at full length, an axle jouraled beneath the forward end of the boat and carrying wheels, handles on said wheels adapted for engagement by the hands of the operator whereby to rotate the wheels, and a supporting wheel at the rear end of the boat structure.



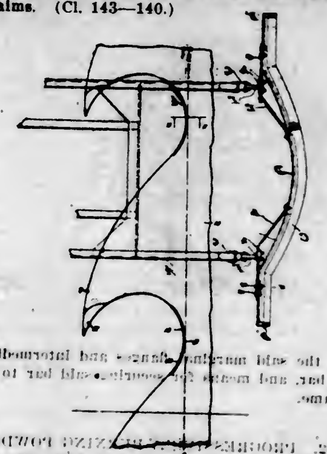
1,354,436. AMUSEMENT APPARATUS. CHARLES HERMANN, New York, N. Y., assignor to Eccentric Ferris Wheel Amusement Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 13, 1920. Serial No. 351,128. 7 Claims. (Cl. 46—27.)

1. An amusement apparatus comprising the combination of a wheel structure rotating on a horizontal axis, and a



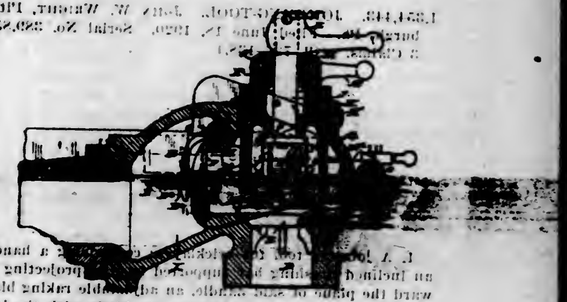
series of passenger carriages mounted thereon and pivotally carried and movable during their travel along inclined tracks toward and from the axis of rotation of the structure, and a supporting wheel at the rear end of the machine adapted to receive the impact of a person standing in the path of the machine to release said keepers from said pin and keepers across the front of the machine and pivoted with a tire holder with a tire holder said type arm also

1,354,437. TRAIN CLASSIFICATION AND NUMBER INDICATOR. WESLEY H. LOWD, Glen Frazer, Calif. Filed Jan. 5, 1917. Serial No. 140,754. 1 Claim. (Cl. 40—132.)



An indicator comprising a casing having a sight opening located in its front side, the edges of the opening being spaced from the edges of the said front side, transverse partitions arranged within the casing and forming a series of compartments, longitudinal partitions arranged within the compartments and having their upper edges disposed below the plane of the upper edges of the transverse partition and the top of the casing, indicator plates arranged between the longitudinal partitions and extending above the same and provided with openings adapted to be engaged by an implement for removing them from the casing, and a reflector mounted upon the casing and located at the exterior thereof at a point in advance of the sight opening and at the upper portion thereof and directed downwardly toward the said sight opening.

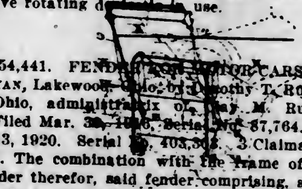
1,354,438. IRONER AND MOLDER FOR OVERALLS AND TROUSERS. OTUS PICKERSIMER, Greenville, S. C. Filed Mar. 19, 1920. Serial No. 367,270. 2 Claims. (Cl. 223—17.)



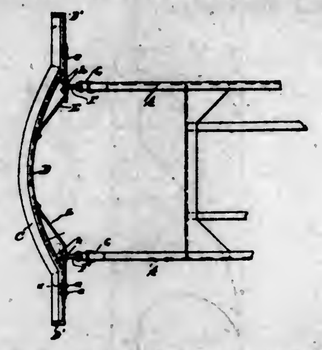
1. A device of the character described including a stand, a hollow tapering casting being closed at its upper end and having a lower open end supported upon said stand, said casting having a partition therein separating the interior thereof into two compartments communicating only at the upper end thereof, means for introducing a heat-carrying medium into the lower end of one of the compartments, means for conveying off the medium after the same has circulated through both of the compartments from the lower end of the other compartment, and an ironing wire associated with said casting and being adjustable to fit the garments substantially as described.

1,354,439. BAND-SAW. MINNIE H. MCCONNELL, New Bedford, Mass. Filed Sept. 30, 1919. Serial No. 326,881. 5 Claims. (Cl. 143—140.)

1. A band saw comprising a flat continuous band, a plurality of teeth formed on one edge of said band, and a throat formed between each of said teeth, the edges of said throats being upset by hammering so as to form reinforcing ribs.



1,354,440. LOCOMOTIVE CHECK-VALVE. JOSEPH B. MOWAT, Cleveland, Ohio. Filed Aug. 20, 1917. Serial No. 187,302. 7 Claims. (Cl. 277—60.)

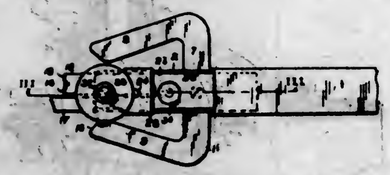


1. In a check valve for use with steam at high pressure, in combination, a casing, a valve seat therein having a vertical opening and independent vertically movable main valve for said seat, said casing provided with a lateral opening, an auxiliary swinging check valve therein, a vertically movable device at the upper end of said casing adapted in its lower position to engage and rotate said main valve, means for raising and for locking said device in inoperative position, said auxiliary check valve serving to prevent back pressure upon said main valve when said valve rotating device is in use.

1,354,441. FENDER FOR MOTOR-CARS. CLAY M. RUNYAN, Lakewood, Ohio, by Dorothy T. Runyan, Cleveland, Ohio, administratrix of Clay M. Runyan, deceased. Filed Mar. 30, 1916. Serial No. 87,764. Renewed Aug. 13, 1920. Serial No. 403,303. 3 Claims. (Cl. 293—55.)

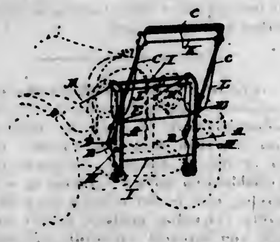
1. The combination with the frame of a vehicle, of a fender therefor, said fender comprising, a buffer bar having forwardly extending inclined flanges at its longitudinal edges, and integral outwardly extending lugs, in-

mediate of its longitudinal edges, and a hollow arched resilient member having its longitudinal edges inserted



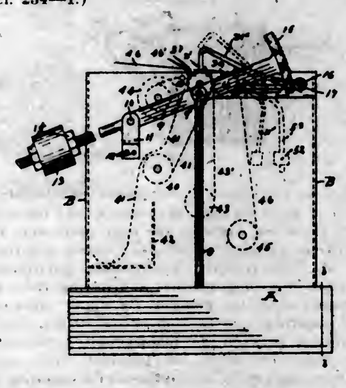
between the said marginal flanges and intermediate lugs on said bar, and means for securing said bar to said vehicle frame.

1,354,442. PROGRESSIVELY-BURNING POWDER AND PROCESS OF MAKING THE SAME. RICHARD G. WOODBRIDGE, Jr., KELLOGG K. V. CASEY, and CLARENCE I. B. HENNING, Wilmington, Del., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Feb. 25, 1920. Serial No. 361,287. 10 Claims. (Cl. 52—3.)



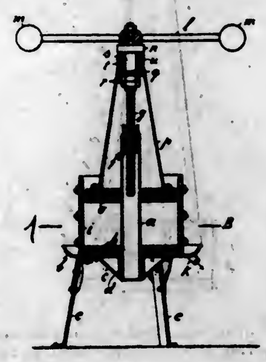
6. A propellent powder comprising deterrent-carrying nitrocellulose powder grains having a firmly adherent coating of an easily ignitible propellant.

1,354,443. JOINTING-TOOL. JOHN W. WRIGHT, Pittsburgh, Pa. Filed June 18, 1920. Serial No. 389,852. 3 Claims. (Cl. 72—138.)



1. A jointing tool for bricklayers comprising a handle, an inclined finishing bar supported by and projecting toward the plane of said handle, an adjustable raking blade having a bit, means for clamping the blade with the handle, and a guide wheel supported from said means.

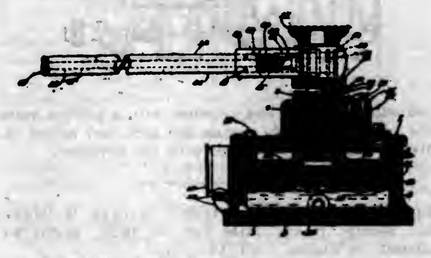
1,354,444. SAFETY-GUARD FOR USE ON TRUCKS AND AUTOMOBILES. STANLEY E. ATHERTON, Cleveland, Ohio. Filed July 7, 1919. Serial No. 308,987. 6 Claims. (Cl. 293—15.)



1. In a safety device for an automobile, a vertically swinging frame or loop, a support for each side of said frame, to which the frame is pivoted, keepers movable in said supports and adapted to retain said frame normally in an elevated position, a tripping wire or rope connecting said keepers across the front of the machine and positioned to receive the impact of a person standing in the path of the machine, to release said keepers from said frame, and means limiting the fall of said frame.

1,354,445. RECORDING DEVICE FOR WEIGHING-SCALES. ANGELO CALOIARO, Salt Lake City, Utah. Filed July 18, 1917. Serial No. 181,376. 3 Claims. (Cl. 234—1.)

1. A recording device comprising a shaft mounted for rotation and having an operating pin, a type arm pivotally mounted, having a type at the outer end and having the inner end arranged in the path of movement of said pin and provided with a rule joint, said type arm also having a depending weighted arm to normally raise the typed end of said arm, and means to turn said shaft, said means including an element for connection to a spring controlled scale.



1,354,446. SCREW-PRESS. JOHN DEININGER, Blaubeuren, Germany. Filed May 12, 1914. Serial No. 838,005. 2 Claims. (Cl. 100—44.)

1. In a screw press, the combination of a sheet metal tray to form the bottom of the pressure chamber, an inverted metal cone secured on the lower face of the tray, a tube secured perpendicularly to the tray and to the cone, a stationary nut located in the tube, a threaded spindle adapted to engage the nut and a pressure plate connected to the spindle, for the purpose described.

2. In a screw press, the combination of a sheet metal tray to form the bottom of the pressure chamber, an inverted metal cone secured on the lower face of the tray, a tube reduced in diameter at its upper end and secured perpendicularly to the tray and to the cone, a stationary nut located in the upper end of the larger diameter of the tube, a threaded spindle adapted to engage the nut, and a pressure plate connected to the spindle, for the purpose described.

1,354,447. SCALE. FREDERICK J. TROLL, Baltimore, Md., assignor to The Loadometer Company, a Corporation of Delaware. Filed Aug. 7, 1919. Serial No. 315,834. 2 Claims. (Cl. 265—47.)

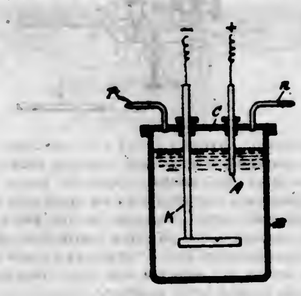
1. A weighing device for obtaining the bearing pressure on vehicle tires consisting of a cylinder and piston with means for indicating the fluid pressure in the cylinder, a jack, means for applying the weight lifted by the jack to the cylinder and piston to contract the piston space, said means including a shank, a weight supporting member for the jack having a screw-threaded engagement with said shank, the axis of the screw being parallel to the path of the piston, ratchet means for turning the screw, and means for preventing relative rotation of the piston and cylinder.

1,354,448. TOOL FOR BENDING METAL RODS. JOHN J. WALT, Chicago, Ill. Filed Nov. 5, 1919. Serial No. 335,903. 5 Claims. (Cl. 81—15.)

1. A tool for bending rods comprising a lever member, a shank member extending at an angle thereto, a rod engaging hook member attached to the shank member, a fulcrum member integral with the lever member and projecting at an angle therefrom and at an angle from the shank member, and adjusting means on the fulcrum member.

1,354,449. TIRE. JAMES R. WOOD, Indianapolis, Ind. Filed July 13, 1920. Serial No. 395,836. 6 Claims. (Cl. 152—8.)

1. A vehicle tire including opposed annular series of inner side plates, means interposed therebetween for yieldingly restraining them against outward relative movement, opposed annular series of outer side plates tiltably mounted on the inner side plates, means extending inwardly from the opposed outer side plates constituting



abutments, yielding means carried by the abutments for restraining the outward swinging movement of the outer side plates relative to each other, and a casing housing all of the plates.

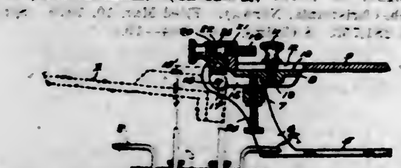
1,354,450. BELT-BUCKLE. WILLIAM G. AHRENDT, Newark, N. J. Filed Feb. 18, 1920. Serial No. 359,636. 8 Claims. (Cl. 24—194.)

1. A belt buckle including a body presenting an interior longitudinal passageway for the belt, said passageway being tapered toward one end, and a slide having a substantially flat back plate disposed in a plane in the rear of the plane of the back of said body and extending to the sides of the latter that its ends may be grasped for manipulating the blade, said ends between the front and back edges of the plate presenting depressions for the grasping of the plate and said plate being in substantially the same plane throughout, said slide presenting a portion protruding into said passageway for engagement with the belt.

1,354,451. MANUFACTURE OF REDUCING ALKALINE MELTS. EINAR BERGVE, Christiania, Norway, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Filed Mar. 10, 1919. Serial No. 281,753. 8 Claims. (Cl. 204—19.)

8. The method of producing an alkaline melt containing dissolved alkali metal for chemical reductions and syntheses, which comprises electrolyzing a melt containing alkali metal hydroxid with an anode current density of from twenty to fifty amperes per square centimeter and a cathode current density below one ampere per square centimeter.

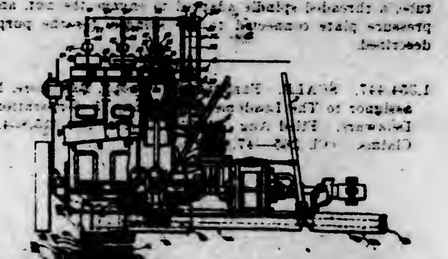
1,354,452. MACHINE FOR TREATING RUBBER AND SIMILAR MATERIALS. DAVID R. BOWER and CARL F. SCHNUCK, Ansonia, Conn., assignors to Farrel Foundry & Machine Company, Ansonia, Conn., a Corporation of Connecticut. Filed Dec. 24, 1917. Serial No. 208,635. 43 Claims. (Cl. 18—8.)



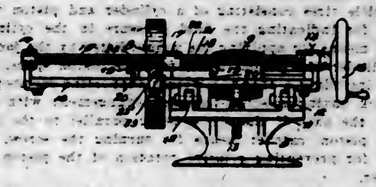
39. In a rubber [illegible] chamber, a rotor for moving the material [illegible] said chamber, and means for charging said chamber from the end.

1,354,453. PATTERN-LATHE. FREDERICK NUESKE, New York, N. Y., assignor to Julius Nueske & Sons, Inc., New York, N. Y., a Corporation of New York. Filed Sept. 19, 1919. Serial No. 324,735. 9 Claims. (Cl. 142—47.)

1. The combination in a lathe with a pattern follower and a cutter, of a reciprocable work and pattern support, means on the support holding the pattern against the follower and the work against the cutter, a rotatable shaft, a crank disk, a crank pin adjustable on the crank disk, and a link connecting the crank pin and the support for reciprocating the support upon the rotation of the disk.



1,354,454. DENTAL ARTICULATOR. JAMES W. TALIAFERRO, Seattle, Wash. Filed Oct. 30, 1919. Serial No. 334,395. 1 Claim. (Cl. 32—1.)



A dental articulator having a lower jaw, an upper jaw comprising two superposed members, a hinge connection between the lower of said members and the lower jaw, said members being each provided with an apertured block element, an adjusting screw engaging in the block elements of both members for effecting horizontal movements of the upper member in forwardly and rearwardly directions, and means for securing the upper member in adjusted positions to said lower member.

1,354,455. OIL-ENGINE. ALEXIS HUNAU, San Pedro, Calif. Filed Feb. 10, 1919. Serial No. 276,933. 11 Claims. (Cl. 123—30.)

1. In an oil engine, the combination with one of the cylinders and the governor thereof, of a piston for the cylinder, a vaporizer for the cylinder communicating therewith, means to inject fuel into said vaporizer, a tube connected with the vaporizer, a valve chamber connected with [illegible] and provided with a port, a valve in the [illegible] to control the port, and means operatively connected with the governor.

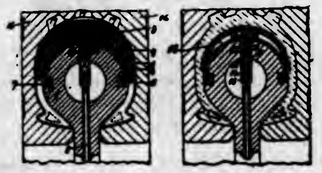
1,354,[illegible]HINE. WALKER M. MILLIGAN, Seattle, Wash. Filed Feb. 19, 1920. Serial No. 360,007. 2 Claims. (Cl. 51—231.)

1. In a machine of the character described, a work-supporting table, a carrier comprising a bar provided with downwardly directed extremities to straddle the work, a screw for imparting feed movements to said carrier in a direction longitudinally of said table, and a second screw arranged to impart sliding feed movements to the work within the space between the extremities of said carrier and independently of the latter and with respect to said table.

1,354,457. TIRE-SPREADER. DON O. NATION, Hollywood, Calif., assignor of one-half to William E. Nation, Los Angeles, Calif. Filed May 5, 1919. Serial No. 294,969. 4 Claims. (Cl. 152—27.)

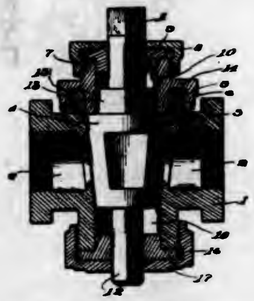
1. A tire spreader comprising a concave bearing plate adapted to fit against the tread of a tire casing, a bar having a rigid hook to engage one bead, said bar fitting against the bearing plate, and a second hook pivotally connected to the bar to engage the other bead.

1,354,458. HAIR-CLIPPER. MARION L. RIGGS, International Falls, Minn. Filed Jan. 21, 1919. Serial No. 272,298. 3 Claims. (Cl. 30—1.)



1. In a hair clipping device, a guard which is of a greater thickness at its longitudinal center than at any

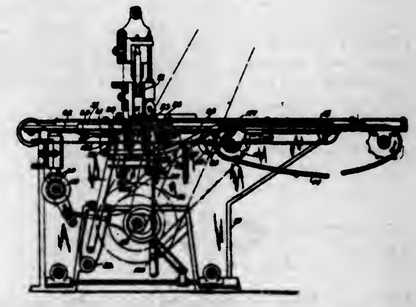
other part thereof and which has the outer surface at its center rounded and inclined upwardly to the edges thereof, one of such edges being cut to provide a straight surface, and both of the edges being formed with laterally extending teeth, a blade having its opposite edges provided



with teeth resting on the guard and reciprocatory thereover, and means for imparting such motion to the blade, a cap plate overlying the blade, and interengaging means between the ends of the cap plate and the ends of the guard.

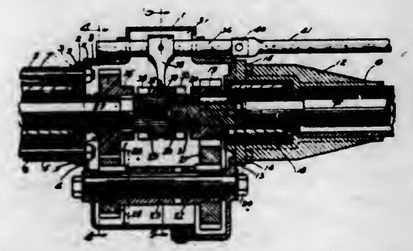
1,354,459. EXPANSIBLE CORE FOR INDIA-RUBBER ARTICLES. CARL GUSTAF ALFRED BÄCKDAHL, Stockholm, Sweden, assignor to United States Tire Company, a Corporation of New York. Filed Dec. 14, 1915. Serial No. 66,693. 17 Claims. (Cl. 18—45.)

1. A fluid-tight, hollow, stretchable, metallic mantle, and a core within said mantle.



1,354,460. STOP-COCK. FREDERICK C. HEYLMAN, Martinez, Calif. Filed Dec. 10, 1918. Serial No. 266,107. 3 Claims. (Cl. 251—91.)

1. In a stop cock, the combination, of a body provided with a fluid way, a valve cone rotatably mounted in said body for controlling the passage of fluid through said way, a ring flange formed upon the body concentric of the axis of said valve cone, and having its outer edge beveled to form a centrally disposed biting rib, a gland mounted on said ring flange, an annular flange formed upon said gland and extending within the ring flange and into contact with a shoulder on the valve cone, a depending flange formed about the outer edge of said gland and detachably connected to said ring flange, said biting edge adapted to bite into the under surface of said gland to form a fluid-tight joint between the gland and body.



REISSUES.

14,951. WIRE-BOUND-BOX-BLANK MACHINE. FREDERICK J. GRUMME, Indianapolis, Ind., assignor, by mesne assignments, to Wirebound Patents Company, a Corporation of Maine. Filed Dec. 22, 1919, Serial No. 346,788. Original application filed Aug. 8, 1913, Serial No. 783,725. Renewed May 31, 1917. Serial No. 172,075. Original No. 1,253,962, dated Jan. 15, 1918. 17 Claims. (Cl. 1—14.)

Ser. No. 126,069. (CLASS 17. TOBACCO PRODUCTS.) F. & E. SOTER CORP., New York, N. Y. Filed Dec. 15, 1919.

LORD NELSON

Particular description of goods.—Cigarettes.
Claims use since August, 1918.

Ser. No. 127,155. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) SPELTZ GRAIN & COAL CO., Albert Lea, Minn. Filed Jan. 14, 1920.

No claim is made to the words "Kentucky Coal" apart from the mark shown on the drawing.
Particular description of goods.—Coal.
Claims use since Sept. 1, 1919.

Ser. No. 127,350. (CLASS 35. BELTING, HOSE, MACHINERY PACKING, AND NON-METALLIC TIRES.) THE BATAVIA RUBBER COMPANY, Batavia, N. Y. Filed Jan. 20, 1920.

MERLIN

Particular description of goods.—Automobile Tire Casings and Tubes of Rubber.
Claims use since Jan. 14, 1920.

Ser. No. 127,533. (CLASS 43. THREAD AND YARN.) CHARLES SPICEHANDLER, New York, N. Y. Filed Jan. 24, 1920.

IRIS

Particular description of goods.—Cotton Thread.
Claims use since July 1, 1909.

Ser. No. 127,536. (CLASS 43. THREAD AND YARN.) CHARLES SPICEHANDLER, New York, N. Y. Filed Jan. 24, 1920.

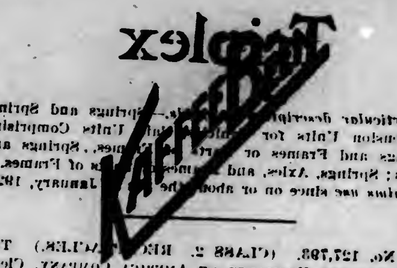
Particular description of goods.—Cotton Thread.
Claims use since Oct. 2, 1909.

Ser. No. 127,747. (CLASS 19. VEHICLES, NOT INCLUDING ENGINES.) THE WILLYS-OVERLAND COMPANY, Toledo, Ohio. Filed Jan. 29, 1920.

Triplex

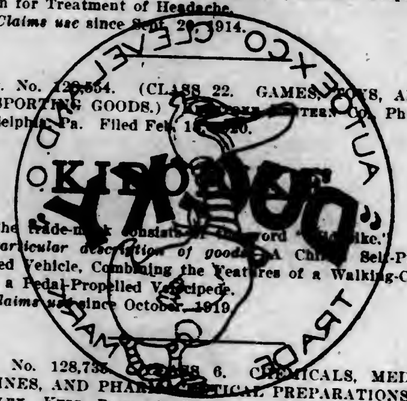
Particular description of goods.—Springs and Spring-Suspension Units for Vehicles, Said Units Comprising Springs and Frames or Parts of Frames, Springs and Axles; Springs, Axles, and Frames or Parts of Frames.
Claims use since on or about the 8th of January, 1920.

Ser. No. 127,793. (CLASS 2. RECEPTACLES.) THE AUTOMOTIVE EXCHANGE OF AMERICA COMPANY, Cleveland, Ohio. Filed Jan. 31, 1920.



No claim being made to the words "Trade Mark" or "Cleveland, O." apart from the mark as shown in the drawing.
Particular description of goods.—Oil-Cans.
Claims use since Jan. 21, 1920.

Ser. No. 128,105. (CLASS 35, BELTING, HOSE, MACHINERY PACKING, AND NON-METALLIC TIRES.) THE OWEN TIRE AND RUBBER COMPANY, Cleveland, Ohio. Filed Feb. 7, 1920.



No claim is made to the representation of the goods except in the particular relation shown.
Particular description of goods.—Solid and Pneumatic Tires Composed of Rubber and Rubber Reinforced with Fabric and Inner Tubes of Rubber.
Claims use since April, 1919.

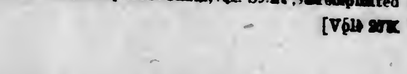
865. No. 128,496. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ROBERT LATZKE, Memphis, Tenn. Filed Feb. 17, 1920.

Particular description of goods.—A Medicinal Preparation for Treatment of Headache.
Claims use since Sept. 20, 1914.

Ser. No. 129,564. (CLASS 22. GAMES, TOYS, AND SPORTING GOODS.) [illegible] Co., Philadelphia, Pa. Filed Feb. 14, 1920.

The trade-mark consists of the word "Kiddie-Kar."
Particular description of goods.—A Child's Self-Propelled Vehicle, Combining the Features of a Walking-Car and a Pedal-Propelled Velocipede.
Claims use since October, 1919.

Ser. No. 128,735. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ALEX. KERR BROS. & Co., Philadelphia, Pa. Filed Feb. 21, 1920. Under ten-year proviso.



No claim being made to the word "Cleveland, O." apart from the mark as shown in the drawing.
Particular description of goods.—[illegible]
Claims use since [illegible]

Ser. No. 128,883. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) ARTHUR CLAASSEN, Jr., Philadelphia, [illegible]. 1920.

Particular description of goods.—[illegible] Hydrous Soap.
Claims use [illegible]

Ser. No. 128,900. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) UNITED DRUG CO., Boston, Mass. Filed Feb. 25, 1920.

No claim is made to the exclusive use of the word "Purelest" except in the particular manner of the display as shown in the drawing.
Particular description of goods.—Solid and Liquid Antiseptic Compound of Rubber and Rubber Reinforced with Powdered Alum; Prepared Chalk, Boric Acid, Precipitated Powder Chalk, Orris Compound, Liquor Formaldehyd Comp., Tincture of Cinchona Co., Tincture of Tartar, Epsom Salts, Fluid Extract Cascara, (Whole;) Flaxseed-Meal, Rochelle Salts, Boracic Acid, Sodium Bicarbonate, Sulfum Phosphate, Sulfur, Sulfur and Cream of Tartar, Talcum Powder, Zinc Stearate, Sweet Spirit of Niter, Glycerin Suppositories, Soft Soap, Bismuth Mixture, Tablets, Brown-Mixture [illegible], Compound Tablets, Compound Milk-of-Potash Tablets, [illegible], Ammonia, [illegible], Essence of Sweet [illegible], Fluid Extract Cascara; Fluid [illegible] Cascara, [illegible]; Formaldehyde, Glycerin, [illegible] and Rose-Water, Mixture Rhubarb and Soda, Oil of Almond, Camphorated Oil; Castor-Oil, Citronella-Oil, Cocoanut-Oil, American Cod-Liver Oil, Norwegian Cod-Liver Oil, Goose-Oil, White Mineral Oil, Skunk Oil; Paregoric, Solution, Dobell's; Spirit Ammonia, [illegible], Spirit Camphor, Stokes's Expectorant; Tincture [illegible], Tincture Benzoin Compound, Tincture Benson, Tincture Green Soap, Tincture Iodin, Tincture Jamaica Ginger, Tincture Larkspur, Tincture Myrrh, Witch-Hazel; Boneset, (Loose;) Buchu, (Loose;) Lavender Flowers, (Loose;) Senna, (Loose;) Senna Leaves, (Loose;) Soap for Medicinal Purposes, Tar Oil, Tinctures of Rhubarb, Pepsin Tablets; Soda, Mint, and Pepsin Tablets; Rhinitis Tablets.
Claims use since August, 1919.

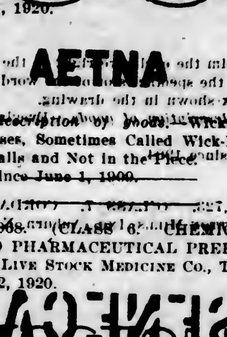
Ser. No. 129,03[illegible] (CLASS [illegible] BRUSHES, AND DUSTERS.) [illegible] C. WRIGHT, Summit, N. J. Filed Feb. 28, 1920.

Particular description of goods.—Automobile Tire Tubes and Tubes of Rubber.
Claims use since Jan. 14, 1920.

Ser. No. 127,[illegible]. (CLASS [illegible] TUBING AND TANKS.) [illegible], New York, N. Y. Filed Jan. 24, 1920.

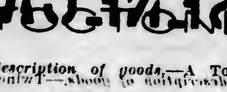
Particular description of goods.—[illegible] Pencil Fountain-Brushes.
Claims use since Jan. [illegible], 1919.

Ser. No. [illegible]. (CLASS 44. DENTAL, MEDICAL, AND SURGICAL APPLIANCES.) SWINE BREEDER'S SERVICE, Chicago, Ill. Filed Mar. 1, 1920.



Particular description of goods.—An Apparatus for Vaporizing a Disinfectant Liquid.
Claims use since October, 1919.

Ser. No. 129,[illegible] (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) [illegible] & Co., Philadelphia, Pa. Filed Mar. 3, 1920.

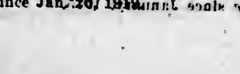


Particular description of goods.—Soap.
Claims use since Mar. 1, 1919.

Ser. No. 129,219. (CLASS 35. BELTING, HOSE, MACHINERY PACKING, AND NON-METALLIC TIRES.) MASSASOIT MANUFACTURING COMPANY, Fall River, Mass. Filed Mar. 4, 1920.

Particular description of goods.—Wicking Used for Packing Purposes, Sometimes Called Wick-Packing, Manufactured in Balls and Not in the Piece.
Claims use since June 1, 1900.

Ser. No. 130,008. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) SUGAR BELT LIVE STOCK MEDICINE Co., Thibodaux, La. Filed Mar. 22, 1920.



Particular description of goods.—A Tonic for Live Stock.
Claims use since Mar. 2, 1920.

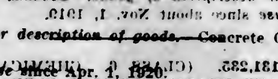
Ser. No. 130,320. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) W. CLARK CHEMICAL LABORATORIES, INC., Chicago, Ill. Filed Mar. 29, 1920.

Trade-mark being the autograph signature of Dr. Clark.
Particular description of goods.—Antiseptic Bolt Dressing.
Claims use since Nov. 1, 1919.

Ser. No. 130,458. (CLASS 28. MEASURING AND SCIENTIFIC APPLIANCES.) WAYNE OIL TANK & PUMP COMPANY, Fort Wayne, Ind. Filed Mar. 31, 1920.

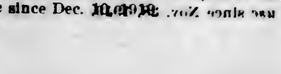
Particular description of goods.—Pipe-Line or Flow Meters.
Claims use since Jan. 20, 1919.

Ser. No. 130,578. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) FREDERICK D. COMANY, Philadelphia, Pa. Filed Apr. 3, 1920.



Particular description of goods.—Preparation for Repairing Cracks, Leaks, &c., in Steam and Water Boilers, Radiators, Piping, and other Containers.
Claims use since Oct. 1, 1919.

Ser. No. 131,046. (CLASS 2. RECEPTACLES.) SANITARY REFUSE BOX COMPANY, Chicago, Ill. Filed Apr. 12, 1920.



Particular description of goods.—Concrete Garbage-Receptacles.
Claims use since Apr. 1, 1920.

Ser. No. 131,061. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 13, 1920.

Particular description of goods.—A Tonic and Invigorant for the Hair and Scalp.
Claims use since March, 1911.

Ser. No. 131,120. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) GEORGE F. RIES, Chicago, Ill. Filed Apr. 14, 1920.

No claim is made to the exclusive use of the word "Brand" as it appears in the drawing.
Particular description of goods.—A Coloring for Meats and Meat Products.
Claims use since Dec. 10, 1919.

Ser. No. 131,176. (CLASS 19. VEHICLES, NOT INCLUDING ENGINES.) CHAS. KAUFMANN & SONS, Santa Ana, Calif. Filed Apr. 15, 1920.

Particular description of goods.—Rear-View Mirrors for Automobiles, Motorcycles, and other Vehicles.
Claims use since about Feb. 1, 1920.

Ser. No. 131,226. (CLASS 29. BROOMS, BRUSHES, AND DUSTERS.) THE MOREY MERCANTILE CO., Denver, Colo. Filed Apr. 16, 1920.

SILVER BAND

Particular description of goods.—Brooms.
Claims use since about Nov. 1, 1919.

Ser. No. 131,227. (CLASS 29. BROOMS, BRUSHES, AND DUSTERS.) THE MOREY MERCANTILE CO., Denver, Colo. Filed Apr. 16, 1920.

MORADO

Particular description of goods.—Brooms.
Claims use since about Nov. 1, 1919.

Ser. No. 131,235. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) GEORGE C. SPENCER, South Bend, Ind. Filed Apr. 16, 1920.

Particular description of goods.—Perfumes.
Claims use since June 4, 1919.

Ser. No. 131,388. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ARTHUR HUGH MONTGOMERY, Montgomery, Ala. Filed Apr. 20, 1920.

Particular description of goods.—A Skin-Lotion.
Claims use since Nov. 28, 1919.

Ser. No. 131,397. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) LAX-TON-ALL CO., New York, N. Y. Filed Apr. 20, 1920.

ROSOLO

Particular description of goods.—A Reconstructive Tonic in Tablet Form.
Claims use since Mar. 25, 1920.

Ser. No. 131,557. (CLASS 26. MEASURING AND SCIENTIFIC APPLIANCES.) JACQUES BECK, New Orleans, La. Filed Apr. 24, 1920.

I do not claim the exclusive right to the use of the representation of the spectacles or of the word "Spex" apart from the mark shown in the drawing.
Particular description of goods.—Eyeglasses and Spectacles.
Claims use since 1904.

Ser. No. 131,723. (CLASS 7. CORDAGE.) CAYUGA LINEN & COTTON MILLS, INC., Auburn, N. Y. Filed Apr. 28, 1920.

SENECA

Particular description of goods.—Twine.
Claims use since January, 1915.

Ser. No. 131,724. (CLASS 7. CORDAGE.) CAYUGA LINEN & COTTON MILLS, INC., Auburn, N. Y. Filed Apr. 28, 1920.

CAYUGA

Particular description of goods.—Twine.
Claims use since January, 1915.

Ser. No. 131,725. (CLASS 7. CORDAGE.) CAYUGA LINEN & COTTON MILLS, INC., Auburn, N. Y. Filed Apr. 28, 1920.

OTISCO

Particular description of goods.—Twine.
Claims use since January, 1915.

Ser. No. 131,929. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) TYLER CHEMICAL COMPANY, Pawtucket, R. I. Filed May 1, 1920.

The words "Trade Mark" do not form a part of petitioner's mark and are expressly disclaimed. Said trademark consists of a red circle divided into quadrants with the word "Tyler" arranged therein in the form of an upright cross and is used for furniture-polish.
Particular description of goods.—Furniture-Polish.
Claims use since Oct. 1, 1919.

Ser. No. 131,953. (CLASS 35. BELTING, HOSE, MACHINERY PACKING, AND NON-METALLIC TIRES.) THE B. F. GOODRICH COMPANY, New York, N. Y. Filed May 3, 1920.

ANTELOPE

Particular description of goods.—Hose Made of Rubber Reinforced with Fabric.
Claims use since about 1901.

Ser. No. 131,957. (CLASS 35. BELTING, HOSE, MACHINERY PACKING, AND NON-METALLIC TIRES.) THE B. F. GOODRICH COMPANY, New York, N. Y. Filed May 3, 1920.

DIRUBCO

Particular description of goods.—Hose and Belting Made of Rubber Reinforced with Fabric.
Claims use since about July, 1916, on belting, and on hose since about October, 1917.

DECISIONS

OF THE

COMMISSIONER OF PATENTS

AND OF

UNITED STATES COURTS IN PATENT CASES.

DECISIONS OF THE U. S. COURTS.

U. S. Circuit Court of Appeals—Second Circuit.

A. KIMBALL CO. *v.* NOESTING PIN TICKET CO.

Decided December 16, 1919.

[262 Fed. Rep., 148.]

1. PATENTS—ATTRIBUTES OF "INVENTION" STATED.
While patentable "invention" is not a term of legal art or capable of judicial definition, yet it is a means only, or the embodiment of the inventive idea, and merits the title, even if the want it meets is not apparent until some previous invention, imperfectly satisfying the more universal want, discloses the subordinate and narrower need.

2. SAME—PATENT FOR PIN-TICKET DEVICE VALID.
The Thompson patent, No. 1,252,862, for an improved pin-ticket device to be attached to textile and other articles offered for sale, *Held* valid against the contention that it did not disclose invention.

3. SAME—WHEN MECHANICAL SKILL BECOMES INVENTION STATED.
As a mechanic is one who applies his trade by rule or rote and only uses what he learned yesterday to do the work of to-day, it may become invention where a mechanic uses insight or foresight to comprehend a problem and uses even the learning of yesterday to do new things in a new way.

APPEAL from the District Court of the United States for the Southern District of New York.

Patent infringement suit by the A. Kimball Company against the Noesting Pin Ticket Company. Decree for plaintiff, and defendant appeals. Affirmed.

STATEMENT OF THE CASE.

Action is upon Patent 1,252,862, issued to Eugene W. Thompson January 8, 1918. The subject of invention is a "pin ticket," which means a card or tag intended to bear price marks or other descriptive matter, and affixed to articles offered for sale (usually textile), by means of a piece of wire, so formed as to present a staple whose prongs pass through both card and cloth; but the base of said wire staple is so formed and prolonged (at right angles to the staple-points) as to embrace (when bent) the conjoined edges of the pierced cloth and card. The staple ends are then also bent over or back against the rear face of the card.

Of the claims in suit, the sixth defines the invention in most general terms, and is as follows:

In a pin ticket having a plurality of round-pointed double-shank pins formed of a single piece of wire, the wire between said pins engaging with the ticket to form a support therefor, the shank of said pins passing through the ticket, and the free ends of the wire being bent to engage with both surfaces of the ticket to hold the pins in engagement therewith.

The seventh claim is not sufficiently different to require quotation. The court below found the patent valid and infringed; defendant appeals.

Mr. Cyrus N. Anderson and *Mr. Walter K. Earle* for the appellant.

Mr. Nathan Heard and *Mr. Abr. A. Silberberg* for the appellee.

Before WARD, ROGERS, and HOUGH, Circuit Judges.

HOUGH, *Cir. J.*, (after stating the facts as above:)

Appellant states that the only substantial question here presented is validity; *i. e.* can invention be found in this "pin ticket?"

We accept the statement, and shall endeavor to answer the query, without bolstering decision by dwelling on the presumption attaching to grant of letters, or the admitted fact that defendant controls and manufactures under another patent, over which priority was awarded Thompson after a protracted interference. Such proceedings assume a belief in validity on the part of both contestants. (*Roth* v. *Harris*, 168 Fed., 279; 93 C. C. A., 581.)

(1) Invention, as we are instructed by the highest court, is not judicially to be defined; *i. e.*, it cannot be determined as to limit of meaning. But many attributes may be marked. Thus patentable invention is a means only; it is the embodiment of the inventive idea (*Corrington* v. *Westinghouse, etc., Co.*, 178 Fed., 715; 103 C. C. A., 479); and even the smallest invention, if it merits the title, must meet an existing want, yet that want, invoking invention, may never be apparent until some previous invention, imperfectly satisfying the more universal want, discloses the subordinate and narrower need (1 Rob. on Pats., 134).

It is this thought that justifies, and indeed compels, study of the prior art, as distinguished from anticipatory patents or uses. To know, not only what the "more universal want" was, but how far and by what means it had been supplied, is a process not seldom resulting in the validation of modest inventions, and the destruction of many of great pretense.

This indicates that "invention" is not a term of legal art, like "common carrier" or "contingent remainder;" nor can applicability be fixed by consulting dictionaries, while reports furnish, not precedents, but only illustrations. What does connect

As a mechanic is one who applies his trade by rule or rote and only uses what he learned yesterday to do the work of to-day, it may become invention where a mechanic uses insight or foresight to comprehend a problem and uses even the learning of yesterday to do new things in a new way.

APPEAL from the District Court of the United States for the Southern District of New York.

Patent infringement suit by the A. Kimball Company against the Noesting Pin Ticket Company. Decree for plaintiff, and defendant appeals. Affirmed.

STATEMENT OF THE CASE.

Action is upon Patent 1,252,862, issued to Eugene W. Thompson January 8, 1918. The subject of invention is a "pin ticket," which means a card or tag intended to bear price marks or other descriptive matter, and affixed to articles offered for sale (usually textile), by means of a piece of wire, so formed as to present a staple whose prongs pass through both card and cloth; but the base of said wire staple is so formed and prolonged (at right angles to the staple-points) as to embrace (when bent) the conjoined edges of the pierced cloth and card. The staple ends are then also bent over or back against the rear face of the card.

Of the claims in suit, the sixth defines the invention in most general terms, and is as follows:

In a pin ticket having a plurality of round-pointed double-shank pins formed of a single piece of wire, the wire between said pins engaging with the ticket to form a support therefor, the shank of said pins passing through the ticket, and the free ends of the wire being bent to engage with both surfaces of the ticket to hold the pins in engagement therewith.

The seventh claim is not sufficiently different to require quotation. The court below found the patent valid and infringed; defendant appeals.

Mr. Cyrus N. Anderson and *Mr. Walter K. Earle* for the appellant.

Mr. Nathan Heard and *Mr. Abr. A. Silberberg* for the appellee.

Before WARD, ROGERS, and HOUGH, Circuit Judges.

HOUGH, *Cir. J.*, (after stating the facts as above:)

Appellant states that the only substantial question here presented is validity; *i. e.* can invention be found in this "pin ticket?"

We accept the statement, and shall endeavor to answer the query, without bolstering decision by dwelling on the presumption attaching to grant of letters, or the admitted fact that defendant controls and manufactures under another patent, over which priority was awarded Thompson after a protracted interference. Such proceedings assume a belief in validity on the part of both contestants. (*Roth* v. *Harris*, 168 Fed., 279; 93 C. C. A., 581.)

(1) Invention, as we are instructed by the highest court, is not judicially to be defined; *i. e.*, it cannot be determined as to limit of meaning. But many attributes may be marked. Thus patentable invention is a means only; it is the embodiment of the inventive idea (*Corrington* v. *Westinghouse, etc., Co.*, 178 Fed., 715; 103 C. C. A., 479); and even the smallest invention, if it merits the title, must meet an existing want, yet that want, invoking invention, may never be apparent until some previous invention, imperfectly satisfying the more universal want, discloses the subordinate and narrower need (1 Rob. on Pats., 134).

It is this thought that justifies, and indeed compels, study of the prior art, as distinguished from anticipatory patents or uses. To know, not only what the "more universal want" was, but how far and by what means it had been supplied, is a process not seldom resulting in the validation of modest inventions, and the destruction of many of great pretense.

This indicates that "invention" is not a term of legal art, like "common carrier" or "contingent remainder;" nor can applicability be fixed by consulting dictionaries, while reports furnish, not precedents, but only illustrations. What does connect

the large word with the perhaps small thing is evidence; and litigations like this become studies of facts, as varying in patent matters as in other human contests.

(2) This record shows that, trivial as the article seems (*e. g.*) to ourselves, pin-tickets have long been a widely-used trade adjunct; also that much effort has been expended to produce them cheaply in quantity, yet affixable to a fabric's edge firmly and with ease, without pricking the operator or injuring what is marked.

The "more universal want" has been and still is largely supplied by the "Empire ticket," made under an expired patent (St. John, 340,961). The substantial difference between that ticket and Thompson's device is that the prongs of the latter's staple are formed, not by cutting a wire transversely and making thereby a sharp point, but by doubling the wire back on itself and so producing a smooth, blunt point.

The Bayer reissue, 13,769, shows that making smooth-pointed pins by doubling a small wire on itself was known before Thompson; no more is claimed for it. But the tool which rapidly and cheaply makes staple-points by cutting wire may leave burs or roughened edges, which, though usually negligible, cut (*e. g.*) delicate silk.

Thus the "narrower need" is disclosed, and Thompson is confessedly the first to supply it. Others have tried to; probably Bayer did; but his pin could not hold its ticket firmly, and devices clutching or binding, but not piercing, the fabric, have been put on the market, but without covering the ground.

Here, then, is a want shown to have long existed among intelligent merchants, whose desires are always studied by equally intelligent manufacturers, and the question recurs whether to furnish the means of supplying that want is invention.

(3) It is, of course, urged, and naturally, that no more than a mechanic's skill was needed to take the final step. But a mechanic is one who applies his trade by rule or rote, and only uses what he learned yesterday to do the work of to-day in the same old manner. He may do it excellently, but if he has, not only hindsight, but insight or foresight, first to comprehend the problem and use even the learning of yesterday to do the new thing in a new way, that mechanic has usually earned the inventor's title.

This is what Thompson has done, if the matter be reasoned from the premises of evidence. It is, however, an important evidential element that the trade world to which this little device must appeal, whether of manufacturers or buyers, evidently regards it as important. That word is always relative, and courts and juries should learn its meaning from the evidence, and not their own emotions.

Thus guided by the evidence, we find as matter of fact that the patent discloses invention, and in so doing we arrive at a result not new in this court, and do it in substantially the same way as heretofore. (*George Frost Co.* v. *Cohn*, 119 Fed., 505; 56 C. C. A., 185; *David* v. *Harris*, 206 Fed., 902; 124 C. C. A., 477; *Barry* v. *Harpoon, etc., Co.*, 209 Fed. 207; 126 C. C. A., 301; *Fonseca* v. *Suarez*, 232 Fed., 155; 146 C. C. A., 347.)

The decree is affirmed, with costs.

U. S. Circuit Court of Appeals—First Circuit.

BACKSTAY MACHINE & LEATHER CO. *v.* HAMILTON.

Decided January 6, 1920.

[262 Fed. Rep., 411.]

1. PATENTS—ENTIRE PRIOR ART CONSIDERED ON APPEAL IN DETERMINING VALIDITY, REGARDLESS OF CLAIM IN LOWER COURT.
   Although appellant assigned as error that the court below erred in holding the patent in suit anticipated by a particular patent and lower court stated that no device except that particular patent embodied plaintiff's device, nevertheless the court on appeal will consider the entire prior art as disclosed by the whole record.
2. SAME—INVENTION FOR FINISHING-WELT ANTICIPATED.
   The Schemmel patent, No. 1,226,600, claims 1, 2, 5, and 6, of May 15, 1915, for a finishing-welt, *Held* invalid because anticipated.
3. SAME—INVENTION FOR FINISHING-WELT HELD INVALID.
   The Schemmel patent, No. 1,226,600, claims 3 and 4, of May 15, 1917, for a finishing-welt, is invalid because for a combination of the article claimed to have been invented with some other article which the inventor does not describe.
4. SAME—DESIGN FOR MOLDING OR WELT VOID FOR LACK OF INVENTION.
   The Schemmel design patent, No. 51,804, for a design for a molding or welt, *Held* void for lack of invention.

APPEALS from the District Court of the United States for the District of Massachusetts; George H. Bingham, judge.

Two patent infringement suits by the Backstay Machine & Leather Company against Helen Wade Hamilton. Decrees for defendant, and plaintiff appeals. Affirmed.

Mr. William E. Dyre (*Mr. Henry D. Williams* and *Mr. George K. Woodworth* on the brief) for the appellant.

Mr. W. Orison Underwood for the appellee.

PATENT appeals Nos. 1423 and 1424.

Before JOHNSON and ANDERSON, Circuit Judges, and ALDRICH, District Judge.

JOHNSON, *Cir. J.*:

These were appeals from the final decrees of the District Court of Massachusetts in two patent cases. In one the plaintiff alleged infringement of Patent No. 1,226,600, issued May 15, 1917, to R. C. Schemmel, for a finishing-welt, hereinafter referred to as the article patent; and in the other infringement of Patent No. 51,804, issued February 19, 1918, to R. C. Schemmel, for a "design for a molding or welt," hereinafter referred to as the design patent.

There were six claims in the article patent, all of which were in issue. Under claims 1, 2, 5, and 6 a patent was claimed for a welt or molding constructed so that two longitudinal, parallel beads superimposed close together upon a base could be separated, the base between them nailed, stitched or otherwise sewed, to any article to cover rough joints, and then the beads, because of their resiliency, made to assume their former positions, thus hiding the tacks, stitches, or other securing means.

In his application the patentee thus described his invention:

> My present invention pertains to the finishing of leather and analogous work as used on vehicles and in other connections; and it contemplates the provision of a finishing welt constructed and arranged with a view to being readily nailed, stitched or otherwise attached to the article by which it is carried in such manner that subsequently to the nailing, stitching or other attachment, the welt can be made to assume or assumes of itself such a state that the attaching means will be entirely hidden from view and the finished appearance of the work as a whole will be enhanced.

Claim 1 of the patent is as follows:

> As a new article of manufacture, a welt comprising a body, and longitudinal parallel beads superimposed on and connected with the body, the body being constructed and arranged to permit of the beads being spread apart and subsequently resuming their normal close-together positions, for the purpose set forth.

Claims 2, 5, and 6 were substantially like claim 1.

Claims 3 and 4 were for a combination of an article, without describing any particular article, and the welt described in claim 1 and "attaching means" by which the welt could be attached to the article.

The court below found claims 1, 2, 5, and 6 void for lack of invention and anticipated, and claims 3 and 4 invalid. The reason for the finding of the court in regard to the latter claims was stated as follows:

> It does not seem to me that the third and fourth claims are valid; the invention, if any, resides in the welt and cannot be held to extend to and include any and every article to which the welt may be attached.

The design patent was for "the ornamental design for a molding or welt as shown," the one "shown" being that described in the article patent. This was found void for lack of invention.

The errors assigned in the suit upon the article patent are:

> (1) The court erred in holding claims 1, 2, 5, and 6 void for lack of invention over Patent No. 221,801, issued November 18, 1879, to A. B. Felt.
> (2) The court erred in holding claims 3 and 4 void for the reason that the invention, if any, resides in the welt, and cannot be held to extend to and include any and every article to which the welt may be attached.
> (5) The court erred in dismissing the bill of complaint, with costs to the defendant.

The other errors assigned were that the court erred in finding that the claims of the patent in suit were not infringed.

In the suit upon the design patent the errors assigned were:

> (1) The court erred in holding the patent in suit void for lack of invention over the prior art offered in evidence by the defendant.
> (4) The court erred in dismissing the bill of complaint, with costs to the defendant.

Errors 2 and 3, not given, related to infringement.

(1) The appellee contends that the validity of the article patent is not open on appeal, because the appellant, in his assignment of errors, has set out as error, not the decision, but the reason of the court, given in his opinion, for finding that claims 1, 2, 5, and 6 are void for lack of invention.

It is true that the learned judge sitting in the district court states in his opinion:

> Moldings or welts of the character here under consideration pertain to the art of upholstering. Concealed tack moldings are old, and have been made in various forms; but none of the devices that have been called to my attention, with a single exception, have embodied the characteristics of the plaintiff's device. The exception to which I refer is the product of a machine upon which a patent was granted to Alvin B. Felt, November 18, 1879, in United States Letters Patent No. 221,801.

While the appellant has alleged that the court below erred in holding that the patent in suit was anticipated by the patent to Felt, and although it was said by that court in its opinion that no other devices called to its attention "embodied the characteristics of the plaintiff's device," we think, upon appeal, we are not confined to a consideration of the patent to Felt only, but that we should consider the prior art as disclosed by the whole record. (*Electric Gaslighting Co. et al.* v. *Fuller et al.*, 59 Fed., 1003; 8 C. C. A., 442; Walk. on Pats., 5th Ed., sec. 655; *Brown* v. *Piper*, 91 U. S., 37, 41; 23 L. Ed., 200; *Slawson* v. *Grand Street R. R. Co.*, 107 U. S., 649, 652; 2 Sup. Ct., 663; 27 L. Ed., 576.)

We find, upon referring to the opinion, that the court below took into consideration, in determining whether the patent in suit was anticipated, not only the patent to Felt, but also the fact that "concealed tack moldings are old and have been made in various forms." We are entirely satisfied with the conclusion reached and the reasons stated in the opinion, which we quote:

> In that patent (the patent to Felt) it states that the cording attachment for sewing machines for which he sought a patent related "to the manufacture and application of corded strips to various articles or fabrics," including "trimmings for dresses, for cording seams of military trousers or the edges of cushions, and for other purposes."
> The cording produced by this machine is shown in defendant's Exhibit 23 and plaintiff's Exhibit W. It discloses two parallel beads or cords superimposed upon a base and close together, only one of which is capable of being moved back from the other, and, on being released, resuming or tending to resume its normal or close position to the other bead or cord. To make this corded structure into a finished welt it would only be necessary to turn under and secure the edges of the base as shown in plaintiff's Exhibit B introduced in evidence. This would involve nothing more than the use of mechanical skill, and that not of a high order. Although in the article produced by the Felt machine only one of the cords is capable of being moved back in relation to the other, and on being released of resuming its normal position, while in the structure of the plaintiff's patent each cord is capable of being moved back and again resuming its normal position, this is due to the positioning of the cords or strips. The principle by which it is accomplished is the same in both, and is clearly shown in the Felt construction.
> The language of Judge Sanborn in considering a similar question in *Warren Webster & Co.* v. *Dunham Co.* (181 Fed., 836, 839; 104 C. C. A., 346, 349, seems to me applicable. He there said:
> "Where a machine or a combination is discovered in a remote art, where it is used to perform a different function, and where it was not designed and was not apparently suitable to accomplish the thing desired, the application of it with proper mechanical adaptation to a new use is often the result of the exercise of the inventive faculty and may be protected by patent. But the thought that an existing machine or combination, discovered in the same art or one nearly analogous to it, designed and suitable to perform a similar function, may be used or adopted to accomplish the desideratum, is not the product of inventive genius, but the result of the application of the skill of the mechanic to the subject under consideration. It is only when the new use is so recondite and remote from that to which the old device and combination has been applied, or for which it was conceived, that its application would not occur to the mind of the ordinary mechanic skilled in the art, seeking to devise means to perform the desired function, with the old machine or combination before him, that its conception may rise to the dignity of invention."

(2, 3) We therefore think there was no error in finding that claims 1, 2, 5, and 6 of the article patent lacked invention, because anticipated by the patent to Felt, and by the prior art as disclosed by the record; nor do we find that there was any error

in finding that the third and fourth claims were invalid. These claims are not for an article of manufacture, but for the combination of the article which the inventor claims to have invented with some other article which he does not describe, and we think the court correctly held that—

the invention, if any, resides in the welt, and cannot be held to extend to and include any and every article to which the welt may be attached.

(4) In considering the design patent the court below said:

The question presented, so far as the validity of the design patent is concerned, is whether the patentee in his article patent having conceived of a welt having a base with superimposed parallel beads or raised portions, mechanically constructed to function in a given manner, which may be of various shapes, and beads of some shape being essential to the functioning of the device, can be said to have exercised inventive thought of a character sufficient to warrant a design patent for a welt with beads or raised portions circular in cross section. It seems to me that to state the question is to answer it; that, having devised an article of manufacture with a base having parallel beads which may be of any suitable shape and beads of some shape being essential to constitute the article, it cannot be invention warranting a design patent to conclude that they should be round in cross section rather than some other suitable shape.

Furthermore, the use of beads or raised portions, circular in cross section, in connection with moldings, whether superimposed upon a base or not, is of such long standing that I cannot on the evidence regard the use made of them by the patentee in his design as disclosing inventive thought. (*Tubular Rivet & Stud Co.* v. *Standard Finding Co.*, 231 Fed., 170, 173; 145 C. C. A., 358.) The conclusion reached renders it unnecessary to consider whether the design patent was an attempt at double patenting or not.

We see no occasion for disagreeing with the finding involved in this statement, or for adding anything to the reasoning by which it is sustained.

In each case—

The decree of the district court is affirmed, with costs to the appellee in this court.

U. S. Circuit Court of Appeals—Seventh Circuit.

JAY *et al.* v. WEINBERG *et al.*

Decided April 29, 1919; rehearing denied December 5, 1919.

[262 Fed. Rep., 973.]

PATENTS—INVENTION—ANALOGOUS USE—VACUUM SUCTION DEVICE FOR AUTOMOBILES ANTICIPATED BY WATER-LIFTING DEVICES.

The Higginson and Arundel patent, No. 1,067,814, and the Jay patents, Nos. 1,132,273 and 1,134,457, for vacuum suction devices for raising gasolene in an automobile from a main tank below the level of the carbureter to a secondary tank, *Held* anticipated by prior devices for lifting water from a lower to a higher level, which is not an analogous but the same art.

APPEAL from the District Court of the United States for the Eastern Division of the Northern District of Illinois.

Suit in equity by Webb Jay and the Stewart-Warner Speedometer Corporation against Frederick Weinberg and the Auto Parts Company. Decree for defendants, and complainants appeal. Affirmed.

For opinion below see 250 Fed., 469.

Mr. Charles Burton and *Mr. George L. Wilkinson* for the appellants.

Mr. R. A. Parker for the appellees.

Before BAKER, Circuit Judge, and LANDIS and ENGLISH, District Judges.

BAKER, *Cir. J.*:

This is an appeal from a final decree dismissing appellants' bill for infringement of the Higginson and Arundel patent, No. 1,067,814, and the Jay patents, Nos. 1,132,273 and 1,134,457, for vacuum suction means of raising gasolene in an automobile from a main tank below the level of the carbureter into a secondary tank from which gasolene flows to the carbureter by gravity.

(1) The trial court found that in the water-elevating art the principle of operation whereby a fluid is lifted by vacuum suction and discharged by gravity, and the general combinations of mechanical means for attaining the result, were old and well known long before appellants' patentees began their labors; that appellants' patentees, starting from this common ground, had made certain specific improvements which they were entitled to have protected; that the appellees, operating under Weinberg's patent, No. 1,229,360, had started from the same common ground and had made certain specific improvements; and that appellees' improvements do not overlap any of appellants'.

Consideration of the record, briefs, and oral argument, has led us to approve the findings of the trial court and the reasons therefor as expressed at length in *Jay* v. *Weinberg*, (D. C., 250 Fed., 469.)

The exigencies of the case have caused appellants to contend that—

the water-elevating art is too remote from the internal combustion engine art to warrant imputing knowledge of expedients in the former to persons engaged in the latter art.

No problem of the internal-combustion engine is present. To the gravity-fed carbureter it is immaterial where the feed-tank gets its supply. So appellants' insistence is that the art of elevating water from a lower to a higher reservoir is not analogous to the art of elevating gasolene from a lower to a higher reservoir. We agree that the arts are not analogous; they are identical.

(2) Where the general art has been developed by the pioneers, there is room for an adapter to have only a specific patent for his particular form of adaptation, and he is not privileged to exclude others from gleaning in the same open field. (*Loew Supply Co.* v. *Fred Miller Brewing Co.*, 138 Fed., 886; 71 C. C. A., 266.)

The decree is affirmed.

Changes in Classification.

(ORDER No. 2,603.)

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 9, 1920.

The following changes in the classification of inventions are hereby directed, to take effect immediately:

In class 55, Harrows and Diggers, (Division I,) establish subclasses—

Pivoted teeth—
153. Tooth with limited play,
154. Tooth-clamp adjustable.

The patents contained in these subclasses have been taken for the most part from class 287, Rod Joints or Couplings, subclasses 7, Harrow-tooth type, and 8, Harrow-tooth type, Tooth and bar, hereinafter abolished.

In class 56, Harvesters, (Division V,) establish the following subclasses and definitions:

Grain-cradles—
324.5. Connections.

Scythes—
Blades—
326.3. Connections—
326.4. Adjustable angle—
326.5. Side tang,
326.6. Nibs.

324.5. GRAIN-CRADLES, CONNECTIONS. Couplings peculiarly adapted for fastening the type of scythe used in grain-cradles to the snathes.

326.3. SCYTHES, BLADES, CONNECTIONS. Specialized for fastening scythes other than those used in cradles to the snathes.

326.4. SCYTHES, BLADES, CONNECTIONS, ADJUSTABLE ANGLE. Wherein the angle of the scythe to the snathe may be varied.

326.5. SCYTHES, BLADES, CONNECTIONS, ADJUSTABLE ANGLE, SIDE TANG. Shank or tang of the scythe having a projecting side lug seated in one of several cavities in the snathe.

326.6. SCYTHES, NIBS. Means for joining the nibs or handhold members to scythe-snathes or one member at right angles to another, after the manner of nib-couplings.

Note.—Compare class 279, CHUCKS OR SOCKETS, subclass 86, Socket type, Side detent, Single transverse bolt.

Note.—Compare class 287, ROD JOINTS OR COUPLINGS, subclass 54, Rigid angle-joints.

The patents contained in subclass 324.5 above have been taken for the most part from class 287, ROD JOINTS OR COUPLINGS, subclass 2, Cradle type, hereinafter abolished.

2. Cradle type,
3. Scythe type—
4. Adjustable angle—
5. Side tang.
6. Nib type,
7. Harrow-tooth type—
8. Tooth and bar.
11. Adjustable angle—
13. Arc connection,
Hinged—
15. Notched arc and detent,
16. Locking-pin,
17. Pivot-clamp,
18. Extension-tang,
19. Screw-clamp.
Rod to base, plate, or head—
22. Hinged,
Rod to base, plate, or head—
24. Handle to transverse tool-heads—
Platelike tool—
26. Socket integral with tool,
27. Resilient connection,
28. Socket in head—
29. Detachable bit—
30. Flat bit—
31. Plural,
32. Wedged-in handle—
33. Screw-actuated wedge,
34. Cap,
35. Cap,
36. Reinforcing-shield—
37. Integral with head,
Rod to base, plate, or head—
Handle to transverse tool-heads—
Socket in head—
38. Split,
39. Center rod,
40. Center bolt,
41. L connection,
42. Loop connection,
43. Y connection,
44. Integral tang,
45. Handle to platelike tool—
46. Trowel type—
47. Socket integral with tool.
Socket—
120. Integral with tool,
122. Spring-pressed detent.

The patents formerly contained in these subclasses have been placed for the most part in class 303, Tool-Handle Fastenings, hereinafter established, with the following exceptions: Those formerly contained in subclasses 2 to 6, inclusive, have been placed, respectively, in class 56, Harvesters, subclasses 324.5, Grain-cradles, Connections; 326.3, Scythes, Blades, Connections; 326.4, Scythes, Blades, Connections, Adjustable angle; 326.5, Scythes, Blades, Connections, Adjustable angle, Side tang, and 326.6, Scythes, Nibs, hereinbefore established, and those formerly contained in subclasses 7 and 8 have been placed for the most part in class 55, Harrows and Diggers, subclasses 153, Pivoted teeth, Tooth with limited play, and 154, Pivoted teeth, Tooth-clamp adjustable, hereinbefore established, and subclasses 94, Harrow-teeth, Spike, Clamped; 95, Harrow-teeth, Spike, Nutted; 96, Harrow-teeth, Spike, Wedged, and 97, Harrow-teeth, Spring, Sectional.

(Note.—Attention is called to the fact that subclass title 11, Adjustable angle, above abolished, still controls and those contained in subclasses 326.3, 326.4, 326.5, and 326.6 have been taken for the most part from class 287, ROD JOINTS OR COUPLINGS, subclasses 3, Scythe type; 4, Scythe type, Adjustable angle; 5, Scythe type, Adjustable angle, Side tang, and 6, Nib type, hereinafter abolished, respectively.

In class 279, CHUCKS OR SOCKETS, (Division XXIX,) abolish the following subclasses, with their definitions:

Socket type—
10. For plural tangs—
11. Forks,
13. Flat bits,
Multiple alternative—
15. End and side sockets,
88. Transverse,
92. Tang with transverse bar,
Transverse pin—
98. Pump-rod type.

The patents formerly contained in these subclasses have been placed for the most part in class 306, Tool-Handle Fastenings, hereinafter established, with the exception of those in subclass 98, which have been placed for the most part in class 287, Rod Joints or Couplings, subclass 58, Adjustable length.

In class 287, Rod Joints or Couplings, (Division XXIX,) abolish the following subclasses, with their definitions:

two subclasses indented thereunder—viz., 12, Ball and socket, and 14, Hinged.)

In class 287, Rod Joints or Couplings, (Division XXIX,) change the title of subclass 25, Rod to base, plate, or head, Handle to transverse tool-heads, Platelike tool, to read:

Rod to base, plate, or head—
25. Platelike body,

abolish the existing definition, and establish in lieu thereof the following definition:

25. ROD TO BASE, PLATE, OR HEAD, PLATELIKE BODY. The rod connected to a platelike body the plane of which is transverse the axis of the rod.

Note.—Compare this class, subclass 23.

Establish, in Division XXIX, class 306, Tool-Handle Fastenings, with the following subclasses and definitions, the patents contained in this class having been taken for the most part from the subclasses hereinbefore abolished in classes 279, Chucks or Sockets, and 287, Rod Joints or Couplings:

306.—TOOL-HANDLE FASTENINGS.
1. Miscellaneous.
2. Adjustable angle—
Pivoted—
3. Swiveled,
4. Bracing-bar,
5. Wedge or cam,
6. Multiple seat or socket,
7. Ball and socket—
8. Clamping-cheeks,
9. Radial screw,
10. Arc-shank connection,
11. Hinged—
12. Notched arc and detent—
13. Spring-actuated,
14. Locking-pin,
15. Screw-clamp,
16. Pivot-clamp—
17. Positive lock,
18. Locking-tang.

306.—TOOL-HANDLE FASTENINGS—Continued.
19. Hinged, freely swinging,
20. Resilient connection.
Rigid—
21. Tool end partial socket,
22. Socket attached—
23. Stud-and-slot interlock,
24. Welded, riveted, or bolted,
25. Interleaving,
26. Separate clamp,
27. Recess-seated,
Socket—
28. Movable detent,
29. Expanded or contracted part,
30. Screw,
31. End, integral,
32. Intermediate, transverse tool,

306.—TOOL-HANDLE FASTENINGS—Continued.
Rigid—
Socket—
33. Wedge—
34. Screw-actuated.
35. Headed securing rod or plate,
36. Headed securing rod and shield,
37. Reinforcing-shield,
38. Through securing-rod,
39. Split or divided head,
40. Loop or yoke connection,
41. Integral tang,
42. Handle and bit holder—
43. Interlocked bit and handle,
44. Trowel type,
45. Plural tangs, fork type.

R. F. WHITEHEAD, *Commissioner.*

Changes in Classification.

(ORDER No. 2,604.)

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 9, 1920.

It is hereby directed that class 287, Rod Joints or Couplings, be transferred from Division XXIX to Division XXXIX, to take effect immediately.

R. F. WHITEHEAD,
Commissioner.

Changes in Classification.

(ORDER No. 2,606.)

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 16, 1920.

The transfer of class 91, Coating, from Division XV to Division XVII is hereby directed, to take effect immediately.

R. F. WHITEHEAD,
Commissioner.

Changes in Classification.

(ORDER No. 2,607.)

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 18, 1920.

The following changes in the classification of inventions are hereby directed to take effect immediately:

In class 74, Machine Elements, (Division XLVII,) abolish subclass—

Machine-brakes—
46. Stop mechanisms.

The patents formerly contained in this subclass have been placed in class 192, Clutches and Power-Stop Control, subclass 116, Stop mechanisms, hereinafter established.

In class 192, Clutches and Power-Stop Control, (Division XLVII,) establish the following subclass and definition—

116. Stop mechanisms.

116. STOP MECHANISMS. Various mechanisms, usually automatic in operation, for stopping a machine when a predetermined result is reached or some part of the machine fails to function or when an operator's position renders him liable to injury.

The patents contained in this subclass have been taken from class 74, Machine Elements, subclass 46, Machine-brakes, Stop mechanisms, hereinbefore abolished.

In class 192, Clutches and Power-Stop Control, (Division XLVII,) in the sixth line of the class definition, change the words "does not include" to read *includes*, and cancel the last sentence of the definition.

R. F. WHITEHEAD,
Commissioner.

INDEX

TO THE

DECISIONS OF THE COMMISSIONER OF PATENTS AND OF THE UNITED STATES COURTS.

SEPTEMBER, 1920.

[The decisions of the Court of Appeals of the District of Columbia are indicated by a star (*), and of the United States Circuit Court of Appeals by the letter d.]

TABLE OF CASES.

Patent entitles holder to equivalents respecting unessential details, d Geo. Borgfeldt & Co. *et al. v.* Weiss	545
Interference, inadvertently-granted patent during pendency of joint application filed by patentee and another, burden of proof heavily on patentee, *Lambert *v.* Hope and Lambert	369
Invention, attributes of stated, d A. Kimball Co. *v.* Noesting Pin Ticket Co	709
Mechanical skill becomes invention where mechanic uses insight or foresight to do new things in a new way, dA. Kimball Co. *v.* Noesting Pin Ticket Co	709
Test in assembly of old elements, whether new result produced is in patentable sense, d Concrete Appliances Co. *et al. v.* Meinken *et al*	163
Particular patents, Callahan, No. 948,719, apparatus for distributing wet concrete, valid and not anticipated, d Concrete Appliances Co. et al. v. Meinken *et al*	163
Higginson and Arundel, No. 1,067,814, and Jay, Nos. 1,132,273 and 1,134,457, vacuum suction device for automobiles, anticipated, d Jay *et al. v.* Weinberg *et al*	712
Particular patents, Pfeffer, design No. 51,559, doll, valid and infringed, d Geo. Borgfeldt & Co. *et al. v.* Weiss	545
Schemmel, No. 1,226,600, finishing-welt, certain claims anticipated, dBackstay Machine & Leather Co. *v.* Hamilton	710
Design No. 51,804, molding or welt, void for lack of invention, d Backstay Machine & Leather Co. *v.* Hamilton	710
Smith, No. 948,746, apparatus for distributing wet concrete, as limited by prior Callahan patent, No. 948,719, void for want of invention, d Concrete Appliances Co. *et al. v.* Meinken *et al*	163
Thompson, No. 1,252,862, pin-ticket device, valid, dA. Kimball Co. *v.* Noesting Pin Ticket Co	709
Patentability, manually-controlled apparatus doing unitary work not an aggregation because involving successive steps, d Concrete Appliances Co. *et al. v.* Meinken *et al*	163
Priority of invention, award, *Hoenig *v.* Kendig	545
Reduction to practice, simple device, test unnecessary, *Hoenig *v.* Parker	367
Trade-marks, origin of mark no bearing on question of identity with another mark, *The Procter and Gamble Company *v.* Eney Shortening Company	369
The word "Esco" refused registration on the word "Crisco," for the same goods, *The Procter and Gamble Company *v.* Eney Shortening Company	369
Validity of patent, prior application for another patent affecting, dConcrete Appliances Co. *et al. v.* Meinken *et al*	163

DIGEST

OF THE

DECISIONS OF THE COMMISSIONER OF PATENTS AND OF THE UNITED STATES COURTS.

SEPTEMBER, 1920.

[Decisions of the Court of Appeals of the District of Columbia are indicated by one star (*), and of the United States Circuit Court of Appeals by the letter [4.]

ABANDONMENT OF INVENTION.

ALLEGED BURDEN OF PROOF.

In an interference proceeding one asserting the abandonment of the invention by another party has the burden of proving it, and where the only evidence relied upon is a delay of ten months after reduction to practice in filing the application for patent the burden is not sustained where the delay is explained by evidence of financial embarrassment. [*Hoenig v. Parker, 367.

CONSTRUCTION OF SPECIFICATIONS AND PATENTS.

See Invention, 1; Particular Patents.

1. CONSTRUCTION—"ADJUSTABLE."

The Callahan patent, No. 948,719, for an apparatus for elevating and distributing wet concrete to the floors of buildings under construction, claim 5, the phrase "said boom being adjustably connected with the tower and adapted to be arranged at various points in the height thereof" construed in accordance with the apparent intention of the draftsman to refer to the vertical change of the boom on the tower, which was effected by taking out bolts and bolting it again to a new position, although such is not adjustability in the most precise definition.

[4 Concrete Appliances Co. *et al. v.* Meinken *et al.*, 163.

2. INVENTION—ANALOGOUS USE—VACUUM SUCTION DEVICE FOR AUTOMOBILES ANTICIPATED BY WATER-LIFTING DEVICES.

The Higginson and Arundel patent, No. 1,067,814, and the Jay patents, Nos. 1,132,273 and 1,134,457, for vacuum suction devices for raising gasolene in an automobile from a main tank below the level of the carbureter to a secondary tank, *Held* anticipated by prior devices for lifting water from a lower to a higher level, which is not an analogous but the same art.

[4 Jay *et al. v. Weinberg et al.*, 712.

DELAY IN FILING APPLICATIONS.

See Abandonment of Invention.

DESIGNS.

See Infringement; Particular Patents, 2, 5, 7.

ENTITLED TO EQUIVALENTS RESPECTING NON-ESSENTIAL DETAILS.

A design patent for a doll entitles the holder to the usual range of equivalents with respect to known prior unessential details, and though the patent drawings show a doll with a cap the figure shown is included within the claim of the patent, whether the doll is provided with painted hair, real hair, bathing-cap, or military or naval cap or any other standard form of head-dress.

IDENTITY OF TRADE-MARKS.

See Trade-Marks, 2.

INADVERTENTLY-GRANTED PATENT.

See Interference.

INFRINGEMENT.

See Particular Patents, 2.

1. DESIGN PATENT DEPENDS ON IMPRESSION PRODUCED ON PURCHASERS.
The question of infringement of a design patent for a doll is a question as to the impression produced on would-be purchasers.
[d Geo. Borgfeldt & Co. *et al. v.* Weiss, 545.

2. TEST OF DESIGN.
Infringement of a design patent for a doll turns upon whether there is identity of appearance, whether the effect produced upon the eye is the same, and whether there is substantial identity of design, and the persons to be deceived are not experts, but ordinary observers, giving such attention to the matter as purchasers usually give. [* Id.

INTERFERENCE.

See Abandonment of Invention; Priority of Invention; Reduction to Practice.

1. BURDEN OF PROOF—INADVERTENTLY-GRANTED PATENT.
In an interference between an inadvertently-granted patent and an application filed jointly by the patentee and another prior to the filing of the application on which the patent was granted the burden of proof is heavily upon the patentee.
[* Lambert *v.* Hope and Lambert, 369.

2. EVIDENCE OF JOINT OR SOLE INVENTORSHIP.
In an interference between Lambert, whose patent was inadvertently granted during the pendency of an application filed jointly by him and Hope, evidence considered and *Held* that it failed to sustain Lambert's contention that he was the sole inventor. [* Id.

INVENTION.

See Construction of Specifications and Patents, 2; Particular Patents, 1, 2, 5, 6, 7; Validity of Patents, 1.

1. TEST—"NEW RESULT."
"The test of the presence of invention in a new assembly of old elements is sometimes said to be whether a new result is accomplished. This is often not a helpful rule, because its application involves definition of the phrase 'new result,' and this opens the original difficulty. Within a narrow definition, every new combination of old elements gets a new result; but this is not the sense in which the phrase is rightly used as indicative of invention."
[d Concrete Appliances Co. *et al. v.* Meinken *et al.*, 163.

2. ATTRIBUTES STATED.
While patentable "invention" is not a term of legal art or capable of judicial definition, yet it is a means only, or the embodiment of the inventive idea, and merits the title, even if the want it meets is not apparent until some previous invention, imperfectly satisfying the more universal want, discloses the subordinate and narrower need.
[d A. Kimball Co. *v.* Noesting Pin Ticket Co., 709.

3. MECHANICAL SKILL—STATED.
As a mechanic is one who applies his trade by rule or rote and only uses what he learned yesterday to do the work of to-day, it may become invention where a mechanic uses insight or foresight to comprehend a problem and uses even the learning of yesterday to do new things in a new way. [d Id.

NEW RESULTS.

See Construction of Specifications and Patents, 2; Invention, 1; Patentability, 2.

PARTICULAR PATENTS.

1. CALLAHAN—NO. 948,719—DEVICE FOR DISTRIBUTING WET CONCRETE—VALID—NOT ANTICIPATED.
The Callahan patent, No. 948,719, for an apparatus for distributing wet concrete, consisting of an elevating-tower and devices for spreading same over structure, though a combination, *Held* to show invention and not to have been anticipated.
[d Concrete Appliances Co. *et al. v.* Meinken *et al.*, 163.

2. PFEFFER—NO. 51,559—DOLL—VALID—INFRINGED.
The Pfeffer design patent, No. 51,559, for a doll, *Held* valid and infringed.
[d Geo. Borgfeldt & Co. *et al. v.* Weiss, 545.

3. SCHEMMEL—NO. 1,226,600—FINISHING-WELT—ANTICIPATED.
The Schemmel patent, No. 1,226,600, claims 1, 2, 5, and 6, of May 15, 1915, for a finishing-welt *Held* invalid because anticipated.
[d Backstay Machine & Leather Co. *v.* Hamilton, 710.]

4. SAME—SAME—FINISHING-WELT—INVALID.
The Schemmel patent, No. 1,226,600, claims 3 and 4, of May 15, 1917, for a finishing-welt, is invalid because for a combination of the article claimed to have been invented with some other article which the inventor does not describe. [d Id.

5. SAME—DESIGN—NO. 51,804—MOLDING OR WELT—VOID FOR LACK OF INVENTION.
The Schemmel design patent, No. 51,804, for a design for a molding or welt, *Held* void for lack of invention. [d Id.

6. SMITH—NO. 948,746—APPARATUS FOR DISTRIBUTING WET CONCRETE—INVALID FOR LACK OF INVENTION.
The Smith patent, No. 948,746, for an apparatus for distributing wet concrete, as limited by the prior Callahan patent, No. 948,719, *Held* not to show invention.
[d Concrete Appliances Co. *et al. v.* Meinken *et al.*, 163.

7. THOMPSON — NO. 1,252,862 — PIN-TICKET DEVICE — VALID.
The Thompson patent, No. 1,252,862, for an improved pin-ticket device to be attached to textile and other articles offered for sale, *Held* valid against the contention that it did not disclose invention.
[d A. Kimball Co. *v.* Noesting Pin Ticket Co., 709.

PATENTABILITY.

See Invention.

1. ANALOGOUS USE.
Apparatus for elevating and distributing wet concrete *Held* not a mere double use of earlier apparatus for loading coal.
[d Concrete Appliances Co. *et al. v.* Meinken *et al.*, 163.

2. NEW RESULT.
The elevation and gravity distribution of wet concrete to and around the successive floors of a building being constructed and all in a semi-automatic way is a new result in a patentable sense. [d Id.

3. AGGREGATION.
Apparatus for elevating and distributing wet concrete to the floors of buildings under construction, which is in a fair sense a unitary work, does not become an aggregation merely because it involves successive steps under manual control. [d Id.

PRIOR PATENTS.

Construction of Specification and Patents, 2; See Particular Patents, 1

PRIORITY OF INVENTION.

INTERFERENCE.
In an interference between H. and K. priority of invention awarded to H. on the ground that he was the first to conceive and was diligent up to the time of his reduction to practice. [* Hoenig *v.* Kendig, 545.

PUBLICATION.

See Validity of Patents, 1.

REDUCTION TO PRACTICE

See Abandonment of Invention; Priority of Invention.

INTERFERENCE—SIMPLE DEVICE.
A two-part insulation having means for holding the parts in assembled relationship is of such a simple nature that it needed no test to show that it would do what was claimed for it. [* Hoenig *v.* Parker, 367.

REGISTRATION OF TRADE-MARKS.

See Trade-Marks.

SIMILARITY OF TRADE-MARKS.

See Trade-Marks, 1.

STATE OF THE ART.

See Validity of Patents.

TERMINOLOGY.

See Construction of Specifications and Patents, 1.

TEST.

See Infringement, 2; Invention, 1; Reduction to Practice.

TRADE-MARKS.

1. SIMILARITY—"ESCO" AND "CRISCO."
The mark "Esco" is so similar to "Crisco" as to be likely to cause confusion when used on substantially identical goods.
[* The Procter and Gamble Company *v.* Eney Shortening Company, 369.

2. SAME—ORIGIN HAS NO BEARING ON QUESTION OF IDENTITY.
That a mark is made up of the initials of the corporation applying for registration with the termination "Co." has no bearing on the question of its identity with another mark. [* Id.

VALID PATENTS.

See Particular Patents, 1, 2, 7.

VALIDITY OF PATENTS.

1. AFFECTED BY PRIOR APPLICATION FOR ANOTHER PATENT.
A patent applied for after filing of application for but before issue of another patent in the same art should, as to anticipation and the presence of invention, be judged upon the basis of which the earlier application is a part, though it was not a part of the prior art in the sense in which that phrase is used with reference only to publication.
[d Concrete Appliances Co. *et al. v.* Meinken *et al.*, 163.

2. ENTIRE PRIOR ART CONSIDERED ON APPEAL.
Although appellant assigned as error that the court below erred in holding the patent in suit anticipated by a particular patent and lower court stated that no device except that particular patent embodied plaintiff's device, nevertheless the court on appeal will consider the entire prior art as disclosed by the whole record.
[d Backstay Machine & Leather Co. *v.* Hamilton, 710.

VOID PATENTS.

See Particular Patents, 3, 4, 5, 6.

Flynn, James, Soo Junction, Mich. Sheet-music moving and time-keeping apparatus. No. 1,352,363; Sept. 7; v. 278; p. 124.
Folmer, William F., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic-film sheath. No. 1,351,998; Sept. 7; v. 278; p. 57.
Foster, Harry J., Chicago, Ill. Circle-guide for oxy-acetylene torches. No. 1,351,846; Sept. 7; v. 278; p. 26.
Fowler, Charles, Tomkins Cove, N. Y. Potato picker or gatherer. No. 1,351,948; Sept. 7; v. 278; p. 47.
Fox, George P., *et al.* (See Bear, Claude A., assignor.)
Freedman, Hyman, Chicago, Ill. Spring structure. No. 1,351,748; Sept. 7; v. 278; p. 7.
French Battery & Carbon Co. (See Ruhoff, Otto E., assignor.)
Freundt, Louis J., Chicago, Ill., assignor to American Can Company, New York, N. Y. Shipping and dispensing container. No. 1,351,900; Sept. 7; v. 278; p. 38.
Friedman, Charles. (See Rudolph, Raymond H., assignor.)
Frothingham, Samuel T., Allston, assignor to Fibre Manufacturing Company, Boston, Mass. Water-closet seat. No. 1,352,058; Sept. 7; v. 278; p. 67.
Fuchs, Ernest, Paris, assignor to L. Renault, Billancourt, France. Forging valves and similar articles. No. 1,351,942; Sept. 7; v. 278; p. 47.
Fuller, Leonard F., Palo Alto, assignor to Federal Telegraph Company, San Francisco, Calif. Radiotelegraphy. No. 1,352,059; Sept. 7; v. 278; p. 67.
Gaston, Ralph M., Chicago, Ill. Internal-combustion engine. No. 1,351,950; Sept. 7; v. 278; p. 48.
Gates Rubber Company, The. (See Yelm, Charles W., assignor.)
Gearhart, Clyde M. (See Montuori, Felix, assignor.)
General Electric Company. (See Berg, Ernst J., assignor.)
General Electric Company. (See Case, Frank E., assignor.)
General Electric Company. (See Crocker, Arthur T., assignor.)
General Electric Company. (See Crocker, Clarence T., assignor.)
General Electric Company. (See Dickinson, E. D., and Wilkinson, assignors.)
General Electric Company. (See Doran, John H., assignor.)
General Electric Company. (See Dwyer, William O., assignor.)
General Electric Company. (See Junggren, Oscar, assignor.)
General Electric Company. (See Lord, Henry C., assignor.)
General Electric Company. (See Murphy, Edwin J., assignor.)
General Electric Company. (See Wilson, Leonard, assignor.)
General Motor Corporation. (See Hamilton, Alexander C., assignor.)
Geran, George B., Miami, Fla., assignor of one-half to S. L. Smith, Williamsburg, Ky. Internal-combustion engine. No. 1,352,187; Sept. 7; v. 278; p. 90.
Gerhart, Jacob G., Fredericksburg, Pa. Air-pump. No. 1,351,847; Sept. 7; v. 278; p. 27.
Gibson, Arthur H., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Centrifugal brake for power-trucks. No. 1,352,000; Sept. 7; v. 278; p. 67.
Gibson, William A. (See Jeffries, Z., and Gibson.)
Gilbert, William L., Clock Company. (See Hyde, Charles H., assignor.)
Giles, Edgar B., Los Angeles, Calif. Trestle-joint. No. 1,352,188; Sept. 7; v. 278; p. 91.
Gingras, Edward F., Buffalo, N. Y. Apparatus for manufacturing belting. No. 1,351,901; Sept. 7; v. 278; p. 88.
Ginn, Percy E. (See Johnson, H. L., and Raymer, assignors.)
Glaze, Herbert L. (See McFate, J. N., and Glaze, assignors.)
Goddard, Clair E., Omaha, Nebr. Recording apparatus. No. 1,351,902; Sept. 7; v. 278; p. 38.
Goldberg, Jacob, assignor to The Goldberg Padding Machine Company, Cincinnati, Ohio. Cloth-feed mechanism for blindstitch sewing-machines. No. 1,352,061; Sept. 7; v. 278; p. 67.
Goldberg Padding Machine Company, The. (See Goldberg, Jacob, assignor.)
Goodwin, Grover C. (See Goodwin, James D., and G. C.)
Goodwin, James D. and G. C., Richmond, Va. Liquid-fuel burner. No. 1,351,848; Sept. 7; v. 278; p. 27.
Gorton, George. (See Tausch, Joseph H., assignor.)
Gorton, Robert, deceased; C. W. Noyes, administrator, Brookline, Mass. Making garters. No. 1,352,258; Sept. 7; v. 278; p. 105.
Graf, Fritz, Sr., Collingdale, Pa. Fiber-dressing machine. No. 1,351,749; Sept. 7; v. 278; p. 7.
Graves, Inez, Seattle, Wash. Ironing-board. No. 1,352,259; Sept. 7; v. 278; p. 105.
Gray, James A., assignor to American Can Company, San Francisco, Calif. Multiple-disk-cutting apparatus. No. 1,351,951; Sept. 7; v. 278; p. 48.
Gray Telephone Pay Station Company, The, *et al.* (See Long, George A., assignor.)
Graziano, Joseph, Newburgh, N. Y. Temperature-regulator. No. 1,352,364; Sept. 7; v. 278; p. 125.
Great Northern Paper Company. (See Sutherland, Forrest A., assignor.)
Green, Charles F., Defiance, assignor to Industrial Research Corporation, Toledo, Ohio. Fuel-feed system. No. 1,352,123; Sept. 7; v. 278; p. 79.
Green, William R., Los Angeles, Calif. Safety-stirrup. No. 1,352,406; Sept. 7; v. 278; p. 132.
Grönroos, Jakob, Fairport Harbor, Ohio. Antiskid device for automobiles. No. 1,351,750; Sept. 7; v. 278; p. 7.
Guinand, Gustavius, Los Angeles, Calif. Valve-spring lifter. No. 1,352,407; Sept. 7; v. 278; p. 132.
Gunther, George, Seattle, Wash. Nonskid device for motor-vehicles. No. 1,352,260; Sept. 7; v. 278; p. 105.
Guthrie, Edwin. (See Whitten, Wilmot W., assignor.)
Haeberlein, Max, Mountain Lakes, N. J. Fly-ball governor. No. 1,352,189; Sept. 7; v. 278; p. 91.
Hagerstrom, John A., assignor to Victor Typewriter Company, Scranton, Pa. Main-shaft drive. No. 1,352,124; Sept. 7; v. 278; p. 79.
Hamel Shoe Machinery Company. (See Laughton, R. E., and Barnes, assignors.)
Hamilton, Alexander C., Pontiac, assignor to General Motors Corporation, Detroit, Mich. Radiator for motor-vehicles. No. 1,352,190; Sept. 7; v. 278; p. 91.
Hanson, H. L., Butte, Mont., and W. B. Sawyer, Edmonds, Wash. Burning tree-stumps. No. 1,352,261; Sept. 7; v. 278; p. 105.

Hanson & Van Winkle Company, The. (See Todd, E. N., and King, assignors.)
Hara, Fusataro, San Francisco, Calif. Ice-cream-delivery machine. No. 1,351,903; Sept. 7; v. 278; p. 38.
Harding, Henry O., Minneapolis, Minn. Conveying and elevating apparatus. No. 1,352,262; Sept. 7; v. 278; p. 105.
Harding, Henry O., assignor to Washburn Crosby Company, Minneapolis, Minn., Conveyer. No. 1,352,263; Sept. 7; v. 278; p. 105.
Harman, Walter A. (See Ricketts, Lawrence M., assignor.)
Harrah, Hillis A., Kansas City, Mo., assignor of one-half to L. T. Leimbach, Rosedale, Kans. Driving-gearing for tractors. No. 1,352,125; Sept. 7; v. 278; p. 79.
Hartman, Peter B., Watertown, N. Y. Automobile-horn. No. 1,351,904; Sept. 7; v. 278; p. 38.
Harvey, Peter L., Chicago, Ill. Flying-machine. No. 1,351,905; Sept. 7; v. 278; p. 39.
Hatfield, Richard H., Brooklyn, N. Y. Means for synchronizing and harmonizing moving-picture exhibitions. No. 1,352,126; Sept. 7; v. 278; p. 80.
Hays, Charles M. (See Orbin, George, assignor.)
Heath, Harry E., Newark, assignor to F. Conlin, Elizabethport, N. J. Driving mechanism. No. 1,351,999; Sept. 7; v. 278; p. 57.
Heeter, Charles M., Butler, Pa. Valve for deep wells. No. 1,351,906; Sept. 7; v. 278; p. 39.
Heine, Herman, Brooklyn, assignor to A. Kimball Company, New York, N. Y. Pin-pointing machine. No. 1,351,849; Sept. 7; v. 278; p. 27.
Hellmund, R. E., Swissvale, and B. S. Moore, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company. Arrangement of leads for dynamo-electric machines. No. 1,351,907; Sept. 7; v. 278; p. 39.
Henderson, John, Chicago, Ill. Internal-combustion engine. No. 1,352,127; Sept. 7; v. 278; p. 80.
Henig Engine Co. (See Henig, Frank L., assignor.)
Henig, Frank L., assignor to Henig Engine Co., Chicago, Ill., Pneumatic tool. No. 1,352,191; Sept. 7; v. 278; p. 91.
Hentschel, Paul J., Baltimore, Md. Bottle-stopper. No. 1,352,062; Sept. 7; v. 278; p. 68.
Hernacki, John, Alexandria, La. Shade-roller support. No. 1,352,264; Sept. 7; v. 278; p. 105.
Herndon, William T., Parkton, N. C. Plow. No. 1,351,850; Sept. 7; v. 278; p. 28.
Herschede Hall Clock Company, The. (See Herschede, W. J. and Cohan, assignors.)
Herschede, W. J., and C. Cohan, assignors to The Herschede Hall Clock Company, Cincinnati, Ohio. Speed-regulating device. No. 1,352,419; Sept. 7; v. 278; p. 134.
Hershey, Martin E., Arlington, N. J. Air-exhauster for steam-radiators. No. 1,352,265; Sept. 7; v. 278; p. 106.
Hiatt, James L. (See Drey, L. A., and Hiatt.)
Hidden, Charles P., assignor to Nitrogen Products Company, Providence, R. I. Process and means for producing metallic cyanids. No. 1,352,192; Sept. 7; v. 278; p. 91.
Hidden, Charles P., Providence, R. I., assignor to Nitrogen Products Company. Fixing atmospheric nitrogen. No. 1,352,193; Sept. 7; v. 278; p. 92.
Hill, Clarence A., Columbus, assignor to The Champion Kerosene-Burner Company, Kenton, Ohio. Kerosene-gas-burning furnace. No. 1,352,063; Sept. 7; v. 278; p. 68.
Hillfield Body Company, The. (See Schofield, Frederick C., assignor.)
Hilton, R. W. (See Catlin G. L., and Morrison, assignors.)
Hinchman, Mortimer L., Brooklyn, N. Y. Safety-envelop blank. No. 1,351,851; Sept. 7; v. 278; p. 28.
Hines, John. (See Craigie, F., and Hines.)
Hirsch, Morris, assignor to Bilur Motor Appliance Company, New York, N. Y. Electrical system for motor-vehicles and the like. No. 1,352,266; Sept. 7; v. 278; p. 106.
Hlavaty, Joe, Jr., Wallis, Tex. Sunken-ship indicator. No. 1,352,000; Sept. 7; v. 278; p. 57.
Hodges, Ralph T. (See Stevens, Howard M., assignor.)
Hoefener, Edward W., Los Angeles, Calif. Traveling stool attachment for barbers' chairs. No. 1,352,409; Sept. 7; v. 278; p. 132.
Hoff, Leslie D., Newark, N. J. Combination slitter and perforator. No. 1,351,751; Sept. 7; v. 278; p. 7.
Hoffmann-La Roche Chemical Works, The. (See Müller, Emil, assignor.)
Hofmann, William G., assignor to Howard B. Sherman, Battle Creek, Mich. Cover-locking device for grease-cups. No. 1,352,064; Sept. 7; v. 278; p. 68.
Hojgaard, Anders, C. E., Copenhagen, Denmark. Device for automatic extinction or dampening of the flame in gas-cookers. No. 1,352,001; Sept. 7; v. 278; p. 57.
Holman, Stephen W. (See Andrews, M. L., and Holman.)
Homan, John G., Steubenville, Ohio, assignor, by mesne assignments, to W. H. Keller, Norton, Va. Alloy. No. 1,352,367; Sept. 7; v. 278; p. 125.
Hood, William C., Chicago, Ill. Commutator-brush. No. 1,352,408; Sept. 7; v. 278; p. 132.
Hooker, Leslie E., Lowell, Mass. Machine for making cartridge-shells. No. 1,352,194; Sept. 7; v. 278; p. 92.
Hooper, Harris G., San Francisco, Calif. Aeroplane construction. No. 1,351,852; Sept. 7; v. 278; p. 28.
Honeywell, Edward R., Garber, Okla. Walking-tractor. No. 1,351,752; Sept. 7; v. 278; p. 7.
Hopedale Manufacturing Company. (See Northrop, Jonas, assignor.)
Horsey, Melvin, Crisfield, Md. Advertising device. No. 1,352,368; Sept. 7; v. 278; p. 125.
Horton, Dock G., Birmingham, Ala. Shade-roller. No. 1,352,410; Sept. 7; v. 278; p. 133.
Hottenstein, Philip, Gleason, Wis. Sign. No. 1,352,065; Sept. 7; v. 278; p. 68.
Hover, Charles F., Conrad, Mont. Mechanical movement. No. 1,351,753; Sept. 7; v. 278; p. 7.
Howe, Andrew F., assignor, by mesne assignments, to Howe Safety Appliance Company, Granite City, Ill. Safety-guard for rotary grinding-machines. No. 1,351,908; Sept. 7; v. 278; p. 39.
Howe Safety Appliance Company. (See Howe, Andrew F., assignor.)
Howe Scale Company. (See Souander, Andrew, assignor.)
Howell, Clarence S., assignor, by mesne assignments, of one-half to L. McGuire, New York, N. Y. Concrete-pile construction. No. 1,352,128; Sept. 7; v. 278; p. 80.
Hubard, Archibald B., Ogontz, Pa. Antifriction roller and ball-bearing. No. 1,351,754; Sept. 7; v. 278; p. 8.
Hubbell, Lindley D., Hartford, Conn. Firearm. No. 1,352,267; Sept. 7; v. 278; p. 106.

James, Eugene, Lincolnton, N. C. Automobile-drive. No. 1,352,130; Sept. 7; v. 278; p. 80.
Jefferson, Daniel H., Los Angeles, assignor to F. E. Anders, Alhambra, Calif. Gaging means. No. 1,352,270; Sept. 7; v. 278; p. 107.
Jeffrey Manufacturing Company, The. (See Ball, Albert, assignor.)
Jeffrey Manufacturing Company, The. (See Levin, Niles D., assignor.)
Jeffries, Z., and W. A. Gibson, assignors to The Aluminum Castings Company, Cleveland, Ohio. Alloy. No. 1,352,271; Sept. 7; v. 278; p. 107.
Jeffries, Z., and W. A. Gibson, assignors to The Aluminum Castings Company, Cleveland, Ohio. Alloy. No. 1,352,272; Sept. 7; v. 278; p. 107.
Jenckes Knitting Machine Company. (See Miller, Max C., assignor.)
Jenkins, Robert C., Bessemer, Ala. Automobile-lock. No. 1,352,132; Sept. 7; v. 278; p. 81.
Jennings, Victor H., assignor, by mesne assignments, to F. R. Batchelder, Worcester, Mass. Woven pocketed carrier. No. 1,352,133; Sept. 7; v. 278; p. 81.

Johnson, Benjamin H., and B. M. Phelps, said Johnson assignor to W. S. Phelps, Roanoke, Va. Bed-frame connection. No. 1,351,758; Sept. 7; v. 278; p. 8.

Johnson, Carl G., Eau Claire, Wis. Camera. No. 1,352,134; Sept. 7; v. 278; p. 81.

Johnson, Frank L., Akron, Ohio. Collapsible tire-core. No. 1,352,274; Sept. 7; v. 278; p. 107.

Johnson, Harry L., Boston, Mass., and M. Raymer, Battle Creek, Mich., assignors to P. E. Ginn, Boston, Mass. Machine for sealing cartons. No. 1,352,197; Sept. 7; v. 278; p. 93.

Johnson, Lawrence E., assignor, by mesne assignments, to Mattie S. Johnson, Melrose, Mass. Method of and apparatus for heat-treating metals. No. 1,351,909; Sept. 7; v. 278; p. 39.

Johnson, Mattie S. (See Johnson, Lawrence E., assignor.)

Johnson, Ralph D., Fairbury, Ill. Clothesline. No. 1,352,273; Sept. 7; v. 278; p. 107.

Johnston, E. A., and E. J. Kane, assignors, by mesne assignments, to International Harvester Company, Chicago, Ill. Tractor steering mechanism. No. 1,351,759; Sept. 7; v. 278; p. 9.

Joiris, Jean L., Wandre, Belgium. Shotgun and like gun. No. 1,351,952; Sept. 7; v. 278; p. 48.

Jones, Charles J., Cheyenne, Wyo. Weather-strip. No. 1,352,276; Sept. 7; v. 278; p. 107.

Jones, Emil J., Jamestown, N. Y. Knockdown sheet-metal drawer. No. 1,352,002; Sept. 7; v. 278; p. 57.

Jones, George G., Cleveland, assignor to Industrial Research Corporation, Toledo, Ohio. Device for removing tires from rims. No. 1,352,135; Sept. 7; v. 278; p. 81.

Jones, John J., Wichita, Kans. Automobile-body construction. No. 1,352,066; Sept. 7; v. 278; p. 68.

Jones, Oliver R., Welland, Ontario, Canada. Wrench. No. 1,352,136; Sept. 7; v. 278; p. 82.

Junggren, Oscar, Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine. No. 1,352,276; Sept. 7; v. 278; p. 108.

Junggren, Oscar, Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine. No. 1,352,277; Sept. 7; v. 278; p. 108.

Junggren, Oscar, Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine. No. 1,352,278; Sept. 7; v. 278; p. 108.

Kallom, F. W., Malden, and P. S. Toennesen, Everett, Mass. Sanding device. No. 1,351,760; Sept. 7; v. 278; p. 9.

Kane, Edmund J. (See Johnston E. H., and Kane.)

Keller, William H. (See Homan, John G., assignor.)

Kennard, Joseph S., Jr., New York, N. Y. Combined motion-picture camera and projector. No. 1,352,003; Sept. 7; v. 278; p. 57.

Kennedy, Joseph, Richmond Hill, assignor to The Clements Co., New York, N. Y. Bolt-anchor. No. 1,352,199; Sept. 7; v. 278; p. 93.

Kennedy, Joseph, Richmond Hill, assignor, by mesne assignments, to The Orsbee Co., Inc., New York, N. Y. Bolt-anchor. No. 1,352,200; Sept. 7; v. 278; p. 93.

Kennedy, Joseph, Richmond Hill, assignor, by mesne assignments, to The Orsbee Co., Inc., New York, N. Y. Bolt-anchor. No. 1,352,201; Sept. 7; v. 278; p. 93.

Kenney, David T., North Plainfield, N. J. Heating system. No. 1,352,371; Sept. 7; v. 278; p. 126.

Kenny, William J. (See Doyle, J. H., and Kenny.)

Kent, Arthur A. (See Richter, William H., assignor.)

Keppel, Jesse E., assignor to International Aerial Navigation Company, St. Louis, Mo. Tail-light signal. No. 1,352,279; Sept. 7; v. 278; p. 108.

Kessel, Fred, New York, N. Y. Caster. No. 1,352,004; Sept. 7; v. 278; p. 58.

Kessler, John H., Binghamton, N. Y. Extension window-screen. No. 1,352,372; Sept. 7; v. 278; p. 126.

Kettering, Charles F., assignor to Delco-Light Company, Dayton, Ohio. System of electrical control. No. 1,351,910; Sept. 7; v. 278; p. 40.

Keyser, Isaac N., Urbana, Ohio. Vermin-exterminator. No. 1,352,067; Sept. 7; v. 278; p. 69.

Kidney, Harvey R., Cleveland, Ohio. Compensating driving mechanism for motor-vehicles. No. 1,351,761; Sept. 7; v. 278; p. 9.

Klewicz, John, assignor to The Reece Button Hole Machine Company, Boston, Mass. Sewing-machine. No. 1,352,280; Sept. 7; v. 278; p. 108.

Kimball, A., Company. (See Heine, Herman, assignor.)

King, Bertell W., Brooklyn, N. Y. Means for inscribing unexposed photographic films, plates, or the like. No. 1,351,762; Sept. 7; v. 278; p. 9.

King, Roy D., assignor of one-half to J. Nelson, Chicago, Ill. Spring-die cushion. No. 1,352,911; Sept. 7; v. 278; p. 40.

King, Willis R. (See Todd, E. N., and King.)

Kirkham, Charles B., assignor to Curtiss Aeroplane & Motor Corporation, Buffalo, N. Y. Aeronautical motor. No. 1,351,763; Sept. 7; v. 278; p. 9.

Kleckler, Henry, assignor to Curtiss Aeroplane & Motor Corporation, Hempstead, N. Y. Hoisting connection for airplanes. No. 1,351,764; Sept. 7; v. 278; p. 10.

Kleckler, Henry. (See Curtiss, G. H., and Kleckler.)

Klein, Carl, Wichita, Kans. Metallic fencepost. No. 1,351,912; Sept. 7; v. 278; p. 40.

Kleine, Robert, Chicago, Ill. Radiator-core. No. 1,352,068; Sept. 7; v. 278; p. 69.

Kleinert, I. B., Rubber Company. (See Zwicke, Martin, assignor.)

Klemme, Ernst F., Milwaukee, Wis. Water-closet ventilator. No. 1,351,854; Sept. 7; v. 278; p. 28.

Klunder, Jacob, Grand Rapids, Mich. Direction-indicator and tail-light for vehicles. No. 1,351,913; Sept. 7; v. 278; p. 40.

Knock, Juan F., Lewistown, Ill. Fuel-saver. No. 1,351,855; Sept. 7; v. 278; p. 28.

Knox, Luther L., Avalon, assignor to Blaw-Knox Company, Pittsburgh, Pa. Valve system for reversing furnaces. No. 1,351,914; Sept. 7; v. 278; p. 41.

Knox, Luther L., Avalon, assignor to Blaw-Knox Company, Pittsburgh, Pa. Reversing furnace. No. 1,351,915; Sept. 7; v. 278; p. 41.

Knutsen, Knut, Bergen, Norway. Hatch-cover. No. 1,352,202; Sept. 7; v. 278; p. 94.

Koch, Charles J., assignor to The Sales Service Company, Cincinnati, Ohio. Carrying case for motion-picture projectors. No. 1,351,765; Sept. 7; v. 278; p. 10.

Koch, Gotthardt, Chicago, Ill. Engine-lock. No. 1,352,417; Sept. 7; v. 278; p. 134.

Koetz, Francis M., Woodstock, Ill. Traction-wheel. No. 1,352,281; Sept. 7; v. 278; p. 109.

Kohner, Louis M., Los Angeles, Calif. Oil-burner. No. 1,352,373; Sept. 7; v. 278; p. 126.

Kristofek, Frank J., and H. L. Fischer, St. Paul, Minn. Pencil. No. 1,351,916; Sept. 7; v. 278; p. 41.

Kronman, Edward, New York, N. Y. Coffee-urn. No. 1,352,069; Sept. 7; v. 278; p. 69.

Kucki, Wincent S., Chicago, Ill. Phonograph. No. 1,352,282; Sept. 7; v. 278; p. 109.

Kuhn, Anna O., San Francisco, Calif. Aseptic appliance. No. 1,351,917; Sept. 7; v. 278; p. 41.

Kurek, Edmund. (See Pospisil, R. E., and Kurek.)

La Bombard, Leon E., assignor to Specialty Automatic Machine Company, Chelsea, Mass. Machine for making double wall-boxes. No. 1,352,283; Sept. 7; v. 278; p. 109.

La Bombard, Leon E., assignor to Specialty Automatic Machine Company, Chelsea, Mass. Blank-feeder. No. 1,352,284; Sept. 7; v. 278; p. 109.

Ladd, James B., Ardmore, Pa., assignor to United States Cast Iron Pipe and Foundry Company, Burlington, N. J. Centrifugal pipe-casting. No. 1,351,766; Sept. 7; v. 278; p. 10.

Ladd, James B. Ardmore, Pa., assignor to United States Cast Iron Pipe and Foundry Company, Burlington, N. J. Method of and apparatus for charging rotating pipe-molds. No. 1,351,767; Sept. 7; v. 278; p. 10.

Lambert, Henry M., Portland, Oreg. Manufacturing tires. No. 1,351,856; Sept. 7; v. 278; p. 29.

Landgraf, Frederick K., assignor to Flannery Bolt Company, Pittsburgh, Pa. Applying and securing staybolt-sleeves to boiler-sheets. No. 1,352,285; Sept. 7; v. 278; p. 110.

Lang, George H., Boston, Mass. Listing-machine. No. 1,352,070; Sept. 7; v. 278; p. 69.

Langley, Kate M. (See Mendal, Henry L., assignor.)

Larimore, George L., Oklahoma, Okla. Fencepost. No. 1,352,203; Sept. 7; v. 278; p. 94.

Larson, Edward E., Thompson, Iowa. Tractor. No. 1,352,286; Sept. 7; v. 278; p. 110.

Larsson, Thure, assignor to Norton Company, Worcester, Mass. Grinding-wheel-balancing device. No. 1,352,005; Sept. 7; v. 278; p. 58.

Lasker, William W., Brooklyn, assignor to Powers Accounting Machine Company, New York, N. Y. Controlling means. No. 1,352,006; Sept. 7; v. 278; p. 58.

Laughton, R. E., and P. E. Barnes, assignors to Hamel Shoe Machinery Company, Haverhill, Mass. Heel-breasting machine. No. 1,352,007; Sept. 7; v. 278; p. 58.

Lawhead, Lester A., St. Joseph, Mo. Traffic-signal. No. 1,351,857; Sept. 7; v. 278; p. 29.

Lawrence, Emma K. (See Lawrence, Frederick C., assignor.)

Lawrence, Frederick C., assignor to E. K. Lawrence, New York, N. Y. Aeroplane. No. 1,351,918; Sept. 7; v. 278; p. 41.

Lawrence, George L., Jr., assignor to Boston Rubber Shoe Company, Melrose, Mass. Rubber shoe and making same. No. 1,352,008; Sept. 7; v. 278; p. 58.

Lawton, Charles L., Hancock, Mich. Testing device for golf-clubs. No. 1,351,768; Sept. 7; v. 278; p. 10.

Laydon, John, Brooklyn, N. Y., Guard for gas-stove cocks. No. 1,352,287; Sept. 7; v. 278; p. 110.

Leahy, Daniel J. (See Culleton, R. A., and Leahy.)

Leeper, George M., Oakland, Oreg. Drier attachment for stoves. No. 1,352,071; Sept. 7; v. 278; p. 69.

Leimbach, Lizzie T. (See Harrah, Hillis A., assignor.)

Leinweber, Mary C., Weimar, Tex. Horseshoe. No. 1,351,769; Sept. 7; v. 278; p. 10.

Leitch, Meredith, Poughkeepsie, assignor to The De Laval Separator Company, New York, N. Y. Yieldable bearing for centrifugal machines. No. 1,352,204; Sept. 7; v. 278; p. 94.

Lelean, Percy S., Westminster, London, England. Disinfecting and destruction of vermin in clothes, bedding, and the like. No. 1,352,289; Sept. 7; v. 278; p. 110.

Lemoine, Louis R., Philadelphia, Pa. assignor to United States Cast Iron Pipe & Foundry Company, Burlington, N. J. Gas-burner for pipe-molds. No. 1,351,770; Sept. 7; v. 278; p. 11.

Lenchard, Walter, McKeesport, Pa. Toy pin-board. No. 1,352,137; Sept. 7; v. 278; p. 82.

Leonard, Joseph E., Cedar Rapids, Ind. Tent-stove. No. 1,352,290; Sept. 7; v. 278; p. 111.

Levi, William I., St. Louis, Mo. Curtain-support. No. 1,351,919; Sept. 7; v. 278; p. 42.

Levin, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Loading-machine. No. 1,351,953; Sept. 7; v. 278; p. 48.

Lewis, Lloyd V., Edgewood borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling system. No. 1,351,771; Sept. 7; v. 278; p. 11.

Lewis, William B. (See von Schlegell, Frederick, and Lewis.)

Libbey, Samuel R., assignor of one-half to S. H. Severson, Brady, Mont. Clamp. No. 1,351,772; Sept. 7; v. 278; p. 11.

Liebermann, Verna B. (See Smith, Harvey G., assignor.)

Liliquist, Victor A., Superior, Wis. Wrench. No. 1,352,009; Sept. 7; v. 278; p. 59.

Lindstrom, John T. (See Delley, Harvey R., assignor.)

Lindstrom, John T., Allentown, and H. R. Delley, Bethlehem, Pa.; said Delley assignor to said Lindstrom. Direction-indicator. No. 1,351,774; Sept. 7; v. 278; p. 11.

Lintern, John B., Cleveland, Ohio. Sanding device. No. 1,352,206; Sept. 7; v. 278; p. 94.

Lintern, William, Cleveland, Ohio. Sanding device. No. 1,352,205; Sept. 7; v. 278; p. 94.

Litchfield, Isaac W., Newtonville, assignor to Litchfield Linoplate Co., Boston, Mass. Printing-plate and making same. No. 1,351,954; Sept. 7; v. 278; p. 48.

Litchfield Linoplate Co. (See Litchfield, Isaac W., assignor.)

Logwood, Charles V., New York, N. Y. Oscillation-generator system. No. 1,351,776; Sept. 7; v. 278; p. 12.

Lokey, Allen T., Memphis, Tex. Cotton-boll-cleaning machine. No. 1,351,858; Sept. 7; v. 278; p. 29.

Lombard, Walter E., Arlington, Mass. Lifting-jack. No. 1,352,207; Sept. 7; v. 278; p. 94.

Long, Frank B., Sacramento, Calif. Articulator for phonographs. No. 1,352,291; Sept. 7; v. 278; p. 111.

Long, George A., assignor of one-fourth to C. Soby, and one-fourth to The Gray Telephone Pay Station Company, Hartford, Conn. System of transmitting intelligence. No. 1,351,775; Sept. 7; v. 278; p. 12.

Lord, Henry C., assignor to General Electric Company, Schenectady, N. Y. Making flow-nozzles. No. 1,352,292; Sept. 7; v. 278; p. 111.

Lovelace, Benjamin F., Baltimore, Md. Producing oxid or oxids of manganese. No. 1,352,208; Sept. 7; v. 278; p. 95.

Lovell, Wesley S., assignor of one-half to R. R. Rockwell, Elmira, N. Y. Gearing. No. 1,352,293; Sept. 7; v. 278; p. 111.

Lowe, Leon P., San Francisco, and F. C. Ruff, Los Angeles, assignors to By-Products Manufacturing Company, San Francisco, Calif. Cracking petroleum. No. 1,351,859; Sept. 7; v. 278; p. 29.

Lowry, Frank J., New Orleans, La. Artificial limb. No. 1,351,955; Sept. 7; v. 278; p. 49.

Lurie, William A., New Orleans, La. Door-lock. No. 1,352,010; Sept. 7; v. 278; p. 59.

Lynn, Walter R. (See Barker, F. R., and Soper.)

Lyster, Fleury J., assignor, by mesne assignments, to Minerals Separation North American Corporation, Broken Hill, New South Wales, Australia. Apparatus for the concentration of ores. No. 1,352,072; Sept. 7; v. 278; p. 69.

McCorkindale, William P., Holyoke, Mass., assignor to Emily K. Dietz, Philadelphia, Pa. Towel-dispensing cabinet. No. 1,351,956; Sept. 7; v. 278; p. 49.

McCormack, Andrew J., Rochester, N. Y., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sole-edge-treating machine. No. 1,352,209; Sept. 7; v. 278; p. 95.

McCormack, Ira A., New York, N. Y. Seal for locks. No. 1,352,073; Sept. 7; v. 278; p. 70.

McCray, Guilford, Tomales, Calif. Egg-washer. No. 1,352,138; Sept. 7; v. 278; p. 82.

McDonough, Joseph G., Eau Claire, Wis. Lumber and timber grading machine. No. 1,351,777; Sept. 7; v. 278; p. 12.

McEown, Frank, New York, N. Y. Safety-razor-blade holder. No. 1,352,011; Sept. 7; v. 278; p. 59.

McFate, Joseph N., Phoenix, Ariz., and H. L. Glaze, Los Angeles, Calif.; said Glaze assignor of four-tenths of his right to said McFate. Tire. No. 1,352,074; Sept. 7; v. 278; p. 70.

McGarry, Henry S., and J. D. Carr, Humble, Tex. Casing-head. No. 1,352,075; Sept. 7; v. 278; p. 70.

McGary, Alexander, *et al.* (See Bear, Claude A., assignor.)

McGinnitey, John F. (See Cox, R. C., and McGinnitey.)

McGrath, William L., assignor to Eclipse Machine Company, Elmira, N. Y. Engine-starter. No. 1,351,860; Sept. 7; v. 278; p. 29.

McGuire, Lawrence. (See Howell, Charles S., assignor.)

McIntosh Battery and Optical Co. (See MacLagan, Hector P., assignor.)

McKenzie, Walter, Tulsa, Okla. Tool-handle. No. 1,352,012; Sept. 7; v. 278. p. 59.

McKnight, Boyd L., assignor of one-half to J. E. Uebele, Washington, D. C. Necktie-pressing device. No. 1,352,294; Sept. 7; v. 278; p. 111.

Mackintosh, Alexander L. (See Riddick, David R., assignor.)

MacLagan, Hector P., Park Ridge, assignor to McIntosh Battery and Optical Co., Chicago, Ill. X-ray cone. No. 1,352,198; Sept. 7; v. 278; p. 93.

Madden, Patrick H., Sparta, Wis. Rail-truck. No. 1,352,076; Sept. 7; v. 278; p. 70.

Madsen, Elith C., Hazleton, Pa. Ash, cinder, and coal separator. No. 1,351,861; Sept. 7; v. 278; p. 30.

Magnuson, Henry O., Chicago, Ill. Molding-machine. No. 1,352,295; Sept. 7; v. 278; p. 112.

Maguth, Michael J., Carlstadt, N. J. Clamping device. No. 1,352,296; Sept. 7; v. 278; p. 112.

Malmberg, Charles J., Jamestown, N. Y. Talking-machine case. No. 1,351,778. Sept. 7; v. 278; p. 12.

Maltby, Frank D. (See Sherman, H. B., and Maltby.)

Mandelbaum, Henry, Brooklyn, N. Y. Compressed-air pump. No. 1,352,013; Sept. 7; v. 278; p. 59.

Marceron, Raymond V., assignor to F. H. Newham, Jr., Washington, D. C. Container and closure therefor. No. 1,351,920; Sept. 7; v. 278; p. 42.

Mariner, Joseph A., Chicago, Ill. Collar-holder. No. 1,352,139; Sept. 7; v. 278; p. 82.

Markwick, Frederick, Detroit, Mich. Sack-fastener. No. 1,351,958; Sept. 7; v. 278; p. 49.

Marshall, Homer F., North Adams, Mass. Picker-stick for looms. No. 1,352,297; Sept. 7; v. 278; p. 112.

Martin, Ernest L., Houston, Tex. Landing device for aeroplanes. No. 1,352,077; Sept. 7; v. 278; p. 71.

Mather, Alonzo C., Chicago, Ill. Electric heater. No. 1,351,779; Sept. 7; v. 278. p. 12.

Matlack, James C., assignor to Notaseme Hosiery Company, Philadelphia, Pa. Stocking. No. 1,352,078; Sept. 7; v. 278; p. 71.

Maupai, Eugene L., New York, N. Y. Dyeing raw silk. No. 1,352,014; Sept. 7; v. 278; p. 5.

Max Ams Machine Company, The. (See Brenzinger, Julius, assignor.)

Maytag Company, The. (See Thompson, Herbert L., assignor.)

Mead, William C., Toronto, Ontario, Canada. Air-valve. No. 1,351,780; Sept. 7; v. 278; p. 12.

Mears, John W., Forest Hills, N. Y. Lubricant distributer and filter for internal-combustion engines. No. 1,352,298; Sept. 7; v. 278; p. 112.

Meeks, Annie L., Gadsden, Ala. Automobile-tire. No. 1,352,375; Sept. 7; v. 278; p. 126.

Mendel, Henry L., assignor of one-fourth to K. M. Langley, Baltimore, Md. Combination cooking device. No. 1,351,921; Sept. 7; v. 278; p. 42.

Mendez, Arsenio F., Camajuani, Cuba. Liquid polish. No. 1,352,015. Sept. 7; v. 278; p. 59.

Menkhaus, John H., Cincinnati, Ohio. Squeegee. No. 1,351,862; Sept. 7; v. 278; p. 30.

Mertz, Emil, Tygh Valley, Oreg. Folding crate. No. 1,352,299; Sept. 7; v. 278; p. 112.

Metropolitan Sewing Machine Corporation. (See Weis, John P., assignor.)

Meushaw, Thomas H., and C. J. Diez, Baltimore, Md. Fire-plug. No. 1,351,781; Sept. 7; v. 278; p. 13.

Miller, Augustus, East Orange, N. J. Dating-stamp lock. No. 1,352,300; Sept. 7; v. 278; p. 113.

Miller, Jacob H., Cresson, Pa. Grease-cup lid. No. 1,351,922; Sept. 7; v. 278; p. 42.

Miller, Max C., Cumberland Hill, assignor to Jenckes Knitting Machine Company, Pawtucket, R. I. Feeding means for circular knitting-machines. No. 1,352,079; Sept. 7; v. 278; p. 71.

Miller Pasteurizing Machine Company, The. (See Pfouts, Leroy S., assignor.)

Miller Rubber Company, The. (See Riley, Ralph E., assignor.)

Mills, John, assignor to American Telephone and Telegraph Company, Wyoming, N. J. Telephone-repeater. No. 1,351,863; Sept. 7; v. 278. p. 30.

Minerals Separation North American Corporation. (See Lyster, Fleury J., assignor.)

Minnich, Otto J., Boerne, Tex. Fastening device for fence-wires. No. 1,351,959; Sept. 7; v. 278; p. 49.

Plummer, Robert S., assignor to American Briquet Company, Philadelphia, Pa. Briquet-drier. No. 1,352,377; Sept. 7; v. 278; p. 127.
Podien, Jakob, Chicago, Ill. Car-replacer. No. 1,351,965; Sept. 7; v. 278; p. 50.
Pospisil, Rudolph E., Chippewa Falls, and E. Kurek, Madison, Wis., assignors of two-thirds to said Pospisil and one-third to said Kurek. Sugar process. No. 1,352,084; Sept. 7; v. 278; p. 72.
Postma, John, Loleta, Calif. Can-punch. No. 1,352,378; Sept. 7; v. 278; p. 127.

Pounder, Harry, Galion, Ohio. Hinge for doors of burial-vaults. No. 1,352,379; Sept. 7; v. 278; p. 127.
Powell, Winfred T., assignor to Automatic Electric Company, Chicago, Ill. Selective signaling system. No. 1,352,217; Sept. 7; v. 278; p. 96.
Power, Nicholas, Brooklyn, assignor to Nicholas Power Company, New York, N. Y. Safety device for moving-picture machines. No. 1,352,218; Sept. 7; v. 278; p. 96.
Powers Accounting Machine Company. (See Lasker, William W., assignor.)
Prell, Henry, Cleveland, Ohio. Vibrator. No. 1,352,219; Sept. 7; v. 278; p. 97.
Prellwitz, William, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Plate-valve. No. 1,352,025; Sept. 7; v. 278; p. 61.
Prew, Raymond, Detroit, Mich. Auger. No. 1,352,313; Sept. 7; v. 278; p. 115.
Price, Thornton W., New York, N. Y. Ingot-stripper. No. 1,352,026; Sept. 7; v. 278; p. 61.
Pridmore, Edward A., La Grange, Ill. Molding-machine. No. 1,351,871; Sept. 7; v. 278; p. 32.
Prisbrey, George W., assignor of one-sixth to B. Carpenter and one-sixth to R. Fawcett, St. George, Utah. Portable metal-turning lathe. No. 1,352,380; Sept. 7; v. 278; p. 127.
Procunier, Frank R., assignor of one-fourth to J. C. Stryker, one-fourth to L. N. Turner, and one-fourth to L. H. Nissen, Chicago, Ill. Automobile-bumper. No. 1,352,220; Sept. 7; v. 278; p. 97.
Quinby, George F., Dorchester, Mass. Innersole-applying device. No. 1,352,145; Sept. 7; v. 278; p. 83.
Radium Luminous Material Corporation. (See Willis, Paul M., assignor.)
Radtke, Milton L., Detroit, Mich. Adjustable clamp. No. 1,351,966; Sept. 7; v. 278; p. 50.
Raymer, Morris. (See Johnson, H. L., and Raymer.)
Rece, Frank S., Dallas, Tex. Joint for metallic structures. No. 1,351,967; Sept. 7; v. 278; p. 51.
Reece Button Hole Machine Company, The. (See Kiewicz, John, assignor.)
Reece Shoe Machinery Company. (See Schoenky, August R., assigner.)
Reifsnyder, James D., assignor to Stokes & Smith Company, Summerdale, Philadelphia, Pa. Machine for sealed wrapped packages. No. 1,352,221; Sept. 7; v. 278; p. 97.
Remy Electric Company. (See Conklin, Oliver F., assignor.)
Renault, Louis. (See Fuchs, Ernest, assignor.)
Reynolds, John J., Rantoul, Ill. Antijounce-spring construction. No. 1,351,968; Sept. 7; v. 278; p. 51.
Reynolds, Joy S., assignor to Reynolds Torch Manufacturing Company, Seattle, Wash. Oxyacetylene-torch for cutting tubes. No. 1,352,381; Sept. 7; v. 278; p. 128.
Reynolds Torch Manufacturing Company. (See Reynolds, Joy S., assignor.)
Richter, William H., Philadelphia, assignor to A. A. Kent, Ardmore, Pa. Condenser unit and making same. No. 1,351,787; Sept. 7; v. 278; p. 14.
Ricke, George H., Cincinnati, Ohio. Skate. No. 1,351,925; Sept. 7; v. 278; p. 43.
Ricketts, Lawrence M., assignor of one-half to W. A. Harman, Baltimore, Md. Steel wheel. No. 1,352,146; Sept. 7; v. 278; p. 84.
Riddick, David R., Rawlins, Wyo., assignor of one-half to A. L. Mackintosh, Denver, Colo. Garment-hanger. No. 1,352,382; Sept. 7; v. 278; p. 128.
Rigby, Holden, Paterson, N. J. Lubricating means for leaf-springs. No. 1,352,314; Sept. 7; v. 278; p. 116.
Riley, Ralph E., Akron, Ohio, assignor to The Miller Rubber Company. Mechanism for manufacturing rubber bathing-caps. No. 1,352,383; Sept. 7; v. 278; p. 128.
Rimailho, Emile, assignor to Compagnie Des Forges et Acieries De La Marine et D'Homecourt, Paris, France. Compound crawler. No. 1,352,315; Sept. 7; v. 278; p. 116.
Ringer, Luther, assignor to The Simmen Automatic Railway Signal Company, Buffalo, N. Y. Cab-signal system. No. 1,351,943; Sept. 7; v. 278; p. 46.
Rishel, Arthur B., Goddard, Kans. Vacuum snow-sweep. No. 1,352,384; Sept. 7; v. 278; p. 128.
Rissman, Henry L., Chicago, Ill. Garment. No. 1,352,027; Sept. 7; v. 278; p. 61.
Robinson, Albert E. (See Sosa, A. M., Robinson, and Schatz.)
Robinson, H. G., and L. K. Stinson, Los Angeles, Calif. Carbureter. No. 1,352,316; Sept. 7; v. 278; p. 116.
Rockwell, Robert R. (See Lovell, Wesley S., assignor.)
Rohman, Harry D., New York, N. Y., assignor, by mesne assignments, to J. Stone & Company Limited, Deptford, England. Car-lighting system. No. 1,351,788; Sept. 7; v. 278; p. 14.
Roofing Patents Company, The. (See Speer, Alexander S., assignor.)
Rose, James R., Edgeworth, Pa. Process of and apparatus for producing carbon and gaseous fuel. No. 1,352,085; Sept. 7; v. 278; p. 72.
Rose, James R., Edgeworth, Pa. Producing carbon and gaseous fuel. No. 1,352,086; Sept. 7; v. 278; p. 72.
Rosen, Paul E., Madison, Wis. Garter. No. 1,351,872; Sept. 7; v. 278; p. 32.
Ross, Frank E., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic objective. No. 1,352,028; Sept. 7; v. 278; p. 61.
Rothenhoefer, Frederick F., Covington, Ky., assignor to The Monarch Lithographing Company, Cincinnati, Ohio. Fan. No. 1,352,385; Sept. 7; v. 278; p. 128.
Rowley, James F., Chicago, Ill. Fitting artificial limbs. No. 1,351,789; Sept. 7; v. 278; p. 14.
Rudin, Karl V., Stockholm, Sweden. Calculating-machine. No. 1,352,029; Sept. 7; v. 278; p. 62.
Rudin, Karl V., Stockholm, Sweden. Step-by-step mechanism in calculating-machines. No. 1,352,030; Sept. 7; v. 278; p. 62.
Rudolph, Raymond H., Elgin, assignor of one-half to C. Friedman, Chicago, Ill. Leather-stitching machine. No. 1,352,222; Sept. 7; v. 278; p. 98.
Rudolph, William R., Glenbrook, Conn. Christmas-tree ornament and making same. No. 1,351,790; Sept. 7; v. 278; p. 14.
Ruhoff, Otto E., assignor to French Battery & Carbon Co., Madison, Wis. Electric battery. No. 1,352,087; Sept. 7; v. 278; p. 72.
Ruff, Frederick C. (See Lowe, L. P., and Ruff.)
Rundberg, Otto, Spokane, Wash. Rake attachment. No. 1,352,386; Sept. 7; v. 278; p. 128.
Runke, Richard B. (See Allen, William M., assignor.)
Saal, Henry G., Chicago, Ill. Speed-governor. No. 1,352,223; Sept. 7; v. 278; p. 98.
Saal, Henry G., Chicago, Ill. Turntable for phonographs. No. 1,352,224; Sept. 7; v. 278; p. 98.
Sala, Thomas, and M. Butera, Pittsburgh, Pa. Ice-creeper. No. 1,352,088; Sept. 7; v. 278; p. 73.
Sales Service Company, The. (See Koch, Charles J., assignor.)
Sanford, Lottie. (See Church, Ira, assignor.)
Sanford, Percy P., Woodridge, N. Y. Fountain-pen. No. 1,351,873; Sept. 7; v. 278; p. 32.
Sargeant, Arthur C., Agawam, Mass. Door-stop. No. 1,352,147; Sept. 7; v. 278; p. 84.
Sargent, Herbert W., assignor to Sargent Tile Ditcher Company, Fort Dodge, Iowa. Gathering conveyer-bucket. No. 1,351,791; Sept. 7; v. 278; p. 15.
Sargent Tile Ditcher Company. (See Sargent, Herbert W., assignor.)
Sargent, William H., assignor to Wayne Manufacturing Company, St. Louis, Mo. Washing-machine. No. 1,352,225; Sept. 7; v. 278; p. 98.
Satterlee, John P., Klamath Falls, Oreg. Auditorium, assembly-room, or theater chair or bench. No. 1,252,415; Sept. 7; v. 278; p. 134.
Saunders, Lewis E., Niagara Falls, N. Y., assignor to Norton Company, Worcester, Mass. Converting refractory oxids. No. 1,352,387; Sept. 7; v. 278; p. 129.
Saunders, Lewis E., assignor to Norton Company, Worcester, Mass. Shrinking magnesia. No. 1,352,388; Sept. 7; v. 278; p. 129.
Sawyer, Harry, assignor to Shaw Electric Crane Company, Muskegon, Mich. Brake mechanism for hoisting machinery. No. 1,351,792; Sept. 7; v. 278; p. 15.
Sawyer, Marion B. (See Hanson, H. L., and Sawyer.)
Saxon, Herman H., assignor, by mesne assignments, to Electric Auto-Lite Corporation, Toledo, Ohio. Commutator. No. 1,351,926; Sept. 7; v. 278; p. 43.
Schaffner, George H., Detroit, Mich. Illuminated sign. No. 1,352,031; Sept. 7; v. 278; p. 62.
Schaller, Jacob J., Chicago, Ill. Cement composition. No. 1,351,874; Sept. 7; v. 278; p. 32.
Schatz, Herman W. (See Sosa, A. M., Robinson, and Schatz.)
Schmidt, Albert, assignor to Champion Ignition Company, Flint, Mich. Spark-plug. No. 1,352,089; Sept. 7; v. 278; p. 73.
Schmidt, Albert, assignor to Champion Ignition Company, Flint, Mich. Spark-plug. No. 1,352,148; Sept. 7; v. 278; p. 84.
Schmidt, Albert, assignor to Champion Ignition Company, Flint, Mich. Spark-plug. No. 1,352,149; Sept. 7; v. 278; p. 84.
Schmidt, Edwin H., Inspiration, Ariz. Ball-mill. No. 1,351,793; Sept. 7; v. 278; p. 15.
Schmidt, William F., Freeburg, Ill. Shot-firing device. No. 1,351,794; Sept. 7; v. 278; p. 15.
Schnabel, Fritz W., Chicago, Ill. Attachment for ladders. No. 1,351,795; Sept. 7; v. 278; p. 15.
Schneider & Cie. (See Schneider, Eugène, assignor.)
Schneider, Eugène, assignor to Schneider & Cie, Paris, France. Recorder for fluid-pressure press. No. 1,352,150; Sept. 7; v. 278; p. 84.
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Apparatus for repeating automatically on a railway-locomotive track-signals provided for the protection of moving trains. No. 1,352,389; Sept. 7; v. 278; p. 129.
Schnell, Lawrence J., Portland, Oreg. Lock-nut. No. 1,352,090; Sept. 7; v. 278; p. 73.
Schoenky, August, R., Somerville, assignor to Reece Shoe Machinery Company, Boston, Mass. Stopping and starting mechanism. No. 1,352,226; Sept. 7; v. 278; p. 98.
Schofield, Frederick C., assignor, by direct and mesne assignments, to The Hillfield Body Company, Salem, Va. Dumping vehicle. No. 1,351,796; Sept. 7; v. 278; p. 15.
Schram Glass Manufacturing Co. (See Drey, L. A., and Hiatt, assignors.)

Schreiber, Edward A., assignor, by mesne assignments, to Vapor Car Heating Company, Inc., Chicago, Ill. Coupling for railway train-pipes. No. 1,351,875; Sept. 7; v. 278; p. 32.

Schumacher, John, Los Angeles, Calif. Plaster-board and making same. No. 1,352,390; Sept. 7; v. 278; p. 119.

Schwartz, Michael, assignor to Automatic Electric Company, Chicago, Ill. Semiautomatic telephone system. No. 1,351,870; Sept. 7; v. 278; p. 32.

Schwarz, Frederick, Berne, Ind. Swing. No. 1,352,317; Sept. 7; v. 278; p. 116.

Schwerin, Carl. (See Wais, Charles C., assignor.)

Scott, Lewis L. (See Newcomb, E. C., and Scott.)

Scott, Lewis L., assignor to Standard Engineering Company, St. Louis, Mo. Combustion system. No. 1,352,227; Sept. 7; v. 278; p. 99.

Sellers, William F., Wilmington, Del., assignor to Edge Moor Iron Company, Edgemoor, Del. Metallic baffle-plate. No. 1,351,797; Sept. 7; v. 278; p. 16.

Seety, Leopold, Bridgeport, Conn. Lifeboat. No. 1,352,318; Sept. 7; v. 278; p. 116.

Severson, Sanford H. (See Libbey, Samuel R., asignor.)

Shand, E. Blake, Detroit, Mich. Splicer for sash straps and cords. No. 1,352,091; Sept. 7; v. 278; p. 73.

Shaw Electric Crane Company. (See Sawyer, Harry, assignor.)

Shawinigan Electro-Metals Company. See Nicol, David S., assignor.)

Sherman, Howard B. (See Hofmann, William G., assignor.)

Sherman, Howard B., Battle Creek, Mich. Electrical connector. No. 1,352,032; Sept. 7; v. 278; p. 62.

Sherman, Howard B., Battle Creek, Mich. Making connectors. No. 1,352,034; Sept. 7; v. 278; p. 62.

Sherman, Howard B., and F. D. Maltby, said Maltby assignor to said Sherman, Battle Creek, Mich. Electrical connection for spark-plugs, &c. No. 1,352,033; Sept. 7; v. 278; p. 62.

Sherman, Howard B., and F. D. Maltby, Battle Creek, Mich.; said Maltby assignor to said Sherman. Spring clasping terminal for electric connectors. No. 1,352,092; Sept. 7; v. 278; p. 73.

Shippert, Warren A., Chicago, Ill. Stripping device for milking-machines. No. 1,351,798; Sept. 7; v. 278; p. 16.

Shotwell, Marcus A., Miami, Fla. Tire cover or protector. No. 1,352,093; Sept. 7; v. 278; p. 73.

Simmer Automatic Railway Signal Company, The. (See Ringer, Luther, assignor.)

Simonson, Sigvard, Butler, Pa., assignor to Harry Vissering & Company, Chicago, Ill. Yoke for railway draft-gears. No. 1,352,151; Sept. 7; v. 278; p. 84.

Simonson, Sigvard, Butler, Pa., assignor to Harry Vissering & Company, Chicago, Ill. Manufacture of railway draft-gears. No. 1,352,152; Sept. 7; v. 278; p. 85.

Simpson, David B., Wichita, Kans. Friction brake-band. No. 1,351,927; Sept. 7; v. 278; p. 43.

Singer Manufacturing Company, The. (See Noble, Donald, assignor.)

Singer Manufacturing Company, The. (See Petti, Ralph, assignor.)

Sitney, Massey, Brooklyn, N. Y. Mobile armament. No. 1,351,928; Sept. 7; v. 278; p. 43.

Slocomb, F. F., & Co., Incorporated. (See Flanagan, James U., assignor.)

Slough, Frank M., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Telephone system. No. 1,351,799; Sept. 7; v. 278; p. 16.

Slough, Frank M., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Telephone system. No. 1,351,800; Sept. 7; v. 278; p. 17.

Smallwood, Alfred, London, England. Furnace. No. 1,351,801; Sept. 7; v. 278; p. 17.

Smith, David J., Jr., Washington, D. C. Motor-operated gun. No. 1,352,319; Sept. 7; v. 278; p. 116.

Smith, Douglas. (See Smith, Elizabeth J., and D.)

Smith, Elizabeth J. and D., Larchmont, N. Y. Snap-fastener. No. 1,352,153; Sept. 7; v. 278; p. 85.

Smith, Harvey G., Los Angeles, assignor of one-half to V. B. Liebmann, San Diego, Calif. Windshield. No. 1,352,094; Sept. 7; v. 278; p. 74.

Smith, Jonathan J., assignor of one-half to O. F. Petersen, Des Moines, Iowa. Hot-blast downdraft-furnace. No. 1,351,803; Sept. 7; v. 278; p. 17.

Smith, Lincoln G., Des Moines, Iowa. Boiler-furnace. No. 1,351,802; Sept. 7; v. 278; p. 17.

Smith, Raymond A., Kinsley, Kans. Farm-derrick. No. 1,352,035; Sept. 7; v. 278; p. 62.

Smith, Sol. L. (See Gerau, George, assignor.)

Smith, Walter H., Oklahoma, Okla. Cuff-button. No. 1,352,095; Sept. 7; v. 278; p. 74.

Smith, William A., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Valve. No. 1,352,036; Sept. 7; v. 278; p. 63.

Snell, Lyle K., assignor to Cadillac Motor Car Company, Detroit, Mich. Vehicle tail-lamp. No. 1,352,096; Sept. 7; v. 278; p. 74.

Sohr, Charles, *et al.* (See Long, George A., assignor.)

Societa Anonima Stabilimenti Biak. (See Tedesco, Arrigo, assignor.)

Societe Chimique des Usines du Rhone, Anciennement Gilliard, P. Monnet et Cartier. (See Beudet, Maurice, assignor.)

Solberg, Knut E., Philadelphia, Pa. Measuring-calipers. No. 1,351,804; Sept. 7; v. 278; p. 17.

Sonander, Andrew, assignor to Howe Scale Company, Rutland, Vt. Scale. No. 1,352,097; Sept. 7; v. 278; p. 74.

Sosa, Augustus M., A. E. Robinson, Cincinnati, and H. W. Schatz, Norwood, assignors to The American Tool Works Company, Cincinnati, Ohio. Feeding mechanism for metal-working machinery. No. 1,351,969; Sept. 7; v. 278; p. 51.

Sosa, Augustus M., A. E. Robinson, Cincinnati, and H. W. Schatz, Norwood, assignors to The American Tool Works Company, Cincinnati, Ohio. Feeding mechanism for metal-working machinery. No. 1,351,970; Sept. 7; v. 278; p. 51.

Sounders, Herbert V., Wilmington, Calif. Trammel-point. No. 1,352,320; Sept. 7; v. 278; p. 117.

Southard, Francis C., and H. G., Southampton, England. Machine for rolling in the baseplates of high-explosive shells and such like. No. 1,352,321; Sept. 7; v. 278; p. 117.

Southard, Henry G. (See Southard, F. C., and H. G.)

Specialty Automatic Machine Company. (See La Bombard, Leon E., assignor.)

Speckman, Frederick, St. Louis, Mo. Mop-wringer. No. 1,351,805; Sept. 7; v. 278; p. 18.

Speer, Alexander S., Chicago, Ill., assignor to The Roofing Patents Company. Apparatus for cutting roofing-sheets. No. 1,352,154; Sept. 7; v. 278; p. 85.

Speirs, Stuart, New York, N. Y. Brush. No. 1,352,228; Sept. 7; v. 278; p. 99.

Staley, Joseph H., Knightstown, Ind. Press for removing bushings and the like. No. 1,352,098; Sept. 7; v. 278; p. 74.

Standard Engineering Company. (See Newcomb, E. C., and Scott, assignors.)

Standard Engineering Company. (See Scott, Lewis L., assignor.)

Stanley, Robert C., New Brighton, assignor to The International Nickel Company, New York, N. Y. Separating nickel and copper from copper-nickel mattes or materials. No. 1,351,877; Sept. 7; v. 278; p. 33.

Star Device Manufacturing Company. (See Stone, Lloyd B., assignor.)

Starling, S. G., Forest Gate, and A. J. Hughes, assignors to Henry Hughes and Son Limited, London, England. Anemometer. No. 1,352,391; Sept. 7; v. 278; p. 129.

Stay, Theron D., assignor to The Aluminum Castings Company, Cleveland, Ohio. Metallic alloy and making same. No. 1,352,322; Sept. 7; v. 278; p. 117.

Steel Products Company, The. (See Bishop, Ashley L., assignor.)

Steen, John L., Waukegan, Ill. Lock. No. 1,351,806; Sept. 7; v. 278; p. 18.

Steigerwald, Edward, Philadelphia, Pa. Trump-indicating device. No. 1,351,971; Sept. 7; v. 278; p. 51.

Stephan, Joban, Clifton, N. J. Safety device for ladders. No. 1,352,323; Sept. 7; v. 278; p. 117.

Stevens, Howard M., assignor of one-half to R. T. Hodges, Somerset, Ky. Lubricating device for valves and cylinders of superheating-locomotives. No. 1,351,807; Sept. 7; v. 278; p. 18.

Stevens, William C., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Machine and building tires. No. 1,352,099; Sept. 7; v. 278; p. 75.

Stevenson, Charles M., Chicago, Ill., assignor to Stevenson Mfg. Co., Barton, Wis. Inclosure, pen, fence, and the like. No. 1,352,392; Sept. 7; v. 278; p. 129.

Stevenson Mfg. Co. (See Stevenson, Charles M., assignor.)

Stewart, Sylvester N., Dayton, Ohio. Composite railway car. No. 1,351,972; Sept. 7; v. 278; p. 52.

Stickney, Burnham C. (See Thomas, E., and Stickney.)

Stiles, Dewey E., Los Angeles, Calif. Film-retouching holder. No. 1,352,037; Sept. 7; v. 278; p. 63.

Stinson, Lewis K. (See Robinson, H. G., and Stinson.)

Stokes, Jos., Rubber Company. (See Boyer, Harry L., assignor.)

Stokes, Joseph, Rubber Company. (See Boyer, Harry L., assignor.)

Stokes & Smith Company. (See Reifsnyder, James D., assignor.)

Stokes & Smith Company. (See Weightman, W. A., and Nitsch, assignors.)

Stone, J., & Company. (See Rohman, Harry D., assignor.)

Stone, Lloyd B., Tacoma, assignor to Star Device Manufacturing Company, King county, Wash. Switch-lock. No. 1,351,973; Sept. 7; v. 278; p. 52.

Storm, Gustav F., Sanborn, Iowa. Ditch-filler. No. 1,352,155; Sept. 7; v. 278; p. 85.

Storm, Gustav F., Sanborn, Iowa. Eye-guard. No. 1,352,156; Sept. 7; v. 278; p. 85.

Straight, Halver R., Adel, Iowa. Drain-tile. No. 1,351,878; Sept. 7; v. 278; p. 33.

Strain, Charles M., Crawfordsville, Iowa. Disk-sharpening machine. No. 1,352,324; Sept. 7; v. 278; p. 117.

Stromberg-Carlson Telephone Manufacturing Company, The. (See Slough, Frank M., assignor.)

Stryker, Jesse C., *et al.* (See Procunier, Frank R., assignor.)

Stuart, Edwards B., Chicago, Ill. Typewriting-machine. No. 1,352,229; Sept. 7; v. 278; p. 99.

Stubblefield, John A., Oregon City, Oreg. Nut-lock. No. 1,351,974; Sept. 7; v. 278; p. 52.

Suckoff, Louis A., Chicago, Ill. Spring-inserting tool. No. 1,352,157; Sept. 7; v. 278; p. 85.

Sullivan, Ward, Sidney, Ohio. Fruit-peeler. No. 1,352,325; Sept. 7; v. 278; p. 117.

Sullivan, William E., Roodhouse, Ill. Truck. No. 1,351,808; Sept. 7; v. 278; p. 18.

Surface, William E., assignor to Farics Manufacturing Co., Decatur, Ill. Shade-holder for electric-light bulbs. No. 1,351,879; Sept. 7; v. 278; p. 33.

Surprise, Joseph, New Haven, Conn. Track for sliding doors. No. 1,352,100; Sept. 7; v. 278; p. 75.

Sutherland, Forrest A., assignor to Great Northern Paper Company, Millinocket, Me. Wrapping-machine. No. 1,351,809; Sept. 7; v. 278; p. 19.

Swales, Albert B., London, England. Cabinet. No. 1,352,101; Sept. 7; v. 278; p. 75.

Swatzell, David N., assignor of one-fourth to B. P. Cox, one-fourth to R. C. Adcock, and one-fourth to W. A. Swatzell, Birmingham, Ala. Motor-driven hair-clipper. No. 1,352,326; Sept. 7; v. 278; p. 118.

Swatzell, W. A., *et al.* (See Swatzell, David N., assignor.)

Sweeney, Frank H., San Francisco, Calif. Direction-indicator for vehicles. No. 1,352,327; Sept. 7; v. 278; p. 118.

Szekely, Ernest, assignor to American Blower Company, Detroit, Mich. Manometer. No. 1,352,038; Sept. 7; v. 278; p. 63.

Tarrant, Roy C. (See Anderegg, George, assignor.)

Tatro, Adelor E., Everett, Mass. Pipe-fitting. No. 1,352,102; Sept. 7; v. 278; p. 75.

Tausch, Joseph H., Chicago Ridge, Ill., assignor to G. Gorton, Racine, Wis. Fence-machine. No. 1,351,810; Sept. 7; v. 278; p. 19.

Taylor, Ernest J., Everett, Mass. Mold and forming porcelain insulators therein. No. 1,351,929; Sept. 7; v. 278; p. 43.

Taylor, Harry H., Hutchinson, Kans. Electric generator attachment for windmills. No. 1,351,975; Sept. 7; v. 278; p. 52.

Tedesco, Arrigo, assignor to Societa Anonima Stabilimenti Biak, Turin, Italy. Alloy having high mechanical, chemical, and electrical resistance. No. 1,351,811; Sept. 7; v. 278; p. 19.

Thibert, Napoleon B., Worcester, Mass. Lock-nut. No. 1,352,103; Sept. 7; v. 278; p. 75.

Thomas, Edward, New York, N. Y., and B. C. Stickney, Elizabeth, N. J., assignors to Underwood Computing Machine Company, New York, N. Y. Typewriting-machine. No. 1,351,812; Sept. 7; v. 278; p. 19.

Thomas, James F., Clarinda, Iowa. Garment-pressing device. No. 1,352,158; Sept. 7; v. 278; p. 86.

Thompson, Albert R., assignor to Anderson-Barn-Grover Mfg. Co., San Jose, Calif. Fruit and vegetable washer. No. 1,352,393; Sept. 7; v. 278; p. 130.

Thompson, Frank P., *et al.* (See Bredsvold, Paul A., assignor.)

Thompson, Herbert L., Elgin, Ill., assignor to The Maytag Company, Newton, Iowa. Internal-combustion engine. No. 1,351,880; Sept. 7; v. 278; p. 34.

Thompson, William P., Liverpool, England. Flying-machine. No. 1,351,976; Sept. 7; v. 278; p. 52.

Thomson, John, Brooklyn, N. Y. Electric furnace. No. 1,351,977; Sept. 7; v. 278; p. 52.

Todd, E. N., Milburn, and W. R. King, assignors to The Hanson & Van Winkle Company, Newark, N. J. Nickel plating. No. 1,352,328; Sept. 7; v. 278; p. 118.

Toennesen, Peter S. (See Kallom, F. W., and Toennesen.)

Tokanos, Frank, Long Branch, N. J. Automobile safety-signal. No. 1,352,039; Sept. 7; v. 278; p. 63.

Tracy, Clarence O., Denver, Colo. Automatically-operating motor-driven carrier. No. 1,351,930; Sept. 7; v. 278; p. 43.

Triner, James M., Chicago, Ill. Scale. No. 1,352,104; Sept. 7; v. 278; p. 76.

Tschache, Edward D., assignor to Washburn Crosby Company, Minneapolis, Minn. Conveying and tipping apparatus. No. 1,352,329; Sept. 7; v. 278; p. 118.

Tucker, Chas. L. (See Tucker, Mat A., assignor.)

Tucker, Mat A., assignor of one-third to C. L. Tucker, Moore, Okla. Dirigible headlight. No. 1,352,394; Sept. 7; v. 278; p. 130.

Turner, Louis N., *et al.* (See Procunier, Frank R., assignor.)

Twiford, William R., Manville, Wyo. Pump. No. 1,351,813; Sept. 7; v. 278; p. 19.

Twyman, Thomas W., Avella, Pa. Combined trolley-wire and guard hanger. No. 1,352,105; Sept. 7; v. 278; p. 76.

Tyler, Ralph S., Cleveland Heights village, assignor to The Chandler and Price Company, Cleveland, Ohio. Inking mechanism for printing-presses. No. 1,352,159; Sept. 7; v. 278; p. 86.

Tyler, Sidney J., Afton, Okla. Fixing-bath and developing-tray support and rocker. No. 1,352,330; Sept. 7; v. 278; p. 118.

U. S. Light & Heat Corporation. (See Bliss, William L., assignor.)

Uebele, Joseph E. (See McKnight, Boyd L., assignor.)

Uhlemann, Theodore F., assignor to Nicholas Power Company, New York, N. Y. Framing mechanism for moving-picture machines. No. 1,351,814; Sept. 7; v. 278; p. 20.

Wohl, Benjamin, New York, N. Y. Clothing. No. 133,941; Sept. 7; v. 278; p. 154.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 7TH DAY OF SEPTEMBER, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Accounting and record device. G. W. Moeller. No. 1,351,864; Sept. 7; v. 278; p. 30.
Adjustable clamp. M. L. Radtke. No. 1,351,966; Sept. 7; v. 278; p. 50.
Advertising device. M. Horsey. No. 1,352,368; Sept. 7; v. 278; p. 125.
Advertising device. H. M. Yingst. No. 1,352,336; Sept. 7; v. 278; p. 119.
Aeroplane. F. C. Lawrence. No. 1,351,918; Sept. 7; v. 278; p. 41.
Aeroplane construction. H. G. Hooper. No. 1,351,852; Sept. 7; v. 278; p. 28.
Aeroplane hoisting connection. H. Kleckler. No. 1,351,764; Sept. 7; v. 278; p. 10.
Aeroplane landing device. E. L. Martin. No. 1,352,077; Sept. 7; v. 278; p. 71.
Aeronautical motor. C. B. Kirkham. No. 1,351,763; Sept. 7; v. 278; p. 9.
Agricultural implement. S. L. Allen. No. 1,351,984; Sept. 7; v. 278; p. 54.
Airplane-wing-structure truss. G. H. Curtiss. No. 1,351,743; Sept. 7; v. 278; p. 6.
Airships, Apparatus for mooring. E. S. Ullmann. No. 1,351,931; Sept. 7; v. 278; p. 44.
Alloy. J. G. Homan. No. 1,352,367; Sept. 7; v. 278; p. 125.
Alloy. Z. Jeffries and W. A. Gibson. No. 1,352,271; Sept. 7; v. 278; p. 107.
Alloy. Z. Jeffries and W. A. Gibson. No. 1,352,272; Sept. 7; v. 278; p. 107.
Alloy and making same, Metallic. T. D. Stay. No. 1,352,322; Sept. 7; v. 278; p. 117.
Alloys having high mechanical, chemical, and electrical resistance. A. Tedesco. No. 1,351,801; Sept. 7; v. 278; p. 19.
Ammonia, Production of. J. C. Clancy. No. 1,352,180; Sept. 7; v. 278; p. 89.
Ammonia, Production of. J. C. Clancy. No. 1,352,181; Sept. 7; v. 278; p. 89.
Ammonia, Production of. J. C. Clancy. No. 1,352,174; Sept. 7; v. 278; p. 89.
Ammonia, Production of. J. C. Clancy. No. 1,352,182; Sept. 7; v. 278; p. 89.
Ammonia synthesis. J. C. Clancy. No. 1,352,179; Sept. 7; v. 278; p. 89.
Ammonia synthesis and catalyst therefor. J. C. Clancy. No. 1,352,178; Sept. 7; v. 278; p. 89.
Ammonia synthesis catalyst and making same. J. C. Clancy. No. 1,352,177; Sept. 7; v. 278; p. 89.
Anemometer. S. G. Starling and A. J. Hughes. No. 1,352,391; Sept. 7; v. 278; p. 129.
Antiskid device. W. C. Cutler. No. 1,352,403; Sept. 7; v. 278; p. 131.
Armament, Mobile. M. Sitney. No. 1,351,928; Sept. 7; v. 278; p. 43.
Aseptic appliance. A. O. Kuhn. No. 1,351,917; Sept. 7; v. 278; p. 41.
Ash, cinder, and coal separator. E. C. Madsen. No. 1,351,861; Sept. 7; v. 278; p. 30.
Anchoring device. L. B. Fish. No. 1,351,845; Sept. 7; v. 278; p. 26.
Auger. R. Prew. No. 1,352,313; Sept. 7; v. 278; p. 115.
Auto-bumper. L. Cohen. No. 1,351,837; Sept. 7; v. 278; p. 25.
Automobile-body construction. J. J. Jones. No. 1,352,066; Sept. 7; v. 278; p. 68.
Automobile-bumper. F. R. Procunier. No. 1,352,220; Sept. 7; v. 278; p. 97.
Automobile-drive. E. James. No. 1,352,130; Sept. 7; v. 278; p. 80.
Automobile-drive. E. James. No. 1,352,131; Sept. 7; v. 278; p. 81.
Automobile-lock. R. C. Jenkins. No. 1,352,132; Sept. 7; v. 278; p. 81.
Automobile safety-signal. H. R. Deiley. No. 1,351,773; Sept. 7; v. 278; p. 11.
Automobile safety-signal. F. Tokanos. No. 1,352,039; Sept. 7; v. 278; p. 63.
Automobiles, Antiskid device for. J. Grönroos. No. 1,351,750; Sept. 7; v. 278; p. 7.
Automobiles, Battery-charging and starting system for. C. E. F. Ahlm. No. 1,352,166; Sept. 7; v. 278; p. 87.
Automobiles, Signal-operating device for. M. Dean. No. 1,351,745; Sept. 7; v. 278; p. 6.
Baffle-plate, Metallic. W. F. Sellers. No. 1,351,797; Sept. 7; v. 278; p. 16.
Bail, Container-body. J. H. Doyle and W. J. Kenny. No. 1,351,896; Sept. 7; v. 278; p. 37.
Bale-band-connecting means. E. V. Benjamin. No. 1,351,991; Sept. 7; v. 278; p. 55.
Baling-presses, Block or follower for. I. N. Becker. No. 1,352,345; Sept. 7; v. 278; p. 121.
Ball: *See*—
Tongue-ball.
Ball-mill. E. H. Schmidt. No. 1,351,793; Sept. 7; v. 278; p. 15.
Barrel-head machine. T. F. Ward. No. 1,351,934; Sept. 7; v. 278; p. 44.
Bath and developing-tray support and rocker, Fixing-. S. J. Tyler. No. 1,352,330; Sept. 7; v. 278; p. 118.
Battery: *See*—
Electric battery.
Battery jars, Apparatus for forming storage-. T. A. Willard. No. 1,352,160; Sept. 7; v. 278; p. 86.
Battery jars, Forming hard-rubber storage-. T. A. Willard. No. 1,352,161; Sept. 7; v. 278; p. 86.
Battery jars, Making rubber storage-. H. L. Boyer. No. 1,352,170; Sept. 7; v. 278; p. 88.
Battery jars, Making storage-. H. L. Boyer. No. 1,352,418; Sept. 7; v. 278; p. 124.
Bearing, Antifriction roller and ball. A. B. Hubard. No. 1,351,754; Sept. 7; v. 278; p. 8.
Bearings, Ball-retainer for radial ball-. C. A. B. R. Brakenhielm. No. 1,352,110; Sept. 7; v. 278; p. 77.
Beating and refining engine. T. H. Nash. No. 1,351,962; Sept. 7; v. 278; p. 50.
Bed-frame connection. B. H. Johnson and B. M. Phelps. No. 1,351,758; Sept. 7; v. 278; p. 8.
Belting, Apparatus for Manufacturing. E. F. Gingras. No. 1,351,901; Sept. 7; v. 278; p. 38.
Blade, Tempered. C. Napier. No. 1,352,140; Sept. 7; v. 278; p. 82.
Board: *See*—
Ironing-board. Toy pin-board.
Boat construction, Flying-. G. H. Curtiss and H. Kleckler. No. 1,351,742; Sept. 7; v. 278; p. 5.
Boiler-furnace. L. G. Smith. No. 1,351,802; Sept. 7; v. 278; p. 17.
Boiler-headers, Closure for. V. L. Emerson. No. 1,352,254; Sept. 7; v. 278; p. 104.
Boiler-sheets, Applying and securing staybolt-sleeves to. F. K. Landgraf. No. 1,352,285; Sept. 7; v. 278; p. 110.
Bolt-anchor. J. Kennedy. No. 1,352,199; Sept. 7; v. 278; p. 93.
Bolt-anchor. J. Kennedy. No. 1,352,200; Sept. 7; v. 278; p. 93.
Bolt-anchor. J. Kennedy. No. 1,352,201; Sept. 7; v. 278; p. 93.
Bookcase, Sectional. H. B. Hunt. No. 1,352,195; Sept. 7; v. 278; p. 92.
Bottle cap, Milk-. E. Wester. No. 1,352,334; Sept. 7; v. 278; p. 119.
Bottle carrier, Milk-. W. C. Campbell. No. 1,352,173; Sept. 7; v. 278; p. 88.
Bottle-filler. G. Agrillo. No. 1,352,165; Sept. 7; v. 278; p. 87.
Bottle-stopper. P. J. Hentschel. No. 1,352,062; Sept. 7; v. 278; p. 68.
Box. E. S. Mix. No. 1,352,016; Sept. 7; v. 278; p. 59.
Brake-band, Friction. D. B. Simpson. No. 1,351,927; Sept. 7; v. 278; p. 43.
Brake mechanism for hoisting machinery. H. Sawyer. No. 1,351,792; Sept. 7; v. 278; p. 15.
Breech lubrication. O. V. Payne. No. 1,352,414; Sept. 7; v. 278; p. 133.
Brick-machine. J. C. Dobbins. No. 1,352,056; Sept. 7; v. 278; p. 66.
Briquet-drier. R. S. Plummer. No. 1,352,377; Sept. 7; v. 278; p. 127.
Brush. H. Hunt. No. 1,352,369; Sept. 7; v. 278; p. 125.
Brush. S. Speirs. No. 1,352,228; Sept. 7; v. 278; p. 99.
Brush, Commutator-. W. C. Hood. No. 1,352,408; Sept. 7; v. 278; p. 132.
Brush-hanger and pad-remover. M. P. Benson and M. M. Wiener. No. 1,352,346; Sept. 7; v. 278; p. 121.
Bucket, Gathering conveyer-. H. W. Sargent. No. 1,351,791; Sept. 7; v. 278; p. 15.

Burner: *See*—
Fuel-burner. Liquid-fuel burner.
Gas-burner. Oil-burner.
Button, Cuff-. W. H. Smith. No. 1,352,095; Sept. 7; v. 278; p. 74.
Cabinet. A. B. Swales. No. 1,352,101; Sept. 7; v. 278; p. 75.
Cabinet, Towel-dispensing. W. P. McCorkindale. No. 1,351,956; Sept. 7; v. 278; p. 49.
Calculating-machine. K. V. Rudin. No. 1,352,029; Sept. 7; v. 278; p. 62.
Calculating-machines, Step-by-step mechanism in. K. V. Rudin. No. 1,352,030; Sept. 7; v. 278; p. 62.
Calipers, Sliding. E. Challet. No. 1,351,941; Sept. 7; v. 278; p. 46.
Camera. C. G. Johnson. No. 1,352,134; Sept. 7; v. 278; p. 81.
Camera, Motion-picture. W. Parkes. No. 1,352,143; Sept. 7; v. 278; p. 83.
Can: *See*—
Garbage-can.
Can-heading machine. J. Brenzinger. No. 1,351,831; Sept. 7; v. 278; p. 23.
Caps, Mechanism for manufacturing rubber bathing-. R. E. Riley. No. 1,352,383; Sept. 7; v. 278; p. 128.
Car, Composite railway-. S. N. Stewart. No. 1,351,972; Sept. 7; v. 278; p. 52.
Car-lighting system. W. L. Bliss. No. 1,351,828; Sept. 7; v. 278; p. 22.
Car-lighting system. H. D. Rohman. No. 1,351,788; Sept. 7; v. 278; p. 14.
Car-replacer. J. Podien. No. 1,351,965; Sept. 7; v. 278; p. 50.
Carbamids, Producing asymmetric. A. V. Blom. No. 1,351,888; Sept. 7; v. 278; p. 35.
Carbon and gaseous fuel, Process of and apparatus for producing. J. R. Rose. No. 1,352,085; Sept. 7; v. 278; p. 72.
Carbon and gaseous fuel, Producing. J. R. Rose. No. 1,352,086; Sept. 7; v. 278; p. 72.
Carbon, Production of substantially pure. R. Williams. No. 1,352,162; Sept. 7; v. 278; p. 86.
Carbureter. H. G. Robinson and L. K. Stinson. No. 1,352,316; Sept. 7; v. 278; p. 116.
Carbureters, Vaporizer for. G. B. Cass. No. 1,352,049; Sept. 7; v. 278; p. 65.
Carrier: *See*—
Bottle-carrier. Woven pocketed carrier.
Motor-driven carrier.
Cartons, Machine for sealing. H. L. Johnson. No. 1,352,197; Sept. 7; v. 278; p. 93.
Case: *See*—
Shipping-case. Talking-machine case.
Casing-head. H. S. McGarry and J. D. Carr. No. 1,352,075; Sept. 7; v. 278; p. 70.
Caster. F. Kessel. No. 1,352,004; Sept. 7; v. 278; p. 58.
Casting, Centrifugal pipe-. J. B. Ladd. No. 1,351,766; Sept. 7; v. 278; p. 10.
Cement composition. J. J. Schaller. No. 1,351,874; Sept. 7; v. 278; p. 32.
Centrifugal machines, Yieldable bearing for. M. Leitch. No. 1,352,204; Sept. 7; v. 278; p. 94.
Chain, Multiplate drive-. F. L. Morse. No. 1,352,017; Sept. 7; v. 278; p. 60.
Chain tightener and lock. G. Anderegg. No. 1,352,339; Sept. 7; v. 278; p. 120.
Chair: *See*—
Folding chair.
Chair or bench, Auditorium, assembly-room, or theater. J. P. Satterlee. No. 1,352,415; Sept. 7; v. 278; p. 134.
Chairs, Traveling stool attachment for barbers'. E. W. Hoefener. No. 1,352,409; Sept. 7; v. 278; p. 132.
Chart, Educational. F. W. Walker. No. 1,352,042; Sept. 7; v. 278; p. 64.
Christmas-tree ornament and making same. W. R. Rudolph. No. 1,351,790; Sept. 7; v. 278; p. 14.
Cinemas, theaters, &c. Fixed seats for use in. P. Cornish. No. 1,351,995; Sept. 7; v. 278; p. 56.
Clamp: *See*—
Adjustable clamp.
Clamp. S. R. Libbey. No. 1,351,772; Sept. 7; v. 278; p. 11.
Clamping device. M. J. Maguth. No. 1,352,296; Sept. 7; v. 278; p. 112.
Cleaner: *See*—
Window and wall cleaner.
Clevis, Safety. J. Zubal. No. 1,351,825; Sept. 7; v. 278; p. 22.
Clipper: *See*—
Hair-clipper.
Clothesline. R. D. Johnson. No. 1,352,273; Sept. 7; v. 278; p. 107.
Coffee-urn. E. Kronman. No. 1,352,069; Sept. 7; v. 278; p. 69.
Collapsible tube. E. L. Cleveland. No. 1,352,355; Sept. 7; v. 278; p. 123.
Collar-fastener. F. Hyde. No. 1,352,268; Sept. 7; v. 278; p. 106.
Collar-holder. J. A. Mariner. No. 1,352,139; Sept. 7; v. 278; p. 82.
Combustion system. L. L. Scott. No. 1,352,227; Sept. 7; v. 278; p. 99.
Commutator. H. R. Saxon. No. 1,351,926; Sept. 7; v. 278; p. 43.
Concrete anchor or insert. C. J. Branch. No. 1,352,245; Sept. 7; v. 278; p. 102.
Concrete-pile construction. C. S. Howell. No. 1,352,128; Sept. 7; v. 278; p. 80.
Concrete-pipe construction. H. E. Dillon. No. 1,351,895; Sept. 7; v. 278; p. 36.
Condenser unit and making same. W. H. Richter. No. 1,351,787; Sept. 7; v. 278; p. 14.
Connectors, Making. H. B. Sherman. No. 1,352,034; Sept. 7; v. 278; p. 62.
Container and closure therefor. R. V. Marceron. No. 1,351,920; Sept. 7; v. 278; p. 42.
Controlling means. W. W. Lasker. No. 1,352,006; Sept. 7; v. 278; p. 58.
Conveyer. H. O'B. Harding. No. 1,352,263; Sept. 7; v. 278; p. 105.
Conveyer. W. Pines. No. 1,352,312; Sept. 7; v. 278; p. 115.
Conveying and elevating apparatus. H. O'B. Harding. No. 1,352,262; Sept. 7; v. 278; p. 105.
Conveying and tipping apparatus. E. D. Tschache. No. 1,352,329; Sept. 7; v. 278; p. 118.
Cooking device, Combination. H. L. Mendal. No. 1,351,921; Sept. 7; v. 278; p. 42.
Corset-fastening. J. H. Auerbach. No. 1,351,728; Sept. 7; v. 278; p. 3.
Cotton-boll-cleaning machine. A. T. Lokey. No. 1,351,858; Sept. 7; v. 278; p. 29.
Cotton-tramper. E. A. H. Jacob; No. 1,352,129; Sept. 7; v. 278; p. 80.
Coupling: *See*—
Flexible coupling. Pipe-coupling.
Crate, Folding. E. Mertz. No. 1,352,299; Sept. 7; v. 278; p. 112.
Crawler, Compound. E. Rimailho. No. 1,352,315; Sept. 7; v. 278; p. 116.
Cup: *See*—
Grease-cup.
Curtain-support. W. I. Levi; No. 1,351,919; Sept. 7; v. 278; p. 42.
Cushion: *See*—
Spring-die cushion.
Cyanids, Process and means for producing metallic. C. P. Hidden. No. 1,352,192; Sept. 7; v. 278; p. 91.

Garters, Making. R. Gorton. No. 1,352,258; Sept. 7; v. 278; p. 105.
Gas-burner. J. Byers. No. 1,352,351; Sept. 7; v. 278; p. 122.
Gas-cookers, Device for automatic extinction or dampening of the flame in. A. C. E. Hojgaard. No. 1,352,001; Sept. 7; v. 278; p. 57.
Gas, Generating. H. Batchelor. No. 1,352,241; Sept. 7; v. 278; p. 102.
Gas-meter. R. A. Culleton and D. J. Leahy. No. 1,351,842; Sept. 7; v. 278; p. 25.
Gate. W. E. White. No. 1,352,233; Sept. 7; v. 278; p. 100.
Gearing. W. S. Lovell. No. 1,352,293; Sept. 7; v. 278; p. 111.
Gearing, Differential. J. C. Bogart. No. 1,351,737; Sept. 7; v. 278; p. 5.
Gears, Contact of electrical switch-. R. S. O'Neil. No. 1,351,963; Sept. 7; v. 278; p. 50.
Gear mechanism, Differential-. M. C. Indahl. No. 1,382,269; Sept. 7; v. 278; p. 106.
Gear wheels or crown-wheels, Manufacture of toothed bevel-. O. R. Opperman. No. 1,352,021; Sept. 7; v. 278; p. 60.
Glass articles, Machine for finishing blown-. J. Bailey. No. 1,352,396; Sept. 7; v. 278; p. 130.
Glass-drawing apparatus. G. L. Catlin and D. Morrison. No. 1,351,833; Sept. 7; v. 278; p. 24.

Golf-club. A. P. Olson. No. 1,352,020; Sept. 7; v. 278; p. 60.
Golf-club-testing device. C. L. Lawton. No. 1,351,768; Sept. 7; v. 278; p. 10.
Governor, Fly-ball. M. Haeberlein. No. 1,352,189; Sept. 7; v. 278; p. 91.
Governor, Speed-. H. G. Saal. No. 1,352,223; Sept. 7; v. 278; p. 98.
Grading machine, Lumber and timber. J. G. McDonough. No. 1,351,777; Sept. 7; v. 278; p. 12.
Grease-cup. J. F. Craven. No. 1,351,841; Sept. 7; v. 278; p. 25.
Grease-cup lid. J. H. Miller. No. 1,351,922; Sept. 7; v. 278; p. 42.
Grease-cups, Cover-locking device for. W. G. Hofmann. No. 1,352,064; Sept. 7; v. 278; p. 68.
Grinding-machines, Safety-guard for rotary. A. F. Howe. No. 1,351,908; Sept. 7; v. 278; p. 39.
Grinding-machines, Shaft-cooling means for. R. C. Mitchell. No. 1,352,303; Sept. 7; v. 278; p. 113.
Grinding-wheel-balancing device. T. Larsson. No. 1,352,005; Sept. 7; v. 278; p. 58.
Gun. O. V. Payne. No. 1,352,412; Sept. 7; v. 278; p. 133.
Gun. O. V. Payne. No. 1,352,413; Sept. 7; v. 278; p. 133.
Gun, Motor-operated. D. J. Smith, Jr. No. 1,352,319; Sept. 7; v. 278; p. 116.
Hair-clipper. V. Nicosia. No. 1,351,924; Sept. 7; v. 278; p. 43.
Hair-clipper, Motor-driven. D. N. Swatzell. No. 1,352,326; Sept. 7; v. 278; p. 118.
Handle: *See*—
Tool-handle.
Hanger: *See*—
Garment-hanger.
Hat-size reducer. H. D. Curtis. No. 1,351,893; Sept. 7; v. 278; p. 36.
Hatch-cover. K. Knutson. No. 1,352,202; Sept. 7; v. 278; p. 94.
Headlight, Dirigible. M. A. Tucker. No. 1,352,394; Sept. 7; v. 278; p. 130.
Headlights, Non-glare lens for. J. O. Yardley. No. 1,352,236; Sept. 7; v. 278; p. 101.
Heater: *See*—
Electric heater. Hot-water heater.
Heaters, Gas-burner for. R. Depew. No. 1,352,358; Sept. 7; v. 278; p. 123.
Heating system. D. T. Kenney. No. 1,352,371; Sept. 7; v. 278; p. 126.
Heel-breasting machine. R. E. Laughton and P. E. Barnes. No. 1,352,007; Sept. 7; v. 278; p. 58.
Heel-building machine. J. E. Mitchell, W. Wolfe, and D. Parks. No. 1,352,302; Sept. 7; v. 278; p. 113.
Hinge for doors of burial-vaults. H. Pounder. No. 1,352,379; Sept. 7; v. 278; p. 127.
Hoisting and conveying apparatus. H. Weickel. No. 1,351,882; Sept. 7; v. 278; p. 34.
Homologue of tropin and producing same. E. Müller. No. 1,352,082; Sept. 7; v. 278; p. 71.
Horn, Automobile-. P. B. Hartman. No. 1,351,904; Sept. 7; v. 278; p. 38.
Horn, Electric. B. Ames. No. 1,351,729; Sept. 7; v. 278; p. 3.
Horseshoe. M. C. Leinweber. No. 1,351,769; Sept. 7; v. 278; p. 10.
Hot appliance. H. V. Barclay. No. 1,351,986; Sept. 7; v. 278; p. 54.
Hot-water heater. J. Fleischmann. No. 1,351,899; Sept. 7; v. 278; p. 37.
Ice-cream-delivery machine. F. Hara. No. 1,351,903; Sept. 7; v. 278; p. 38.
Ice-creeper. T. Saia and M. Butera. No. 1,352,088; Sept. 7; v. 278; p. 73.
Inclosure, pen, fence, and the like. C. M. Stevenson. No. 1,352,392; Sept. 7; v. 278; p. 129.

Picture machines, Safety device for moving-. N. Power. No. 1,352,218; Sept. 7; v. 278; p. 96.
Picture projectors, Carrying-case for motion-. C. J. Koch. No. 1,351,765; Sept. 7; v. 278; p. 10.
Pin-pointing machine. H. Heine. No. 1,351,849; Sept. 7; v. 278; p. 27.
Pipe-coupling. F. Dow. No. 1,352,118; Sept. 7; v. 278; p. 78.
Pipe coupling, Metal-. F. W. Erickson. No. 1,352,256; Sept. 7; v. 278; p. 104.
Pipe-fitting. A. E. Tatro. No. 1,352,102; Sept. 7; v. 278; p. 75.
Pipe-molds, Gas-burner for. L. R. Lemoine. No. 1,351,770; Sept. 7; v. 278; p. 11.
Pipe-molds, Method of and apparatus for charging rotating. J. B. Ladd. No. 1,351,767; Sept. 7; v. 278; p. 10.
Pipes, Coupling for railway-train. E. A. Schreiber. No. 1,351,875; Sept. 7; v. 278; p. 32.
Package-tie. J. C. Culligan. No. 1,352,357; Sept. 7; v. 278; p. 123.
Pipes, Roof connection for vent-. E. E. Coar. No. 1,352,248; Sept. 7; v. 278; p. 103.
Plaster-board and making same. J. Schumacher. No. 1,352,390; Sept. 7; v. 278; p. 129.
Plow. W. T. Herndon. No. 1,351,850; Sept. 7; v. 278; p. 28.
Plow. A. Mitchell. No. 1,351,782; Sept. 7; v. 278; p. 13.
Pocket, Protective. C. C. Wals. No. 1,351,816; Sept. 7; v. 278; p. 20.
Poison-bottle indicator. A. G. Baxter. No. 1,352,344; Sept. 7; v. 278; p. 121.
Polish, Liquid. A. F. Mendez. No. 1,352,015; Sept. 7; v. 278; p. 59.
Pot: *See*—
Dash-pot.
Potato picker or gatherer. C. Fowler. No. 1,351,948; Sept. 7; v. 278; p. 47.
Potatoes and other seed, Machine for planting. J. Hutton. No. 1,352,411; Sept. 7; v. 278; p. 133.
Powder and making same, Perforated pellet of explosive. F. I. and E. du Pont. No. 1,352,121; Sept. 7; v. 278; p. 79.
Power system, Totalizing. L. Wilson. No. 1,352,235; Sept. 7; v. 278; p. 100.
Press for removing bushings, &c. J. H. Staley. No. 1,352,098; Sept. 7; v. 278; p. 74.
Pressure-regulator. L. Le Bras. No. 1,352,288; Sept. 7; v. 278; p. 110.
Printing mechanism for cylindrical articles. E. S. Bradford. No. 1,351,830; Sept. 7; v. 278; p. 23.
Printing-plate and making same. I. W. Litchfield. No. 1,351,954; Sept. 7; v. 278; p. 48.
Printing-presses, Guard for. D. Curry. No. 1,351,997; Sept. 7; v. 278; p. 56.
Printing-presses, Inking mechanism for. R. S. Tyler. No. 1,352,159; Sept. 7; v. 278; p. 86.
Propeller-testing device. W. S. Bowen. No. 1,351,738; Sept. 7; v. 278; p. 5.
Pulp hollow ware, Method and apparatus for drying. J. J. Eldridge and G. A. Dunn. No. 1,352,404; Sept. 7; v. 278; p. 131.
Pump. W. R. Twiford. No. 1,351,813; Sept. 7; v. 278; p. 19.
Pump, Air-. S. H. Bossart. No. 1,352,348; Sept. 7; v. 278; p. 122.
Pump, Air-. J. G. Gerhart. No. 1,351,847; Sept. 7; v. 278; p. 27.
Pump and pumping system. B. S. Aikman. (Reissue.) No. 14,946; Sept. 7; v. 278; p. 135.
Pump, Compressed-air. H. Mandelbaum. No. 1,352,013; Sept. 7; v. 278; p. 59.

Pump, Governing fuel-. A. F. Christmas. No. 1,352,050; Sept. 7; v. 278; p. 65.
Pump or compressor. J. H. Wagenhorst. No. 1,352,107; Sept. 7; v. 278; p. 76.
Pump, Water-motor. M. V. Andrews and S. W. Holman. No. 1,352,237; Sept. 7; v. 278; p. 101.
Punch, Can-. J. Postma. No. 1,352,378; Sept. 7; v. 278; p. 127.
Rack: *See*—
Display-rack. Tank-rack.
Radiator-condenser. J. R. Brandon, Jr. No. 1,351,891; Sept. 7; v. 278; p. 36.
Radiator-core. R. Kleine. No. 1,352,068; Sept. 7; v. 278; p. 69.
Radiator-shield. H. H. Crawford. No. 1,352,184; Sept. 7; v. 278; p. 90.
Radiators, Air-exhauster for steam-. M. E. Hershey. No. 1,352,265; Sept. 7; v. 278; p. 106.
Radiotelegraphy. L. F. Fuller. No. 1,352,059; Sept. 7; v. 278; p. 67.
Rail structure, Guard-. W. M. Creitz. No. 1,352,356; Sept. 7; v. 278; p. 123.
Railway draft-gears, Manufacture of. S. Simonson. No. 1,352,152; Sept. 7; v. 278; p. 85.
Railway draft-gears, Manufacture of yokes for. H. T. Anderson. No. 1,352,167; Sept. 7; v. 278; p. 87.
Railway draft-gears, Yoke for. S. Simonson. No. 1,352,151; Sept. 7; v. 278; p. 84.
Railway switch and signal, Automatic. I. L. Edwards. No. 1,351,946; Sept. 7; v. 278; p. 47.
Railway-tie. C. O. Whitcomb. No. 1,351,819; Sept. 7; v. 278; p. 21.
Railway-traffic-controlling system. L. V. Lewis. No. 1,351,771; Sept. 7; v. 278; p. 11.
Rake attachment. O. Rundberg. No. 1,352,386; Sept. 7; v. 278; p. 128.
Ratchet and clutch mechanism. I. Church. No. 1,352,354; Sept. 7; v. 278; p. 123.
Razor-blade holder. A. F. Barro. No. 1,351,987; Sept. 7; v. 278; p. 54.
Razor-blade holder, Safety-. F. McEown. No. 1,352,011; Sept. 7; v. 278; p. 59.
Razor, Safety-. L. H. Allan. No. 1,351,826; Sept. 7; v. 278; p. 22.
Recording apparatus. C. E. Goddard. No. 1,351,902; Sept. 7; v. 278; p. 38.
Reel. C. E. Walker. No. 1,352,041; Sept. 7; v. 278; p. 64.

Preparation for relief of headaches and neuralgia. Vancouver Drug Company. No. 134,553; Sept. 7; v. 278; p. 161.
Preparation for the treatment of the teeth. The Pemetine Company. No. 134,522; Sept. 7; v. 278; p. 160.
Printing-presses and parts thereof. Lisenby Manufacturing Company. No. 134,511; Sept. 7; v. 278; p. 160.
Radiator compound for internal-combustion engines. The Chamberlain-Haber Chemical Co. No. 134,482; Sept. 7; v. 278; p. 159.
Remedy for falling hair, dandruff, and scalp diseases. S. B. Deaderick. No. 134,492; Sept. 7; v. 278; p. 159.
Remedy for various affections of the lungs and relief of consumptive and asthmatic patients, Internal. V. L. Blahnik & Sons. No. 134,478; Sept. 7; v. 278; p. 159.
Remedy, Toothache. The Dentamina Trading Co. No. 134,499; Sept. 7; v. 278; p. 160.
Rennet powder and photographic developers. Fabrique de Produits Chimiques Flora. No. 134,496; Sept. 7; v. 278; p. 159.
Ribbons. Pelgram & Meyer. No. 134,521; Sept. 7; v. 278; p. 160.
Roofing, Heat and cold insulating materials, &c. The Philip Carey Manufacturing Company. No. 134,525; Sept. 7; v. 278; p. 160.
Roofing, Prepared. Carpenter-Morton Company. No. 134,480; Sept. 7; v. 278; p. 159.
Salve. W. C. Sunderland. No. 134,543; Sept. 7; v. 278; p. 161.
Salve or ointment, for catarrh, hay-fever, burns, &c. S. D. Clark. No. 134,485; Sept. 7; v. 278; p. 159.
Sherry. W. H. Chaplin & Company. No. 134,484; Sept. 7; v. 278; p. 159.
Tire-patch. R. L. Bartholomew. No. 134,477; Sept. 7; v. 278; p. 159.
Tires, Inner tubes for pneumatic. Spencer Carroll Company. No. 134,542; Sept. 7; v. 278; p. 161.
Tires, &c., Patches for inner tubes of automobile-. J. E. Sawyer. No. 134,535; Sept. 7; v. 278; p. 161.
Toilet preparations. The United States Drug & Chemical Co. No. 134,549; Sept. 7; v. 278; p. 161.
Tonic, Laxative. The Manhattan Medicine Co. No. 134,515; Sept. 7; v. 278; p. 160.
Toothbrushes. C. Dierke. No. 134,493; Sept. 7; v. 278; p. 159.
Toy horse. J. Scanlon. No. 134,536; Sept. 7; v. 278; p. 161.
Typewriting and printing, Non-carbonized paper. Powers Paper Company. No. 134,527; Sept. 7; v. 278; p. 160.
Wall-board and building-paper. Muro Wall Board Company. No. 134,517; Sept. 7; v. 278; p. 160.
Wines, Dealcoholized. Garrett and Company. No. 134,503; Sept. 7; v. 278; p. 160.

ALPHABETICAL LIST OF LABELS.

"Caramels." (For Caramels.) Beech-Nut Packing Company. No. 22,093; Sept. 7; v. 278; p. 162.
"Cream Manila Practice Paper, Louisville Public Schools." (For Pads of Drawing-Paper in the Public Schools.) Board of Education of Louisville, Kentucky. No. 22,094; Sept. 7; v. 278; p. 162.
"Grey Manilla Practice Paper, Louisville Public Schools." (For Pads of Drawing-Paper in the Public Schools.) Board of Education of Louisville, Kentucky. No. 22,095; Sept. 7; v. 278; p. 162.
"Waterman's Ideal Ink." (For Waterman's Ideal Ink.) L. E. Waterman Company. Nos. 22,096–9; Sept. 7; v. 278; p. 162.

ALPHABETICAL LIST OF PRINTS.

"Handy Candy Caramels." (For Handy Candy Caramels.) Beech-Nut Packing Company. No. 5,334; Sept. 7; v. 278; p. 162.
"The New Series Haynes Suburban." (For Automobiles.) The Haynes Automobile Co. No. 5,335; Sept. 7; v. 278; p. 162.

ALPHABETICAL LIST OF TRADE-MARK TITLES.

(REGISTRATION APPLIED FOR.)

Antiseptic for infections. H. H. Hall. No. 128,387; Sept. 7; v. 278; p. 143.
Automobile-horns, Electrically-operated. Guiterman, Rosenfeld & Company. No. 135,555; Sept. 7; v. 278; p. 156.
Automobile, piano, and furniture polish. Van Camp Hardware & Iron Company. No. 129,156; Sept. 7; v. 278; p. 145.
Automobile-rim clamps, wedges, and bolts for same. Thompson-Neaylon Manufacturing Co. No. 130,453; Sept. 7; v. 278; p. 147.
Baking-powder. Commercial Importing Company. No. 128,725; Sept. 7; v. 278; p. 144.
Bananas, Evaporated. Duran & Davalos. No. 126,564; Sept. 7; v. 278; p. 141.
Battery-containers. United Battery Service Company. No. 132,901; Sept. 7; v. 278; p. 150.
Bed-ticking. Blue Buckle Cotton Mills, Inc. Nos. 135,686–8; Sept. 7; v. 278; pp. 156–7.
Bed-ticking. Blue Buckle Cotton Mills, Inc. No. 135,690; Sept. 7; v. 278; p. 157.
Bed-ticking. Blue Buckle Cotton Mills, Inc. No. 135,692; Sept. 7; v. 278; p. 157.
Beverages, Non-alcoholic. H. M. Lewis. No. 127,433; Sept. 7; v. 278; p. 142.
Buttons. H. Opitz. No. 135,614; Sept. 7; v. 278; p. 156.
Buttons for shoes and clothing. National Ring Traveler Co. No. 135,611; Sept. 7; v. 278; p. 156.
Blankets, Manufactured. Edson Moore & Company. No. 126,354; Sept. 7; v. 278; p. 141.
Bleaching compounds and powder. Société Anonyme des Produits du Lion Noir. No. 118,621; Sept. 7; v. 278; p. 140.
Blocks, ties, conduits, &c. The Rodd Company. No. 126,139; Sept. 7; v. 278; p. 141.
Bluing. The Ultramarine Company. No. 118,630; Sept. 7; v. 278; p. 140.
Boots and shoes. Stone-Tarlow Co. No. 130,734; Sept. 7; v. 278; p. 147.
Boxes for toilet preparations. S. S. Booty. No. 129,121; Sept. 7; v. 278; p. 145.
Bread. S. Straus. No. 132,568; Sept. 7; v. 278; p. 149.
Candies and molasses kisses. C. Elliott. Nos. 133,653–4; Sept. 7; v. 278; p. 151.
Candles. Tiffany & Co. Nos. 134,158–9; Sept. 7; v. 278; p. 155.
Candy. The Creole Praline Co. No. 123,773; Sept. 7; v. 278; p. 140.
Candy. W. A. Feuillan, Jr. No. 132,786; Sept. 7; v. 278; p. 150.
Candy. W. T. Hall & Co. No. 133,665; Sept. 7; v. 278; p. 152.
Canned fish. O'Loane, Kiely & Co. No. 133,489; Sept. 7; v. 278; p. 151.
Canned fruits. R. S. Beston & Co. No. 134,346; Sept. 7; v. 278; p. 155.
Canned milk. Libby, McNeill & Libby. No. 133,156; Sept. 7; v. 278; p. 151.
Capsules of benzol benzoate. The William S. Merrell Company. No. 128,419; Sept. 7; v. 278; p. 143.
Carpets and rugs. Rag. A. C. McGugin. No. 134,840; Sept. 7; v. 278; p. 155.
Cement, Adhesive. Stixole Manufacturing Co. No. 132,815; Sept. 7; v. 278; p. 150.
Chemical compound. R. L. Crowe. No. 128,487; Sept. 7; v. 278; p. 144.
Clothing. S. Horwitz & Sons. No. 132,860; Sept. 7; v. 278; p. 150.
Clothing. Sionim Brothers. No. 124,693; Sept. 7; v. 278; p. 141.
Clothing. B. Wohl. No. 133,941; Sept. 7; v. 278; p. 154.
Clothing, Infants' and children's. E. J. Feisel. No. 127,048; Sept. 7; v. 278; p. 141.
Clothing, Work-. Evans Mfg. Co. No. 128,300; Sept. 7; v. 278. p. 143.
Coats, waistcoats, trousers, overcoats. David Adler & Sons Co. No. 129,525; Sept. 7; v. 278; p. 146.
Coffee, tea, canned corn, and tomatoes. Keil Company. No. 131,486; Sept. 7; v. 278; p. 148.
Collars, Men's and boys'. Rogers Peet Company. No. 134,034; Sept. 7; v. 278; p. 154.
Colloid solution for influenza, hay-fever, &c., Antiseptic. E. Govett. No. 129,841; Sept. 7; v. 278; p. 146.
Colloidal metallic silver medicine. Norfolk Chemical Company. No. 128,400; Sept. 7; v. 278; p. 143.
Corsets, corset-waists, brassières. Lineham-Conover Company. No. 113,453; Sept. 7; v. 278; p. 139.
Cotton Blankets. Massachusetts Cotton Mills. No. 135,792; Sept. 7. v. 278; p. 157.
Cotton piece goods. G. Igstaedter. No. 135,322; Sept. 7; v. 278; p. 156.
Cotton table-damask, pattern-cloths, and napkins, Bleached, &c. B. F. Bailey & Co. No. 135,745; Sept. 7; v. 278; p. 157.
Disinfectant, deodorizer, &c. F. D. Fenner. No. 128,433; Sept. 7; v. 278; p. 144.
Drying-machines, Electrical lavatory. Groton Electrical Devices, Inc. No. 134,889; Sept. 7; v. 278; p. 155.
Dye, Leather-shoe. L. Mandel. No. 128,787; Sept. 7; v. 278; p. 145.
Dyestuffs. National Aniline & Chemical Company. Nos. 133,836–46; Sept. 7; v. 278. pp. 152–3.
Egg-preserving preparations. The Rub-No-More Co. No. 128,702; Sept. 7; v. 278; p. 144.
Electric-light fixtures. St. Louis Brass Manufacturing Co. No. 119,374; Sept. 7; v. 278; p. 140.
Electric motors. Persons Electric Co. No. 135,762; Sept. 7; v. 278; p. 157.
Engagement and welding rings. C. A. Kline. No. 131,638; Sept. 7; v. 278; p. 148.
Fenceposts, cross-arms, &c., Wood. Southern Wood Preserving Co. No. 130,070; Sept. 7; v. 278; p. 147.
Flash-lights and batteries. Shapleigh Hardware Company. No. 135,734; Sept. 7; v. 278. p. 157.
Flat-ware and tableware, Silver-plated. Oneida Community. No. 127,603; Sept. 7; v. 278; p. 142.
Flooring, Wood. The Crooks-Dittmar Co. No. 127,239; Sept. 7; v. 278; p. 141.
Flooring, Wood. The Crooks-Dittmar Co. No. 131,943; Sept. 7; v. 278; p. 149.
Forms for use in business management, &c., Printed blank. P. S. Warner. No. 131,415; Sept. 7; v. 278; p. 148.
Fur coats, scarfs, and muffs. Rosenberg Bros. No. 132,708; Sept. 7; v. 278; p. 149.
Furnishing goods, Men's, women's, and children's. The Plaut Company. No. 133,937; Sept. 7; v. 278; p. 154.

Garments, Men's and boys' work-. Triangle Overall Company. No. 133,946; Sept. 7; v. 278; p. 154.
Garters. Harris Suspender Company. No. 129,783; Sept. 7; v. 278; p. 146.
Hair-grower, pressing-oil, &c. S. F. Winston. No. 129,361; Sept. 7; v. 278; p. 146.
Hair restorer and tonic. B. McCabe. No. 129,851; Sept. 7; v. 278; p. 147.
Hair-tonic. J. L. Hall. No. 130,098; Sept. 7; v. 278. p. 147.
Healing-powders, Antiseptic. Allaire, Woodward & Co. No. 128,338; Sept. 7; v. 278; p. 143.
Hosiery. Consolidated Mills Company. No. 134,635; Sept. 7; v. 278; p. 155.
Hosiery. Marshall Field & Company. No. 131,490; Sept. 7; v. 278; p. 148.
Hosiery. E. T. Slattery Co. No. 133,060; Sept. 7; v. 278; p. 150.
Knitted sweaters, leggings, caps, &c. Simon Ascher & Co. No. 133,514; Sept. 7; v. 278; p. 151.
Ladies' belts of ornamental design. F. C. Gerbasi. No. 135,559; Sept. 7; v. 278. p. 156.
Laxative for colds, headache, &c. Pal Medicine Co. No. 129,800; Sept. 7; v. 278; p. 146.
Leather goods for use in looms and textile machinery. John Ormerod & Sons. No. 127,257; Sept. 7; v. 278; p. 142.
Leather goods, for use in looms and textile machinery. John Ormerod & Sons. No. 127,259; Sept. 7; v. 278; p. 142.
Lime, Chemical calcium hydrated. Rockland and Rockport Lime Corporation. No. 129,609; Sept. 7; v. 278; p. 146.
Linoleum, Imitation. Economic Manufacturing Co. No. 134,813; Sept. 7; v. 278; p. 155.
Lubricators, Oil, and grease cups. Madison1Kipp Corporation. No. 126,133; Sept. 7; v. 278; p. 141.
Lumber and forest products. Union Lumber Company. No. 133,994; Sept. 7; v. 278; p. 154.
Magazine, Quarterly. W. H. Alston. No. 132,070; Sept. 7; v. 278; p. 149.
Magazine, Weekly. J. B. Bloor. No. 135,264; Sept. 7; v. 278; p. 156.

(REGISTRATION APPLIED FOR.)

Maltose, glucose, &c., for food-flavoring. A. O. Probst & Co. No. 128,273; Sept. 7; v. 278; p. 143.
Medicinal preparations for venereal diseases. J. Brémont. No. 129,488; Sept. 7; v. 278; p. 146.
Medicines for the stomach and liver. E. H. Baker. No. 128,647; Sept. 7; v. 278; p. 144.
Music-boxes. Tiffany & Company. No. 135,387; Sept. 7; v. 278; p. 156.
Oil, Corn-. Douglas Company. No. 113,929; Sept. 7; v. 278; p. 139.
Oil, Cotton salad-. Rocco Perretta & Company. No. 134,601; Sept. 7; v. 278; p. 155.
Oils and greases, gasolene, &c., Lubricating. Blery Oil Company. No. 130,798; Sept. 7; v. 278; p. 148.
Oils and greases, Lubricating. The Hulbert Oil & Grease Co. No. 116,774; Sept. 7; v. 278; p. 139.
Oils, greases, and compounds, Motor and lubricating. Petroleum Oil Company. No. 133,934; Sept. 7; v. 278; p. 154.
Ointment for eczema, &c. The Sumellor Company. No. 108,460; Sept. 7; v. 278; p. 139.
Ointment, Nasal. Sinclair Pharmacal Co. No. 128,412; Sept. 7; v. 278; p. 143.
Ointment used in the treatment of pulmonary diseases. Wingate's Salvo Manufacturing Co. No. 128,376; Sept. 7; v. 278; p. 143.
Overalls. L. Lewin Company. No. 133,787; Sept. 7; v. 278; p. 152.
Overalls and work-clothes. Jobbers Overall Co. No. 133,151; Sept. 7; v. 278; p. 150.
Paint. Indiana Indestructible Paint Co. No. 128,966; Sept. 7; v. 278; p. 145.
Paints. Indiana Indestructible Paint Co. No. 128,969; Sept. 7; v. 278; p. 145.
Paints, paint-oils, and varnishes for metal surfaces. The Irvin, Jewell & Vinson Company. No. 130,045; Sept. 7; v. 278; p. 147.
Paints, paint-oils, and varnishes for metal surfaces. The Irvin, Jewell & Vinson Company. No. 130,478; Sept. 7; v. 278; p. 147.
Paper and typewriter-ribbons, Carbon-. De-Fi Manufacturing Company. No. 129,005; Sept. 7; v. 278; p. 145.
Paper, Binders for loose sheets of. Paragon Binder Corporation. No. 103,510; Sept. 7; v. 278; p. 139.
Paper coated on one side with mucilage. Samuel Jones & Company. No. 127,289; Sept. 7; v. 278; p. 142.
Papers, Transparent and gelatin. Chemical Paper Company. No. 130,157; Sept. 7; v. 278; p. 147.
Pencils and fountain-pens, Automatic. Crocker Pen Company. No. 133,403; Sept. 7; v. 278; p. 151.
Pens, Fountain-. The Evans Dollar Pen Company. No. 133,917; Sept. 7; v. 278; p. 154.
Periodical, Weekly. United Publishers Corporation. No. 132,328; Sept. 7; v. 278; p. 149.
Periodicals, Annual. Oscar H. Will & Co. No. 128,575; Sept. 7; v. 278; p. 144.
Phonograph-motors (mechanical). Krasberg Engineering and Manufacturing Corporation. No. 119,074; Sept. 7; v. 278; p. 140.
Pictures. N. Kahn-Lang. Nos. 127,826–7; Sept. 7; v. 278; p. 142.
Pipes, cigarette-holders, tobacco-pouches. The House of Willis. No. 127,246; Sept. 7; v. 278; p. 141.
Powder, Talcum. Talcum Puff Company. No. 128,872; Sept. 7; v. 278; p. 145.
Preparation for influenza. F. P. Gemenden. No. 128,963; Sept. 7; v. 278; p. 145.
Publication. J. F. Fisher. No. 134,815; Sept. 7; v. 278; p. 155.
Punch, Fruit. N. E. French. No. 133,463; Sept. 7; v. 278; p. 151.
Rafts. Martin Olsson & Sons. No. 130,485; Sept. 7; v. 278; p. 147.
Remedy and corn cure, Foot. Aseptic Chemical Company. No. 129,485; Sept. 7; v. 278; p. 146.
Scalp and mange remedy. G. Paquin. No. 128,404; Sept. 7; v. 278; p. 143.
Shoes. A. J. Bates & Company. Nos. 133,005–6; Sept. 7; v. 278; p. 150.
Silk, linen, woolen, &c., piece goods. Haas Brothers Fabrics Corporation. No. 131,872; Sept. 7; v. 278; p. 149.
Silk Piece Goods. Empire Silk Company. No. 135,806; Sept. 7; v. 278; p. 157.
Silk piece goods. C. Peschler. Nos. 133,590–1; Sept. 7; v. 278; p. 151.
Silver-plating compound. Metalmend Manufacturing Co. No. 126,737; Sept. 7; v. 278; p. 141.
Snap-fasteners. Carr Fastener Company. No. 135,406; Sept. 7; v. 278; p. 156.
Soda, Cleansing-. E. G. Broderick. No. 129,825; Sept. 7; v. 278; p. 146.
Soap. Ritz Soap Co. No. 131,539; Sept. 7; v. 278; p. 148.
Soap. Swift and Company. No. 131,600; Sept. 7; v. 278; p. 148.
Stamps or coupons, Trading. S. V. D'Unger. No. 128,030; Sept. 7; v. 278; p. 143.
Syrup, Cough-. Dudman Drug & Chemical Co. No. 129,172; Sept. 7; v. 278; p. 146.
Tablets, Antibilious. J. R. Hodges. No. 128,780; Sept. 7; v. 278; p. 144.
Tablets, Phenolphthalein. The William S. Merrell Company. No. 128,418; Sept. 7; v. 278; p. 143.
Telegraphic sending-machines. The Vibroplex Company. No. 132,330; Sept. 7; v. 278; p. 149.
Tooth-wash. B. Altman & Co. No. 128,579; Sept. 7; v. 278; p. 144.
Toy aeroplanes. P. Pierce. No. 124,355; Sept. 7; v. 278; p. 140.
Toy velocipedes. R. E. Booth. No. 122,242; Sept. 7; v. 278; p. 140.
Trousers. H. Koffler. No. 134,022; Sept. 7; v. 278; p. 154.
Underwear, Woven. American Wholesale Corporation (Baltimore Bargain House). No. 131,098; Sept. 7; v. 278; p. 148.
Waistbands. L. Friedman. No. 133,409; Sept. 7; v. 278; p. 151.
Washing machines, Clothes-. Wayne Manufacturing Company. No. 131,000; Sept. 7; v. 278; p. 148.
Washing-powders. Mato Mfg. Co. No. 117,469; Sept. 7; v. 278; p. 139.
Welding-rods. Oxweld Acetylene Company. No. 134,266; Sept. 7; v. 278; p. 155.
Wool, Compound for cleaning and bleaching. Hagemeyer Trading Company. No. 128,681; Sept. 7; v. 278; p. 144.
Woolen, worsted, &c., piece goods. R. Spitzer. No. 132,063; Sept. 7; v. 278; p. 149.
Wringer and washboard, Combined. The Pierson Company. No. 118,932; Sept. 7; v. 278; p. 140.

CLASSIFICATION OF PATENTS

ISSUED SEPTEMBER 7, 1920.

NOTE.—First number=class, second number=subclass, third number=patent number.

2— 15: 1,351,816
32: 1,351,893
62: 1,352,027
95: 1,351,731
149: 1,352,156
3— 2: 1,351,789
1,351,955
4— 18: 1,352,058

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 14TH DAY OF SEPTEMBER, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Aaseth, Gustav, Christiania, Norway. Machine for cultivating unbroken ground. No. 1,353,012; Sept. 14; v. 278; p. 289.

Abrams, William B., and R. I. Gay, Philadelphia, Pa. Divider for dough or the like. No. 1,352,424; Sept. 14; v. 278; p. 171.

Air Reduction Company. (See Russell, Richard F., assignor.)

Aktiebolaget Gyro. (See Cassell, Gunnar E., assignor.)

Albé, Angelo, Turin, Italy. Type-casting machine. No. 1,352,644; Sept. 14; v. 278; p. 216.

Albers, William C., New York, assignor to A. F. Pierce, Brooklyn, N. Y. Picture-projecting machine. No. 1,352,420; Sept. 14; v. 278; p. 171.

Alsina, Vicente C., and G. Fernandez, Buenos Aires, Argentina. Preserving manufactured or leaf tobacco. No. 1,352,421; Sept. 14; v. 278; p. 171.

Altpeter, Oscar, Milwaukee, Wis. Machine for making composite shingles. No. 1,352,931; Sept. 14; v. 278; p. 273.

Alvin Electrical Products Company. (See Olevin, Adolph, assignor.)

American Coke and Chemical Company. (See Roberts, Arthur, assignor.)

American Cyanamid Company. (See Buchanan, Guy H., assignor.)

American Kron Scale Company. (See Barrett, Joseph C., assignor.)

American Laundry Machinery Company, The. (See Miller, Ernest W., assignor.)

American Safety Device Company. (See Johnston, Frank B., assignor.)

American Telephone and Telegraph Company. (See Campbell, George A., assignor.)

American Telephone and Telegraph Company. (See Demarest, Charles S., assignor.)

American Telephone and Telegraph Company. (See Mills, John, assignor.)

American Telephone & Telegraph Company. (See Sinclair, Charles G., Jr., assignor.)

Anderson, Caroline E., Park City, Utah. Maternity-corset. No. 1,352,422; Sept. 14; v. 278; p. 171.

Anderson, Nils O., and C. Scheich, Chicago, Ill. Antiseptic-powder-dispensing pencil. No. 1,352,932; Sept. 14; v. 278; p. 273.

Andrew, Frederick W., assignor to Elsemann Magneto Corporation, Brooklyn, N. Y. Coupling for impulse-starters. No. 1,352,864; Sept. 14; v. 278; p. 260.

Angier, Edward H., Framingham, Mass. Composite sheet. No. 1,352,774; Sept. 14; v. 278; p. 242.

Anthony, David W., assignor to Anthony Liquid Vending Machine Co., Minneapolis, Minn. Liquid-vending machine. No. 1,352,645; Sept. 14; v. 278; p. 216.

Appelberry, Daniel L., Hammond, Ind. Beef-splitting machine. No. 1,353,013; Sept. 14; v. 278; p. 289.

Arnold, Clarence F., Philadelphia, Pa. Walking doll. No. 1,352,933; Sept. 14; v. 278; p. 273.

Arntzen, Anders, and K. Trosdahl, assignors to Elektrisk Varmeteknik A/S., Sarpsborg, Norway. Electric-heating body. No. 1,352,934; Sept. 14; v. 278; p. 274.

Anthony Liquid Vending Machine Co. (See Anthony, David W., assignor.)

Arbon, Paul, Tulsa, Okla. Casing-head. No. 1,352,423; Sept. 14; v. 278; p. 171.

Armes Automatiques Lewis. (See Hulse, Frederick W., assignor.)

Ashby, Earnest J., Henderson, Ky. Trowel. No. 1,353,014; Sept. 14; v. 278; p. 289.

Ashtabula Bow Socket Company, The. (See Lewis, Frederick K., assignor.)

Augestad, Arent, Marka Brandbu Station, Hadeland, Norway. Inlay-sole for the prevention of the development of galls. No. 1,352,865; Sept. 14; v. 278; p. 260.

Austral Window Co. (See Kellogg, Waldo S., assignor.)

Auto & Motor Truck Axle Company, The. (See Young, Clifford H.)

Auto Pneumatic Action Co. (See Heller, Henry R., assignor.)

Automatic Electric Company. (See Jacobsen, Emil, assignor.)

Ayars, Charles H., Salem, N. J. Can-distributing device. No. 1,352,718; Sept. 14; v. 278; p. 230.

Balduf, Bruno E. (See Kochendorfer, F. S., and Balduf.)

Baldwin, Abram T., deceased; C. P. Baldwin, executrix, Detroit, Mich. Draft-gage. No. 1,352,719; Sept. 14; v. 278; p. 231.

Baldwin, Catherine P., executrix. (See Baldwin, Abram T.)

Balfour, Eva L. D. B. and J. W. B., London, England. Spike. No. 1,352,573; Sept. 14; v. 278; p. 201.

Balfour, John W. B. (See Balfour, Eva L. D. B. and J. W. B.)

Baltzley, Oren F., Hagerstown, assignor to The Liberty Tool Company, Baltimore, Md. Apparatus for drilling, reaming, and countersinking. No. 1,352,646; Sept. 14; v. 278; p. 216.

Barbers Electric Specialty Company, The. (See Coffman, Samuel M., assignor.)

Barnes, George W., and D. C. Travis, assignors to Simmons Company, Kenosha, Wis. Spring construction. No. 1,352,574; Sept. 14; v. 278; p. 202.

Barrett Company, The. (See Perry, Ray P., assignor.)

Barrett, Joseph C., Brooklyn, assignor to American Kron Scale Company, New York, N. Y. Weighing-scale. No. 1,352,935; Sept. 14; v. 278; p. 274.

Barrett, Thomas F., South Pottstown, Pa. Power transmission and storage apparatus. No. 1,352,936; Sept. 14; v. 278; p. 274.

Bastian Bros. Company. (See Mitchel, Charles F., assignor.)

Batchelder, Frank R. (See Jennings, Victor H., assignor.)

Bausch & Lomb Optical Company. (See Patterson, William L., assignor.)

Baymiller, Joel F., Buhl, Idaho. Revolving housekeeping-cabinet. No. 1,352,496; Sept. 14; v. 278; p. 186.

Beanblossom, Albert C., Des Moines, Iowa. Power attachment for automobiles. No. 1,352,497; Sept. 14; v. 278; p. 186.

Bears, Daniel S., assignor to Reliance Manufacturing Co., Providence, R. I. Belt-buckle. No. 1,352,937; Sept. 14; v. 278; p. 274.

Behr, Ernst, Saratoga Springs, N. Y. Leaf-turning device. No. 1,353,015; Sept. 14; v. 278; p. 289.

Bell, George A., assignor of one-half to L. C. Hammond, Silver Creek, N. Y. Spark-plug. No. 1,352,775; Sept. 14; v. 278; p. 242.

Bell, Henry W. (See Currie, J., and Bell.)

Benecke, Louis A., *et al.* (See Flatau, Louis S., assignor.)

Benjamin Electric Manufacturing Company. (See Benjamin, Reuben B., assignor.)

Benjamin, Reuben B., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Separable attachment device. No. 1,352,776; Sept. 14; v. 278; p. 242.

Benjamin, Reuben B., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Illuminating device. No. 1,352,777; Sept. 14; v. 278; p. 242.

Benjamin, Reuben B., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Combined connecting-block and fuse-block. No. 1,352,778; Sept. 14; v. 278; p. 243.

Benton, George T., assignor of one-half to O. A. McDill, Willow Springs, Mo. Double clamp. No. 1,352,647; Sept. 14; v. 278; p. 216.

Berger, Charles F., Pelham, N. Y. Chalk-trough. No. 1,352,720; Sept. 14; v. 278; p. 231.

Berger, Charles F., Pelham, N. Y. Combination chalk-trough. No. 1,352,721; Sept. 14; v. 278; p. 231.

Bernard, Thomas E., Lakeview, Oreg. Wire-screen holding and dispensing receptacle. No. 1,353,016; Sept. 14; v. 278; p. 290.

Bernecker, George E., assignor to Standard Accessory Corporation, Milwaukee, Wis. Phonograph-lighting attachment. No. 1,352,779; Sept. 14; v. 278; p. 243.

Beyer, Herman E., New York, N. Y., and W. G. Hall, Honolulu, Hawaii, assignors to Ingersoll-Rand Company, Jersey City, N. J. Rectifier and condenser. No. 1,352,648; Sept. 14; v. 278; p. 216.

Bidwell, George L., Riegelsville, Pa. Hard-stock whipper. No. 1,352,866; Sept. 14; v. 278; p. 260.

Bingaman, Charles A., Reading, Pa. Crane. No. 1,352,575; Sept. 14; v. 278; p. 202.

Bird, Milton W., Wenatchee, Wash. Fruit-grading machine. No. 1,352,780; Sept. 14; v. 278; p. 243.

Birkenfeld, Benjamin, New York, N. Y. Automobile signaling device. No. 1,352,781; Sept. 14; v. 278; p. 243.

Birnbaum, Charles. (See Eliasoff, A. L., and Birnbaum.)

Blair, Robert S., South Orange, N. J. Firearm. No. 1,352,938; Sept. 14; v. 278; p. 274.
Blair, Shiras A., Indianapolis, Ind. Washing system. No. 1,352,867; Sept. 14; v. 278; p. 261.
Blake, George H., Alameda, Calif. Device for supplying water-moisture to intake of internal-combustion engines. No. 1,352,649; Sept. 14; v. 278; p. 217.
Blake & Johnson Company, The. (See Duston, Ernest W., assignor.)
Blanchard, Casper E., Chicago, Ill. Bottle-closure. No. 1,352,650; Sept. 14; v. 278; p. 217.
Blomstrom, Carl H., Detroit, Mich. Steering mechanism. No. 1,352,868; Sept. 14; v. 278; p. 261.
Bloom, David, Berkeley, Calif. Receptacle-closure. No. 1,353,017; Sept. 14; v. 278; p. 290.
Blount, William H. (See Sleeper, F. H., and Blount.)
Boeck, Charles H., assignor to White Frost Refrigerator Company, Jackson, Mich. Water-cooler for refrigerators. No. 1,353,018; Sept. 14; v. 278; p. 290.
Boker, Vitus A., Minneapolis, assignor to The E. G. Staude Manufacturing Co., St. Paul, Minn. Radiator-fan-supporting means. No. 1,352,869; Sept. 14; v. 278; p. 261.
Bolls, William W., Washington, D. C. Pulp-canal file. No. 1,353,019; Sept. 14; v. 278; p. 290.
Booth, William T., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-transmitter. No. 1,352,939; Sept. 14; v. 278; p. 274.
Boston Scale and Machine Co. (See Davis, John V., assignor.)
Boswell, George G. F., Indianapolis, Ind. Shock-absorber. No. 1,352,651; Sept. 14; v. 278; p. 217.
Bowers, Walter C., Dayton, Ohio. Making ring-mountings. No. 1,352,870; Sept. 14; v. 278; p. 261.
Bowman, Clyde. (See St. John, G. E., and Bowman.)
Boye, James H., assignor to James H. Boye Manufacturing Company, Chicago, Ill. Dispensing device. No. 1,352,425; Sept. 14; v. 278; p. 172.
Boye, James H., assignor to James H. Boye Manufacturing Company, Chicago, Ill. Curtain-hanger. No. 1,352,652; Sept. 14; v. 278; p. 217.
Boye, James H., Manufacturing Company. (See Boye, James H., assignor.)
Bradford, Bruce B., Hot Springs, Mont. Pen and feed pusher. No. 1,352,498; Sept. 14; v. 278; p. 186.
Brand, Johan W., The Hague, Netherlands. Apparatus for mounting or removing pneumatic tires. No. 1,353,020; Sept. 14; v. 278; p. 290.
Brecht, Frank v., and H. W. Tohtz, assignors to Gus v. Brecht Butcher's Supply Company, St. Louis, Mo. Beater for hog-scraping machines. No. 1,352,576; Sept. 14; v. 278; p. 200.
Brecht, G. v., Butcher's Supply Company. (See Brecht, Frank v., and Tohtz, assignors.)
Brenizer, Orson W., Philadelphia, Pa. Hair-curler. No. 1,352,871; Sept. 14; v. 278; p. 262.
Broadwell, Harry M., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Inclosed-switch construction. No. 1,353,021; Sept. 14; v. 278; p. 291.
Broc, Victor H., Neuilly-sur-Seine, France. Electrical connector. No. 1,352,499; Sept. 14; v. 278; p. 187.
Brock, Maynor D., Kansas City, Mo. Adjustable toy vehicle. No. 1,352,577; Sept. 14; v. 278; p. 202.
Brooks, James G., Rushville, Nebr. Hinge or hanger. No. 1,352,782; Sept. 14; v. 278; p. 244.
Brown, Alexander T., assignor to The Brown-Lipe Gear Company, Syracuse, N. Y. Gear-grinding machine. No. 1,352,872; Sept. 14; v. 278; p. 262.
Brown & Bigelow. (See Welcker, Paul H., assignor.)
Brown, Fay C., Berkeley, Calif. Optiphone. No. 1,352,940; Sept. 14; v. 278; p. 274.
Brown, Herbert V., Cherry Tree borough, Pa. Mine-haul. No. 1,352,653; Sept. 14; v. 278; p. 218.
Brown-Lipe Gear Company. (See Brown, Alexander T., assignor.)
Brown-Lipe-Chapin Co. (See Ormsby, Donald D., assignor.)
Brown, Norman, Muenster, Tex. Banjo. No. 1,352,654; Sept. 14; v. 278; p. 218.
Bruce, William M., Jr., Springfield, Ohio. Telegraphy. No. 1,352,873; Sept. 14; v. 278; p. 262.
Buchanan, Guy H., Roselle, N. J., assignor to American Cyanamid Company, New York, N. Y. Producing hydrocyanic acid. No. 1,352,655; Sept. 14; v. 278; p. 218.
Buckham, George T. (See Dawson, A. T., and Buckham.)
Bumgarner, Stephen O, Given, Ohio. Elevator for silos. No. 1,352,500; Sept. 14; v. 278; p. 187.
Burch, William H., St. Louis, Mo. Automobile-indicator. No. 1,352,874; Sept. 14; v. 278; p. 262.
Busch-Sulzer Bros.-Diesel Engine Company. (See Zhindon, Eugen, assignor.)
Butler, Charles H. (See Peirson, C. H., and Butler.)
Butters-Camp Mfg. Co., The. (See Camp, W. H., and Butters, assignors.)
Butters, Robert H. (See Camp, W. H., and Butters.)
Butterworth, Joseph A., assignor to Herbert Morris, Limited, Loughborough, England. Elevating-trucks. No. 1,352,426; Sept. 14; v. 278; p. 172.
Cahill, John, Norfolk, Va. Flexible curtain. No. 1,352,656; Sept. 14; v. 278; p. 218.
Caldwell, Noah L., Knoxville, Tenn. Tire-removing apparatus. No. 1,352,722; Sept. 14; v. 278; p. 231.
Cameron Can Machinery Co. (See Cameron, William, assignor.)
Cameron, Theodore R., San Antonio, Tex. Power reversing mechanism. No. 1,352,784; Sept. 14; v. 278; p. 244.
Cameron, Theodore R., San Antonio, Tex. Feeding apparatus for baling-presses. No. 1,352,785; Sept. 14; v. 278; p. 244.
Cameron, William, assignor to Cameron Can Machinery Co., Chicago, Ill. Can-end-feeding mechanism. No. 1,352,578; Sept. 14; v. 278; p. 202.
Camp, Warner H., and R. H. Butters, assignors to The Butters-Camp Mfg. Co., Atlanta, Ga. Gin or linter saw teeth. No. 1,353,022; Sept. 14; v. 278; p. 291.
Campbell, George A., assignor to American Telephone and Telegraph Company, Montclair, N. J. Four-wire transmission system. No. 1,352,786; Sept. 14; v. 278; p. 244.
Candee, Andrew H., assignor to Westinghouse Electric & Manufacturing Company, Pittsburgh, Pa. System of control. No. 1,352,427; Sept. 14; v. 278; p. 172.
Card, Samuel, East Providence, R. I. Separator for spinning-frames. No. 1,352,657; Sept. 14; v. 278; p. 218.
Carey, Charles H., Salem, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Heel-press. No. 1,352,501; Sept. 14; v. 278; p. 187.
Carleton, Paul W. (See Lamb, A. B., Miller, and Carleton.)
Carlisle, Bert, Santa Ana, Calif. Direction-indicator for automobiles. No. 1,353,023; Sept. 14; v. 278; p. 291.
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Cuff-link. No. 1,353,109; Sept. 14; v. 278; p. 307.
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,353,110; Sept. 14; v. 278; p. 308.
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,353,111; Sept. 14; v. 278; p. 308.
Carr Fastener Company. (See Carr, Fred S., assignor.)
Carrette, Armand, Paris, France. Screwing apparatus. No. 1,353,024; Sept. 14; v. 278; p. 291.
Carter, Howard O., Detroit, Mich. Headlight-deflector. No. 1,352,579; Sept. 14; v. 278; p. 203.
Cassel, Gunnar E., assignor to Aktiebolaget Gyro, Stockholm, Sweden. Parallel beach-vise. No. 1,352,787; Sept. 14; v. 278; p. 245.
Catron, John J., Bonham, Tex. Liquid storage and dispensing apparatus. No. 1,352,788; Sept. 14; v. 278; p. 245.
Chaffee, Edward F., assignor to The O. M. Edwards Company, Inc., Syracuse, N. Y. Brake for window-sashes. No. 1,352,875; Sept. 14; v. 278; p. 262.
Champion Shoe Machinery Company. (See Dobyne, Stephen A., assignor.)
Chapman, Richard D. (See Crook, A., and Chapman.)
Chase, Harry M., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo. Rock-drill. No. 1,352,428; Sept. 14; v. 278; p. 172.
Chemical Foundation, The. (See Theil, Otto, assignor.)
Chemical Foundation, The. (See Schwerin, Botho, assignor.)
Chemical Foundation, The. (See Tambach, Rudolf, assignor.)
Chicago Railway Equipment Company. (See William, Charles H., assignor.)
Chicken, C. B., and J. H. Thain, assignors to Sir W. G. Armstrong, Whitworth and Company Limited, Newcastle-upon-Tyne, England. Electrical signaling apparatus. No. 1,353,025; Sept. 14; v. 278; p. 291.
Cincinnati Lathe & Tool Company, The. (See Thiel, Louis, assignor.)
Ciuille, Georges, Epierre, France. Manufacture of steel. No. 1,352,580; Sept. 14; v. 278; p. 203.
Clare, Peter, assignor of one-half to G. W. Wilson, Valley, Wash. Hook. No. 1,353,026; Sept. 14; v. 278; p. 292.
Clarke, Alex A., Dallas, Tex. Handle attachment for surface-treating machines. No. 1,352,581; Sept. 14; v. 278; p. 203.
Clarke, Alex A., Dallas, Tex. Surface-treating device. No. 1,352,582; Sept. 14; v. 278; p. 203.
Clarke, Alex A., Dallas, Tex. Surface-treating machine. No. 1,352,583; Sept. 14; v. 278; p. 203.
Clarke, St. John, Bogota, N. J. Shore-protector. No. 1,352,429; Sept. 14; v. 278; p. 172.
Clarke, William, Montreal, Quebec, Canada. Liquid-fuel burner. No. 1,353,112; Sept. 14; v. 278; p. 308.
Clay, William H., Eustis, Fla. Bow-facing oar. No. 1,353,027; Sept. 14; v. 278; p. 292.
Clements, William E., assignor of one-half to A. C. Penner, Oroville, Calif. Electrode-holder. No. 1,353,028; Sept. 14; v. 278; p. 292.
Coffman, Samuel M., assignor to The Barbers Electric Specialty Company, Kansas City, Mo. Electric hair-drying device. No. 1,352,876; Sept. 14; v. 278; p. 263.
Cogliolo, Tomaso S., assignor to Società Esercizio Bacini, Industrials, Genoa, Italy. Marine propeller. No. 1,352,877; Sept. 14; v. 278; p. 263.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Induction solder-pot heater. No. 1,352,430; Sept. 14; v. 278; p. 173.
Coleman, Stephen L. C., Fredericton, New Brunswick, Canada. Shock-absorbing mechanism for motor-vehicles. No. 1,353,029; Sept. 14; v. 278; p. 292.

Conrad, Frank, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Ignition system. No. 1,352,431; Sept. 14; v. 278; p. 173.
Conrad, Frank, Swissvale, Pa., assignor to Westinghouse Electric and Manufacturing Company. Electrical ignition system. No. 1,352,432; Sept. 14; v. 278; p. 173.
Conrad, Frank, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Electrical ignition system. No. 1,352,433; Sept. 14; v. 278; p. 173.
Conrad, Frank, Swissvale, Pa., assignor to Westinghouse Electric and Manufacturing Company. Ignition system. No. 1,352,434; Sept. 14; v. 278; p. 173.
Consumers Biscuit Company. (See Rizzuto, James, assignor.)
Cook, Elmer E., Sharon Hill, assignor of one-half to D. Thorton, Ada, Pa. Six-wheel pivotal bogie-truck. No. 1,352,878; Sept. 14; v. 278; p. 263.
Cosimeter Company. (See Fowler, Edward E., assignor.)
Cotton, Alfred, and L. F. Koellner, Hartford, Conn. Sheet-metal wheel. No. 1,352,723; Sept. 14; v. 278; p. 231.
Cox, Arthur O., and P. Sager, Watsonville, Calif. Cultivator. No. 1,352,783; Sept. 14; v. 278; p. 244.
Craig, Joseph E., Gary, Ind. Combined dental mirror and syringe. No. 1,352,789; Sept. 14; v. 278; p. 245.
Crofut & Knapp Company. (See Josephs, Julius, assignor.)
Crompton & Knowles Loom Works. (See Regan, John, assignor.)
Crompton & Knowles Loom Works. (See Ryon, Eppa H., assignor.)
Crompton & Knowles Loom Works. (See Stone, Charles M., assignor.)
Crook, Alfred, and R. D. Chapman, Philadelphia, Pa., assignors to Taylor-Wharton Iron and Steel Company, Highbridge, N. J. Method and means for making asbestos shingles. No. 1,352,941; Sept. 14; v. 278; p. 275.
Cummings, Henry H. (See Thompson, J. T., and Cummings.)
Curran, Edward T., Detroit, Mich. Radiator. No. 1,352,584; Sept. 14; v. 278; p. 204.
Currie, John, and H. W. Bell, Seattle, Wash. Dust-cap for pneumatic valves. No. 1,353,125; Aug. 14; v. 278; p. 310.
Cutler-Hammer Mfg. Co., The. (See Holder, William H., assignor.)
Cutler-Hammer Mfg. Co., The. (See Klein, Charles J., assignor.)
Dahlstrom, John J., Amite, La. Collapsible crate. No. 1,353,030; Sept. 14; v. 278; p. 292.
Danforth, Harland A., Saugus, Mass. Shock-absorber. No. 1,352,724; Sept. 14; v. 278; p. 732.
Danielsson, Axel, Gottenborg, Sweden. Machine for grinding concaved spherical surfaces. No. 1,352,790; Sept. 14; v. 278; p. 245.
Danziger, Adolphe. (See Rider, Thomas B., assignor.)
Davis-Bournonville Company. (See Plumley, Stuart, assignor.)
Davis, H. G., Manufacturing Company. (See Henry, George W., Jr., assignor.)
Davis, Harry S., Indianapolis, Ind. Weather-strip. No. 1,352,879; Sept. 14; v. 278; p. 263.
Davis, Henry J., Waynesboro, Ga. Agricultural machine. No. 1,352,725; Sept. 14; v. 278; p. 232.
Davis, John V., Kelseyville, Calif., assignor, by mesne assignments, to Boston Scale and Machine Co., Boston, Mass. Automatic weighing and recording scale. No. 1,352,880; Sept. 14; v. 278; p. 263.
Dawley, James C. (See Rinsch, C. W., and Dawley.)
Dawson, Arthur T., and G. T. Buckham, assignors to Vickers Limited, Westminster, London, England. Gun-mounting. No. 1,352,791; Sept. 14; v. 278; p. 246.
Day, John L., Memphis, Tenn. Fuel-tank. No. 1,352,792; Sept. 14; v. 278; p. 246.
Day and Zimmerman. (See Remington, Joseph P., assignor.)
Daysh, Norman J., Poughkeepsie, N. Y., assignor to The De Laval Separator Company. Milking machinery. No. 1,352,726; Sept. 14; v. 278; p. 232.
Dean, Anthony E. (See Winters, Robert E., assignor.)
Deets, Clarence L., Portland, Oreg. Fishing-reel. No. 1,353,113; Sept. 14; v. 278; p. 308.
Defiance Check Writer Corporation. (See Plant, Henry J., assignor.)
Delamater, George R., Steelton, Pa. Mineral-washing apparatus. No. 1,352,727; Sept. 14; v. 278; p. 233.
Delaney, Edward C., New York, N. Y. Seating plan and class-record. No. 1,352,728; Sept. 14; v. 278; p. 233.
De Laval Separator Company, The. (See Daysh, Norman J., assignor.)
Demarest, Charles S., assignor to American Telephone and Telegraph Company, Brooklyn, N. Y. Vacuum-bulb for signaling apparatus. No. 1,353,031; Sept. 14; v. 278; p. 292.
Dennert, Edward C., assignor to Westinghouse Electric and Manufacturing Company, Detroit, Mich. Beverage-preparing machine. No. 1,352,435; Sept. 14; v. 278; p. 178.
Denver Rock Drill Manufacturing Company, The. (See Chase, Harry M., assignor.)
Denver Rock Drill Manufacturing Company. (See Nell, Gustave M., assignor.)
De Teixeira, Anna L. H. (See de Teixeira, Eugenio, assignor.)
De Teixeira, Eugenio, assignor to A. L. H. De Teixeira, Setauket, N. Y. Table implement. No. 1,353,090; Sept. 14; v. 278; p. 304.
De Vaughn, Harry E., assignor to United States Window Glass Company, Morgantown, W. Va. Window-glass-flattening oven. No. 1,352,881; Sept. 14; v. 278; p. 264.
Dickey, Daniel A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Forming composite bodies. No. 1,352,436; Sept. 14; v. 278; p. 174.
Dies, Charles A., Chicago, Ill. Slicing-machine. No. 1,352,658; Sept. 14; v. 278; p. 218.
Dobyne, Stephen A., assignor to Champion Shoe Machinery Company, St. Louis, Mo. Clutch and brake mechanism. No. 1,352,585; Sept. 14; v. 278; p. 204.
Dodge, Charlie B. (See Dodge, Lewis, and C. B.)
Dodge, Lewis, and C. B., Morse Bluff, Nebr. Pneumatic foot. No. 1,352,942; Sept. 14; v. 278; p. 275.
Dodge, Lewis, and C. B., Morse Bluff, Nebr. Pneumatic foot. No. 1,352,943; Sept. 14; v. 278; p. 275.
Dodgson, Frank L., Rochester, N. Y., assignor to General Railway Signal Company, Gates, N. Y. Railway signaling system. No. 1,352,793; Sept. 14; v. 278; p. 246.
Donegan, David H., Saw Pit, Colo. Ore-concentrator. No. 1,352,882; Sept. 14; v. 278; p. 264.
Drake, Alfred E., assignor to Drake Manufacturing Company, Indianapolis, Ind. Steering device. No. 1,352,659; Sept. 14; v. 278; p. 219.
Drake Manufacturing Company. (See Drake, Alfred E., assignor.)
Duensing, A'Quilla, Altoona, Iowa. Printing device. No. 1,353,032; Sept. 14; v. 278; p. 293.
Dufour, Pierre F., Paris, France. Brake for railway-trains. No. 1,352,586; Sept. 14; v. 278; p. 204.
Duston, Ernest W., assignor to The Blake & Johnson Company, Waterbury, Conn. Rolling-mill bridle. No. 1,352,587; Sept. 14; v. 278; p. 204.
Dutreux, Auguste, assignor to Societe Anonyme pour l'Eclairage Electrique des Vehicules, Issy Les Moulineaux, France. Electric starting system for internal-combustion engines. No. 1,352,794; Sept. 14; v. 278; p. 246.
Duvall, Adele, Chicago, Ill. Underwear. No. 1,352,944; Sept. 14; v. 278; p. 275.
Dyer, William H. (See Robertson, S. M., and Dyer.)
Dyson, Alfred H., Montclair, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,352,660; Sept. 14; v. 278; p. 219.
Eastern Manufacturing Company. (See Ladd, F. C., and Neal, assignors.)
Eastlake, Lewis S., Chicago, Ill. Making lubricating-oils. No. 1,352,502; Sept. 14; v. 278; p. 187.
Eberhart, Cleburne, Jr., assignor to Play-O-Lite Company, Incorporated, Buffalo, N. Y. Piano-lamp. No. 1,353,033; Sept. 14; v. 278; p. 293.
Edwards, Ara B., and C. A. Turner, Hamlet, N. C., and T. L. Reed, Atlanta, Ga. Valve-changing means. No. 1,353,114; Sept. 14; v. 278; p. 308.
Edwards, O. M., Company. (See Chaffee, Edward F., assignor.)
Egedi, Paul, Buffalo, N. Y. Water-motor. No. 1,352,588; Sept. 14; v. 278; p. 204.

Guice, William O., Seattle, Wash. Portable varnish-drying oven. No. 1,352,893; Sept. 14; v. 278; p. 266.
Guynn, John M., East Newport, Ark. Door-stop. No. 1,352,456; Sept. 14; v. 278; p. 178.
Hachmann, Frederick, assignor of one-half to H. Stifel, St. Louis, Mo., one-sixteenth to P. E. Moody and one-sixteenth to C. R. Watson, Detroit, Mich., one-eighth to D. M. Hutchinson, Ferguson, Mo., and one-sixteenth to H. A. Wright, Detroit, Mich. Piston. No. 1,353,041; Sept. 14; v. 278; p. 294.
Hafner, Charles A. D., Des Moines, Iowa. Fishpole-support. No. 1,352,663; Sept. 14; v. 278; p. 219.
Haiden, Richard. (See Van Brocklen, M. E., and Haiden.)

Hall, Arthur J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control apparatus. No. 1,352,447; Sept. 14; v. 278; p. 176.
Hall, A. J., and C. C. Whittaker, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Control apparatus. No. 1,352,448; Sept. 14; v. 278; p. 176.
Hall, Thomas, Harrisburg, Pa. Fluid-pressure motor. No. 1,352,743; Sept. 14; v. 278; p. 235.
Hall, William G. (See Beyer, H. E., and Hall.)
Halstead, Stanley M. (See Vaughan, P. E., and Halstead.)
Halton, William. (See Power, Henry, assignor.)
Hamer, John H., Warsaw, Ohio. Shock-absorber. No. 1,352,955; Sept. 14; v. 278; p. 277.
Hamilton, Clayton R. (See Hamilton, Herbert E., and C. R.)
Hamilton, H. E., and C. R., Yale, Iowa. Stock-feeding device. No. 1,352,513; Sept. 14; v. 278; p. 189.
Hammond, Le Roy C. (See Bell, George A., assignor.)
Hansen, Viggo N., Winnetka, assignor to Standex Manufacturing Corporation, Chicago, Ill. Engine-controlled lubricating system. No. 1,352,954; Sept. 14; v. 278; p. 277.
Harding, Abner C. (See Kennicott, Cass L., and Kemble, assignors.)
Hardinge, Harlowe. (See Hardinge, Harry W., and H.).
Hardinge, Harry W., and H., New York, N. Y. Telethermoscope. No. 1,352,956; Sept. 14; v. 278; p. 278.
Harris, Edward. Los Angeles, Calif. Retread-vulcanizer. No. 1,353,042; Sept. 14; v. 278; p. 295.
Harris, Varian M., assignor, by mesne assignments, to Popular Reflex Camera Corporation, Chicago, Ill. Reflex camera. No. 1,352,449; Sept. 14; v. 278; p. 176.
Harrison, Henry C., assignor to Western Electric Company, Incorporated, New York, N. Y. Receiver. No. 1,352,597; Sept. 14; v. 278; p. 206.
Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Means for feeding articles in stacked relation. No. 1,352,744; Sept. 14; v. 278; p. 236.
Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Means for feeding articles in stacked relation. No. 1,352,745; Sept. 14; v. 278; p. 236.
Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Feed mechanism. No. 1,352,746; Sept. 14; v. 278; p. 236.
Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Feed mechanism. No. 1,352,747; Sept. 14; v. 278; p. 236.
Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Feed mechanism. No. 1,352,748; Sept. 14; v. 278; p. 236.
Hart, Hubert C., Unionville, Conn. Polishing and buffing metal articles. No. 1,352,598; Sept. 14; v. 278; p. 206.
Hart, Walter V., assignor to S. F. Williams, Jacksonville, Fla. Box-press. No. 1,352,749; Sept. 14; v. 278; p. 237.
Hartford-Fairmont Company. (See Hunter, Alfred R. assignor.)
Hartog, S. D., Manufacturing Company. (See Hartog, Stephen D., assignor.)
Hartog, Stephen D., assignor to S. D. Hartog Manufacturing Company, St. Louis, Mo. Valve-facing tool. No. 1,352,599; Sept. 14; v. 278; p. 206.
Haskelite Manufacturing Corporation. (See Haskell, Henry L., assignor.)
Haskell, Henry L., Ludington, assignor to Haskelite Manufacturing Corporation, Grand Rapids, Mich. Aeroplane. No. 1,352,600; Sept. 14; v. 278; p. 207.
Hastam & Stretton Limited. (See Stratton, T., and Jones, assignors.)
Hatmaker, William T., assignor to The Huffman Recording Pump Company, Dayton, Ohio. Liquid-dispensing pump. No. 1,352,664; Sept. 14; v. 278; p. 220.
Hauenstein, Peter, *et al.* (See Kugler, James R., and E. W., assignors.)
Haughton Elevator and Machine Company, The. (See Thurston, Ernest B., assignor.)
Hawkinson, Paul E., assignor, by mesne assignments, to Kehawke Mfg. Co., Minneapolis, Minn. Tire-casing holder and spreader. No. 1,352,601; Sept. 14; v. 278; p. 207.
Hawkinson, Paul E., assignor, by mesne assignments, to Kehawke Mfg. Co., Minneapolis, Minn. Tire-casing spreader. No. 1,352,807; Sept. 14; v. 278; p. 249.
Hayes, Stephen Q., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit-interrupting system. No. 1,352,451; Sept. 14; v. 278; p. 176.
Hayes, William V., New York, N. Y. Blow-out patch. No. 1,352,957; Sept. 14; v. 278; p. 278.
Healy, Maurice F., Watertown, Mass. Lifting-dog. No. 1,352,665; Sept. 14; v. 278; p. 220.
Hedges, Isaac A., *et al.* (See Flatau, Louis, S., assignor.)
Heller, Henry R., assignor, by mesne assignments, to Auto Pneumatic Action Co., New York, N. Y. Musical instrument. No. 1,352,958; Sept. 14; v. 278; p. 278.
Henderson, Adelbert A., Wilkinsburg, Pa. Lift-bridge. No. 1,352,450; Sept. 14; v. 278; p. 176.
Henry, George W., Jr., assignor to H. G. Davis Manufacturing Company, Philadelphia, Pa. Numbering attachment for pin-ticketing machines. No. 1,352,959; Sept. 14; v. 278; p. 278.
Hersog, John, Saginaw, Mich., assignor to Sonora Phonograph Company, Inc., New York, N. Y. Lid-support for talking-machines. No. 1,352,602; Sept. 14; v. 278; p. 207.
Heyroth, Albert H., Geraldine, Mont. Wind-wheel electric generator. No. 1,352,960; Sept. 14; v. 278; p. 278.
Hill, George S., Strafford, N. H., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Sewing-machine. No. 1,352,514; Sept. 14; v. 278; p. 189.
Hill, Thomas J. (See Thompson, Charles E., assignor.)
Hills, Henry A., Grand Rapids, Mich. Filter. No. 1,352,961; Sept. 14; v. 278; p. 279.
Hitzigrath, Paul E., Rockville Center, N. Y. Package. No. 1,352,962; Sept. 14; v. 278; p. 279.
Hoffine, Fred G., Kansas City, Mo. Vibrator. No. 1,352,894; Sept. 14; v. 278; p. 266.
Hoffman, Aubrey F., Longford, Kans. Radiator-cover. No. 1,352,963; Sept. 14; v. 278; p. 279.
Hoffman, Edgar J., Akron, Ohio. Hanger. No. 1,352,895; Sept. 14; v. 278; p. 266.
Hoffman, George D., Pasadena, Calif., assignor to Hoffman Specialty Company, Chicago, Ill. Thermo-valve. No. 1,352,808; Sept. 14; v. 278; p. 249.
Hoffman Specialty Company. (See Hoffman, George D., assignor.)
Hoke, Jacob F., Jr. (See Holcomb, J. I., and Hoke, Jr.)
Holaday, Albert H., *et al.* (See Zwicker, Frederick P., assignor.)
Holcomb and Hoke Manufacturing Company. (See Holcomb, J. I., and Hoke, Jr., assignors.)
Holcomb & Hoke Manufacturing Company. (See Tripp, Charles E., assignor.)
Holcomb, James I., and J. F. Hoke, Jr., assignors to Holcomb and Hoke Manufacturing Company, Indianapolis, Ind. Amusement apparatus. No. 1,352,666; Sept. 14; v. 278; p. 220.
Holder, William H., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electrical controller. No. 1,352,896; Sept. 14; v. 278; p. 266.
Holley, Clarence M., and F. W. Robison, assignors to Utility Compressor Company, Detroit, Mich. Expansion-coil for refrigerating systems. No. 1,352,964; Sept. 14; v. 278; p. 280.
Holmes, Arthur, assignor to H. H. Franklin Manufacturing Company, Syracuse, N. Y. Valve-mechanism support. No. 1,352,897; Sept. 14; v. 278; p. 266.
Holt, Samuel M. (See Graves, R. W., and Holt.)
Holt, George H. F., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Storage-battery locomotive. No. 1,352,452; Sept. 14; v. 278; p. 177.
Homans, Thomas S., Hempstead, assignor to Intertype Corporation, Brooklyn, N. Y. Typographical machine. No. 1,352,965; Sept. 14; v. 278; p. 280.
Honetschlager, George. (See Kelly, James, assignor.)
Houck, George H., Tonawanda, N. Y. Wrecking-trailer for automobiles. No. 1,352,898; Sept. 14; v. 278; p. 267.
Houghton, E. F., & Co. (See Peirson, C. H., and Butler, assignors.)
Howe, Clinton W., Chicago, Ill. Pawl-and-ratchet mechanism. No. 1,352,603; Sept. 14; v. 278; p. 207.
Howe Lamp & Mfg. Co. (See Nelson, Arvid, assignor.)
Hubbell, Harvey, Bridgeport, Conn. Electric-switch mechanism. No. 1,352,604; Sept. 14; v. 278; p. 207.
Huffman Recording Pump Company, The. (See Hatmaker, William T., assignor.)
Hulse, Frederick W., Northfield, near Birmingham, England, assignor of one-half to Armes Automatiques Lewis, Antwerp, Belgium. Cartridge-extractor for firearms. No. 1,352,515; Sept. 14; v. 278; p. 190.
Hultberg, John E., Warren, Pa. Tool-handle. No. 1,353,043; Sept. 14; v. 278; p. 295.
Hunt, Nathaniel H., assignor of one-half to W. G. Kent, London, England. Means for measuring the velocity of a moving body. No. 1,352,809; Sept. 14; v. 278; p. 249.
Hunt, Otto H., Walla Walla, Wash. Clamp. No. 1,352,810; Sept. 14; v. 278; p. 250.
Hunter, Alfred R., Hartford, Conn., assignor to Hartford-Fairmont Company, Canajoharie, N. Y. Glass-working machine. No. 1,353,115; Sept. 14; v. 278; p. 308.
Hunter, Percy E., Pittsburgh, Pa. Metal supporting and transferring table. No. 1,352,811; Sept. 14; v. 278; p. 250.
Hutchinson, David M., *et al.* (See Hachmann, Frederick, assignor.)
Ingersoll-Rand Company. (See Beyer, H. E., and Hall, assignors.)
Illinois Specialty Manufacturing Company. (See Frankeberger, Albert L., assignor.)
Intertype Corporation. (See Homans, Thomas S., assignor.)
Irrgang, Hans F., St. Maries, Idaho. Electric switch. No. 1,352,966; Sept. 14; v. 278; p. 280.
Jackson Compressor Company, The. (See Jackson, Henry O., assignor.)

Jackson, Henry O., assignor to The Jackson Compressor Company, Denver, Colo. Rotary air-compressor. No. 1,352,750; Sept. 14; v. 278; p. 237.

Jackson, Henry O., assignor to The Jackson Compressor Company, Denver, Colo. Rotary air-compressor. No. 1,352,751; Sept. 14; v. 278; p. 237.

Jacoby, Charles N. (See Richardson, D., and Jacoby.)

Jacobs, George, Detroit, Mich. Resilient wheel. No. 1,352,752; Sept. 14; v. 278; p. 238.

Jacobsen, Emil, Evanston, assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. No. 1,352,605; Sept. 14; v. 278; p. 208.

Jeffrey Manufacturing Company, The. (See Levin, Nils D., assignor.)

Jenckes Spinning Company. (See Wood, William P., assignor.)

Jennings, Victor H., Worcester, Mass., assignor, by mesne assignments, to F. R. Batchelder. Woven carrier. No. 1,352,453; Sept. 14; v. 278; p. 177.

Johnson, Emil F., Lamberton, Minn. Shortening attachment for reins. No. 1,352,812; Sept. 14; v. 278; p. 250.

Johnston, Frank B., assignor to American Safety Device Company, New York, N. Y. Safety-scaffold. No. 1,352,454; Sept. 14; v. 278; p. 177.

Johnston, Frank B., assignor to American Safety Device Company, New York, N. Y. Scaffold-supporting machine. No. 1,352,455; Sept. 14; v. 278; p. 177.

Johnson, Harry L., assignor to Percy E. Ginn, Boston, Mass. Package-sealing machine. No. 1,352,899; Sept. 14; v. 278; p. 267.

Johnson, Howard A., Norfolk, Va. Multiple sliding door for use in airplane-hangars or other large openings. No. 1,352,606; Sept. 14; v. 278; p. 208.

Johnson, Thomas A., Rockford, Ill. Bottle-stopper protector and supporter. No. 1,352,967; Sept. 14; v. 278; p. 280.

Jones, Charles H., Medford, Mass. Mechanism for guiding and spacing candy. No. 1,352,607; Sept. 14; v. 278; p. 208.

Jones, John W. (See Stretton, T., and Jones.)

Josephs, Julius, assignor to the Crofut & Knapp Company, New York, N. Y. Cap. No. 1,352,968; Sept. 14; v. 278; p. 281.

Joyce-Cridland Company, The. (See Ripsch, C. W., and Dawley, assignors.)

Kabushiki-Kwaisha Mamiyado. (See Mamiya, Katsusaburo, assignor.)

Kalata, Frank, Springfield, Ill. Car-coupling. No. 1,352,516; Sept. 14; v. 278; p. 190.

Kalix, John, White Plains, N. Y. Carrier. No. 1,352,969; Sept. 14; v. 278; p. 281.

Kaltenbach, Robert W., assignor to The McMyler Interstate Company, Cleveland, Ohio. Box-car unloader. No. 1,352,608; Sept. 14; v. 278; p. 208.

Kastenholz, Charles C., *et al.* (See Kugler, James R., and E. W., assignors.)

Kays, Charles A. (See Wilhem, J., and Kays.)

Keckler, Charles W., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,352,970; Sept. 14; v. 278; p. 281.

Keffer, Charles A. (See Stehle, F., and Keffer.)

Kehawke Mfg. Co. (See Hawkinson, Paul E., assignor.)

Keiper, Henry B., Lancaster, Pa. Ball retainer and separator for thrust-bearings. No. 1,353,044; Sept. 14; v. 278; p. 295.

Kellam, Albert S., and N. F. Norvell, Richmond, Va. Valve. No. 1,352,900; Sept. 14; v. 278; p. 267.

Kellogg, Waldo S., assignor to Austral Window Co., New York, N. Y. Balanced window. No. 1,352,971; Sept. 14; v. 278; p. 281.

Kelly, James, Eagle Pass, Tex., assignor of one-half to G. Honetschlager, Stanford, Mont. Ignition system for gas-engines. No. 1,353,045; Sept. 14; v. 278; p. 295.

Kemble, Charles P. (See Kennicott, C. L., and Kemble.)

Kempton, Willard H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Mold. No. 1,352,457; Sept. 14; v. 278; p. 178.

Kendall, Myron A., assignor to Stephens-Adamson Mfg. Co., Aurora, Ill. Coal-crusher. No. 1,352,609; Sept. 14; v. 278; p. 208.

Kennicott, Cass L., and C. P. Kemble, Chicago Heights; said Kennicott assignor, by mesne assignments, to A. C. Harding, Chicago, Ill. Machine for forming metal. No. 1,352,813; Sept. 14; v. 278; p. 250.

Kent, Walter G. (See Hunt, Nathaniel H., assignor.)

Kessel, John A., Buffalo, N. Y. Ash-sifter. No. 1,352,667; Sept. 14; v. 278; p. 220.

Keyworth, William C., Paterson, N. J. Swift for reeling-machines. No. 1,352,458; Sept. 14; v. 278; p. 178.

Kimball, Robert E., Cleveland, Ohio. Set-back register. No. 1,352,973; Sept. 14; v. 278; p. 281.

Kimbark, Eugene U., Evanston, Ill. Envelop. No. 1,352,972; Sept. 14; v. 278; p. 281.

King, Edward M., Elida, Ohio. Game apparatus. No. 1,352,517; Sept. 14; v. 278; p. 190.

King, Stewart B., Highlands, N. J. Skiff. No. 1,352,753; Sept. 14; v. 278; p. 238.

Kirk, Walter I., assignor to Lyon & Healy, Chicago, Ill. Trunk for harps or like instruments. No. 1,352,814; Sept. 14; v. 278; p. 250.

Kirsh, Hugh L., Beaver Dam, Wis. Fittings for molding plants. No. 1,352,815; Sept. 14; v. 278; p. 250.

Kauber, Laurence M., assignor of one-half to San Diego Consolidated Gas & Electric Company, San Diego, Calif. Repeating fuse apparatus. No. 1,352,816; Sept. 14; v. 278; p. 251.

Klein, Charles J., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Attachment-plug. No. 1,352,817; Sept. 14; v. 278; p. 251.

Klein, Charles J., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electric switch. No. 1,353,124; Sept. 14; v. 278; p. 310.

Knapp, Albert S., assignor to Wickwire Spencer Steel Corporation, Worcester, Mass. Loom for weaving wire-cloth. No. 1,352,610; Sept. 14; v. 278; p. 209.

Knight, Herbert M., Rome, N. Y. Concrete block construction. No. 1,353,046; Sept. 14; v. 278; p. 296.

Kochendorfer, Frederic S., Chicago, and B. E. Balduf, Cicero, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Annealing-furnace. No. 1,352,459; Sept. 14; v. 278; p. 178.

Koellner, Louie F. (See Cotton, Alfred, and Koellner.)

Komarcsevits, George, Cleveland, Ohio. Street-cleaner. No. 1,353,047; Sept. 14; v. 278; p. 296.

Konyvka, Frank, Cleveland, Ohio. Piston. No. 1,352,460; Sept. 14; v. 278; p. 178.

Koontz, Victor R., assignor to Victor Tool Company, Waynesboro, Pa. Collapsible tap. No. 1,353,048; Sept. 14; v. 278; p. 296.

Kops Bros. (See Kops, Waldemar, assignor.)

Kops, Waldemar, assignor to Kops Bros., New York, N. Y. Brassière. No. 1,352,974; Sept. 14; v. 278; p. 282.

Korn, Joseph, Newark, N. J. Crease-retaining device for hats. No. 1,352,975; Sept. 14; v. 278; p. 282.

Kramer, John S., Steger, Ill. Talking-machine. No. 1,352,901; Sept. 14; v. 278; p. 267.

Kramer, John S., Steger, Ill. Locking device for drawers. No. 1,352,902; Sept. 14; v. 278; p. 267.

Kries, Lawrence F., assignor to C. M. Marshall, trustee, Baltimore, Md. Cartridge-fuse. No. 1,353,123; Sept. 14; v. 278; p. 310.

Krippendorf, Paul F. W. C., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Last and last-making. No. 1,352,518; Sept. 14; v. 278; p. 190.

Krotowych, Jhan, Lillian, W. Va. Window curtain and shade support. No. 1,353,122; Sept. 14; v. 278; p. 310.

Kugler, Earl W. (See Kugler, James R., and E. W.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 14TH DAY OF SEPTEMBER, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acid, Producing hydrocyanic. G. H. Buchanan. No. 1,352,655; Sept. 14; v. 278; p. 218.

Advertising device. W. B. Wheeler. No. 1,353,105; Sept. 14; v. 278; p. 307.

Aeroplane. H. L. Haskell. No. 1,352,600; Sept. 14; v. 278; p. 207.

Agricultural machine. H. J. Davis. No. 1,352,725; Sept. 14; v. 278; p. 232.

Air-compressor regulator. C. Wainwright. No. 1,353,098; Sept. 14; v. 278; p. 305.

Air-compressor, Rotary. H. O. Jackson. No. 1,352,750; Sept. 14; v. 278; p. 237.

Air-compressor, Rotary. H. O. Jackson. No. 1,352,751; Sept. 14, v. 278; p. 237.

Air-deflecting device. C. T. Myers. No. 1,352,679; Sept. 14; v. 278; p. 223.

Airplane-hangars or other large openings, Multiple sliding door for. H. A. Johnson. No. 1,352,606; Sept. 14; v. 278; p. 208.

Amusement apparatus. J. I. Holcomb and J. F. Hoke, Jr. No. 1,352,666; Sept. 14; v. 278; p. 220.

Amusement device. H. A. Silver. No. 1,352,841; Sept. 14; v. 278; p. 255.

Annealing-furnace. F. S. Kochendorfer and B. E. Balduf. No. 1,352,459; Sept. 14; v. 278; p. 178.

Attachment device, Separable. R. B. Benjamin. No. 1,352,776; Sept. 14; v. 278; p. 242.

Automobile direction-indicator. B. Carlisle. No. 1,353,023; Sept. 14; v. 278; p. 291.

Automobile gear-lock. C. G. Trosien. No. 1,353,119; Sept. 14; v. 278; p. 309.

Automobile gear-lock. C. G. Trosien. No. 1,353,120; Sept. 14; v. 278; p. 309.

Automobile-indicator. W. H. Burch. No. 1,352,874; Sept. 14; v. 278; p. 262.

Automobile mud and dust shield. O. R. Emery. No. 1,352,798; Sept. 14; v. 278; p. 247.

Automobile-signal. C. H. Felton. No. 1,352,946; Sept. 14; v. 278; p. 276.

Automobile starting system. C. B. Mills and C. E. Wilson. No. 1,352,468; Sept. 14; v. 278; p. 180.

Automobile-starter. H. C. Fentress. No. 1,352,803; Sept. 14; v. 278; p. 248.

Automobiles, Power attachment for. A. C. Beanblossom. No. 1,352,497; Sept. 14; v. 278; p. 186.

Automobile wrecking-trailer. G. H. Houck. No. 1,352,898; Sept. 14; v. 278; p. 267.

Automobiles, Power plant for. N. B. Wales. No. 1,353,099; Sept. 14; v. 278; p. 306.

Autos and trailers, Disk-flange attachment to. M. R. Thompson. No. 1,352,561; Sept. 14; v. 278; p. 199.

Auxiliary frame and spring attachment. J. B. Pospeshil. No. 1,352,625; Sept. 14; v. 278; p. 211.

Aviation-bombs, Fuse for. E. Schneider. No. 1,352,542; Sept. 14; v. 278; p. 195.

Baling-presses, Feeding apparatus for. T. R. Cameron. No. 1,352,785; Sept. 14; v. 278; p. 244.

Banana heater and ripener. A. L. Frankelberger. (Reissue.) No. 14,948; Sept. 14; v. 278; p. 312.

Banjo. N. Brown. No. 1,352,654; Sept. 14; v. 278; p. 218.

Batteries, Terminal structure for electric. P. E. Norris. No. 1,352,619; Sept. 14; v. 278; p. 210.

Bearings, Ball retainer and separator for thrust-. H. B. Kelper. No. 1,353,044; Sept. 14; v. 278; p. 295.

Bed, Folding. H. J. Meyers. No. 1,352,909; Sept. 14; v. 278; p. 269.

Bed, Folding. R. B. Page. No. 1,352,525; Sept. 14; v. 278; p. 191.

Bed, Sofa-. J. J. Gruenfeld, Jr. No. 1,352,806; Sept. 14; v. 278; p. 229.

Beef-splitting machine. D. L. Appelberry. No. 1,353,013; Sept. 14; v. 278; p. 289.

Belt-conveyer. C. S. Wray. No. 1,353,008; Sept. 14; v. 278; p. 288.

Belt-driving. K. E. A. Granstedt. No. 1,352,511; Sept. 14; v. 278; p. 189.

Beverage-dispensing apparatus, Portable. D. Richardson and C. N. Jacoby. No. 1,352,475; Sept. 14; v. 278; p. 182.

Beverage-preparing machine. E. C. Dennert. No. 1,352,435; Sept. 14; v. 278; p. 173.

Bicycle-pedals, Repair of. J. Glanz. No. 1,352,445; Sept. 14; v. 278; p. 175.

Board: *See*—
Game-board. Ironing-board.

Bodies, Forming composite. D. A. Dickey. No. 1,352,436; Sept. 14; v. 278; p. 174.

Boiler: *See*—
Combination-boiler.

Boiler. M. Folkush. No. 1,352,505; Sept. 14; v. 278; p. 187.

Book, Pass-. T. P. Martin, Jr. No. 1,352,907; Sept. 14; v. 278; p. 269.

Boots and shoes, Making. H. C. Egerton. No. 1,352,738; Sept. 14; v. 278; p. 234.

Bottle-closure. C. E. Blanchard. No. 1,352,650; Sept. 14; v. 278; p. 217.

Bottle-stopper protector and supporter. T. A. Johnson. No. 1,352,967; Sept. 14; v. 278; p. 280.

Bottle, Vacuum-. H. M. Smith. No. 1,352,844; Sept. 14; v. 278; p. 256.

Bow-guide. H. F. Fisher. No. 1,353,036; Sept. 14; v. 278; p. 293.

Box: *See*—
Cigarette-box. Valve-stem stuffing-box.
Coil-box.

Box, Collapsible berry-. C. W. Robinson. No. 1,352,833; Sept. 14; v. 278; p. 254.

Box-press. W. V. Hart. No. 1,352,749; Sept. 14; v. 278; p. 237.

Brace: *See*—
Mud-guard brace.

Brake: *See*—
Railway-brake. Window-sash brake.
Railway-train brake.

Brake-beams, Adjustable third or fourth point support for. C. H. Williams. No. 1,352,570; Sept. 14; v. 278; p. 201.

Brassière. W. Kops. No. 1,352,974; Sept. 14; v. 278; p. 282.

Breakwater. G. Uriarte. No. 1,353,001; Sept. 14; v. 278; p. 287.

Bridge-articulator, Anatomical. L. Greenfield. No. 1,353,039; Sept. 14; v. 278; p. 294.

Bridge, Lift-. A. A. Henderson. No. 1,352,450; Sept. 14; v. 278; p. 176.

Brushing-machine. S. Radimak. No. 1,352,527; Sept. 14; v. 278; p. 192.

Buckle, Belt-. D. S. Bears. No. 1,352,937; Sept. 14; v. 278; p. 274.

Buckle for leaf-springs, Wedge-lock. N. Waterhouse. No. 1,352,488; Sept. 14; v. 278; p. 184.

Building structure. D. J. Murnane. No. 1,352,678; Sept. 14; v. 278; p. 223.

Burner: *See*—
Hydrocarbon-burner. Liquid-fuel burner.

Button, Collar-. A. Lentatz. No. 1,352,754; Sept. 14; v. 278; p. 238.

Button, Separable cuff-. E. J. Swedlund. No. 1,353,085; Sept. 14; v. 278; p. 303.

Button, Separable cuff-. F. R. Maffeson. No. 1,352,908; Sept. 14; v. 278; p. 269.

Cabinet, Record-. O. L. Ostendorf. No. 1,352,684; Sept. 14; v. 278; p. 224.

Cabinet, Stove-. T. Wone. No. 1,353,121; Sept. 14; v. 278; p. 309.

Cabinet, Revolving housekeeping-. J. F. Baymiller. No. 1,352,496; Sept. 14; v. 278; p. 186.

Cable-hanger. C. G. Sinclair, Jr. No. 1,352,549; Sept. 14; v. 278; p. 196.

Calculators, Ribbon-shifting means for. W. Fuhrmann. No. 1,352,593; Sept. 14; v. 278; p. 305.

Camera, Reflex. V. M. Harris. No. 1,352,449; Sept. 14; v. 278; p. 176.

Cameras, Double-exposure mechanism for motion-picture. J. E. Leonard. No. 1,352,668; Sept. 14; v. 278; p. 220.

Can: *See*—
Garbage-can.

Can-distributing device. C. H. Ayars. No. 1,352,718; Sept. 14; v. 278; p. 230.

Can handle, Milk-. P. Lambrakos. No. 1,353,050; Sept. 14; v. 278; p. 296.

Can-tops, Machine for applying compound to. N. Troyer. No. 1,352,641; Sept. 14; v. 278; p. 215.

Cans, Bail-ear fastening for. H. K. Smith. No. 1,353,080; Sept. 14; v. 278; p. 302.

Candy, Mechanism for guiding and spacing. C. H. Jones. No. 1,342,607; Sept. 14; v. 278; p. 208.
Cannon, Gas-. J. H. Wily. No. 1,352,715; Sept. 14; v. 278; p. 230.
Cap. J. Josepha. No. 1,352,968; Sept. 14; v. 278; p. 281.
Car construction, Tank-. B. D. Lockwood. No. 1,352,981; Sept. 14; v. 278; p. 283.
Car-coupling. F. Kalata. No. 1,352,516; Sept. 14; v. 278; p. 190.
Car, Refrigerator-. H. R. Ross. No. 1,352,532; Sept. 14; v. 278; p. 193.
Car unloader, Box-. R. W. Kaltenbach. No. 1,352,608; Sept. 14; v. 278; p. 208.
Cars, Doorway construction for. A. N. Warfield. No. 1,353,102; Sept. 14; v. 278; p. 306.

Scaffold-supporting machine. F. B. Johnston. No. 1,352,455; Sept. 14; v. 278; p. 177.
Scale, Automatic weighing and recording. J. V. Davis. No. 1,352,880; Sept. 14; v. 278; p. 263.
Scale, Railway-track. A. W. Epright and W. H. Grindall. No. 1,352,441; Sept. 14; v. 278; p. 175.
Scale, Weighing-. J. C. Barrett. No. 1,352,935; Sept. 14; v. 278; p. 274.
Screwing apparatus. A. Carrette. No. 1,353,024; Sept. 14; v. 278; p. 291.
Sealing machine, Package-. H. L. Johnson. No. 1,352,899; Sept. 14; v. 278; p. 267.
Seat: *See*—
Motorcycle-seat.
Seating plan and class-record. E. C. Delaney. No. 1,352,728; Sept. 14; v. 278; p. 233.
Seed-drill. F. Sherwin. No. 1,352,482; Sept. 14; v. 278; p. 183.
Separable fastener. F. S. Carr. No. 1,353,110; Sept. 14; v. 278; p. 308.
Separable fastener. F. S. Carr. No. 1,353,111; Sept. 14; v. 278; p. 308.
Separator: *See*—
Grain-separator. Spinning-frame separator.
Setback-register. R. E. Kimball. No. 1,352,973; Sept. 14; v. 278; p. 281.
Sewing-machine. G. S. Hill. No. 1,352,514; Sept. 14; v. 278; p. 189.
Sewing-machine. J. R. Moffatt. No. 1,352,675; Sept. 14; v. 278; p. 222.
Shackle, Spring-. F. P. Sawders and J. G. Murray. No. 1,352,633; Sept. 14; v. 278; p. 213.
Sharpener, Knife-. S. H. Gallagher. No. 1,352,888; Sept. 14; v. 278; p. 265.
Sheet-metal wheel. A. Cotton and L. F. Koelliner. No. 1,352,723; Sept. 14; v. 278; p. 231.
Shield, Erasing-. F. P. Zwicker. No. 1,353,133; Sept. 14; v. 278; p. 312.
Shield, Expansion-. L. R. Zifferer. No. 1,352,494; Sept. 14; v. 278; p. 186.
Shingles, Machine for making composite. O. Altpeter. No. 1,352,931; Sept. 14; v. 278; p. 273.
Shingles, Method and means for making asbestos. A. Crook and R. D. Chapman. No. 1,352,941; Sept. 14; v. 278; p. 275.
Ship construction. J. M. Thompson. No. 1,352,998; Sept. 14; v. 278; p. 287.
Ship-salvage device. K. Galeski. No. 1,352,950; Sept. 14; v. 278; p. 276.
Shipping-case and display-rack, Combined. G. H. Wilkins. No. 1,352,490; Sept. 14; v. 278; p. 185.
Ships, barges, floating structures, &c., Mode of constructing reinforced-concrete. E. O. Williams. No. 1,353,107; Sept. 14; v. 278; p. 307.
Shirt. J. M. van Heusen. No. 1,352,704; Sept. 14; v. 278; p. 228.
Shock-absorber. G. G. F. Boswell. No. 1,352,651; Sept. 14; v. 278; p. 217.
Shock-absorber. H. A. Danforth. No. 1,352,724; Sept. 14; v. 278; p. 232.
Shock-absorber. J. H. Hamer. No. 1,352,955; Sept. 14; v. 278; p. 277.
Shock-absorber spring and blank therefor. N. Schachter. No. 1,352,540; Sept. 14; v. 278; p. 194.
Shoe-sole. H. C. Egerton. No. 1,352,730; Sept. 14; v. 278; p. 233.
Shoe-sole for turn-shoes, Rubber. H. C. Egerton. No. 1,352,736; Sept. 14; v. 278; p. 234.
Shoe-sole, Gripping. H. C. Egerton. No. 1,352,731; Sept. 14; v. 278; p. 233.
Shoe-sole, Partially-stiffened. H. C. Egerton. No. 1,352,737. Sept. 14; v. 278; p. 234.
Shore-protector. S. Clarke. No. 1,352,429; Sept. 14; v. 278; p. 172.

Show-case lock. H. Nagler. No. 1,352,680; Sept. 14; v. 278; p. 223.
Sifter, Ash-. J. A. Kessel. No. 1,352,667; Sept. 14; v. 278; p. 220.
Sign. S. Gibby. No. 1,352,661; Sept. 14; v. 278; p. 219.
Signal: *See*—
Automobile-signal. Railway-signal.
Signaling apparatus, Electrical. C. B. Chicken and J. H. Thain. No. 1,353,025; Sept. 14; v. 278; p. 291.
Signaling apparatus, Vacuum-bulb for. C. S. Demarest. No. 1,353,031; Sept. 14; v. 278; p. 292.
Signaling device, Automobile. B. Birkenfeld. No. 1,352,781; Sept. 14; v. 278; p. 243.
Silicate of soda, Producing. W. H. Stanton. No. 1,352,700; Sept. 14; v. 278; p. 227.
Silo-elevator. S. O. Bumgarner. No. 1,352,500; Sept. 14; v. 278; p. 187.
Skiff. S. B. King. No. 1,352,753; Sept. 14; v. 278; p. 238.
Slicing-machine. C. A. Dies. No. 1,352,658; Sept. 14; v. 278; p. 218.
Slotting and creasing machines, Feed mechanism for. G. W. Swift, Jr. No. 1,353,087; Sept. 14; v. 278; p. 303.
Snap-hook. J. A. Lüthi. No. 1,352,982; Sept. 14; v. 278; p. 283.
Soap-dish, Collapsible. P. H. Welcker. No. 1,353,103; Sept. 14; v. 278; p. 306.
Solder-pot heater, Induction. O. A. Colby. No. 1,352,430; Sept. 14; v. 278; p. 173.
Sole for the prevention of the development of galls, Inlay-. A. Augestad. No. 1,352,865; Sept. 14; v. 278; p. 260.
Spacing-clip. W. E. White. No. 1,352,642; Sept. 14; v. 278; p. 215.
Spade or shovel. J. A. Southwell. No. 1,352,921; Sept. 14; v. 278; p. 271.
Spark-plug. A. J. Perron. (Reissue.) No. 14,949; Sept. 14; v. 278; p. 312.
Spark-plug. G. A. Bell. No. 1,352,775; Sept. 14; v. 278; p. 242.
Spark-plug. L. S. Flatau. No. 1,352,592; Sept. 14; v. 278; p. 205.
Spark-plug. W. H. Snyder. No. 1,352,554; Sept. 14; v. 278; p. 198.
Spark-plug intensifier. R. S. Patchen. No. 1,352,526; Sept. 14; v. 278; p. 192.
Spectacle nose-bridge. J. S. Galeski. No. 1,352,887; Sept. 14; v. 278; p. 265.
Speed-change mechanism. R. E. Winters. No. 1,352,716; Sept. 14; v. 278; p. 230.
Spike. E. L. D. B. and J. W. B. Balfour. No. 1,352,573; Sept. 14; v. 278; p. 201.
Spinning-frame separator. S. Card. No. 1,352,657; Sept. 14; v. 278; p. 218.
Spotter's training device. H. A. Wentworth. No. 1,352,773; Sept. 14; v. 278; p. 242.
Spring construction. G. W. Barnes and D. C. Travis. No. 1,352,574; Sept. 14; v. 278; p. 202.
Spring structure. A. F. Lance. No. 1,352,612; Sept. 14; v. 278; p. 209.
Stamp-mill. J. W. Vanmeter. No. 1,353,096; Sept. 14; v. 278; p. 305.
Stamp-mill, Ore. J. W. Vanmeter. No. 1,353,097; Sept. 14; v. 278; p. 305.
Steam-trap. J. Morehead. No. 1,352,617; Sept. 14; v. 278; p. 210.
Steel manufacture. G. B. Waterhouse. No. 1,352,710; Sept. 14; v. 278; p. 229.
Steel, Manufacture of. G. Cinille. No. 1,352,580; Sept. 14; v. 278; p. 203.
Steering device. A. E. Drake. No. 1,352,659; Sept. 14; v. 278; p. 219.
Steering mechanism. C. H. Blomstrom. No. 1,352,868; Sept. 14; v. 278; p. 261.
Stock-cutting machine. E. E. Winkley. No. 1,352,492; Sept. 14; v. 278; p. 185.
Stock whipper, Hard-. G. L. Bidwell. No. 1,352,866; Sept. 14; v. 278; p. 260.
Stoker and draft-controlling mechanism thereof, Underfeed. C. F. Miller. No. 1,352,466; Sept. 14; v. 278; p. 180.
Stoker, Multiple-feed horizontal underfeed. C. F. Miller. No. 1,352,465; Sept. 14; v. 278; p. 179.
Stoker, Multiple-retort underfeed. C. F. Miller. No. 1,352,464; Sept. 14; v. 278; p. 179.
Stoker, Multiple-section horizontal underfeed. C. F. Miller. No. 1,352,467; Sept. 14; v. 278; p. 180.
Stove, Combined coal and gas. J. H. Sattler. No. 1,352,539; Sept. 14; v. 278; p. 194.
Strainer, Jelly-. C. S. Ludwig. No. 1,353,056; Sept. 14; v. 278; p. 298.
Street-cleaner. G. Komarcsevits. No. 1,353,047; Sept. 14; v. 278; p. 296.
Structures, Making return-bends and related. G. E. Ryder. No. 1,352,535; Sept. 14; v. 278; p. 193.

Fruits, Fresh citrus. House Brothers. No. 135,277; Sept. 14; v. 278; p. 350.
Fruits, Fresh citrus. Old Baldy Citrus Association. No. 134,381; Sept. 14; v. 278; p. 343.
Furniture, automobile, and piano polish. Sun Gloss Polish Co. No. 133,288; Sept. 14; v. 278; p. 339.
Furnace, burning coal, wood, or oil, Warm-air. P. C. De Vol Hardware Co. No. 134,464; Sept. 14; v. 278; p. 343.
Gas-engines, oil-engines, oil well packers, &c. Franklin Valveless Engine Company. No. 133,576; Sept. 14; v. 278; p. 341.
Glass bottles and jars. The Kearns-Gorsuch Bottle Company. No. 133,358; Sept. 14; v. 278; p. 340.
Gloves, Fabric. H. N. Smaltz. No. 131,543; Sept. 14; v. 278; p. 336.
Grape product containing less than one-half of one per cent. of alcohol. A. D. Lewis. No. 134,829; Sept. 14; v. 278; p. 345.
Grinding-machines. The Heald Machine Company. No. 133,315; Sept. 14; v. 278; p. 340.
Gum-arabic, gum-tragacanth, perfumery, &c. Orbis Products Trading Co. No. 114,769; Sept. 14; v. 278; p. 327.
Hair-restorer. A. Flores. No. 128,344; Sept. 14; v. 278; p. 331.
Heaters, Gas water-. Bastian-Morley Co. No. 134,873; Sept. 14; v. 278; p. 346.
Heaters, Gas water-. Bastian-Morley Co. No. 134,875; Sept. 14; v. 278; p. 346.
Herbs for seasoning, Dried. Frank H. Lockyer Supply Co., Limited. No. 115,641; Sept. 14; v. 278; p. 327.
Horns, Mechanically-operated automobile. Guiterman, Rosenfeld & Company. No. 133,258; Sept. 14; v. 278; p. 338.
Hose and sheet packing. The B. F. Goodrich Company. No. 131,958; Sept. 14; v. 278; p. 337.
Hose, Rubber, &c. F. A. Patrick & Co. No. 130,925; Sept. 14; v. 278; p. 335.
Hosiery. J. R. Beaton Co. No. 132,626; Sept. 14; v. 278; p. 338.
Hosiery. Chipman Knitting Mills. No. 135,357; Sept. 14; v. 278; p. 357.
Ice-cream. W. B. Wood Mfg. Co. No. 134,869; Sept. 14; v. 278; p. 346.
Ice-cream cones or cornets. J. H. Dickhudt. No. 134,774; Sept. 14; v. 278; p. 345.
Inner Tubes for Pneumatic Tires. Goodwill Rubber Co. No. 133,660; Sept. 14; v. 278; p. 341.
Lard containing cotton-seed oil. Kaufman Packing Co. No. 133,973; Sept. 14; v. 278; p. 342.
Leather. Amalgamated Leather Companies. No. 131,691; Sept. 14; v. 278; p. 336.
Leather. The United States Leather Company. No. 129,197; Sept. 14; v. 278; p. 333.
Lenses, Automobile-headlight. T. B. Dewhurst. No. 130,884; Sept. 14; v. 278; p. 335.
Lenses, Headlight-. The Clamert Manufacturing Company. No. 135,442; Sept. 14; v. 278; p. 351.
Light-diffusers. Stewart-Warner Speedometer Corp. No. 107,222; Sept. 14; v. 278; p. 327.
Liquid composition for the treatment of kidney, bladder, and liver diseases. La Rue Medicine Company. No. 129,787; Sept. 14; v. 278; p. 334.
Lithopone. E. I. du Pont de Nemours & Co. No. 112,295; Sept. 14; v. 278; p. 327.
Lotion for treating the complexion. J. H. Snyder Med. Co. No. 128,803; Sept. 14; v. 278; p. 332.
Macaroni, cheese, orange, and grapefruit marmalade. A. Silz, Inc. No. 131,754; Sept. 14; v. 278; p. 336.
Massage shower-bath sprays. The Fitzgerald Manufacturing Company. No. 134,468; Sept. 14; v. 278; p. 343.
Meats, lard, butter, eggs, &c. Allied Packers. No. 131,768; Sept. 14; v. 278; p. 337.
Medical preparation for hog-cholera. A. Hunt. No. 126,472; Sept. 14; v. 278; p. 330.
Milk mixed with cocoanut-oil. Condensed skimmed. The Universal Milk Company. Nos. 135,029–30; Sept. 14; v. 278; p. 348.
Milk-powder. T. G. Remschel. No. 126,198; Sept. 14; v. 278; p. 330.
Motorcycles and bicycles. Excelsior Motor Mfg. & Supply Co. No. 132,637; Sept. 14; v. 278; p. 338.
Music-boxes. Tiffany & Company. No. 135,388; Sept. 14; v. 278; p. 351.
Mustard. Bingo Mustard Co. No. 134,841; Sept. 14; v. 278; p. 345.
Nail polish, Finger-. The Medco Company. No. 126,047; Sept. 14; v. 278; p. 330.
Nightgowns, pajamas, combinations, &c. Bessie Damsey. No. 133,401; Sept. 14; v. 278; p. 340.
Nuts, Pinon-. F. S. Spitz. No. 124,123; Sept. 14; v. 278; p. 329.
Oils, Lubricating-. Nourse Oil Company. No. 125,904; Sept. 14; v. 278; p. 330.
Oilskin clothing. Great Grimsby Coal, Salt and Tanning Company, Limited. No. 134,747; Sept. 14; v. 278; p. 344.
Ointment, Skin-. B. H. Smith. No. 120,934; Sept. 14; v. 278; p. 328.
Oleomargarin. The Baltimore Butterine Co. No. 133,394; Sept. 14; v. 278; p. 340.
Orange marmalade. Gordon & Dilworth. No. 133,966; Sept. 14; v. 278; p. 342.
Packing-rings, Metallic. St. Louis Piston Ring Corporation. No. 135,174; Sept. 14; v. 278; p. 349.
Packing, Sheet-. The B. F. Goodrich Company. No. 131,964; Sept. 14; v. 278; p. 337.
Paints, wood stains, varnish-stains, &c. The Patterson-Sargent Company. No. 134,756; Sept. 14; v. 278; p. 344.
Pans, Muffin-. Chicago Metallic Manufacturing Co. No. 122,154; Sept. 14; v. 278; p. 328.
Paper, Grease-proof parchment-. Mountain Mill Paper Company. No. 133,550; Sept. 14; v. 278; p. 340.
Paper tubes, Flexible. Kellerit-Schlauch-Gesellschaft m. b. h. No. 110,278; Sept. 14; v. 278; p. 327.
Patches and patch kits, Tube and heavy-casing. Money Back Laboratories. Nos. 131,583–5; Sept. 14; v. 278; p. 336.
Paving material. Bitoslag Paving Company. No. 135,198; Sept. 14; v. 278; p. 349.
Perfume-cream for neutralizing body-odors. O. J. Kolar. No. 129,263; Sept. 14; v. 278; p. 333.
Phonographic records. F. Lauter. No. 135,153; Sept. 14; v. 278; p. 349.
Piano actions, Player-. Scott Player Action Co. No. 135,385; Sept. 14; v. 278; p. 351.
Pins, Safety-. New York Merchandise Company. No. 135,040; Sept. 14; v. 278; p. 352.
Polish, Automobile and furniture. E. W. Smith. No. 130,449; Sept. 14; v. 278; p. 335.
Polishes for automobiles, &c. R. F. Carr. No. 133,294; Sept. 14; v. 278; p. 339.
Popcorn. International Corn Products Corporation. No. 134,957; Sept. 14; v. 278; p. 347.
Preparation for bathing the feet. Specific Remedy Company. No. 129,752; Sept. 14; v. 278; p. 334.
Preparation for dental-pulp preserving and capping. V. C. Smedley. No. 129,815; Sept. 14; v. 278; p. 334.
Preparation for removing rust. The Rustokut Company. No. 128,620; Sept. 14; v. 278; p. 331.
Preparation for the treatment of indigestion, &c. Golden Seal Laboratories. No. 128,436; Sept. 14; v. 278; p. 331.
Protective and safety devices for workers and others. The Strong, Kennard & Nutt Company. No. 126,340; Sept. 14; v. 278; p. 330.
Protein substance. C. Brooks. No. 117,477; Sept. 14; v. 278; p. 328.
Pumps, Power-driven water-supply. The Goulds Manufacturing Co. No. 132,918; Sept. 14; v. 278; p. 338.
Remedy for catarrh. T. Woodward. No. 130,001; Sept. 14; v. 278; p. 335.
Remedy for debilities of stomach, headache, &c. C. A. Kalinska. No. 129,178; Sept. 14; v. 278; p. 333.
Ribbons, Silk, velvet, and cotton. W. E. Dodd. No. 129,626; Sept. 14; v. 278; p. 334.
Rice. I. Akaba. No. 129,618; Sept. 14; v. 278; p. 334.
Root-beer, birch-beer, ginger-ale, lemon-soda, &c. Chester Beverage Co. No. 133,080; Sept. 14; v. 278; p. 338.
Root-beer extract. The E. L. Patch Co. No. 134,851; Sept. 14; v. 278; p. 346.
Rubber tires. International India Rubber Corporation. No. 134,822; Sept. 14; v. 278; p. 345.
Sardines. Globe Canning Co. No. 111,725; Sept. 14; v. 278; p. 327.
Seeds and horses. R. Haughton. Nos. 134,471–8; Sept. 4; v. 278; p. 344.
Shirts, Men's dress and negligée. Gerson & Goodman. No. 133,577; Sept. 14; v. 278; p. 341.
Shirts, Men's silk and cotton dress or work. B. Chipman. No. 133,203; Sept. 14; v. 278; p. 338.
Shoes. I. Blyn & Sons. No. 115,899; Sept. 14; v. 278; p. 327.
Shoes. Graham-Bumgarner Company. No. 135,323; Sept. 14; v. 278; p. 350.
Shoes. Graham-Bumgarner Company. No. 135,325; Sept. 14; v. 278; p. 350.
Shoes for misses and children. Craddock Terry Company. No. 134,773; Sept. 14; v. 278; p. 345.
Signs, Advertising-. Animated Advertising Corporation. No. 133,648; Sept. 14; v. 278; p. 341.

(REGISTRATION APPLIED FOR.)

Stimulant for kidney and bladder. Scranton Distributing and Mfg. Co. No. 128,902; Sept. 14; v. 278; p. 332.
Stoves, ranges, and parts thereof. Magee Furnace Company. No. 133,548; Sept. 14; v. 278; p. 340.
Sweaters, neckscarfs, shawls, &c. Louis Metzger & Company. No. 135,338; Sept. 14; v. 278; p. 351.
Syrup for food purposes and a dough-developer. Cereal Products Refining Company. Nos. 134,458–60; Sept. 14; v. 278; p. 343.
Syrup, molasses, and honey, Table-. Conner & Co. No. 134,932; Sept. 14; v. 278; p. 346.
Syrup, Non-alcoholic, non-cereal, maltless soft-drink. J. M. Strickler. No. 130,688; Sept. 14; v. 278; p. 335.
Syrup, Table-. Langhoff Brothers Company. No. 134,966; Sept. 14; v. 278; p. 347.
Tents and awnings. Central Tent & Awning Company. No. 133,871; Sept. 14; v. 278; p. 342.
Thread and yarns. The West End Thread Company. No. 134,397; Sept. 14; v. 278; p. 343.
Tire-casings and inner-tubes. Zonta Tire & Inner Tubes. No. 132,282; Sept. 14; v. 278; p. 337.
Tire patch, Automobile-. E. J. O'Connell. No. 135,165; Sept. 14; v. 278; p. 349.
Tires, Automobile-. True-Matic Tire & Tube Company. No. 135,530; Sept. 14; v. 278; p. 352.
Tires, Repair shoes and patches for pneumatic. The Wilson Rubber Company. No. 133,441; Sept. 14; v. 278; p. 340.
Tires, Rubber pneumatic. Victory Rubber Manufacturing Co. No. 133,718; Sept. 14; v. 278; p. 341.
Tires, Rubber vehicle-. J. C. Dawson. No. 130,409; Sept. 14; v. 278; p. 335.
Tooth-paste. G. Bernard. No. 129,820; Sept. 14; v. 278; p. 334.
Transmission-linings. The Powers Manufacturing Company. No. 132,200; Sept. 14; v. 278; p. 337.
Trucks, Motor-. Highway Motors Co. No. 125,779; Sept. 14; v. 278; p. 329.
Turpentine and turpentine substitutes. Anderson, Meyer & Company, Ltd. No. 134,623; Sept. 14; v. 278; p. 344.
Undergarments, Women's, misses', and children's. D. E. Sicher & Co. No. 134,921; Sept. 14; v. 278; p. 346.
Underwaists, Infants'. Comfort Garment Company. No. 131,310; Sept. 14; v. 278; p. 335.
Underwear. William H. Shelp & Company. No. 131,129; Sept. 14; v. 278; p. 335.
Underwear and baby-pants, Infants' and children's. I. B. Kleinert Rubber Company. No. 135,329; Sept. 14; v. 278; p. 351.
Underwear and pajamas, Men's. Universal Garment Company. No. 134,926; Sept. 14; v. 278; p. 346.
Underwear, baby-pants, and waders, Infants' and children's. I. B. Kleinert Rubber Company. No. 135,328; Sept. 14; v. 278; p. 350.
Vehicle-bodies. The Baker R & L Company. No. 133,958; Sept. 14; v. 278; p. 342.
Vehicles, Light motor road-. Delmore Manufacturing Co. No. 130,721; Sept. 14; v. 278; p. 335.
Vehicles, Pedal-driven, three-wheel juvenile. Westfield Manufacturing Company. Nos. 134,494–5; Sept. 14; v. 278; p. 344.
Wicking used for packing. Massasoit Manufacturing Company. No. 129,131; Sept. 14; v. 278; p. 333.
Wicking used for packing. Massasoit Manufacturing Company. Nos. 129,220–1; Sept. 14; v. 278; p. 333.

CLASSIFICATION OF PATENTS

ISSUED SEPTEMBER 14, 1920.

NOTE.—First number—class, second number—subclass, third number—patent number.

2— 41: 1,352,704
67: 1,352,563
1,352,705
1,352,706
73: 1,352,422

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 21st DAY OF SEPTEMBER, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abramowitz, Hyman, New York, N. Y. Toy machine-gun. No. 1,353,696; Sept. 21; v. 278; p. 484.

Adams-Pond Company. (See Allbright, Edwin F., assignor.)

Adams, Raymond K., Dwyer, Wyo. Hoisting-crane or stacker. No. 1,353,697; Sept. 21; v. 278; p. 485.

Adams, Thomas M., Houston, Tex. Standing valve. No. 1,353,303; Sept. 21; v. 278; p. 405.

Affel, Herman A., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Combined carrier and radio system. No. 1,353,698; Sept. 21, v. 278; p. 485.

Aguere, Arthur, West Somerville, Mass. Electric plug. No. 1,353,699; Sept. 21; v. 278; p. 485.

Ahlstrom, Fritz A., Absaraka, N. D. Fencing-machine. No. 1,353,304; Sept. 21; v. 278; p. 405.

Aktiebolaget Svenska Kullagerfabriken. (See Palmgren, Nils A., assignor.)

Aladdin Products Company. (See Robison, Clinton S., assignor.)

Albany Perforated Wrapping Paper Company. (See Crandell, Willis S., assignor.)

Alberti, Emilio, New York, assignor to International Cork Company, Brooklyn, N. Y. Feeding attachment for crown-cork making machines. No. 1,353,136; Sept. 21; v. 278; p. 373.

Allan, William N., San Antonio, Tex. Vehicle-wheel. No. 1,353,700; Sept. 21; v. 278; p. 485.

Allana, Priscilla. (See Lambert, Emma N., assignor.)

Allbright, Edwin F., Atlantic, assignor to Adams-Pond Company, Inc., Boston, Mass. Concrete construction. No. 1,353,373; Sept. 21; v. 278; p. 419.

Allen, Arthur M., Hope, Ark. Seat-hook. No. 1,353,701; Sept. 21; v. 278; p. 485.

Allen Hosiery Company. (See Longtin, William J., assignor.)

Alnutt, Lawrence L., Chattanooga, Tenn. Musical-instrument-string retoner. No. 1,353,135; Sept. 21; v. 278; p. 373.

Altenberg, George P., assignor to The Icy-Hot Bottle Company, Cincinnati, Ohio. Heat-insulated vessel and casing therefor. No. 1,353,305; Sept. 21; v. 278; p. 405.

American Metal Cap Company. (See Hammer, Charles, assignor.)

American Mine Door Company, The. (See Bowman, C. L., and Body, assignors.)

American Optical Company. (See Boutelle, William H., assignor.)

American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)

American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)

American Telephone and Telegraph Company. (See Grisson, George, assignor.)

American Wagon Company. (See Kuhnen, Alexander F., assignor.)

Andersen, Hans, Nymore, Minn. Log-skidding grapple. No. 1,353,503; Sept. 21; v. 278; p. 445.

Anderson, Eugene G., Seattle, Wash. Display-table. No. 1,353,208; Sept. 21; v. 278; p. 387.

Andersson, Wictor O. J., Malmö, Sweden. Calculating-machine. No. 1,353,504; Sept. 21; v. 278. p. 445.

Anfinson, Anton, Wakonda, S. D. Roadway. No. 1,353,446; Sept. 21; v. 278; p. 433.

Ansonia Manufacturing Company. (See Malby, Seth G., assignor.)

Arrighi, Pietro, San Francisco, Calif. Rotary engine. No. 1,353,374; Sept. 21; v. 278; p. 419.

Aschauer, Charles J., Decatur, Ill. Building construction. No. 1,353,702; Sept. 21; v. 278; p. 485.

Ash, Charles S., Geneva, N. Y. Truing-stand. No. 1,353,505; Sept. 21; v. 278; p. 445.

Atwood, Seth B., Rockford, Ill. Door-bumper. No. 1,353,506; Sept. 21, v. 278; p. 445.

Ashenhurst, Harold S., assignor of four-fifths to J. J. Reynolds, Chicago, Ill. Manufacturing an insulating material. No. 1,353,621; Sept. 21; v. 278; p. 469.

Ashenhurst, Harold S., assignor of four-fifths to J. J. Reynolds, Chicago, Ill. Reinforced insulating material. No. 1,353,622; Sept. 21; v. 278; p. 469.

Ault, Eugene B., Calallen, Tex. Bee-cage. No. 1,353,137; Sept. 21; v. 278; p. 373.

Automatic Electric Company. (See Yanochowski, G. A., and Hershey, assignors.)

Averill, Rex G., assignor to The Ohio Brass Company, Mansfield, Ohio. Trolley-tender. No. 1,353,507; Sept. 21; v. 278; p. 445.

Averill, Rex G., assignor to The Ohio Brass Company, Mansfield, Ohio. Trolley-tender. No. 1,353,508; Sept. 21; v. 278; p. 445.

Averill, Rex G., and C. H. Tomlinson; said Averill assignor to The Ohio Brass Company, Mansfield, Ohio. Multiple electric air and car coupling. No. 1,353,557; Sept. 21; v. 278; p. 455.

Avillar, Manuel D., New York, N. Y. Machine for slotting piston-rings and similar objects. No. 1,353,558; Sept. 21; v. 278; p. 456.

Babcock, Fay L., Largo, Fla. Toy. No. 1,353,703; Sept. 21; v. 278; p. 486.

Badger Manufacturing Corporation. (See Isrig, Walter V., assignor.)

Bagley, William W., Chicago, Ill., assignor to J. Rousso, Los Angeles, Calif. Towel-cabinet. No. 1,353,704; Sept. 21; v. 278; p. 486.

Bair, George I., Detroit, Mich. Window for automobile-curtains. No. 1,353,306; Sept. 21; v. 278; p. 406.

Baisch, Robert, and O. Kreutz, Detroit, Mich. Toy gun. No. 1,353,138; Sept. 21; v. 278; p. 373.

Bambrick, Charles L., Brooks, Alberta, Canada. Film-holder. No. 1,353,705; Sept. 21; v. 278; p. 486.

Bancel, Paul A., Nutley, assignor to The Ingersoll-Rand Company, Jersey City, N. J. Regenerative power installation. No. 1,353,706; Sept. 21; v. 278; p. 486.

Barber, Alfred H. (See Gasser, J., and Barber.)

Barber, Howard M., Stonington, Conn., assignor to C. B. Cottrell & Sons Company, New York, N. Y. Sheet-delivery mechanism for printing-presses. No. 1,353,509; Sept. 21; v. 278; p. 446.

Barker-Sweet Manufacturing Company, The. (See Sweet, Parker H., assignor.)

Barkis, Henry B., Sr., Lodi, Calif. Nut-bleaching apparatus. No. 1,353,209; Sept. 21; v. 278; p. 387.

Barkschat, Henry. (See Blinn, Edmund B., assignor.)

Barlow, William L., Clear Lake, Iowa. Device for catching and holding hogs. No. 1,353,376; Sept. 21; v. 278; p. 419.

Barnard, Dudley J., Barking, England. Grab. No. 1,354,651. Sept. 21; v. 278; p. 475.

Barnard, Joseph, Hackney, London, assignor to H. E. and G. G. Bloch, Birmingham, England. Toy animal. No. 1,353,707; Sept. 21; v. 278; p. 486.

Barnett, John H., Tettenhall, England. Seat of motor-cars. No. 1,353,708; Sept. 21; v. 278; p. 487.

Barr, Edward B., Newton, Kans. Door-latch. No. 1,353,447; Sept. 21; v. 278; p. 433.

Bartholomew, Wallace J. (See Dann, Frederick J., assignor.)

Bates, Adelmer M., assignor to Bates Valve Bag Company, Chicago, Ill. Making and filling bags. No. 1,353,210; Sept. 21; v. 278; p. 387.

Bates Valve Bag Company. (See Bates, Adelmer M., assignor.)

Bauer, Martha V., Washington, D. C. Token. No. 1,353,709; Sept. 21; v. 278; p. 487.

Baumann, Karl, Urmston, assignor to The British Westinghouse Electric & Manufacturing Company, Limited, London, England. Blade or vane for steam-turbines. No. 1,353,710; Sept. 21, v. 278; p. 487.

Baumgartl, Leroy, Chicago, Ill. Manufacturing slabs or the like of cement or like material. No. 1,353,510; Sept. 21; v. 278; p. 446.

Baumgartl, Leroy, Chicago, Ill. Demountable wheel. No. 1,353,511; Sept. 21; v. 278; p. 446.

Baumgartl, Leroy, Chicago, Ill. Manufacturing slabs or the like of cement or like material. No. 1,353,512; Sept. 21; v. 278; p. 446.

Bausch, Albert. (See Maguire, W., and Bausch.)

Beach, Chester H., assignor to Frederick J. Osius, Racine, Wis. Support for sewing-machine motors. No. 1,353,211; Sept. 21; v. 278; p. 388.

Beattie, Charles W., Parsonsfield, Me., assignor of one-half to J. C. Nicholson, Peabody, Mass. Discharge-valve for flush-tanks. No. 1,353,559; Sept. 21; v. 278; p. 456.

Beckwith, Walter C., Fostoria, Ohio. Device for raising sunken vessels. No. 1,353,623; Sept. 21; v. 278; p. 469.

Bell, Hugo, Lawrence, Mass. Antiskid device for motor-vehicles. No. 1,353,560; Sept. 21; v. 278; p. 456.
Bilknap, Frank L. (See James, Willard C., assignor.)
Bellm, Henry E. (See Colver, A. S., and Bellm.)
Bennett, Ralph R., San Jose, Calif. Weighing-machine. No. 1,353,139; Sept. 21; v. 278; p. 373.
Bens, Frank J., San Jose, Calif. Lace-tip. No. 1,353,140; Sept. 21; v. 278; p. 374.
Berger, Samuel, Newark, N. J. Sink scoop or shovel. No. 1,353,307; Sept. 21; v. 278; p. 406.
Bergeron, Lindor, Macamic, Quebec, Canada. Sleigh. No. 1,353,141; Sept. 21; v. 278; p. 374.
Bergman, Sven R., Nahant, Mass., assignor to General Electric Company. Electric welding and reactor. No. 1,353,711; Sept. 21, v. 278; p. 487.
Bergstrom-Brewster Motor Company. (See Bergstrom, Cuthbert C., assignor.
Bergstrom, Cuthbert C., assignor to The Bergstrom-Brewster Motor Company, Denver, Colo. Stake-holder. No. 1,353,624; Sept. 21; v. 278; p. 470.
Bernier, Henry N., St. Eugene, De Guigues, Quebec, assignor of one-half to J. De Froy, Timmins, Ontario, Canada. Funnel. No. 1,353,712; Sept. 21; v. 278; p. 487.
Berry, William O., assignor of one-half to W. F. Wallis, Caro, Mich. Coupling device. No. 1,353,713; Sept. 21; v. 278; p. 488.
Berthon, Paul. (See Radisson, A., and Berthon.)
Bingley, John W., Watertown, N. Y. Engineer's brake-valve. No. 1,353,375; Sept. 21; v. 278; p. 419.
Black, George H., Rochester, N. Y., assignor to United Shoe Machinery Corporation, Paterson, N. J. Manufacture of welt-shoes. No. 1,353,308; Sept. 21; v. 278; p. 406.
Blinn, Edmund B., Pasadena, assignor of one-third to H. Barkschat, Los Angeles, Calif. Concrete pole. No. 1,353,309; Sept. 21; v. 278; p. 406.
Bloch, George G., *et al.* (See Barnard, Joseph, assignor.)
Bloch, Harris E., *et al.* (See Barnard, Joseph, assignor.)
Bobo, Walton E., Hattiesburg, Miss., assignor to The Magnolia Company, Chicago, Ill. Curing sweet potatoes or yams. No. 1,353,561; Sept. 21; v. 278; p. 456.
Body, John J. (See Bowman, C. L., and Body.)
Bohen, Michael M. Casper, Wyo. Shoveling-machine. No. 1,353,142; Sept. 21; v. 278; p. 374.
Böhling, Rudolf H., assignor to the firm Rohrbogenwerk G. m. b. H., Hamburg, Germany. Method and device for manufacturing pipe-bends, serpentines, and the like. No. 1,353,714; Sept. 21; v. 278; p. 488.
Bohre, Anton C. deceased; K. C. Bohre, executrix, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Concentration of sulfuric acid. No. 1,353,488; Sept. 21; v. 278; p. 433.
Bohre, Katharina C., executrix. (See Bohre, Anton C.)
Boiler, Edward V., West Side, Iowa. Aeroplane. No. 1,353,212; Sept. 21; v. 278; p. 388.
Bois, Nathaniel, San Francisco, Calif. Stair structure. No. 1,353,377; Sept. 21; v. 278; p. 420.
Bonnet, Gottlieb, Lincoln Valley, N. D. Insect-trap. No. 1,353,310; Sept. 21; v. 278; p. 406.
Boswell, Fletcher O., assignor to F. O. B. Manufacturing Company, Philadelphia, Pa. Automobile-lock. No. 1,353,143; Sept. 21; v. 278; p. 374.
Boswell, George G. F., Indianapolis, Ind. Shock-absorber. No. 1,353,513; Sept. 21; v. 278; p. 446.
Boswell, George G. F., Indianapolis, Ind. Shock-absorber. No. 1,353,514; Sept. 21; v. 278; p. 447.
Bouvier, Jean B. (See Frappart, H., and Bouvier.)
Boutelle, William H., assignor to American Optical Company, Southbridge, Mass. Ophthalmic mounting. No. 1,353,311; Sept. 21; v. 278; p. 407.
Bovard, William H. (See Wolfe, P. L., and Bovard.)
Bowlus, Charles F., Dallas, Tex. Heater. No. 1,353,312; Sept. 21; v. 278; p. 407.
Bowman, Charles L., Canton, Ohio, and J. J. Body, Dante, Va., assignors to The American Mine Door Company, Canton, Ohio. Automatic mine-door. No. 1,353,715; Sept. 21; v. 278; p. 488.
Boyce, John A., Chicago, Ill. Printing and folding machine. No. 1,353,799; Sept. 21; v. 278; p. 504.
Bradley, Charles S., New York, N. Y. Production of iron and steel. No. 1,353,716; Sept. 21; v. 278; p. 488.
Brandenburg, Albert F., assignor of one-half to H. E. Palmer, Dayton, Ohio. Pen-brush. No. 1,353,625; Sept. 21; v. 278; p. 470.
Braun, Carl F., San Francisco, Calif. Heat-exchanger. No. 1,353,449; Sept. 21; v. 278; p. 433.
Brinnon, Burleigh B. (See Harbour, T. P., and Brinnon.)
British Westinghouse Electric & Manufacturing Company, The. (See Baumann, Karl, assignor.)
Bromfield, Henry A. M., Daylesford, Victoria, Australia. Weed and clod cutter. No. 1,353,626; Sept. 21; v. 278; p. 470.
Brown & Bigelow. (See Kristofek, F. J., and Fischer, assignors.)
Brown, Vincent B., Plattsmouth, Nebr. Sickle. No. 1,353,450; Sept. 21; v. 278; p. 433.
Brown, Walter W., Chico, Calif. Primer for engines. No. 1,353,144; Sept. 21; v. 278; p. 374.
Bryant Electric Company, The. (See Thomas, George B., assignor.)
Brush, Alanson P., Detroit, Mich. Internal-combustion engine of the V-type. No. 1,353,213; Sept. 21; v. 278; p. 388.
Buchanan, Frederick F., and N. F. Slack, Machipongo, Va. Package-tie. No. 1,353,717; Sept. 21; v. 278; p. 488.
Bucher, David H., Louisville, Ky. Collapsible pail. No. 1,353,627; Sept. 21; v. 278; p. 470.
Bullock, Percy W. (See Handley, George, assignor.)
Buresch, William W., Baltimore, Md. Bottle-capping tool. No. 1,353,718; Sept. 21; v. 278; p. 489.
Buresch, William W., Baltimore, Md. Bottle-capping tool. No. 1,353,719; Sept. 21; v. 278; p. 489.
Burns, Walter G., Fort Wayne, Ind. Driving mechanism for ore-concentrators. No. 1,353,451; Sept. 21; v. 278; p. 434.
Butterworth, Frank W., assignor to Western Brick Company, Danville, Ill. Brick. No. 1,353,515; Sept. 21; v. 278; p. 447.
Cahill, Henry D., Boston, Mass. Electric-lamp body, reflector, and shade-holder. No. 1,353,562; Sept. 21; v. 278; p. 456.
Cahill, Henry D., Boston, Mass. Electric-cluster-lamp body and shade-holder. No. 1,353,563; Sept. 21; v. 278; p. 457.
Calleson, Amos, Brooklyn, N. Y. Sealing appliance. No. 1,353,628; Sept. 21; v. 278; p. 470.
Calmer, Edward, St. Louis, Mo. Fire-kindler. No. 1,353,214; Sept. 21; v. 278; p. 388.
Calthrop, Everard R., assignor to E. R. Calthrop's Aerial Patents Limited, London, England. Parachute. No. 1,353,378; Sept. 21; v. 278; p. 420.
Calthrop's, E. R., Aerial Patents Limited. (See Calthrop, Everard R., assignor.)
Campbell, William J., Indianapolis, Ind. Eraser attachment for pencils. No. 1,353,215; Sept. 21; v. 278; p. 388.
Carlson, Edward P., Seattle, Wash. Hydraulic pump. No. 1,353,216; Sept. 21; v. 278; p. 388.
Carvalho, David N., New York, N. Y. Process and composition for the protection of monetary and other documents. No. 1,353,720; Sept. 21; v. 278; p. 489.
Case, J. I., Threshing Machine Company. (See Crawford, John F., assignor.)
Caulfeild, Geraldine M. and H. F. S., Lee, England. Motor-vehicle. No. 1,353,379; Sept. 21; v. 278; p. 430.
Caulfeild, H. F. S. (See Caulfeild, Geraldine M. and H. F. S.)
Celite Products Company. (See Starr, E. B., and Marsh, assignors.)
Central Scientific Company. (See Krause, Arndt M., assignor.)
Chapman, Frank, Providence, R. I. Portable stove. No. 1,353,314; Sept. 21; v. 278; p. 407.
Chapman, Walter I., Jersey City, N. J. Roofing-tile and fastening means therefor. No. 1,353,807; Sept. 21; v. 278; p. 505.
Chappelle, Charles C., New York, N. Y. Gas-burner. No. 1,353,217; Sept. 21; v. 278; p. 389.
Cherry, Edward P., Dayton, assignor of one-half to N. N. Cherry, Springfield, Ohio. Illuminated sign. No. 1,353,516; Sept. 21; v. 278; p. 447.
Cherry, Norman N. (See Cherry, Edward P., assignor.)
Chesnutt, John L., assignor to The Service Caster & Truck Company, Kansas City, Mo. Operating mechanism for elevating-trucks. No. 1,353,564; Sept. 21; v. 278; p. 457.
Chipperfield, Walter, Hornchurch, assignor to Roneo Limited, London, England. Metal filing-cabinet. No. 1,353,452; Sept. 21; v. 278; p. 434.
Chipperfield, Walter, Romford, assignor to Roneo Limited, London, England. Means for simultaneously locking sliding drawers, shelves, or other sliding structures. No. 1,353,453; Sept. 21; v. 278; p. 434.
Chisholm, Douglas W., Garnkirk, Scotland. Closing die or bell for welded tubes. No. 1,353,721; Sept. 21; v. 278; p. 489.
Chmielarski, Walter, Gary, Ind. Bomb-dropper. No. 1,353,518; Sept. 21; v. 278; p. 447.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 21st DAY OF SEPTEMBER, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acetylene-gas generator. C. T. and C. B. Cook. No. 1,353,465; Sept. 21; v. 278; p. 435.

Acid, Concentration of sulfuric. A. C. Bohre. No. 1,353,448; Sept. 21; v. 278; p. 433.

Acids and their glycerids, Method of and apparatus for hydrogenating fatty. A. Radlsson and P. Berthon. No. 1,353,419; Sept. 21; v. 278; p. 428.

Aeroplane. E. V. Boller. No. 1,353,212; Sept. 21; v. 278; p. 388.

Aeroplane. P. T. Wolfe and W. H. Bovard. No. 1,353,692; Sept. 21; v. 278; p. 484.

Aeroplane, Twin-propeller. L. B. Sperry. No. 1,353,544; Sept. 21; v. 278; p. 452.

Aeroplanes, Foldable landing-gear for. F. McCarroll. No. 1,353,407; Sept. 21; v. 278; p. 423.

Agricultural implement Balance. D. Y. Wheatley. No. 1,353,366; Sept. 21; v. 278; p. 417.

Air and car coupling, Multiple electric. R. G. Averill and C. H. Tomlinson. No. 1,353,557. Sept. 21; v. 278; p. 455.

Aircraft, Wing and similar member of. F. H. Page. No. 1,353,666; Sept. 21; v. 278; p. 478.

Airplane-wing. J. Petrovitch. No. 1,353,179; Sept. 21; v. 278; p. 382.

Alarm: *See*—
Latch and burglar-alarm.

Alloys, Treating copper-bearing. W. J. Marsh. No. 1,353,778; Sept. 21; v. 278; p. 499.

Anchor-bolt. F. Hammermann. No. 1,353,159; Sept. 21; v. 278; p. 377.

Antenna structure. L. Espenschied. No. 1,353,735; Sept. 21; v. 278; p. 492.

Antiskidding device. J. C. Dupler. No. 1,353,329; Sept. 21; v. 278; p. 410.

Automatic controlling device. C. J. Stuart. No. 1,353,434; Sept. 21; v. 278; p. 431.

Automobile-bumper. W. V. Isgrig. No. 1,353,241; Sept. 21; v. 278; p. 393.

Automobile-chock. F. Retterer. No. 1,353,541; Sept. 21; v. 278; p. 452.

Automobile-curtain. S. A. Gates. No. 1,353,568; Sept. 21; v. 278; p. 437.

Automobile hauling attachment. E. Krumland. No. 1,353,762; Sept. 21; v. 278; p. 497.

Automobile-lock. F. O. Boswell. No. 1,353,143; Sept. 21; v. 278; p. 374.

Automatic-locking spring-washer. A. T. Mills. No. 1,353,776; Sept. 21; v. 278; p. 499.

Automobile pilot-signal. C. Sealy. No. 1,353,790; Sept. 21; v. 278; p. 502.

Automobile-signal. C. F. Livingston and E. E. Lordge. No. 1,353,253; Sept. 21; v. 278; p. 395.

Automobile-tops, Dressing for. C. A. Honig. No. 1,353,239; Sept. 21; v. 278; p. 393.

Automobile - wrench combination. H. Rosenberg. No. 1,353,496; Sept. 21; v. 278; p. 443.

Automobiles, &c., Four-wheel drive for. H. A. Mieske. No. 1,353,411; Sept. 21; v. 278; p. 426.

Automobiles, Auxiliary radiator for. W. Nash. No. 1,353,263; Sept. 21; v. 278; p. 397.

Automobiles, Convertible interior of. W. H. Griffin and O. C. Hartsough. No. 1,353,232; Sept. 21; v. 278; p. 391.

Automobiles, Gear-casing and band-operating device for. J. T. Parrish. No. 1,353,612; Sept. 21; v. 278; p. 506.

Axles, Spring-fitting for vehicle. J. C. H. Grant. No. 1,353,470; Sept. 21; v. 278; p. 438.

Badges, Naval, military and other metallic. C. F. Gaunt. No. 1,353,228; Sept. 21; v. 278; p. 391.

Bag-holder. E. Erickson. No. 1,353,330; Sept. 21; v. 278; p. 410.

Bags, Making and filling. A. M. Bates. No. 1,353,210; Sept. 21; v. 278; p. 387.

Baling-presses, Safety device for. C. R. Littig. No. 1,353,252; Sept. 21; v. 278; p. 395.

Barge. J. Thies. No. 1,353,190; Sept. 21; v. 278; p. 384.

Barometer, Mercurial. A. M. Krause. No. 1,353,482; Sept. 21; v. 278; p. 440.

Barrels, Head equipment for. H. U. Ruedy. No. 1,353,183; Sept. 21; v. 278; p. 382.

Bathtub attachment. C. H. Waechter. No. 1,353,318; Sept. 21. v. 278; p. 407.

Battery-box-forming machine. S. E. Hall. No. 1,353,239; Sept. 21; v. 278; p. 412.

Battery-plate support. E. M. Duffey. No. 1,353,154; Sept. 21; v. 278; p. 376.

Bearings, Machine for burning in and burnishing engine-. T. W. Jansen. No. 1,353,164; Sept. 21; v. 278; p. 378.

Bed attachment, Combination. J. W. Weismantel. No. 1,353,502; Sept. 21; v. 278; p. 444.

Bed-bottom. R. Fuller. No. 1,353,579; Sept. 21; v. 278; p. 460.

Bed, Convertible wardrobe-. J. M. McGhee. No. 1,353,536; Sept. 21; v. 278; p. 451.

Bed having vertical pivots, Screened. W. C. James. No. 1,353,163; Sept. 21; v. 278; p. 378.

Bed headrest attachment. A. MacDonald. No. 1,353,537; Sept. 21; v. 278; p. 451.

Bed, Vertically-pivoted wall- W. C. James. No. 1,353,162; Sept. 21; v. 278; p. 378.

Bee-cage. E. B. Ault. No. 1,353,187; Sept. 21; v. 278; p. 373.

Beet-topping means. C. L. Leonard and A. F. Howard. No. 1,353,403; Sept. 21; v. 278; p. 425.

Berry-picker. A. Mahtes. No. 1,353,172; Sept. 21; v. 278; p. 380.

Blower-pipe, windbreak, and silage-distributer. A. M. Tamm and J. Tennessen, Jr. No. 1,353,674; Sept. 21; v. 278; p. 480.

Board: *See*—
Game-board. Paper-board.
Ironing-board. Sound-board.

Boat or other light marine vessel, Flying- H. Scott-Paine. No. 1,353,660; Sept. 21; v. 278; p. 479.

Boilers, Apparatus for returning water to. D. N. Crosthwait, Jr. No. 1,353,457; Sept. 21; v. 278; p. 435.

Boilers, Fire-box for. C. Ducas. No. 1,353,640; Sept. 21; v. 278; p. 473.

Bolt: *See*—
Anchor-bolt.

Bolt-keeper. W. F. Wagner. No. 1,353,440; Sept. 21; v. 278; p. 432.

Bolting-up and plate-tightening machine. J. P. McBride. No. 1,353,600; Sept. 21; v. 278; p. 464.

Bomb-dropper. W. Chmielarski. No. 1,353,518; Sept. 21; v. 278; p. 447.

Book. A. T. Mason. No. 1,353,774; Sept. 21; v. 278; p. 499.

Book, Commutation- J. E. C. Swann. No. 1,353,189; Sept. 21; v. 278; p. 383.

Book, Record-. E. H. Clark. No. 1,353,315; Sept. 21; v. 278; p. 407.

Books, Page arrangement for. D. I. Winslow. No. 1,353,371; Sept. 21; v. 278; p. 418.

Bottle and closure, Combination. T. C. Spelling. No. 1,353,187; Sept. 21; v. 278; p. 383.

Bottle-capping tool. W. W. Buresch. No. 1,353,718; Sept. 21; v. 278; p. 489.

Bottle-capping tool. W. W. Buresch. No. 1,353,719; Sept. 21; v. 278; p. 489.

Bottle holder, Milk-. G. R. Schlegel. No. 1,353,498; Sept. 21; v. 278; p. 443.

Bottles, Marking-card for milk- R. G. Heard. No. 1,353,531; Sept. 21; v. 278; p. 450.

Box: *See*—
Coin and stamp box. Collapsible box.

Boxes, Machine for making partitions for. F. M. Joslin. No. 1,353,344; Sept. 21; v. 278; p. 413.

Brace: *See*—
Rail-brace.

Bracelet-snap. W. Maguire and A. Bausch. No. 1,353,772; Sept. 21; v. 278; p. 499.

Bracket: *See*—
Shade-bracket.

Brake: *See*—
Derailment-brake. Vehicle-brake.
Friction band-brake.

Brakes, Controlling means for electromagnetic feed-reel. H. V. James. No. 1,353,401; Sept. 21; v. 278; p. 424.

Brick. F. W. Butterworth. No. 1,353,515; Sept. 21; v. 278; p. 447.

Bricks or blocks from natural deposits, Method and apparatus for cutting. E. B. Starr and H. E. Marsh. No. 1,353,188; Sept. 21; v. 278; p. 383.

Brush. C. Schatte. No. 1,353,184; Sept. 21; v. 278; p. 382.

Brush, Fountain mucilage-. P. I. Venard. No. 1,353,679; Sept. 21; v. 278; p. 481.

Brush, Pen-. A. F. Brandenburg. No. 1,353,625; Sept. 21; v. 278; p. 470.

Buckle. T. C. Erpenbeck. No. 1,353,331; Sept. 21; v. 135; p. 410.
Buffing and polishing wheel. H. L. Zucker. No. 1,353,207; Sept. 21; v. 278; p. 387.
Building construction. C. J. Aschauer. No. 1,353,702; Sept. 21; v. 278; p. 485.
Building construction, Material for. H. W. White. No. 1,353,619; Sept. 21; v. 278; p. 468.
Bung, Safety-. G. Dobmeier. No. 1,353,732; Sept. 21; v. 278; p. 491.
Burner: *See*—
Gas-burner.
Button, Collar-. A. Yauck. No. 1,353,444; Sept. 21; v. 278; p. 432.
Button device. S. Cohen. No. 1,353,725; Sept. 21; v. 278; p. 491.
Button machine, Shank-. B. Vesely and W. Fajman. No. 1,353,680; Sept. 21; v. 278; p. 461.
Button, Toggle-. P. de F. and F. E. Warner. No. 1,353,439; Sept. 21; v. 278; p. 431.
Cabinet, Sleeping-. R. K. Jayne. No. 1,353,754; Sept. 21; v. 278; p. 495.
Cabinet, Towel-. W. W. Bagley. No. 1,353,704; Sept. 21; v. 278; p. 486.
Cabinet, Metal filing-. W. Chipperfield. No. 1,353,452; Sept. 21; v. 278; p. 434.
Cabinet, Optical. S. W. Woodhull. No. 1,353,372; Sept. 21; v. 278; p. 419.
Cabinet, Roller-towel. C. B. Orcutt. No. 1,353,416; Sept. 21; v. 278; p. 427.
Calculating-machine. F. J. Tillman. No. 1,353,293; Sept. 21; v. 278; p. 403.
Calculating-machine. W. O. J. Anderson. No. 1,353,504; Sept. 21; v. 278; p. 445.
Calendar, Perpetual. J. L. Hutson. No. 1,353,751; Sept. 21; v. 278; p. 495.
Camera. R. H. Pearman. No. 1,353,266; Sept. 21; v. 278; p. 398.
Cameras, Direct-vision view-finder for motion-picture. W. M. Thomas. No. 1,353,191; Sept. 21; v. 278; p. 384.
Can-covering. J. M. Hatfield. No. 1,353,236; Sept. 21; v. 278; p. 392.
Cans, Device for securing protecting-jackets upon. W. H. Semon. No. 1,353,280; Sept. 21; v. 278; p. 401.
Cap, Band catsup-. C. Hammer. No. 1,353,801; Sept. 21; v. 278; p. 504.
Caps, Manufacture of rubber bathing-. R. E. Riley. No. 1,353,421; Sept. 21; v. 278; p. 428.
Car-door latch, Mine-. C. E. Kelley and G. D. Speicher. No. 1,353,760; Sept. 21; v. 278; p. 496.
Car-door ventilator. G. F. Zaun. No. 1,353,301; Sept. 21; v. 278; p. 405.
Car seat, Motor-. J. H. Barnett. No. 1,353,708; Sept. 21; v. 278; p. 487.
Car-step, Auxiliary. P. Swanson. No. 1,353,364; Sept. 21; v. 278; p. 417.
Cars, Friction draft-gear for railway-. R. D. Gallagher, Jr. No. 1,353,529; Sept. 21; v. 278; p. 450.
Carbureter. C. L. Stokes. No. 1,353,288; Sept. 21; v. 278; p. 402.
Carbureting-screen. F. W. Lapham. No. 1,353,248; Sept. 21; v. 278; p. 394.
Carrier and radio system, Combined. H. A. Affel. No. 1,353,698; Sept. 21; v. 278; p. 485.
Case: *See*—
Vanity-case.
Caster. J. B. Watling. No. 1,353,195; Sept. 21; v. 278; p. 385.
Cellulose acetate, Manufacture of compositions, preparations, or articles having a basis of. H. Dreyfus. No. 1,353,384; Sept. 21; v. 278; p. 421.
Cellulose acetate, Manufacture of compositions, preparations, or articles having a basis of. H. Dreyfus. No. 1,353,385; Sept. 21; v. 278; p. 421.
Cement, Manufacturing slabs of. L. Baumgartl. No. 1,353,510; Sept. 21; v. 278; p. 446.
Cement, Manufacturing slabs of. L. Baumgartl. No. 1,353,512; Sept. 21; v. 278; p. 446.
Chain-hook. P. D. Thompson. No. 1,353,676; Sept. 21; v. 278; p. 480.
Chair: *See*—
Combination-chair. Folding chair.
Check-holding device. A. Napolillo. No. 1,353,605; Sept. 21; v. 278; p. 466.
Check-writer. C. G. Tiefel. No. 1,353,437; Sept. 213; v. 278; p. 431.
Check-writer. L. M. Todd and C. G. Tiefel. No. 1,353,618; Sept. 21; v. 278; p. 468.
Circuits, Repeater-. G. Crisson. No. 1,353,637; Sept. 21; v. 278; p. 472.
Clamp: *See*—
Rail-clamp. Work-holding clamp.
Clamp. A. Coons. No. 1,353,632; Sept. 21; v. 278; p. 471.
Cleaner: *See*—
Window-cleaner.
Clinker-extractor. G. Selander. No. 1,353,428; Sept. 21; v. 278; p. 430.
Clothes-drier. J. Straith. No. 1,353,670; Sept. 21; v. 278; p. 479.
Coal and grain truck, Self-loading. J. A. Klovstad. No. 1,353,247; Sept. 21; v. 278; p. 394.
Coin and stamp box. J. R. Halley. No. 1,353,585; Sept. 21; v. 278; p. 461.
Coin-controlled apparatus. C. Dimmock. No. 1,353,228; Sept. 21; v. 278; p. 390.
Collapsible box. G. A. Cibulka. No. 1,353,629; Sept. 21; v. 278; p. 470.
Collar. C. M. Richter. No. 1,353,181; Sept. 21; v. 278; p. 382.
Collar-fastener. T. J. Gillespie. No. 1,353,789; Sept. 21; v. 278; p. 493.
Colloid-treated fabric and producing same. S. P. Lovell. No. 1,353,599; Sept. 21; v. 278; p. 464.

Planter, Potato-. F. W. Lee. No. 1,353,356; Sept. 21; v. 278; p. 415.
Pocket-knife, Safety. J. Pantalek. No. 1,353,490; Sept. 21; v. 278; p. 442.
Polishing apparatus. W. Severns. No. 1,353,429; Sept. 21; v. 278; p. 430.
Potassium chlorid from brine, Recovering. J. L. Silsbee. No. 1,353,288; Sept. 21; v. 278; p. 401.
Potato masher and beater, Combination. C. C. Defenbaugh. No. 1,353,520; Sept. 21; v. 278; p. 448.
Potatoes or yams, Curing sweet-. W. E. Bobo. No. 1,353,561; Sept. 21; v. 278; p. 456.
Power-barring apparatus. E. Schneider. No. 1,353,275; Sept. 21; v. 278; p. 399.
Power installation, Regenerative. P. A. Bancel. No. 1,353,706; Sept. 21; v. 278; p. 486.
Power-transmission attachment for automobiles. D. D. Roberts. No. 1,353,786; Sept. 21; v. 278; p. 501.
Power-transmission device. H. E. Owen. No. 1,353,178; Sept. 21; v. 278; p. 381.
Preserving and protecting poles, Apparatus for. T. E. Lewis. No. 1,353,598; Sept. 21; v. 278; p. 464.
Priming-cup. W. Grikscheit. No. 1,353,584; Sept. 21; v. 278; p. 461.
Printing and folding machine. J. A. Boyce. No. 1,353,709; Sept. 21; v. 278; p. 504.
Printing, cutting, and creasing presses, Adjustable chase and lock-up for. E. Karl. No. 1,353,758; Sept. 21; v. 278; p. 496.
Printing-presses, Gripper for. A. S. Korob. No. 1,353,808; Sept. 21; v. 278; p. 505.
Printing-presses, Chromo-roller for. M. G. Murufas. No. 1,353,662; Sept. 21; v. 278; p. 477.
Printing-presses, Sheet-delivery mechanism for. H. M. Barber. No. 1,353,509; Sept. 21; v. 278; p. 446.
Pulp hollow ware, Machine for forming. W. H. Fulcher. No. 1,353,578; Sept. 21; v. 278; p. 460.
Pump. H. M. Hall. No. 1,353,391; Sept. 21; v. 278; p. 422.
Pump. T. Peters. No. 1,353,492; Sept. 21; v. 278; p. 442.
Pump-cylinders, Device for recovering. H. Nelson. No. 1,353,177; Sept. 21; v. 278; p. 381.
Pump for pumping liquids, Rotary. G. Handley. No. 1,353,745; Sept. 21; v. 278; p. 494.
Pump, Hydraulic. E. P. Carlson. No. 1,353,216; Sept. 21; v. 278; p. 388.
Punching-machine. H. Swanson. No. 1,353,292; Sept. 21; v. 278; p. 403.
Rabbit. E. C. Robinson. No. 1,353,422; Sept. 21; v. 278; p. 428.
Rack: *See*—
Towel-rack.
Radiator. L. Loughlin. No. 1,353,768; Sept. 21; v. 278; p. 498.
Radiator antifreeze device. J. Torrent, Jr. No. 1,353,678; Sept. 21; v. 278; p. 481.
Radiator unit, Humidifying-. F. E. Grosvold. No. 1,353,744; Sept. 21; v. 278; p. 494.
Radiators, Selective cooling and heating systems for automobile-. H. J. Peterson. No. 1,353,418; Sept. 21; v. 278; p. 428.

Radium, Producing compounds of. H. O. Hedström. No. 1,353,532; Sept. 21; v. 278; p. 450.
Rail-anchor, Adjustable. B. Wohlhaupter. No. 1,353,204; Sept. 21; v. 278; p. 386.
Rail-brace. J. G. Mueller. No. 1,353,412; Sept. 21; v. 278; p. 426.
Rail-clamp. H. Frappart and J. B. Bouvier. No. 1,353,577; Sept. 21; v. 278; p. 460.
Rail-joint-coupling device. J. H. Harnsberger. No. 1,353,653; Sept. 21; v. 278; p. 476.
Rail-support for temporary use, Auxiliary. J. J. Duffy. No. 1,353,572; Sept. 21; v. 278; p. 459.
Railway-carriages, Journal-box for. N. A. Palmgren. No. 1,353,489; Sept. 21; v. 278; p. 442.
Railway guard device. S. Clary. No. 1,353,723; Sept. 21; v. 278; p. 489.
Railway-rails, Anticreep device or anchor for. H. Yates. No. 1,353,206; Sept. 21; v. 278; p. 387.
Railway system. G. B. Samuelson and W. H. Glaser. No. 1,353,423; Sept. 21; v. 278; p. 429.
Railway-track construction. J. Malik. No. 1,353,771; Sept. 21; v. 278; p. 499.
Railway-traffic-controlling apparatus. L. V. Lewis. No. 1,353,250; Sept. 21; v. 278; p. 395.
Railways, Rail-bond for electric. E. A. Hoffman and T. P. Him. No. 1,353,237; Sept. 21; v. 278; p. 392.
Raising or lowering device. J. Gasser and A. H. Barber. No 1,353,737; Sept 21; v. 278; p. 492.
Range-finder. E. W. Deming. No. 1,353,151; Sept. 21; v. 278; p. 376.
Razor, Rotary safety-. A. C. Hanson. No 1,353,160; Sept. 21; v. 278; p. 377.
Razor, Safety-. R. H. Parker. No. 1,353,609; Sept. 21; v. 278; p. 466.
Razor, Safety-. S. G. Malby. No. 1,353,603; Sept. 21; v. 278; p. 465.
Reamers, Device for expanding. H. H. La Vercombe. No. 1,353,535; Sept. 21; v. 278; p. 451.
Reciprocating engine. E. P. Palmer. No. 1,353,539; Sept. 21; v. 278; p. 452.
Reel: *See*—
Fishing-reel.
Regulator. J. A. Wiener. No. 1,353,298; Sept. 21; v. 278; p. 404.

Toy vehicle. J. G. Gavlak. No. 1,353,581; Sept. 21; v. 278; p. 461.
Track-laying wheel. O. G. Malsbary. No. 1,353,256; Sept. 21; v. 278; p. 396.
Tractor, Garden-. P. B. Ford. No. 1,353,156; Sept. 21; v. 278; p. 377.
Tractors and other vehicles, Steering means for. R. Tinker. No. 1,353,192; Sept. 21; v. 278; p. 384.
Tractors, Steering and control mechanism for. G. R. Nichols, Jr. No. 1,353,606; Sept. 21; v. 278; p. 466.
Traction-machine. W. Strait. No. 1,353,617; Sept. 21; v. 278; p. 468.
Transmission mechanism. C. A. Grotz. No. 1,353,390; Sept. 21; v. 278; p. 422.
Trap: *See*—
Insect-trap.
Tray. C. E. Roy. No. 1,353,273; Sept. 21; v. 278; p. 399.
Tree: *See*—
Shoe-tree.
Tree-protector. P. A. Libby. No. 1,353,404; Sept. 21; v. 278; p. 425.
Trimming and finishing mechanism. H. Reynolds. No. 1,353,668; Sept. 21; v. 278; p. 479.
Trolley-pole head. S. S. Cooper. No. 1,353,381; Sept. 21; v. 278; p. 420.
Trolley-retriever. E. A. Morris. No. 1,353,262; Sept. 21; v. 278; p. 397.
Trolley-tender. R. G. Averill. No. 1,353,507; Sept. 21; v. 278; p. 445.
Trolley-tender. R. G. Averill. No. 1,353,508; Sept. 21; v. 278; p. 445.
Trucks, Operating mechanism for elevating-. J. L. Chesnutt. No. 1,353,564; Sept. 21; v. 278; p. 457.
Truing-stand. C. S. Ash. No. 1,353,505; Sept. 21; v. 278; p. 445.
Trunk-band. R. T. Emery. No. 1,353,814; Sept. 21; v. 278; p. 506.
Tube-coiling machine. F. H. Sleeper. No. 1,353,186; Sept. 21; v. 278; p. 383.
Tumblers, jars, bottles, and other receptacles, Closure for. A. and H. Ingram. No. 1,353,398; Sept. 21; v. 278; p. 424.
Tunnel construction. H. W. Schlueter. No. 1,353,274; Sept. 21; v. 278; p. 399.
Turbine, Elastic-fluid. C. Steenstrup. No. 1,353,797; Sept. 21; v. 278; p. 503.
Turbine-engine. C. J. Walters. No. 1,353,687; Sept. 21; v. 278; p. 483.
Turbine, Marine steam-. A. M. Rodberg. No. 1,353,360; Sept. 21; v. 278; p. 416.
Turbines, Blade or vane for steam-. K. Baumann. No. 1,353,710; Sept. 21; v. 278; p. 487.
Two-cycle engine. W. A. Edwards. No. 1,353,465; Sept. 21; v. 278; p. 437.
Typewriter attachment. F. L. Deden. No. 1,353,150; Sept. 21; v. 278; p. 375.
Umbrella, Folding. A. Gustafson. No. 1,353,234; Sept. 21; v. 278; p. 392.
Underreamer for reaming out producing-sands. A. L. Lambeth. No. 1,353,354; Sept. 21; v. 278; p. 415.
Upholstering. J. Heitzenreder, Jr. No. 1,353,340; Sept. 21; v. 278; p. 412.
Utensil, Combination. W. Dietzel. No. 1,353,222; Sept. 21; v. 278; p. 389.
Valve. C. F. Crommett. No. 1,353,321; Sept. 21; v. 278; p. 409.
Valve, Combined by-pass and relief. E. B. Whelan. No. 1,353,296; Sept. 21; v. 278; p. 404.
Valve diaphragm, Compressed-air-. I. Stokke. No. 1,353,290; Sept. 21; v. 278; p. 402.
Valve, Engineer's brake-. J. W. Bingley. No. 1,353,375; Sept. 21; v. 278; p. 419.
Valve, Pneumatic. J. N. Newsom, H. E Harder, and W. F. Leschen. No. 1,353,415; Sept. 21; v. 278; p. 427.
Valve-spring lifter. N. H. Lundquist. No. 1,353,255; Sept. 21; v. 278; p. 396.
Valve, Standing. T. M. Adams. No. 1,353,303; Sept. 21; v. 278; p. 405.
Valve, Water-seal vacuum-. J. H. Lindsay. No. 1,353,767; Sept. 21; v. 278; p. 498.
Valves, Controlling mechanism for flushing-. F. A. Schossow. No. 1,353,804; Sept. 21; v. 278; p. 505.
Vanity-case. R. H. Sharp. No. 1,353,281; Sept. 21; v. 278; p. 401.
Vegetable-cutter. J. Loeffler. No. 1,353,484; Sept. 21; v. 278; p. 441.
Vehicle-body, Convertible. R. M. Freeman. No. 1,353,157; Sept. 21; v. 278; p. 377.
Vehicle body, Motor-road-. W. I. Rogers. No. 1,353,787; Sept. 21; v. 278; p. 502.
Vehicle brake, Motor-driven-. S. H. Lewis. No. 1,353,806; Sept. 21; v. 278; p. 505.
Vehicle, Motor-. G. M. and H. F. S. Caulfeild. No. 1,353,379; Sept. 21; v. 278; p. 420.
Vehicle, Motor-. M. Haupt. No. 1,353,393; Sept. 21; v. 278; p. 422.
Vehicle signal device. P. Niewiarowski. No. 1,353,359; Sept. 21; v. 278; p. 416.
Vehicle-wheel. W. N. Allan. No. 1,353,700; Sept. 21; v. 278; p. 485.
Vehicles, Antiskid device for motor-. H. Bell. No. 1,353,560; Sept. 21; v. 278; p. 456.
Vehicles, Dashboard for motor-. L. Seguin. No. 1,353,427; Sept. 21; v. 278; p. 429.
Vehicles, Side bumper for. A. H. Sweet. No. 1,353,553; Sept. 21; v. 278; p. 455.
Vehicles, Steering-wheel lock for motor-. P. D. Massoline and L. Ronca. No. 1,353,487; Sept. 21; v. 278; p. 441.
Vehicles, Traction device for. J. A. Cowan. No. 1,353,318; Sept. 21; v. 278; p. 408.
Vehicles, Windshield attachment for auto-. A. H. Sweet. No. 1,353,552; Sept. 21; v. 278; p. 454.

Veneer, Process of and apparatus for drying wood. J. F. Hope and E. Lambert. No. 1,353,301; Sept. 21; v. 278; p. 463.

Ventilator: *See*—
Car-door ventilator. Window-ventilator.

Vessels, Device for raising sunken. W. C. Beckwith. No. 1,353,623; Sept. 21; v. 278; p. 469.

Violin attachment. E. Lacoste. No. 1,353,763; Sept. 21; v. 278; p. 497.

Vulcanising-pad. J. N. Dieser. No. 1,353,382; Sept. 21; v. 278; p. 421.

Wagon-body. A. F. Kuhnen. No. 1,353,351; Sept. 21; v. 278; p. 415.

Wagon, Nursery service-. J. C. Preston. No. 1,353,180; Sept. 21; v. 278; p. 382.

Washboard. G. W. Shoemaker. No. 1,353,792; Sept. 21; v. 278; p. 502.

Washer: *See*—
Automatic-locking spring-washer.

Washing-machine. J. W. Seifert. No. 1,353,791; Sept. 21; v. 278; p. 502.

Washing-machine. J. J. Zofzak. No. 1,353,502; Sept. 21; v. 278; p. 405.

Water-closets, Hand or armpit support for. W. J. Hegarty. No. 1,353,749; Sept. 21; v. 278; p. 494.

Water-distributing systems of railway passenger-cars, Portable testing apparatus for. H. A. Montgomery. No. 1,353,810; Sept. 21; v. 278; p. 506.

Water-heater, Instantaneous. J. A. Mayers. No. 1,353,174; Sept. 21; v. 278; p. 381.

Waterer, Stock-. F. A. Clemons. No. 1,353,146; Sept. 21; v. 278; p. 375.

Wearing-apparel, Hook-link fastener for eyeleted. H. E. Ress. No. 1,353,614; Sept. 21; v. 278; p. 468.

Weed and clod cutter. H. A. M. Bromfield. No. 1,353,626; Sept 21; v. 278; p. 470.

Weighing-machine. R. R. Bennett. No. 1,353,139; Sept. 21; v. 278; p. 373.

Weir, Reversible. O. Sommer. No. 1,353,285; Sept. 21; v. 278; p. 401.

Welded tubes, Closing die or bell for. D. W. Chisholm. No. 1,353,721; Sept. 21; v. 278; p. 489.

Welding and reactor, Electric. S. R. Bergman. No. 1,353,711; Sept. 21; v. 278; p. 487.

Welding-machine. R. E. Wagner and W. E. Laird. No. 1,353,684; Sept. 21; v. 278; p. 482.

Wells, Valve structure for oil-. J. P. McEvoy. No. 1,353,409; Sept. 21; v. 278; p. 426.

Welting, Jointed. C. D. Libby. No. 1,353,251; Sept. 21; v. 278; p. 395.

Wheel: *See*—
Building and polishing wheel. Resilient wheel.
Cushioned wheel. Track-laying wheel.
Demountable wheel. Vehicle-wheel.
Disk wheel. Wire wheel.

Wheel-rim, Cushioned. A. S. Duffes. No. 1,353,326; Sept. 21; v. 278; p. 406.

Winch. J. H. Holmes. No. 1,353,238; Sept. 21; v. 278; p. 398.

Winding-machine. F. A. Holt and G. Kershaw. No. 1,353,474; Sept. 21; v. 278; p. 438.

Winding-machine. F. A. Holt and G. Kershaw. No. 1,353,475; Sept. 21; v. 278; p. 439.

Winding-machine. P. F. Rhoades. No. 1,353,269; Sept. 21; v. 278; p. 398.

Window, Automobile-curtain. G. I. Bair. No. 1,353,306; Sept. 21; v. 278; p. 406.

Window-cleaner. M. Goldstone. No. 1,353,741; Sept. 21; v. 278; p. 493.

Window-holder. T. J. Heady. No. 1,353,655; Sept. 21; v. 278; p. 476.

Window-seat. L. Viezzi. No. 1,353,681; Sept. 21; v. 278; p. 481.

Window-ventilator. F. Sceltz. No. 1,353,789; Sept. 21; v. 278; p. 502.

Wire-fabric machine. A. L. Kitselman. No. 1,353,346; Sept. 21; v. 278; p. 413.

Wire-spoke nipples, Forming. H. A. House, Jr. No. 1,353,395; Sept. 21; v. 278; p. 423.

Wire-stretcher. B. Webb and W. A. Gardner. No. 1,353,365; Sept. 21; v. 278; p. 417.

Wire wheel. H. A. House, Jr. No. 1,353,394; Sept. 21; v. 278; p. 423.

Woodworking sticker or molder-head. J. Shuff. No. 1,353,616; Sept. 21; v. 278; p. 468.

Work-holding clamp. H. I. Lavers. No. 1,353,353; Sept. 21; v. 278; p. 415.

Wrench: *See*—
Double-acting power-wrench. Pipe-wrench.

Wrench. J. L. Dillon. No. 1,353,567; Sept. 21; v. 278; p. 457.

Writer's aiding device. A. A. Disbrow. No. 1,353,790; Sept. 21; v. 278; p. 491.

Zinc-reduction furnace. J. D. Shipton. No. 1,353,362; Sept. 21; v. 278; p. 417.

Yarn-holder. A. E. Gaeng. No. 1,353,528; Sept. 21; v. 278; p. 449.

Yarn-tension device. F. A. Holt and G. Kershaw. No. 1,353,476; Sept. 21; v. 278; p. 439.

ALPHABETICAL LIST OF TRADE-MARKS.

Abrasive, detergent, and polishing materials. Chelsea Engineering Sales Corporation. No. 134,905; Sept. 21; v. 278; p. 530.

Alloys, Base-metal. W. W. Holland. No. 134,970; Sept. 21; v. 278; p. 532.

Ammonia, bluing, bleaching preparation, and disinfectant. Elberfeld Chemical & Mfg. Co. No. 134,936; Sept. 21; v. 278; p. 531.

Analgesic and antipyretic. The Bayer Company. Nos. 134,891–2; Sept. 21; v. 278; p. 529.

Apparel, Wearing-. Eloesser-Heynemann. No. 134,937; Sept. 21; v. 278; p. 531.

Automobiles. Jordan Motor Car Co. No. 134,985; Sept. 21; v. 278; p. 532.

Automobiles. The Baker R & L Company. No. 134,880; Sept. 21; v. 278; p. 529.

Automobiles. The Baker R & L Company. No. 135,174; Sept. 21; v. 278; p. 539.

Automobiles. The Morris Adler Company. No. 134,873; Sept. 21; v. 278; p. 529.

Automobiles and repair parts therefor, Ignition and electric-lighting systems and magnetos for. The Cleveland Ignition Company. No. 134,911; Sept. 21; v. 278; p. 182.

Batteries and parts thereof, Electric. Ionite Storage Battery Co. No. 134,981; Sept. 21; v. 278; p. 532.

Batteries, Electric. Acorn Battery Company. No. 134,871; Sept. 21; v. 278; p. 529.

Beverage, Cereal malt. Suffolk Brewing Company. Nos. 135,082–3; Sept. 21; v. 278; p. 535.

Beverage, Non-alcoholic. Lash's Bitters Co. No. 134,994; Sept. 21; v. 278; p. 532.

Binding, Glove-. The Star Binding & Trimming Co. No. 135,078; Sept. 21; v. 278; p. 535.

Blood-purifier. The T. D. S. Co. No. 135,089; Sept. 21; v. 278; p. 535.

Bluing. Sunbeam Chemical Company. Nos. 135,084–5; Sept. 21; v. 278; p. 535.

Bluing in capsule form, Laundry. Blual Chemical Co. No. 134,894; Sept. 21; v. 278; p. 529.

Books in which saving-stamps will be pasted, Blank. W. M. Hoerner. No. 134,969; Sept. 21; v. 278; p. 532.

Books, Memorandum-. Rosenblum & Kern. No. 135,063; Sept. 21; v. 278; p. 534.

Books, pads, and tablets, Blank. Boorum & Pease Co. No. 134,895; Sept. 21; v. 278; p. 529.

Boot drivers and awls, machinery-springs. Morris & Yeomans. No. 135,019; Sept. 21; v. 278; p. 533.

Brake-band lining. Reflex Auto Accessory Co. No. 135,052; Sept. 21; v. 278; p. 534.

Buckets and bins, Wood, fiber, and canvas hand-. Allied Machinery Company of America. No. 134,876; Sept. 21; v. 278; p. 529.

Candles. E. R. Pershing. No. 135,041; Sept. 21; v. 278; p. 534.

Candles. Tiffin Products Inc. No. 135,092; Sept. 21; v. 278; p. 535.

Candy. Fuerst & Kraemer Limited. No. 134,949; Sept. 21; v. 278; p. 531.

Candy, Chocolate. Chocolate Truffles Co. No. 135,177; Sept. 21; v. 278; p. 539.

Candy, Chocolate. Pennsylvania Chocolate Company. No. 135,186; Sept. 21; v. 278; p. 540.

Candy, Chocolate. Theodore Gottman & Sons. No. 135,181; Sept. 21; v. 278; p. 539.

Canes, parasols, and umbrellas. Tiffany & Company. No. 135,091; Sept. 21; v. 278; p. 535.

Cars and dump-wagons, Dump, spreader, and flat. Western Wheeled Scraper Company. No. 135,162; Sept. 21; v. 278; p. 537.

Cheese, Brick. H. R. Moldenhauer. No. 135,016; Sept. 21; v. 278; p. 533.

Chocolate and candy. Pennsylvania Chocolate Company. No. 135,185; Sept. 21; v. 278; p. 540.

Cider, Champagne. Valle, Ballina y Fernandez, S. A. No. 135,097; Sept. 21; v. 278; p. 536.

Circuit-controllers, Automatic. Clox-Lite Mfg. Company. No. 134,912; Sept. 21; v. 278; p. 530.

Cleaners and parts thereof, Electric vacuum-. The Regina Company. No. 135,051; Sept. 21; v. 278; p. 534.

Cleaning and polishing materials for jewelry and metal ware. Tiffany & Company. No. 135,090; Sept. 21; v. 278; p. 535.

Cleansing, polishing, and burnishing the surfaces of metal and glass, Compounds used for. A. W. Richards. No. 135,055; Sept. 21; v. 278; p. 534.

Combs. Samstag and Hilder Bros. No. 135,064; Sept. 21; v. 278; p. 535.

Confectionery. W. H. Woodard. No. 135,170; Sept. 21; v. 278; p. 538.

Cork disks, washers, and gaskets. International Cork Company. No. 134,978; Sept. 21; v. 278; p. 532.

Cornmeal, bolted meal, buckwheat-flour, &c. Everbest Milling Corporation. No. 134,941; Sept. 21; v. 278; p. 531.

Corsets and abdominal supporters. J. C. McNeal. No. 135,007; Sept. 21; v. 278; p. 533.

Cotton and silk piece goods. Commercial Shirt Company. No. 134,917; Sept. 21; v. 278; p. 530.

Cotton piece goods. China, Japan & South America Trading Co. No. 134,907; Sept. 21; v. 278; p. 530.

Cotton piece goods. F. C. Harder. No. 135,182; Sept. 21; v. 278; p. 540.

Cough-syrup preparation. American Laboratories. No. 134,878; Sept. 21; v. 278; p. 529.

Auto, piano, and furniture polish. F. M. Taft. No. 134,615; Sept. 21; v. 278; p. 526.
Batteries, Indicators for indicating the internal condition of storage and other. Hempy-Cooper Manufacturing Company. No. 133,920; Sept. 21; v. 278; p. 525.
Beef and iron compound, blood-purifier, &c. Republic Druggist Syndicate. No. 130,292; Sept. 21; v. 278; p. 516.
Beverages containing less than one-half of one per cent. of alcohol by volume. C. E. Ritzler. No. 132,570; Sept. 21; v. 278; p. 523.
Brushes, spray painting apparatus operated by compressed air, Air-. The Aerograph Company. No. 127,790; Sept. 21; v. 278; p. 511.
Camphor substitute. Commonwealth Chemical Corp. No. 131,856; Sept. 21; v. 278; p. 521.
Candied popcorn crispettes. R. D. Brown. No. 120,237; Sept. 21; v. 278; p. 510.
Candy. U. R. S. Candy Stores. No. 133,116; Sept. 21; v. 278; p. 524.
Candy. Paul F. Beich Co. No. 134,004; Sept. 21; v. 278; p. 525.
Canned fruits. California Sanitary Canning Co. No. 123,614; Sept. 21; v. 278; p. 510.
Canned fruits and vegetables. Bisceglia Brothers. No. 130,567; Sept. 21; v. 278; p. 516.
Canned fruits and vegetables. The Springfield Canning Co. No. 131,836; Sept. 21; v. 278; p. 521.
Canned goods. California Packing Corporation. No. 127,893; Sept. 21; v. 278; p. 512.
Canned pork and beans, beans and spaghetti. The Franco-American Food Company. No. 128,059; Sept. 21; v. 278; p. 512.
Canned sardines. Seacoast Canning Co. No. 127,777; Sept. 21; v. 278; p. 511.
Capsules to be taken internally for the treatment of piles. C. A. Moore, Sr. No. 132,548; Sept. 21; v. 278; p. 522.
Check-writers. New Era Mfg. Co. No. 134,481; Sept. 21; v. 278; p. 525.
Chilled fresh meats. Improved Chilling and Transport Limited. No. 132,693; Sept. 21; v. 278; p. 523.
Chocolates. D. Auerbach & Sons. No. 133,121; Sept. 21; v. 278; p. 524.
Chocolates, bonbons, and candies. Norris, Inc. No. 133,675; Sept. 21; v. 278; p. 524.
Clothing, Women's and misses. Avedon & Company. No. 130,007; Sept. 21; v. 278; p. 514.
Coffee. W. H. Bruning. No. 123,870; Sept. 21; v. 278; p. 510.
Colors, Food-. National Aniline & Chemical Company. Nos. 131,440–4; Sept. 21; v. 278; p. 520.
Compound for treatment of the stomach, liver, bowels, &c., Vegetable. S. G. G. Henderson. No. 132,249; Sept. 21; v. 278; p. 521.
Creosote, &c., Liquid containing. Page & Hill Co. No. 132,417; Sept. 21; v. 278; p. 522.
Dental pastes, mouth-washes, pyorrhea remedies. Associated Dental Supply Co. No. 126,835; Sept. 21; v. 278; p. 511.
Dentifrices. The Omega Chemical Company. No. 130,609; Sept. 21; v. 278; p. 517.
Deodorant and germicide. U. S. Sanitary Specialties Corporation. No. 131,890; Sept. 21; v. 278; p. 521.
Disinfectant. Mackie Pine Oil Specialty Co. No. 129,938; Sept. 21; v. 278; p. 514.
Disinfectants and deodorants. Ideal Disinfectant Co. No. 129,503; Sept. 21; v. 278; p. 514.
Dyes. Young Smyth Field Company. No. 128,637; Sept. 21; v. 278; p. 513.
Dyes, Anilin. Wetterwald & Pfister Co. No. 130,781; Sept. 21; v. 278; p. 517.
Embalming fluid. Beecher-Hollins Co. No. 130,510; Sept. 21; v. 278; p. 516.
Flavoring extracts, cocoa, coffee, &c. The Weideman Company. No. 986,642; Sept. 21; v. 278; p. 509.
Flavoring material. Grape Ola Products Corporation. No. 126,375; Sept. 21; v. 278; p. 511.
Flour-improvers. Woodlands Limited. No. 133,177; Sept. 21; v. 278; p. 524.
Flour, Wheat-. Big Diamond Mills Co. No. 107,904; Sept. 21; v. 278; p. 509.
Flour, Wheat-. Cape County Milling Company. Nos. 135,267–8; Sept. 21; v. 278; p. 527.
Fruit and flavoring extracts, &c., for use in the preparation of non-alcoholic beverages. Adam-Christian Co. No. 118,100; Sept. 21; v. 278; p. 510.
Fuel intensifier, Liquid-. Brauer & Kreidt. No. 130,946; Sept. 21; v. 278; p. 518.
Germicides, insecticides, and disinfectants. Magnolia Chemical Company. No. 131,582; Sept. 21; v. 278; p. 520.
Gum, Chewing-. Short & Son Co. No. 120,886; Sept. 21; v. 278; p. 510.
Gasolene, Preparation to be added to. Mile-A-Minute Incorporated. No. 130,104; Sept. 21; v. 278; p. 515.
Hair-coloring. Zauder Bros. Inc. No. 132,624; Sept. 21; v. 278; p. 523.
Hair-coloring preparation. M. Levy. No. 131,710; Sept. 21; v. 278; p. 521.
Hair-growers and hair-shampooing mixture. T. Criss. No. 130,753; Sept. 21; v. 278; p. 517.
Hair-shampoo. Salux Laboratories. No. 131,989; Sept. 21; v. 278; p. 521.
Harrow, Spiral. Dubuque Spiral Harrow Co. No. 133,615; Sept. 21; v. 278; p. 524.
Hair-tonic. S. V. Howard. No. 132,790; Sept. 21; v. 278; p. 524.
Hair tonic and invigorant. H. H. Ayer. No. 131,062; Sept. 21; v. 278; p. 518.
Hats and bonnets, Ladies'. M. E. Baker. No. 135,549; Sept. 21; v. 278; p. 528.
Hoists. The Denver Rock Drill Manufacturing Company. No. 134,703; Sept. 21; v. 278; p. 527.
Insecticides. M. F. Butcher. No. 130,910; Sept. 21; v. 278; p. 518.
Insecticides. Corona Chemical Company. No. 131,066; Sept. 21; v. 278; p. 518.
Insecticides. Garden Chemical Company. No. 130,722; Sept. 21; v. 278; p. 517.
Insecticides. E. S. Morris. No. 128,367; Sept. 21; v. 278; p. 513.
Iron and steel. Federal Tool & Alloy Steel Corporation. Nos. 135,703–4; Sept. 21; v. 278; p. 528.
Iron, Bar-. Logan Iron and Steel Company. No. 135,374; Sept. 21; v. 278; p. 528.
Kerosene, Deodorized. Ultra Refined Crude Products Company. No. 135,676; Sept. 21; v. 278; p. 528.
Laxative, Apple-syrup. The Apple-Lax Company. No. 129,921; Sept. 21; v. 278; p. 514.
Liniment for rheumatism, sprains, bruises, &c. E. F. Harper. No. 129,927; Sept. 21; v. 278; p. 514.
Laxative wafers. V. V. Bonkowski. No. 125,529; Sept. 21; v. 278; p. 511.
Liniment for rheumatism. J. A. Boon. No. 130,201; Sept. 21; v. 278; p. 515.
Lotion, Eczema-. The Worsham Company. No. 130,187; Sept. 21; v. 278; p. 515.
Medicinal pills. Dr. W. Selbert. No. 131,287; Sept. 21; v. 278; p. 519.
Medicinal preparations for the treatment of bot and worm ailments in horses, &c. Dakota Chemical Company. No. 132,208; Sept. 21; v. 278; p. 522.

Rouge paste, liquid, or powder. H. H. Ayer. No. 131,060; Sept. 21; v. 278; p. 518.
Russian dressing and mayonnaise. O. Schmidt. No. 131,670; Sept. 21; v. 278; p. 520.
Rust-eradicator. H. H. Sebree. No. 128,707; Sept. 21; v. 278; p. 513.
Rust-stains, Chemical products for removing. J. Tirel. No. 124,582; Sept. 21; v. 278; p. 510.
Salt. Remington Salt Company. No. 128,863; Sept. 21; v. 278; p. 513.
Salves and ointments. Henry Thayer & Co. No. 130,450; Sept. 21; v. 278; p. 516.
Sardines. La Manna, Azema & Farman. No. 131,273; Sept. 21; v. 278; p. 519.
Shampoo. Shuptrine Company. No. 131,452; Sept. 21; v. 278; p. 520.
Shampoo liquid and jelly. Vosburgh (Inc.). No. 130,348; Sept. 21; v. 278; p. 516.
Shovels, spades, scoops, &c. The Wyoming Shovel Works. No. 134,285; Sept. 21; v. 278; p. 525.
Sickles. J. Ogden. No. 134,723; Sept. 21; v. 278; p. 527.
Soap shampoo and bath-foam, Antiseptic liquid-. H. H. Ayer. No. 131,059; Sept. 21; v. 278; p. 518.
Soldering-flux. F. Chapman. No. 128,295; Sept. 21; v. 278; p. 513.
Solutions for hypodermic intramuscular injections. E. H. Marcy Laboratories. No. 131,343; Sept. 21; v. 278; p. 519.
Tablet, Laxative. Norma-Tone Co. No. 131,229; Sept. 21; v. 278; p. 519.
Tablets for la grippe and colds. O. W. Spicer. No. 130,988; Sept. 21; v. 278; p. 518.
Tablets, Laxative. E. M. Morton. No. 130,149; Sept. 21; v. 278; p. 515.
Tea. Hudson Coffee Mills. No. 130,039; Sept. 21; v. 278; p. 515.
Toilet preparations. B. Altman & Co. No. 131,460; Sept. 21; v. 278; p. 520.
Toilet preparations. Roosa & Ratliff Chemical Co. 131,828; Sept. 21; v. 278; p. 521.
Toilet preparations. J. Tanenbaum. No. 132,898; Sept. 21; v. 278; p. 524.
Tonic. Albano & Gangemi. No. 130,310; Sept. 21; v. 278; p. 516.
Tonic and restorative preparations. Proto Chemical Co. 129,803; Sept. 21; v. 278; p. 514.
Tonic for hogs. The Avalon Farms Company. No. 131,250; Sept. 21; v. 278; p. 519.
Tonics and worm-powders, Stock-. Sheats Stock Tonic Company. No. 130,623; Sept. 21; v. 278; p. 517.
Tool-steel in bars, billets, and shapes. The Carpenter Steel Company. Nos. 134,574–6; Sept. 21; v. 278; p. 526.
Tool-steel in bars, billets, and shapes. The Carpenter Steel Company. No. 134,581; Sept. 21; v. 278; p. 526.
Tool-steels in bars, billets, and shapes. The Carpenter Steel Company. No. 134,571; Sept. 21; v. 278; p. 525.
Tool-steels in bars, billets, and shapes. The Carpenter Steel Company. No. 134,584; Sept. 21; v. 278; p. 526.
Tooth-paste. United Drug Company. No. 130,396; Sept. 21; v. 278; p. 516.
Turning-lathes, planers, drill-presses, &c. William Sellers & Company. No. 132,622; Sept. 21; v. 278; p. 523.
Valves and strainers, Starting and check. William Sellers & Company. No. 132,621; Sept. 21; v. 278; p. 523.
Winding machines for thread, yarn, cord, twine, &c.; countershafts and parts thereof. Universal Winding Company. No. 134,283; Sept. 21; v. 278; p. 525.
Wrenches. L. F. Grammes & Sons. No. 134,817; Sept. 21; v. 278; p. 527.

CLASSIFICATION OF PATENTS

ISSUED SEPTEMBER 21, 1920.

NOTE.—First number—class, second number—subclass, third number—patent number.

2— 67: 1,353,181
122: 1,353,480
149: 1,353,759
150: 1,353,228
4— 5: 1,353,230
1,353,559
1,353,804
18: 1,353,749
5— 1: 1,353,260
14: 1,353,754
18: 1,353,162
1,353,163
39: 1,353,579
41: 1,353,502
43: 1,353,537
52: 1,353,536
6— 9: 1,353,137
7— 15: 1,353,496
12— 128: 1,353,327
142: 1,353,308
13— 5: 1,353,337
10: 1,353,295
14: 1,353,435
15— 13: 1,353,429
38: 1,353,184
39: 1,353,780
59: 1,353,741
16— 4: 1,353,195
46: 1,353,219
77: 1,353,506
87: 1,353,218
165: 1,353,784
17— 24: 1,353,803

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED DURING THE MONTH OF SEPTEMBER, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Aaron, Solomon E., Boston, Mass. Wire-stripping pliers. No. 1,354,365; Sept. 28; v. 278; p. 662.
Aarts, Jacobus G., Dongen, near Breda, Netherlands. Furnace. No. 1,352,338; Sept. 7; v. 278; p. 120.
Aaseth, Gustav, Christiania, Norway. Machine for cultivating unbroken ground. No. 1,353,012; Sept. 14; v. 278; p. 289.
Abbott, Adrian O., Jr., Detroit, Mich. Fishing-reel. No. 1,353,816; Sept. 28; v. 278; p. 551.
Abramowitz, Hyman, New York, N. Y. Toy machine-gun. No. 1,353,696; Sept. 21; v. 278; p. 484.
Abrams, William B., and R. I. Gay, Philadelphia, Pa. Divider for dough or the like. No. 1,352,424; Sept. 14; v. 278; p. 171.
Acme Engineering & Mfg. Co. (See Brandstetter, Josef, assignor.)
Adamczyk, Florvan, Coupon, Pa. Railway-tie construction. No. 1,354,366; Sept. 28; v. 278; p. 662.
Adams, Harry E. (See Decker, H. L., and Adams.)
Adams-Pond Company. (See Allbright, Edwin F., assignor.)
Adams, Raymond K., Dwyer, Wyo. Hoisting-crane or stacker. No. 1,353,697; Sept. 21; v. 278; p. 485.
Adams, Thomas M., Houston, Tex. Standing valve. No. 1,353,303; Sept. 21; v. 278; p. 405.
Adams & Westlake Company, The. (See Hamm, William S., assignor.)
Adcock, R. C., *et al.* (See Swatzell, David N., assignor.)
Addressograph Company. (See Duncan, Joseph S., assignor.)
Affel, Herman A., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Combined carrier and radio system. No. 1,353,698; Sept. 21, v. 278; p. 485.
Agrillo, Giuseppe, Brooklyn, N. Y. Bottle-filler. No. 1,352,165; Sept. 7; v. 278; p. 87.
Aguere, Arthur. West Somerville, Mass. Electric plug. No. 1,353,699; Sept. 21; v. 278; p. 485.
Ahlm, Charles E. F., Cleveland Heights, Ohio. Battery-charging and starting system for automobiles. No. 1,352,166; Sept. 7; v. 278; p. 87.
Ahlstrom, Fritz A., Absaraka, N. D. Fencing-machine. No. 1,353,304; Sept. 21; v. 278; p. 405.
Ahrendt, William G., Newark, N. J. Belt-buckle. No. 1,354,450; Sept. 28; v. 278; p. 679.
Aikman, Burton S., assignor to National Brake & Electric Company, Milwaukee, Wis. Pump and pumping system. (Reissue.) No. 14,046; Sept. 7; v. 278; p. 135.
Air Reduction Company. (See Russell, Richard F., assignor.)
Aitken, William A., Gravesend, England. Fourdrinier paper-making machine. No. 1,353,941; Sept. 28; v. 278; p. 575.
Ajello, Gaetan, New York, N. Y. Safety device for aircraft. No. 1,354,367; Sept. 28; v. 278; p. 663.
Akin, Delbert A., assignor of one-third to J. Meckay, and one-third to E. F. Fuller, Spokane, Wash. Dental flask and charger. No. 1,353,942; Sept. 28; v. 278; p. 576.
Aktiebolaget Gyro. (See Cassell, Gunnar E., assignor.) 1,352,644; Sept. 14; v. 278; p. 216.
Aktiebolaget Svenska Kullagerfabriken. (See Bråkenhielm, Carl A. B. R., assignor.)
Aktiebolaget Svenska Kullagerfabriken. (See Palmgren, Nils A., assignor.)
Aladdin Products Company. (See Robison, Clinton S., assignor.)
Albany Perforated Wrapping Paper Company. (See Crandell, Willis S., assignor.)
Albé, Angelo, Turin, Italy. Type-casting machine. No.
Albers, William C., New York, assignor to A. F. Pierce, Brooklyn, N. Y. Picture-projecting machine. No. 1,352,420; Sept. 14; v. 278; p. 171.
Alberti, Emilio, New York, assignor to International Cork Company, Brooklyn, N. Y. Feeding attachment for crown-cork making machines. No. 1,353,136; Sept. 21; v. 278; p. 373.
Albrecht, Armin G., St. Paul, Minn. Wheel-puller. No. 1,354,271; Sept. 28; v. 278; p. 644.
Alexander, Edward E., and J. T. Piggott, assignors to Taylor-Wharton Iron and Steel Company, High Bridge, N. J. Pipe-ball-annealing furnace. No. 1,354,368; Sept. 28; v. 278; p. 663.
Alitalo, Kustaa E., Åbo, Finland. Fire-extinguishing apparatus. No. 1,353,864; Sept. 28; v. 278; p. 564.
Allan, William N., San Antonio, Tex. Vehicle-wheel. No. 1,353,700; Sept. 21; v. 278; p. 485.
Allana, Priscilla. (See Lambert, Emma N., assignor.)
Allbright, Edwin F., Atlantic, assignor to Adams-Pond Company, Inc., Boston, Mass. Concrete construction. No. 1,353,373; Sept. 21; v. 278; p. 419.
Allen, Arthur M., Hope, Ark. Seat-hook. No. 1,353,701; Sept. 21; v. 278; p. 485.
Allen, Charles J., *et al.*, executors. (See Allen, Samuel L.)
Allen, Edward A., Portland, Me. Electrolytic cell. No. 1,351,886; Sept. 7; v. 278; p. 35.
Allen, Elizabeth R., *et al.*, executors. (See Allen, Samuel L.)
Allen Hosiery Company. (See Longtin, William J., assignor.)
Allen, Howard G., Albion, N. Y. Spring-motor. No. 1,351,727; Sept. 7; v. 278; p. 3.
Allen, Lewis H., West Springfield, Mass. Safety-razor. No. 1,351,826; Sept. 7; v. 278; p. 22.
Allen, Samuel L., deceased, Moorestown, N. J.; S. H. Allen, C. J. Allen, E. R. Allen, S. J. Allen, and E. A. Elfreth, executors. Nutcracker. No. 1,351,983; Sept. 7; v. 278; p. 54.
Allen, Samuel L., deceased, Moorestown, N. J. S. H. Allen, C. J. Allen, E. R. Allen, S. J. Allen, and E. A. Elfreth, executors. Agricultural implement. No. 1,351,984; Sept. 7; v. 278; p. 54.
Allen, Sarah H., *et al.*, executors. (See Allen, Samuel L.)
Allen, Susan J., *et al.*, executors. (See Allen, Samuel L.)
Allen, Walter S., assignor to Detroit Steel Casting Company, Detroit, Mich. Cast vehicle-wheel. No. 1,353,819; Sept. 28; v. 278; p. 551.
Allen, William M., assignor of one-fourth to Richard B. Runke, Merrill, Wis. Spring-winding mechanism for phonographs. No. 1,351,938; Sept. 7; v. 278; p. 45.
Alldredge, Francis B., Des Moines, Iowa. Combined worm and lever steering-gear device. No. 1,351,937; Sept. 7; v. 278; p. 45.
Allison, Otho G., *et al.* (See Link, William, assignor.)
Alnutt, Lawrence L., Chattanooga, Tenn. Musical-instrument-string retoner. No. 1,353,135; Sept. 21; v. 278; p. 373.
Alsina, Vicente C., and G. Fernandez, Buenos Aires, Argentina. Preserving manufactured or leaf tobacco. No. 1,352,421; Sept. 14; v. 278; p. 171.
Altenberg, George P., assignor to The Icy-Hot Bottle Company, Cincinnati, Ohio. Heat-insulated vessel and casing therefor. No. 1,353,305; Sept. 21; v. 278; p. 405.
Altpeter, Oscar, Milwaukee, Wis. Machine for making composite shingles. No. 1,352,931; Sept. 14; v. 278; p. 273.
Aluminum Castings Company, The. (See Jeffries, Z., and Gibson, assignors.)
Aluminum Castings Company, The. (See Stay, Theron D., assignor.)
Alvin Electrical Products Company. (See Olevin, Adolph, assignor.)
Ambruster, Cornelius, Roslyn, Pa. Storage-battery electrode or plate. No. 1,354,086; Sept. 28; v. 278; p. 606.
American Bar Lock Company. (See Law, Charles H., assignor.)
American Blower Company. (See Szekely, Ernest, assignor.)
American Briquet Company. (See Plummer, Robert S., assignor.)
American Can Company. (See Doyle, J., and Kenny, assignors.)
American Can Company. (See Freundt, Louis J., assignor.)
American Can Company. (See Gray, James A., assignor.)
American Coke and Chemical Company. (See Roberts, Arthur, assignor.)
American Cyanamid Company. (See Buchanan, Guy H., assignor.)
American Electrical Heater Company. (See Kuhn, F., Thomas, and Spiess, assignors.)
American Kron Scale Company. (See Barrett, Joseph C., assignor.)
American Laundry Machinery Company, The. (See Miller, Ernest W., assignor.)
American Metal Cap Company. (See Hammer, Charles, assignor.)

American Mine Door Company, The. (See Bowman, C. L., and Body, assignors.)
American Optical Company. (See Boutelle, William H., assignor.)
American Safety Device Company. (See Johnston, Frank B., assignor.)
American Safety Razor Company. (See Behrman, Marcus B., assignor.)
American Smelting & Refining Company. (See Cameron, F. K., Cullen, and Hyde, assignors.)
American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)
American Telephone and Telegraph Company. (See Campbell, George A., assignor.)
American Telephone and Telegraph Company. (See Demarest, Charles S., assignor.)
American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)
American Telephone and Telegraph Company. (See Fish, Lewin B., assignor.)
American Telephone and Telegraph Company. (See Grisson, George, assignor.)
American Telephone and Telegraph Company. (See Mills, John, assignor.)
American Telephone & Telegraph Company. (See Sinclair, Charles G., Jr., assignor.)
American Telephone and Telegraph Company. (See Thompson, George K., assignor.)
American Tool Works Company, The. (See Sosa, A. M., Robinson, and Schatz, assignors.)
American Vulcanized Fibre Co. (See Pierce, James F., assignor.)
American Wagon Company. (See Kuhnen, Alexander F., assignor.)
Ames, Butler, Lowell, Mass. Electric horn. No. 1,351,729; Sept. 7; v. 278; p. 3.
Ammann, Theophile, Berne, Switzerland. Rotary switch. No. 1,353,820; Sept. 28; v. 278; p. 551.
Anderegg, George, assignor of one-half to R. C. Tarrant, Sheridan, Wyo. Chain tightener and lock. No. 1,352,339; Sept. 7; v. 278; p. 120.
Andersen, Hans, Nymore, Minn. Log-skidding grapple. No. 1,353,503; Sept. 21; v. 278; p. 445.
Anderson, Albert L., assignor of one-fourth to J. F. Mazna and one-fourth to G. B. Shafer, Spokane, Wash. Demountable rim. No. 1,353,943; Sept. 28; v. 278; p. 576.
Anderson-Barngrover Mfg. Co. (See Thompson, Albert R., assignor.)
Anderson, Caroline E., Park City, Utah. Maternity-corset. No. 1,352,422; Sept. 14; v. 278; p. 171.
Anderson, Eugene G., Seattle, Wash. Display-table. No. 1,353,208; Sept. 21; v. 278; p. 387.
Anderson, Harry T., Butler, Pa., assignor to Harry Vissering & Company, Chicago, Ill. Manufacture of yokes for railway draft-gears. No. 1,352,167; Sept. 7; v. 278; p. 87.
Anderson, Luther H., Seattle, Wash. Machine for winding ribbon. No. 1,354,369; Sept. 28; v. 278; p. 663.
Anderson, Nils O., and C. Scheich, Chicago, Ill. Antiseptic-powder-dispensing pencil. No. 1,352,932; Sept. 14; v. 278; p. 273.

Browne, Arthur W., Ithaca, N. Y. Dehydration. No. 1,354,279; Sept. 28; v. 278; p. 645.

Bruce, William M., Jr., Springfield, Ohio. Telegraphy. No. 1,352,873; Sept. 14; v. 278; p. 262.

Brush, Alanson P., Detroit, Mich. Internal-combustion engine of the V-type. No. 1,353,213; Sept. 21; v. 278; p. 388.

Brush, Alanson P., Detroit, Mich. Valve. No. 1,354,019; Sept. 28; v. 278; p. 592.

Bryant, Alfred A., Easley, S. C. Clevis adjustment for plows. No. 1,353,946; Sept. 28; v. 278; p. 576.

Bryant Electric Company, The. (See Thomas, George B., assignor.)

Bryant, Richard S., assignor, by mesne assignments, to The Standard Parts Company, Cleveland, Ohio. Transversely-split demountable rim. No. 1,353,088; Sept. 28; v. 278; p. 585.

Bryce, Harry W., Downers Grove, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Telephone system. No. 1,354,020; Sept. 28; v. 278; p. 592.

Bua, Frank A., Lodi, N. J. Illuminating attachment for music-holders. No. 1,352,349; Sept. 7; v. 278; p. 122.

Buchanan, Frederick F., and N. F. Slack, Machipongo, Va. Package-tie. No. 1,353,717; Sept. 21; v. 278; p. 488.

Buchanan, Guy H., Roselle, N. J., assignor to American Cyanamid Company, New York, N. Y. Producing hydrocyanic acid. No. 1,352,655; Sept. 14; v. 278; p. 218.

Bucher, David H., Louisville, Ky. Collapsible pail. No. 1,353,627; Sept. 21; v. 278; p. 470.

Buckham, George T. (See Dawson, A. T., and Buckham.)

Buecher, Jacob. (See Merkel, H., and Buecher.)

Bucker, William, Dewey, Okla. Pipe-clamp. No. 1,354,081; Sept. 28; v. 278; p. 606.

Buffalo Foundry & Machine Company. (See Yahn, Frederick C. M., assignor.)

Bullock, Percy W. (See Handley, George, assignor.)

Bumgardners, Benjamin T., *et al.* (See Traywick, Walter F., assignor.)

Bumgarner, Stephen O, Given, Ohio. Elevator for silos. No. 1,352,500; Sept. 14; v. 278; p. 187.

Bunnell, Harry C., Westport, N. Y. Railway-rail brace. No. 1,354,239; Sept. 28; v. 278; p. 637.

Buraky, John, Windsor, Ontario, Canada. Toilet-cabinet. No. 1,354,240; Sept. 28; v. 278; p. 637.

Burch, William H., St. Louis, Mo. Automobile-indicator. No. 1,352,874; Sept. 14; v. 278; p. 262.

Burchell, Alice, Mayfield, England. Child's combination-cot adaptable as play-pen, &c. No. 1,354,088; Sept. 28; v. 278; p. 607.

Buresch, William W., Baltimore, Md. Bottle-capping tool. No. 1,353,718; Sept. 21; v. 278; p. 489.

Buresch, William W., Baltimore, Md. Bottle-capping tool. No. 1,353,719; Sept. 21; v. 278; p. 489.

Burgess Battery Company. (See Maisel, Lorens, assignor.)

Burgess, Edward W., assignor, by mesne assignments, to International Harvester Company, Chicago, Ill. Steering mechanism for traction-engines. No. 1,351,741; Sept. 7; v. 278; p. 5.

Burgess, Edward W., assignor, by mesne assignments, to International Harvester Company, Chicago, Ill. Silo-packer. No. 1,354,280; Sept. 28; v. 278; p. 645.

Burkheiser, Adam C. (See King, B. W., and Burkheiser.)

Burns, Thomas J., Syracuse, N. Y. Window-shade. No. 1,352,350; Sept. 7; v. 278; p. 122.

Burns, Walter G., Fort Wayne, Ind. Driving mechanism for ore-concentrators. No. 1,353,451; Sept. 21; v. 278; p. 434.

Burridge, Francis O., executor. (See Burridge, Lee S.)

Burridge, Lee S., deceased, F. O. Burridge, executor, assignor, by mesne assignments, to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,351,993; Sept. 7, v. 278; p. 56.

Burroughs, Arthur S. (See Dutro, O. V., and Burroughs.)

Busch-Sulzer Bros.-Diesel Engine Company. (See Zhindon, Eugen, assignor.)

Busko, Joseph E., Pittsburgh, Pa., assignor to Safety First Supply Company. Ladder-foot. No. 1,354,166; Sept. 28; v. 278; p. 622.

Butera, Mike. (See Salia, T., and Butera.)

Butler, Charles H. (See Peirson, C. H., and Butler.)

Butters-Camp Mfg. Co., The. (See Camp, W. H., and Butters, assignors.)

Butters, Robert H. (See Camp, W. H., and Butters.)

Butterworth, Frank W., assignor to Western Brick Company, Danville, Ill. Brick. No. 1,353,515; Sept. 21; v. 278; p. 447.

Butterworth, Joseph A., assignor to Herbert Morris, Limited, Loughborough, England. Elevating-trucks. No. 1,352,426; Sept. 14; v. 278; p. 172.

By-Products Manufacturing Company. (See Lowe, L. P., and Ruff, assignors.)

Byers, James, Chicago, Ill. Gas-burner. No. 1,352,351; Sept. 7; v. 278; p. 122.

C-K Co., The. (See Conover, George W., assignor.)

Cabot, Godfrey L. (See Crommett, Charles F., and O. J., assignors.)

Cadillac Motor Car Company. (See Snell, Lyle K., assignor.)

Cady, Elisha J. (See Wyzenbeek, A., and Cady.)

Cahill, Henry D., Boston, Mass. Electric-lamp body, reflector, and shade-holder. No. 1,353,562; Sept. 21; v. 278; p. 456.

Cahill, Henry D., Boston, Mass. Electric-cluster-lamp body and shade-holder. No. 1,353,563; Sept. 21; v. 278; p. 457.

Cahill, John, Norfolk, Va. Flexible curtain. No. 1,352,656; Sept. 14; v. 278; p. 218.

Caldwell, Noah L., Knoxville, Tenn. Tire-removing apparatus. No. 1,352,722; Sept. 14; v. 278; p. 231.

Calleson, Amos, Brooklyn, N. Y. Sealing appliance. No. 1,353,628; Sept. 21; v. 278; p. 470.

Callsen, Henry, New York, N. Y. Dental tool. No. 1,354,089; Sept. 28; v. 278; p. 607.

Calmer, Edward, St. Louis, Mo. Fire-kindler. No. 1,353,214; Sept. 21; v. 278; p. 388.

Calolaro, Angelo, Salt Lake City, Utah. Recording device for weighing-scales. No. 1,354,445; Sept. 28; v. 278; p. 678.

Calthrop, Everard R., assignor to E. R. Calthrop's Aerial Patents Limited, London, England. Parachute. No. 1,353,378; Sept. 21; v. 278; p. 420.

Calthrop's, E. R., Aerial Patents Limited. (See Calthrop, Everard R., assignor.)

Camell, Ramon, Rhone, and L. Cochet and J. Gritte, Lyon, assignors to Societe Lyonnaise Des Réchauds Catalytiques Camell, Cochet, Gritte & Cie. (Société en Commandite), Calure, Rhone, France. Catalytic heating apparatus. No. 1,354,090; Sept. 28; v. 278; p. 607.

Cameron Can Machinery Co. (See Cameron, William, assignor.)

Cameron, F. K., and J. A. Cullen, Salt Lake City, Utah, and R. W. Hyde, New York, N. Y., assignors to American Smelting & Refining Company, Salt Lake City, Utah. Treating zinc-bearing ores. No. 1,352,399; Sept. 7; v. 278; p. 131.

Cameron, Theodore R., San Antonio, Tex. Power reversing mechanism. No. 1,352,784; Sept. 14; v. 278; p. 244.

Cameron, Theodore R., San Antonio, Tex. Feeding apparatus for baling-presses. No. 1,352,785; Sept. 14; v. 278; p. 244.

Cameron, William, assignor to Cameron Can Machinery Co., Chicago, Ill. Can-end-feeding mechanism. No. 1,352,578; Sept. 14; v. 278; p. 202.

Camp, Warner H., and R. H. Butters, assignors to The Butters-Camp Mfg. Co., Atlanta, Ga. Gin or linter saw teeth. No. 1,353,022; Sept. 14; v. 278; p. 291.

Campagnie Des Forges et Acieries De La Marine et D'Homecourt. (See Rimailho, Emile, assignor.)

Campbell, George A., assignor to American Telephone and Telegraph Company, Montclair, N. J. Four-wire transmission system. No. 1,352,786; Sept. 14; v. 278; p. 244.

Campbell, William C., Denver, Colo. Milk-bottle carrier. No. 1,352,173; Sept. 7; v. 278; p. 88.

Campbell, William J., Indianapolis, Ind. Eraser attachment for pencils. No. 1,353,215; Sept. 21; v. 278; p. 388.

Candee, Andrew H., assignor to Westinghouse Electric & Manufacturing Company, Pittsburgh, Pa. System of control. No. 1,352,427; Sept. 14; v. 278; p. 172.

Candee, Andrew H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control system. No. 1,354,167; Sept. 28; v. 278; p. 622.

Candee, Zenas P., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Stamping-press. No. 1,354,377; Sept. 28; v. 278; p. 665.

Canellos, Steve G., Connellsville, Pa. Wall-papering device. No. 1,354,430; Sept. 28; v. 278; p. 675.

Cappelen, Frederick W., Minneapolis, Minn. Headlight-shade. No. 1,353,890; Sept. 28; v. 278; p. 565.

Capstaff, John G., assignor to Eastman Kodak Company, Rochester, N. Y. Apparatus for treating motion-picture films. No. 1,351,834; Sept. 7; v. 278; p. 24.

Card, Samuel, East Providence, R. I. Separator for spinning-frames. No. 1,352,057; Sept. 14; v. 278; p. 218.

Carey, Charles H., Salem, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Heel-press. No. 1,352,501; Sept. 14; v. 278; p. 187.

Carleton, Paul W. (See Lamb, A. B., Miller, and Carleton.)

Carlisle, Bert, Santa Ana, Calif. Direction-indicator for automobiles. No. 1,353,023; Sept. 14; v. 278; p. 291.

Carlson, Edward P., Seattle, Wash. Hydraulic pump. No. 1,353,216; Sept. 21; v. 278; p. 388.

Carlson, Lawrence E., Huntington, Ind. Electric switch. No. 1,352,246; Sept. 7; v. 278; p. 102.

Carmean, James H., Kansas City, Mo. Glove. No. 1,354,241; Sept. 28; v. 278; p. 637.

Carpenter, Brigham, *et al.* (See Prisbrey, George W., assignor.)

Carpenter, Robert H., Chicago, Ill. Adjustable clamp. No. 1,354,378; Sept. 28; v. 278; p. 665.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Cuff-link. No. 1,353,109; Sept. 14; v. 278; p. 307.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,353,110; Sept. 14; v. 278; p. 308.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. No. 1,353,111; Sept. 14; v. 278; p. 308.

Carr Fastener Company. (See Carr, Fred S., assignor.)

Carr, John D. (See McGarry, H. S., and Carr.)

Carran, Edward, Moxee City, Wash. Sickle-bar attachment for mowing-machines. No. 1,354,242; Sept. 28; v. 278; p. 637.

Carrette, Armand, Paris, France. Screwing apparatus. No. 1,353,024; Sept. 14; v. 278; p. 291.

Carroll, John D., West Lafayette, assignor to Turbo Rotary Engine Company, Evansville, Ind. Piston-vane. No. 1,354,281; Sept. 28; v. 278; p. 646.

Carroll, John D., West Lafayette, assignor to Turbo Rotary Engine Company, Evansville, Ind. Rocker for piston-vanes. No. 1,354,282; Sept. 28; v. 278; p. 646.

Carson, Pirie Scott & Company. (See Boyd, Roger J., assignor.)

Carter, Howard O., Detroit, Mich. Headlight-deflector. No. 1,352,579; Sept. 14; v. 278; p. 203.

Carter, Thomas, Belton, S. C. Fireplace heater and cooker. No. 1,352,048; Sept. 7; v. 278; p. 65.

Carvalho, David N., New York, N. Y. Process and composition for the protection of monetary and other documents. No. 1,353,720; Sept. 21; v. 278; p. 489.

Case, Frank E., Schenectady, N. Y., assignor to General Electric Company. Controller for electric motors. No. 1,352,247; Sept. 7; v. 278; p. 103.

Case, J. I., Threshing Machine Company. (See Crawford, John F., assignor.)

Casey, Kellogg K. V. (See Woodbridge, R. G., Jr., Casey, and Henning.)

Cass, George R., Ottawa, Ohio. Vaporizer for carburetors. No. 1,352,040; Sept. 7; v. 278; p. 65.

Cassel, Gunnar E., assignor to Aktiebolaget Gyro, Stockholm, Sweden. Parallel bench-vise. No. 1,352,787; Sept. 14; v. 278; p. 245.

Caswell, George B., Fort Terry, N. Y. Oven-grill. No. 1,352,352; Sept. 7; v. 278; p. 122.

Catlin, G. L., and D. Morrison, Port Allegany, assignors to R. W. Hilton, Smethport, Pa. Glass-drawing apparatus. No. 1,351,833; Sept. 7; v. 278; p. 24.

Catron, John J., Bonham, Tex. Liquid storage and dispensing apparatus. No. 1,352,788; Sept. 14; v. 278; p. 245.

Caulfeild, Geraldine M. and H. F. S., Lee, England. Motor-vehicle. No. 1,353,379; Sept. 21; v. 278; p. 420.

Clarke, Alex A., Dallas, Tex. Surface-treating machine. No. 1,352,583; Sept. 14; v. 278; p. 203.

Clarke, John A., Jr., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. System of control. No. 1,354,168; Sept. 28; v. 278; p. 622.

Clarke, St. John, Bogota, N. J. Shore-protector. No. 1,352,429; Sept. 14; v. 278; p. 172.

Clarke, William, Montreal, Quebec, Canada. Liquid-fuel burner. No. 1,353,112; Sept. 14; v. 278; p. 308.

Clary, Simon, Carnegie, Pa. Guard device for railways. No. 1,353,723; Sept. 21; v. 278; p. 489.

Clausen, Henry P., Mount Vernon, assignor to Western Electric Company, Incorporated, New York, N. Y. Impulse-controlling system. No. 1,353,517; Sept. 21; v. 278; p. 447.

Clay, William H., Eustis, Fla. Bow-facing oar. No. 1,353,027; Sept. 14; v. 278; p. 292.

Clegg, Herbert, Burnley, England. Apparatus for the purpose of providing public amusement and exercise. No. 1,354,021; Sept. 28; v. 278; p. 592.

Clement, Lewis M., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Device for varying electrical coupling. No. 1,353,145; Sept. 21; v. 278; p. 375.

Clements Co., The. (See Kennedy, Joseph, assignor.)

Clements, William E., assignor of one-half to A. C. Penner, Oroville, Calif. Electrode-holder. No. 1,353,028; Sept. 14; v. 278; p. 292.

Clemons, Fay A., Clemons, Iowa. Stock-waterer. No. 1,353,146; Sept. 21; v. 278; p. 375.

Clendenning, William, Philadelphia, Pa. Tire. No. 1,354,431; Sept. 28; v. 278; p. 676.

Cleveland, Edgar L., Othello, Wash. Collapsible tube. No. 1,352,355; Sept. 7; v. 278; p. 123.

Cleveland Phonograph Company, The. (See Horswell, Percy A., assignor.)

Cleveland Tractor Company, The. (See Strait, William, assignor.)

Clifford, Harlon A., assignor of one-half to J. W. Cobb, Greenfield, Mass. Disinfecting apparatus. No. 1,354,244; Sept. 28; v. 278; p. 638.

Coar, Enos E., South Bend, Ind. Roof connection for vent-pipes. No. 1,352,248; Sept. 7; v. 278; p. 103.

Coast, John W., Jr., assignor to The Process Company, Tulsa, Okla. Apparatus for cracking hydrocarbons. No. 1,353,316; Sept. 21; v. 278; p. 408.

Cobb, Harry E., Springfield, Ill. Ensilage-packer. No. 1,353,724; Sept. 21; v. 278; p. 489.

Cobb, James W. (See Clifford, Harlon A., assignor.)

Cochet, Laurent. (See Camell, R. Cochet, and Gritte.)

Coching, Gregorio C., Manila, Philippine Islands. Combined eye-shade and reflector. No. 1,353,630; Sept. 21; v. 278; p. 471.

Cochran, John J., assignor, to Martin-Lumaghi Manufacturing Company, St. Louis, Mo. Means for supplying explosive mixtures to engines. No. 1,353,454; Sept. 21; v. 278; p. 434.

Coffman, Edward S., Clifton Forge, Va., assignor to F. E. Stebbins, Washington, D. C. Door-controlling device. No. 1,353,218; Sept. 21; v. 278; p. 389.

Coffman, Samuel M., assignor to The Barbers Electric Specialty Company, Kansas City, Mo. Electric hair-drying device. No. 1,352,876; Sept. 14; v. 278; p. 263.

Cogliolo, Tomaso S., assignor to Società Esercizio Bacini, Industrials, Genoa, Italy. Marine propeller. No. 1,352,877; Sept. 14; v. 278; p. 263.

Cohan, Charles. (See Herschede, W. J., and Cohan.)

Cohen, Louis, Johnstown, N. Y. Auto-bumper. No. 1,351,837; Sept. 7; v. 278; p. 25.

Cohen, Samuel, and A. R. Foerster, New York, N. Y. Button device. No. 1,353,725; Sept. 21; v. 278; p. 490.

Cohon, Benjamin J., Westwood, and L. Moskowitz, Bayonne, N. J. Lock. No. 1,351,838; Sept. 7; v. 278; p. 25.

Colburn Machine Tool Company. (See Head, Ernest C., assignor.)

Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Induction solder-pot heater. No. 1,352,430; Sept. 14; v. 278; p. 173.

Coldwell, Harry T., Chicago, Ill., assignor of one-half to O. A. Sanford, Morristown, N. J. Lawn-mower. No. 1,354,169; Sept. 28; v. 278; p. 622.

Cole, Frederick W., Newton Highlands, Mass., assignor to The Gamewell Fire Alarm Telegraph Company, Newton Upper Falls, Mass. Electromechanical valve mechanism for timing and controlling blasts on fire-alarm whistles and the like. No. 1,353,317; Sept. 21; v. 278; p. 408.

Coleman, Stephen L. C., Fredericton, New Brunswick, Canada. Shock-absorbing mechanism for motor-vehicles. No. 1,353,029; Sept. 14; v. 278; p. 292.

Collicutt, D. Fellows, Columbia, S. C. Scythe-snathe. No. 1,353,631; Sept. 21; v. 278; p. 471.

Collins, Thomas E., Chicago, Ill. Door check and closers. No. 1,353,219; Sept. 21; v. 278; p. 389.

Colver, Arthur S., and H. E. Hellm, assignors of one-third to C. C. Colver, Chicago, Ill. Labeling-machine. No. 1,353,519; Sept. 21; v. 278; p. 448.

Colver, Charles C. (See Colver, A. S., and Hellm, assignors.)

Combustion Engineering Corporation. (See Skelly, John S., assignor.)

Combustion Engineering Corporation. (See Wagoner, Judson E., assignor.)

Commonwealth Steel Company. (See Sheehan, William M., assignor.)

Concannon, Michael E., Chicago, Ill. Proportional spacer. No. 1,351,889; Sept. 7; v. 278; p. 36.

Condon, Edward T., Jr., New York, N. Y. Automatic stop mechanism for talking-machines. No. 1,351,839; Sept. 7; v. 278; p. 25.

Conklin, Oliver F., Detroit, Mich., assignor to Remy Electric Company, Anderson, Ind. Regulating device for dynamo-electric machines. No. 1,352,051; Sept. 7; v. 278; p. 66.

Conlin, Frederick. (See Heath, Harry E., assignor.)

Conlin, William P. (See Heath, C. W., and Conlin.)

Conover, George W., assignor to The C-K Co., Chicago, Ill. Dish-washing machine. No. 1,354,022; Sept. 28; v. 278; p. 592.

Conrad, Frank, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Ignition system. No. 1,352,431; Sept. 14; v. 278; p. 173.

Conrad, Frank, Swissvale, Pa., assignor to Westinghouse Electric and Manufacturing Company. Electrical ignition system. No. 1,352,432; Sept. 14; v. 278; p. 173.

Conrad, Frank, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Electrical ignition system. No. 1,352,433; Sept. 14; v. 278; p. 173.

Conrad, Frank, Swissvale, Pa., assignor to Westinghouse Electric and Manufacturing Company. Ignition system. No. 1,352,434; Sept. 14; v. 278; p. 173.

Conradson, Conrad M., Madison, Wis. Carriage-bed for lathes. No. 1,352,183; Sept. 7; v. 278; p. 89.

Consumers Biscuit Company. (See Rizzuto, James, assignor.)

Converse, Atherton D., Winchendon, Mass. Toy aeroplane. No. 1,353,147; Sept. 21; v. 278; p. 375.

Cook, Albert E., Evanston, Ill. Endless cutter for mowers. No. 1,353,891; Sept. 28; v. 278; p. 566.

Cook, Charles B. (See Cook, Clayton T. and C. B.)

Cook, Clayton T. and C. B., Owosso, Mich. Acetylene-gas generator. No. 1,353,455; Sept. 21; v. 278; p. 435.

Cook, Elmer E., Sharon Hill, assignor of one-half to D. Thorton, Ada, Pa. Six-wheel pivotal bogie-truck. No. 1,352,878; Sept. 14; v. 278; p. 263.

Cook, Fred W., assignor to Chicago Hardware Foundry Company, North Chicago, Ill. Toilet-paper fixture. No. 1,354,170; Sept. 28; v. 278; p. 623.

Cooley, Frank L., Brooklyn, N. Y. Refillable cartridge-fuse. No. 1,354,284; Sept. 28; v. 278; p. 646.

Cooley, Fred W., Minneapolis, Wis. Tone-modifier for talking-machines. No. 1,352,115; Sept. 7; v. 278; p. 78.

Coons, Alonzo, Wappingers Falls, N. Y. Clamp. No. 1,353,632; Sept. 21; v. 278; p. 471.

Cooper, Cullen B., *et al.* (See Lambeth, Acey L., assignor.)

Cooper, George F., Detroit, Mich. Display-rack. No. 1,351,994; Sept. 7; v. 278; p. 56.

Cooper, Samuel S., Landgraff, W. Va. Trolley-pole head. No. 1,353,381; Sept. 21; v. 278; p. 420.

Coote, John M., Elizabeth, N. J. Elevator safety-contact. No. 1,353,148; Sept. 21; v. 278; p. 375.

Cope, Frank T. (See Baily, T. F., and Cope.)

Copp, Earl F., Montclair, N. J. Tone-modifier. No. 1,354,171; Sept. 28; v. 278; p. 623.

Copthorne, Howard N., Chicago, Ill., and A. L. Tannehill, Gary, Ind. Producing artificial resin. No. 1,353,220; Sept. 21; v. 278; p. 389.

Cornett, Gardner, Bronxville, N. Y., and C. W. Stancliffe, Toronto, Ontario, Canada, assignors to Pneumercator Company, New York, N. Y. Trap for manometer-tubes. No. 1,354,023; Sept. 28; v. 278; p. 592.

Corning Glass Works. (See Bailey, James, assignor.)

Cornish, Philip, Leytonstone, England. Fixed seat for use in cinemas, theaters, and the like. No. 1,351,995; Sept. 7; v. 278; p. 56.

Corona Typewriter Company, Inc. (See Moser, Albert F., assignor.)

Corpee, Adolph, and A. Kraft, Oakland, Calif. Turntable. No. 1,354,285; Sept. 28; v. 278; p. 646.

Corrigan, Clyde S., Norwood, Ohio. Mining-machine. No. 1,351,892; Sept. 7; v. 278; p. 36.

Corte, Camillo, Rome, Italy. Multiple wheel for road-vehicles. No. 1,351,996; Sept. 7; v. 278; p. 56.

Coryell, William C., assignor to The General Fireproofing Company, Youngstown, Ohio. Machine for making building fabric. No. 1,353,456; Sept. 21; v. 278; p. 435.

Coryell, William C., assignor to The General Fireproofing Company, Youngstown, Ohio. Building fabric. No. 1,354,024; Sept. 28; v. 278; p. 593.

Coryell, William C., assignor to The General Fireproofing Company, Youngstown, Ohio. Stone-surfacing fibrous materials. No. 1,354,025; Sept. 28; v. 278; p. 593.

Cosgrove, John W., Medford, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Sole-holder. No. 1,353,892; Sept. 28; v. 278; p. 566.

Cossitt, Malcolm L., Oakland, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Manifolding medium. No. 1,353,149; Sept. 21; v. 278; p. 375.

Costmeter Company. (See Fowler, Edward E., assignor.)

Cothran, John T., Spartanburg, S. C. Lifting-rod collar for spinning-frames. No. 1,353,633; Sept. 21; v. 278; p. 471.

Cotton, Alfred, and L. F. Koellner, Hartford, Conn. Sheet-metal wheel. No. 1,352,723; Sept. 14; v. 278; p. 231.

Cottrell, C. B., & Sons Company. (See Barber, Howard M., assignor.)

Couper, William D., Chicago, Ill. Apparatus for mixing and controlling a supply of fuel for explosion-engines. No. 1,353,893; Sept. 28; v. 278; p. 566.

Coups, Charles A. (See Joule, J., and Coups.)

Courtney, John, Mark Center, Ohio. Automobile-lock. No. 1,354,172; Sept. 28; v. 278; p. 623.

Cowan, John A., Kansas City, Mo. Traction device for vehicles. No. 1,353,318; Sept. 21; v. 278; p. 408.

Cox, Arthur O., and P. Sager, Watsonville, Calif. Cultivator. No. 1,352,783; Sept. 14; v. 278; p. 244.

Cox, B. P., *et al.* (See Swatzell, David N., assignor.)

Cox, Ross C., and J. F. McGinnitey, St. Joseph, Mo. Mashing and mixing machine. No. 1,351,890; Sept. 7; v. 278; p. 36.

Cox, William A., Los Angeles, Calif. Menu and napkin holder. No. 1,354,026; Sept. 28; v. 278; p. 593.

Craig, Joseph E., Gary, Ind. Combined dental mirror and syringe. No. 1,352,789; Sept. 14; v. 278; p. 245.

Craig, Robert M., Wilkinsburg, Pa. Making metallic denture-backings. No. 1,353,565; Sept. 21; v. 278; p. 457.

Craigie, Frank, and J. Hines, Chicago, Ill. Nozzle. No. 1,351,840; Sept. 7; v. 278; p. 25.

Crandell, Willis S., Elsmere, assignor to Albany Perforated Wrapping Paper Company, Albany, N. Y. Process of and machine for winding rolls of paper towels and toilet-paper, &c. No. 1,353,634; Sept. 21; v. 278; p. 471.

Crate, James S., Houston, Tex. Envelop. No. 1,354,092; Sept. 28; v. 278; p. 607.

Craven, James F., Pittsburgh, Pa. Grease-cup. No. 1,351,841; Sept. 7; v. 278; p. 25.

Crawford, Frank S., assignor to The Crawford Manufacturing Company, New Brunswick, N. J. Stop-motion. No. 1,354,379; Sept. 28; v. 278; p. 665.

Crawford, Howard H., assignor to Detroit Motor Appliance Company, Detroit, Mich. Radiator-shield. No. 1,352,184; Sept. 7; v. 278; p. 90.

Crawford, John F., assignor to J. I. Case Threshing Machine Company, Racine, Wis. Metal-bending machine. No. 1,353,865; Sept. 21; v. 278; p. 472.

Crawford Manufacturing Company, The. (See Crawford, Frank, Sr., assignor.)

Crawford, William R., Pomona, Calif. Smokeless orchard-heater. No. 1,353,636; Sept. 21; v. 278; p. 472.

Creitz, Walter M., Bethlehem, Pa. Guard-rail structure. No. 1,352,356; Sept. 7; v. 278; p. 123.

Creveling, John L., White Plains, N. Y., assignor to Gould Coupler Company. Electric regulation. No. 1,353,319; Sept. 21; v. 278; p. 408.

Crippen, George F., Ypsilanti, assignor to The Crippen Manufacturing Company, Mount Pleasant, Mich. Roll-adjusting apparatus. No. 1,352,052; Sept. 7; v. 278; p. 66.

Crippen Manufacturing Company, The. (See Crippen, George F., assignor.)

Criqui, Charles A., and E. T. Larkin; said Larkin assignor to said Criqui, Buffalo, N. Y. Mechanism for controlling lubrication of explosion-engines. No. 1,353,894; Sept. 28; v. 278; p. 566.

Crissinger, Joseph J., Greensburg, Pa. Nut-lock. No. 1,353,382; Sept. 21; v. 278; p. 421.

Crisson, George, Hoboken, N. J., assignor to American Telephone and Telegraph Company. Repeater-circuit. No. 1,353,637; Sept. 21; v. 278; p. 472.

Crocker, Arthur T. Schenectady, N. Y., assignor to General Electric Company. Controller for electric motors. No. 1,352,249; Sept. 7; v. 278; p. 103.

Crocker, Clarence T., Schenectady, N. Y., assignor to General Electric Company. Controller for electric motors. No. 1,352,250; Sept. 7; v. 278; p. 103.

Crofut & Knapp Company. (See Josephs, Julius, assignor.)

Crommett, Charles F., Chelsea, Mass. Containing apparatus and valve system therefor. No. 1,353,320; Sept. 21; v. 278; p. 408.

Crommett, Charles F., Chelsea, Mass. Valve. No. 1,353,321; Sept. 21; v. 278; p. 409.

Crommett, Charles F. and O. J., Chelsea, assignors, by mesne assignments, to G. L. Cabot, Cambridge, Mass. Apparatus for producing liquid oxygen. No. 1,354,380; Sept. 28; v. 278; p. 665.

Crommett, Orrin J. (See Crommett, Charles F., and O. J.)

Crompton & Knowles Loom Works. (See Regan, John, assignor.)

Crompton & Knowles Loom Works. (See Ryon, Eppa H., assignor.)

Crompton & Knowles Loom Works. (See Stone, Charles M., assignor.)

Crook, Alfred, and R. D. Chapman, Philadelphia, Pa., assignors to Taylor-Wharton Iron and Steel Company, Highbridge, N. J. Method and means for making asbestos shingles. No. 1,352,941; Sept. 14; v. 278; p. 275.

Crosthwait, David N., Jr., Marshalltown, Iowa. Apparatus for returning water to boilers. No. 1,353,457; Sept. 21; v. 278; p. 435.

Crowell, Erd V., Tulsa, Okla. Gas-energy-control head for oil-wells. No. 1,354,027; Sept. 28; v. 278; p. 593.

Cuau, Charles, Paris, France. Construction of radiators for cooling the circulating water in explosion-motors. No. 1,353,822; Sept. 21; v. 278; p. 409.

Cullen, John A. (See Cameron, F. K., Cullen, and Hyde.)

Cullerton, William J. (See Holst, Charles T., assignor.)

Culleton, Robert A., and D. J. Leahy, Brooklyn, N. Y. Gas-meter. No. 1,351,842; Sept. 7; v. 278; p. 25.

Culligan, John C., Bombay, N. Y. Package-tie. No. 1,352,357; Sept. 7; v. 278; p. 123.

Cummings, B. F., Perforator Company, The. (See Swanson, Hjalmar, assignor.)

Cummings, George C., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraphy. No. 1,352,116; Sept. 7; v. 278; p. 78.

Cummings, Henry H. (See Thompson, J. T., and Cummings.)

Cunningham, Clyde L., Perris, Calif. Tire. No. 1,353,726; Sept. 21; v. 278; p. 490.

Curran, Edward T., Detroit, Mich. Radiator. No. 1,352,584; Sept. 14; v. 278; p. 204.

Curran, William, Lewiston, Me., assignor of one-third to P. F. Tremblay, Lewiston, and one-third to H. W. Oakes, Auburn, Me. Let-off-rod operator. No. 1,353,727; Sept. 21; v. 278; p. 490.

Currie, John, and H. W. Bell, Seattle, Wash. Dust-cap for pneumatic valves. No. 1,353,125; Aug. 14; v. 278; p. 310.

Curry, David, New York, N. Y. Guard for printing-presses. No. 1,351,997; Sept. 7; v. 278; p. 56.

Curtin, John W., Worcester, Mass. Nut-lock. No. 1,352,053; Sept. 7; v. 278; p. 66.

Curtis, Harry D., Red Bank, N. J. Hat-size reducer. No. 1,351,893; Sept. 7; v. 278; p. 36.

Curtiss Aeroplane & Motor Corporation. (See Curtiss, G. H., and Kleckler, assignors.)

Curtiss Aeroplane and Motor Corporation. (See Curtiss, Glenn H., assignor.)

Curtiss Aeroplane & Motor Corp. (See Kirkham, Charles B., assignor.)

Curtiss Aeroplane & Motor Corporation. (See Kleckler, Henry, assignor.)

Curtiss, Glenn H., and H. Kleckler, assignors to Curtiss Aeroplane & Motor Corporation, Buffalo, N. Y. Flying-boat construction. No. 1,351,742; Sept. 7; v. 278; p. 5.

Curtiss, Glenn H., assignor to Curtiss Aeroplane and Motor Corporation, Garden City, N. Y. Airplane-wing-structure truss. No. 1,351,743; Sept. 7; v. 278; p. 6.

Cutler-Hammer Mfg. Co., The. (See Holder, William H., assignor.)

Cutler-Hammer Mfg. Co., The. (See Klein, Charles J., assignor.)

Cutler-Hammer Mfg. Co., The. (See Meyer, Friedrich W., assignor.)

Cutler, William C., North Glendale, Calif. Antiskid device. No. 1,352,403; Sept. 7; v. 278; p. 131.

Cutler, William C., North Glendale, Calif. Directory machine. No. 1,352,416; Sept. 7; v. 278; p. 134.

Cutler, William C., North Glendale, Calif. Directory-machine. No. 1,353,458; Sept. 21; v. 278; p. 435.
Czumpft, John, assignor to Art Woodwork Company, Brooklyn, N. Y. Curved wood tube and making same. No. 1,353,895; Sept. 28; v. 278; p. 566.
Dahlstrom, John J., Amite, La. Collapsible crate. No. 1,353,030; Sept. 14; v. 278; p. 292.
Dai-Nippon Enkei Shinju Kabushiki Kwaisha. (See Mise, Tatsuhei, assignor.)
Dailey, Roy A., Taft, Calif. Overshot. No. 1,351,744; Sept. 7; v. 278; p. 6.
Dalbey, James H., assignor to Elgin Rubber Ace Company, Elgin, Ill. Resilient core for tires. No. 1,351,894; Sept. 7; v. 278, p. 36.
Danforth, Harland A., Saugus, Mass. Shock-absorber. No. 1,352,724; Sept. 14; v. 278; p. 732.
Daniels, Edward G. (See Mott, Daniel V., assignor.)
Danielsson, Axel, Gottenborg, Sweden. Machine for grinding concaved spherical surfaces. No. 1,352,790; Sept. 14; v. 278; p. 245.
Danly, Robert C., assignor to Ludwig & Ludwig, Chicago, Ill. Snare-tensioning device for drums. No. 1,354,028; Sept. 28; v. 278; p. 593.
Dann, Frederick J., Countesthorpe, England, assignor to Wallace J. Bartholomew, London, England. Spade and like digging-tool. No. 1,353,459; Sept. 21; v. 278; p. 435.
Danziger, Adolphe. (See Rider, Thomas B., assignor.)
Daugherty, Alvin A., New York, N. Y. Apparatus for producing gasolene and other products from hydrocarbons. No. 1,353,638; Sept. 21; v. 278; p. 472.
Davidson, Charles S., assignor of one-third to F. M. Pool and one-third to J. E. Faber, Los Angeles, Calif. Dry-chemical fire-extinguisher. No. 1,354,093; Sept. 28; v. 278; p. 608.
Davidson, Frank B., Marseilles, Ill., assignor to National Biscuit Company, New York, N. Y. Paper-board. No. 1,353,323; Sept. 21; v. 278; p. 409.
Davis, A. B. (See Fisk, Alfred A., assignor.)
Davis-Bournonville Company. (See Plumley, Stuart, assignor.)
Davis, Claude H., Wanganui, New Zealand. Vacuum milking-machine. No. 1,353,639; Sept. 21; v. 278; p. 472.
Davis, George H., West Orange, N. J. Perforated music-sheet for automatic musical instruments. No. 1,353,460; Sept. 21; v. 278; p. 436.
Davis, H. G., Manufacturing Company. (See Henry, George W., Jr., assignor.)
Davis, Harry S., Indianapolis, Ind. Weather-strip. No. 1,352,879; Sept. 14; v. 278; p. 263.
Davis, Henry J., Waynesboro, Ga. Agricultural machine. No. 1,352,725; Sept. 14; v. 278; p. 232.
Davis, John V., Kelseyville, Calif., assignor, by mesne assignments, to Boston Scale and Machine Co., Boston, Mass. Automatic weighing and recording scale. No. 1,352,880; Sept. 14; v. 278; p. 263.
Davis, Minor M., New York, N. Y. Protecting device for electrical instruments. No. 1,352,117; Sept. 7; v. 278; p. 78.
Dawley, James C. (See Ripsch, C. W., and Dawley.)
Dawson, Arthur T., and G. T. Buckham, assignors to Vickers Limited, Westminster, London, England. Gun-mounting. No. 1,352,791; Sept. 14; v. 278; p. 246.
Dawson, Vernon B., Bridgeton, N. J. Combined eraser-holder and point-protector for pencils. No. 1,353,896; Sept. 28; v. 278; p. 567.
Dawson, William. (See Williams, William M., assignor.)
Day, John L., Memphis, Tenn. Fuel-tank. No. 1,352,792; Sept. 14; v. 278; p. 246.
Day and Zimmerman. (See Remington, Joseph P., assignor.)
Dayon, Albert, Dollard, Saskatchewan, Canada. Toy. No. 1,354,381; Sept. 28; v. 278; p. 665.
Daysh, Norman J., Poughkeepsie, N. Y., assignor to The De Laval Separator Company. Milking machinery. No. 1,352,726; Sept. 14; v. 278; p. 232.
Dean, Anthony E. (See Winters, Robert E., assignor.)
Dean, Mark, Boonville, N. Y. Signal-operating device for automobiles. No. 1,351,745; Sept. 7; v. 278; p. 6.
De Bats, Jean H. L., Stoneham, Mass., assignor to New Process Metals Corporation, Wilmington, Del. Method of and apparatus for melting and casting metals. No. 1,354,286; Sept. 28; v. 278; p. 647.
De Camp, Ray E., Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Motor-control system. No. 1,354,173; Sept. 28; v. 278; p. 623.
Dech, Henry, assignor to Mercer Tire Company, Trenton, N. J. Making inner tubes. No. 1,354,174; Sept. 28; v. 278; p. 623.
Decker, Hugh L., and H. E. Adams, assignors to The W. G. Nagel Electric Company, Toledo, Ohio. Oil-can holder. No. 1,353,898; Sept. 28; v. 278; p. 567.
Deden, Freda L., Fort Smith, Ark. Typewriter attachment. No. 1,353,150; Sept. 21; v. 278; p. 375.
Deets, Clarence L., Portland, Oreg. Fishing-reel. No. 1,353,113; Sept. 14; v. 278; p. 308.
Deere & Company. (See Neighbour, Leonard B., assignor.)

Hagen, Lars J., Portland, Oreg. Ship construction. No. 1,353,235; Sept. 21; v. 278; p. 392.

Hagerstrom, John A., assignor to Victor Typewriter Company, Scranton, Pa. Main-shaft drive. No. 1,352,124; Sept. 7; v. 278; p. 79.

Haglund, Otto E., Medina, N. D. Motor-vehicle propelling attachment. No. 1,354,103; Sept. 28; v. 278; p. 610.

Haiden, Richard. (See Van Brocklen, M. E., and Haiden.)

Haines, Joseph, Lawton, Mich. Planter. No. 1,354,039; Sept. 28; v. 278; p. 596.

Hale, Frank A., assignor to Hale Specialty Company, Chicago, Ill. Holder for pad-calendars. No. 1,353,832; Sept. 28; v. 278; p. 554.

Hale Specialty Company. (See Hale, Frank A., assignor.)

Haley, George S., Dubuque, Iowa, assignor to H. Mueller Manufacturing Co., Decatur, Ill. Tapping-machine. No. 1,353,833; Sept. 28; v. 278; p. 554.

Hall, A. J., and C. C. Whittaker, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Control apparatus. No. 1,352,448; Sept. 14; v. 278; p. 176.

Hall, Arthur J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control apparatus. No. 1,352,447; Sept. 14; v. 278; p. 176.

Hall, Harry M., Willcox, Ariz. Pump. No. 1,353,391; Sept. 21; v. 278; p. 422.

Hall, Hugh A., Philadelphia, Pa. Automatic restaurant and vending mechanism therefor. No. 1,353,996; Sept. 28; v. 278; p. 587.

Hall, Stewart E., Akron, assignor of one-third to E. R. Sloan, Maumee, and one-third to E. H. Workinger, Akron, Ohio. Battery-box-forming machine. No. 1,353,339; Sept. 21; v. 278; p. 412.

Hall, Thomas, Harrisburg, Pa. Fluid-pressure motor. No. 1,352,743; Sept. 14; v. 278; p. 235.

Hall, William G. (See Beyer, H. E., and Hall.)

Halley, John R., Nashville, Iowa. Coin and stamp box. No. 1,353,585; Sept. 21; v. 278; p. 461.

Halstead, Stanley M. (See Vaughan, P. E., and Halstead.)

Halton, William. (See Power, Henry, assignor.)

Hamel Shoe Machinery Company. (See Laughton, R. E., and Barnes, assignors.)

Hamer, John H., Warsaw, Ohio. Shock-absorber. No. 1,352,955; Sept. 14; v. 278; p. 277.

Hamilton, Alexander C., Pontiac, assignor to General Motors Corporation, Detroit, Mich. Radiator for motor-vehicles. No. 1,352,190; Sept. 7; v. 278; p. 91.

Hamilton, Clayton R. (See Hamilton, Herbert E., and C. R.)

Hamilton, H. E., and C. R., Yale, Iowa. Stock-feeding device. No. 1,352,513; Sept. 14; v. 278; p. 189.

Hamilton, Paul H., assignor to Esda Manufacturing Company, New York, N. Y. Gas-burner for water-heaters. No. 1,354,295; Sept. 28; v. 278; p. 648.

Hamm, William S., assignor to The Adams & Westlake Company, Hubbard Woods, Ill. Sash-latch. No. 1,353,834; Sept. 28; v. 278; p. 554.

Hammer, Charles, Queens, assignor to American Metal Cap Company, Brooklyn, N. Y. Band catsup-cap. No. 1,353,801; Sept. 21; v. 278; p. 504.

Hammermann, Fred, New York, N. Y. Anchor-bolt. No. 1,353,159; Sept. 21; v. 278; p. 377.

Hammon, James H., Vincennes, Ind. Spectacle-lens. No. 1,354,040; Sept. 28; v. 278; p. 596.

Hammond, Le Roy C. (See Bell, George A., assignor.)

Hampton, James, Southampton, assignor of one-half to John I. Thornycroft and Company Limited, London, England. Means for holding and releasing depth charges, mines, and the like on boats or ships. No. 1,353,652; Sept. 21; v. 278; p. 476.

Handley, George, Palmers Green, assignor to P. W. Bullock, London, England. Rotary pump for pumping liquids. No. 1,353,745; Sept. 21; v. 278; p. 494.

Hansen, Andreas, Cumberland Mills, Me. Wire-stretcher. No. 1,353,835; Sept. 28; v. 278; p. 555.

Hansen, Viggo N., Winnetka, assignor to Standex Manufacturing Corporation, Chicago, Ill. Engine-controlled lubricating system. No. 1,352,954; Sept. 14; v. 278; p. 277.

Hanson, Andrew C., Racine, Wis. Rotary safety-razor. No. 1,353,160; Sept. 21; v. 278; p. 377.

Hanson, H. L., Butte, Mont., and M. B. Sawyer, Edmonds, Wash. Burning tree-stumps. No. 1,352,261; Sept. 7; v. 278; p. 105.

Hanson, T. Sophus. (See Nelson, Henry, assignor.)

Hanson & Van Winkle Company, The. (See Todd, E. N., and King, assignors.)

Hara, Fusataro, San Francisco, Calif. Ice-cream-delivery machine. No. 1,351,903; Sept. 7; v. 278; p. 38.

Harberson, Edward M., Los Angeles, Calif. Yoke construction for leaf-springs. No. 1,353,746; Sept. 21; v. 278; p. 494.

Harbour, Thomas P., and B. B. Brinnon, Bellefontaine, Ohio. Commutator. No. 1,353,392; Sept. 21; v. 278; p. 422.

Hardeman, William E. (See Macbeth, C., and Hardeman.)

Harder, Harry E. (See Newsom, J. N., Harder, and Leschen.)

Harding, Abner C. (See Kennicott, Cass L., and Kemble, assignors.)

Harding, Henry O., Minneapolis, Minn. Conveying and elevating apparatus. No. 1,352,262; Sept. 7; v. 278; p. 105.

Harding, Henry O., assignor to Washburn Crosby Company, Minneapolis, Minn., Conveyer. No. 1,352,263; Sept. 7; v. 278; p. 105.

Hardinge, Harlowe. (See Hardinge, Harry W., and H.)

Hardinge, Harry W., and H., New York, N. Y. Telethermoscope. No. 1,352,956; Sept. 14; v. 278; p. 278.

Harle, William. (See Sparrow, J. A., and Harle.)

Harman, Walter A. (See Ricketts, Lawrence M., assignor.)

Harmon, Frank W. (See Broadgate, William C., assignor.)

Harnsberger, John H., Catlett, Va. Rail-joint-coupling device. No. 1,353,653; Sept. 21; v. 278; p. 476.

Harp, Robert T., Gatliff, Ky. Horse-detacher. No. 1,354,186; Sept. 28; v. 278; p. 626.

Harrah, Hillis A., Kansas City, Mo., assignor of one-half to L. T. Leimbach, Rosedale, Kans. Driving-gearing for tractors. No. 1,352,125; Sept. 7; v. 278; p. 79.

Harris, David H., Kalamazoo, Mich. Truck-body. No. 1,354,187; Sept. 28; v. 278; p. 626.

Harris, Edward, Los Angeles, Calif. Retread-vulcanizer. No. 1,353,042; Sept. 14; v. 278; p. 295.

Harris, Varian M., assignor, by mesne assignments, to Popular Reflex Camera Corporation, Chicago, Ill. Reflex camera. No. 1,352,449; Sept. 14; v. 278; p. 176.

Harrison, Francis, London, England. Removing film from used metallic-filament electric lamps. No. 1,353,654; Sept. 21; v. 278; p. 476.

Harrison, George, Jr., assignor to The Bassick Company, Bridgeport, Conn. Lock for automobile-doors. No. 1,354,104; Sept. 28; v. 278; p. 610.

Harrison, Henry C., assignor to Western Electric Company, Incorporated, New York, N. Y. Receiver. No. 1,352,597; Sept. 14; v. 278; p. 206.

Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Means for feeding articles in stacked relation. No. 1,352,744; Sept. 14; v. 278; p. 236.

Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Means for feeding articles in stacked relation. No. 1,352,745; Sept. 14; v. 278; p. 236.

Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Feed mechanism. No. 1,352,746; Sept. 14; v. 278; p. 236.

Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Feed mechanism. No. 1,352,747; Sept. 14; v. 278; p. 236.

Hart, Fred V., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Feed mechanism. No. 1,352,748; Sept. 14; v. 278; p. 236.

Hart, Hubert C., Unionville, Conn. Polishing and buffing metal articles. No. 1,352,598; Sept. 14; v. 278; p. 206.

Hart, Walter V., assignor to S. F. Williams, Jacksonville, Fla. Box-press. No. 1,352,749; Sept. 14; v. 278; p. 237.

Hartman, Charles, Sandwich, Ill., assignor to Sandwich Manufacturing Company. Hay-loader. No. 1,353,586; Sept. 21; v. 278; p. 462.

Hartman, Peter B., Watertown, N. Y. Automobile-horn. No. 1,351,904; Sept. 7; v. 278; p. 38.

Hartford-Fairmont Company. (See Hunter, Alfred R. assignor.)

Hartmann, Max, assignor to Society of Chemical Industry in Basle, Basel, Switzerland. Mercury compounds of glucosids and making same. No. 1,354,105; Sept. 28; v. 278; p. 610.

Hartog, S. D., Manufacturing Company. (See Hartog, Stephen D., assignor.)

Hartog, Stephen D., assignor to S. D. Hartog Manufacturing Company, St. Louis, Mo. Valve-facing tool. No. 1,352,599; Sept. 14; v. 278; p. 206.

Hartsough, Oliver C. (See Griffin, W. H., and Hartsough.)

Harvey, Peter L., Chicago, Ill. Flying-machine. No. 1,351,905; Sept. 7; v. 278; p. 39.

Harwood, Sumpter L., assignor of one-half to T. R. Long, Uniontown, Ala. Paste-dispensing device. No. 1,353,747; Sept. 21; v. 278; p. 494.

Hasbrouck, Charles H. (See McCabe, Thomas W. R., assignor.)

Haskelite Manufacturing Corporation. (See Haskell, Henry L., assignor.)

Haskell, Henry L., Lndington, assignor to Haskelite Manufacturing Corporation, Grand Rapids, Mich. Aeroplane. No. 1,352,600; Sept. 14; v. 278; p. 207.

Hastam & Stretton Limited. (See Stratton, T., and Jones, assignors.)

Hastings, Odie L. (See Iles, E. J., and Hastings.)

Hatfield, Andrew L., assignor to The Strong Machinery & Supply Co., Hillside, N. J. Gage-glass guard. No. 1,354,296; Sept. 28; v. 278; p. 648.

Hatfield, Joseph M., Independence, Kans. Can-covering. No. 1,353,236; Sept. 21; v. 278; p. 392.

Hatfield, Richard H., Brooklyn, N. Y. Means for synchronizing and harmonizing moving-picture exhibitions. No. 1,352,126; Sept. 7; v. 278; p. 80.

Hatmaker, William T., assignor to The Huffman Recording Pump Company, Dayton, Ohio. Liquid-dispensing pump. No. 1,352,664; Sept. 14; v. 278; p. 220.

Hauenstein, Peter, *et al.* (See Kugler, James R., and E. W., assignors.)

Haughton Elevator and Machine Company, The. (See Thurston, Ernest B., assignor.)

Haupt, Mathias, Spokane, Wash. Motor-vehicle. No. 1,353,393; Sept. 21; v. 278; p. 422.

Hawkinson, Paul E., assignor, by mesne assignments, to Kehawke Mfg. Co., Minneapolis, Minn. Tire-casing holder and spreader. No. 1,352,001; Sept. 14; v. 278; p. 207.

Hawkinson, Paul E., assignor, by mesne assignments, to Kehawke Mfg. Co., Minneapolis, Minn. Tire-casing spreader. No. 1,352,807; Sept. 14; v. 278; p. 249.

Hawley Pulp and Paper Company. (See Swick, Clyde E., assignor.)

Hawthorne, Ellsworth A., Bridgeport, Conn. Electrical connection. No. 1,353,748; Sept. 21; v. 278; p. 494.

Hawthorne, Louis A., Newark, N. J., assignor to Steel Utilities Incorporated. Crating apparatus. No. 1,354,250; Sept. 28; v. 278; p. 639.

Hayes, Stephen Q., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit-interrupting system. No. 1,352,451; Sept. 14; v. 278; p. 176.

Hayes, William V., New York, N. Y. Blow-out patch. No. 1,352,957; Sept. 14; v. 278; p. 278.

Hays, Charles M. (See Orbin, George, assignor.)

Head, Ernest C., Van Wert, Ohio., assignor to Coburn Machine Tool Company, Franklin, Pa. Control mechanism. No. 1,353,836; Sept. 28; v. 278; p. 555.

Heady, Thomas J., Cottonwood, Ariz. Window-holder. No. 1,353,655; Sept. 21; v. 278; p. 476.

Healy, Maurice F., Watertown, Mass. Lifting-dog. No. 1,352,665; Sept. 14; v. 278; p. 220.

Heard, Ralph G., Boston, assignor to Tolman Print, Inc., Brockton, Mass. Marking-card for milk-bottles. No. 1,353,531; Sept. 21; v. 278; p. 450.

Heath, Clarence W., and W. P. Conlin, Bellevue borough, Pa. Railway-fare-receipt ticket. No. 1,354,297; Sept. 28; v. 278; p. 648.

Heath, Frank, National City, Calif. Sardine sizing and selecting apparatus. No. 1,354,251; Sept. 28; v. 278; p. 640.

Heberger, Charles W., Rochester, N. Y. Driving mechanism for grinding-tools. No. 1,353,902; Sept. 28; v. 278; p. 568.

Heck, George D., Prince Bay, N. Y., assignor to The S. S. White Dental Manufacturing Company. Saliva-ejector. No. 1,353,587; Sept. 21; v. 278; p. 462.

Hedström, Herman O., Djursholm, Sweden. Producing compounds of radium. No. 1,353,532; Sept. 21; v. 278; p. 450.

Heenan & Froude. (See Walker, George H., assignor.)

Hegarty, William J., Lawsonville, Cork, Ireland. Hand or armpit support for water-closets. No. 1,353,749; Sept. 21; v. 278; p. 494.

Heath, Harry E., Newark, assignor to F. Conlin, Elizabethport, N. J. Driving mechanism. No. 1,351,999; Sept. 7; v. 278; p. 57.

Hedges, Isaac A., *et al.* (See Flatau, Louis, S., assignor.)

Heeter, Charles M., Butler, Pa. Valve for deep wells. No. 1,351,906; Sept. 7; v. 278; p. 39.

Heidorf, Christopher J., Hudson Falls, N. Y. Wall-paper finish. No. 1,353473; Sept. 21; v. 278; p. 438.

Heine, Herman, Brooklyn, assignor to A. Kimball Company, New York, N. Y. Pin-pointing machine. No. 1,351,849; Sept. 7; v. 278; p. 27.

Heisler, Charles L., Schenectady, N. Y., assignor to General Electric Company. Fluid-operated motor. No. 1,353,656; Sept. 21; v. 278; p. 476.

Heitler, Kurt, New York, N. Y. Garment-protector. No. 1,353,750; Sept. 21; v. 278; p. 495.

Heltzenreder, Jacob, Jr., Detroit, Mich. Upholstering. No. 1,353,340; Sept. 21; v. 278; p. 412.

Heller, Henry R., assignor, by mesne assignments, to Auto Pneumatic Action Co., New York, N. Y. Musical instrument. No. 1,352,958; Sept. 14; v. 278; p. 278.

Hellmund, Rudolf E., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Control system. No. 1,354,188; Sept. 28; v. 278; p. 626.

Hellmund, R. E., Swissvale, and B. S. Moore, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company. Arrangement of leads for dynamo-electric machines. No. 1,351,907; Sept. 7; v. 278; p. 39.

Helmers, Hio J., Sibley, Iowa. Tractor attachment. No. 1,354,252; Sept. 28; v. 278; p. 640.

Helmond, William F., Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,354,298; Sept. 28; v. 278; p. 649.

Henchoz, Gustave. (See Walther, H. S., and Henchoz.)

Henderson, Adelbert A., Wilkinsburg, Pa. Lift-bridge. No. 1,352,450; Sept. 14; v. 278; p. 176.

Henderson, John, Chicago, Ill. Internal-combustion engine. No. 1,352,127; Sept. 7; v. 278; p. 80.

Henderson, Robert L., West, Tex. Automatic rotary weighing-scale. No. 1,354,394; Sept. 28; v. 278; p. 668.

Henig Engine Co. (See Henig, Frank L., assignor.)

Henig, Frank L., assignor to Henig Engine Co., Chicago, Ill., Pneumatic tool. No. 1,352,191; Sept. 7; v. 278; p. 91.

Henning, Clarence I. B. (See Woodbridge, R. J., Jr., Casey, and Henning.)

Henry, George W., Jr., assignor to H. G. Davis Manufacturing Company, Philadelphia, Pa. Numbering attachment for pin-ticketing machines. No. 1,352,959; Sept. 14; v. 278; p. 278.

Henry, Thomas B., Northville, Mich. Combined towel and antiseptic pad. No. 1,353,954; Sept. 28; v. 278; p. 578.

Hentschel, Paul J., Baltimore, Md. Bottle-stopper. No. 1,352,062; Sept. 7; v. 278; p. 68.

Herring, Carl, Philadelphia, Pa. Apparatus for aerial navigation. No. 1,353,955; Sept. 28; v. 278; p. 578.

Hermann, Charles, assignor to Eccentric Ferris Wheel Amusement Company, Incorporated, New York, N. Y. Amusement apparatus. No. 1,354,486; Sept. 28; v. 278; p. 676.

Hernacki, John, Alexandria, La. Shade-roller support. No. 1,352,264; Sept. 7; v. 278; p. 105.

Herndon, William T., Parkton, N. C. Plow. No. 1,351,850; Sept. 7; v. 278; p. 28.

Herrmann, Dora L., and A. A. Johnson, Washington, D. C. Cook-book and the like. No. 1,354,395; Sept. 28; v. 278; p. 668.

Herschede Hall Clock Company, The. (See Herschede, W. J. and Cohan, assignors.)

Herschede, W. J., and C. Cohan, assignors to The Herschede Hall Clock Company, Cincinnati, Ohio. Speed-regulating device. No. 1,352,419; Sept. 7; v. 278; p. 134.

Hershaw, Grindrod. (See Holt, F. A., and Hershaw.)

Hershey, Harry E. (See Yanochowski, G. A., and Hershey.)

Hershey, Martin E., Arlington, N. J. Air-exhauster for steam-radiators. No. 1,352,265; Sept. 7; v. 278; p. 106.

Hervieu, Gaston, and P. M. G. Maréchal, London, England. Shed for airships, aeroplanes, and the like. No. 1,353,956; Sept. 28; v. 278; p. 579.

Herzog, John, Saginaw, Mich., assignor to Sonora Phonograph Company, Inc., New York, N. Y. Lid-support for talking-machines. No. 1,352,602; Sept. 14; v. 278; p. 207.

Hess, Clare W., Flint, Mich. Carbureter. No. 1,354,041; Sept. 28; v. 278; p. 596.

Hess, Willis C. (See Morden, M., and Hess.)

Hessel, William F., New York, N. Y. Electrical switch device. (Reissue.) No. 14,950; Sept. 21; v. 278; p. 507.

Heyl, Firm Cornelius. (See Schulz, Heinrich, assignor.)

Heylman, Frederick C., Martinez, Calif. Stop-cock. No. 1,354,460; Sept. 28; v. 278; p. 681.

Heyroth, Albert H., Geraldine, Mont. Wind-wheel electric generator. No. 1,352,960; Sept. 14; v. 278; p. 278.

Heywood, Vincent E. Worcester, Mass. Making window-envelops. No. 1,353,588; Sept. 21; v. 278; p. 462.

Hiatt, James L. (See Drey, L. A., and Hiatt.)

Hidden, Charles P., assignor to Nitrogen Products Company, Providence, R. I. Process and means for producing metallic cyanids. No. 1,352,192; Sept. 7; v. 278; p. 91.

Hidden, Charles P., Providence, R. I., assignor to Nitrogen Products Company. Fixing atmospheric nitrogen. No. 1,352,193; Sept. 7; v. 278; p. 92.

Hildebrand, Richard E., Chicago, Ill. Spark-plug intensifier. No. 1,353,657; Sept. 21; v. 278; p. 477.

Hilger, George, Chicago, Ill. Ammonia-compressor. No. 1,354,190; Sept. 28; v. 278; p. 627.

Hill, Arthur H. (See Farquhar, M. G., and Hill.)

Hill, Clarence A., Columbus, assignor to The Champion Kerosene-Burner Company, Kenton, Ohio. Kerosene-gas-burning furnace. No. 1,352,063; Sept. 7; v. 278; p. 68.

Hill, George S., Strafford, N. H., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Sewing-machine. No. 1,352,514; Sept. 14; v. 278; p. 189.

Hill, George S., Strafford, N. H., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Sewing-machine. No. 1,353,837; Sept. 28; v. 278; p. 555.

Hill, Hugh S. (See Fleming, I., and Hill.)

Hill, Thomas J. (See Thompson, Charles E., assignor.)

Hillfield Body Company, The. (See Schofield, Frederick C., assignor.)

Hills, Henry A., Grand Rapids, Mich. Filter. No. 1,352,961; Sept. 14; v. 278; p. 279.

Hilton, R. W. (See Catlin, G. L., and Morrison, assignors.)

Him, Thomas P. (See Hoffman, E. A., and Him.)

Hinchman, Mortimer L., Brooklyn, N. Y. Safety-envelop blank. No. 1,351,851; Sept. 7; v. 278; p. 28.

Hines, John. (See Craigie, F., and Hines.)

Hins, Leo, Perth Amboy, N. J., assignor of one-half to F. Martin, New York, N. Y. Aeroplane. No. 1,353,957; Sept. 28; v. 278; p. 579.

Hirsch, Morris, assignor to Blinr Motor Appliance Company, New York, N. Y. Electrical system for motor-vehicles and the like. No. 1,352,266; Sept. 7; v. 278; p. 106.

Hitzigrath, Paul E., Rockville Center, N. Y. Package. No. 1,352,962; Sept. 14; v. 278; p. 279.

Hlavaty, Joe, Jr., Wallis, Tex. Sunken-ship indicator. No. 1,352,000; Sept. 7; v. 278; p. 57.

Hodges, Ralph T. (See Stevens, Howard M., assignor.)

Hodgkins, Charles H., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Controller. No. 1,354,191; Sept. 28; v. 278; p. 627.

Hodgson, Carl W., Denver, Colo. Tunneling-machine. No. 1,353,908; Sept. 28; v. 278; p. 569.

Hoe, R., and Co. (See Reynolds, Howard, assignor.)

Hoefener, Edward W., Los Angeles, Calif. Traveling stool attachment for barbers' chairs. No. 1,352,409; Sept. 7; v. 278; p. 132.

Hoenig, Harry E., assignor of one-half to J. T. Smith, East Liverpool, Ohio. Fastening device. No. 1,354,396; Sept. 28; v. 278; p. 668.

Hoff, Leslie D., Newark, N. J. Combination slitter and perforator. No. 1,351,751; Sept. 7; v. 278; p. 7.

Hoffman, Aubrey F., Longford, Kans. Radiator-cover. No. 1,352,963; Sept. 14; v. 278; p. 279.

Hoffman, Edgar J., Akron, Ohio. Hanger. No. 1,352,895; Sept. 14; v. 278; p. 266.

Hoffman, Edwin A., and T. P. Him, Wilkes-Barre, Pa. Rail-bond for electric railways. No. 1,353,237; Sept. 21; v. 278; p. 392.

Hoffman, George D., Pasadena, Calif., assignor to Hoffman Specialty Company, Chicago, Ill. Thermo-valve. No. 1,352,808; Sept. 14; v. 278; p. 249.

Hoffman, Roscoe C., Argos, Ind. Disk wheel. No. 1,353,161; Sept. 21; v. 278; p. 377.

Hoffman Specialty Company. (See Hoffman, George D., assignor.)

Hoffmann-La Roche Chemical Works, The. (See Müller, Emil, assignor.)

Hofmann, George W., and W. P. Murray, assignors to Standard Separator Company, Milwaukee, Wis. Yielding upper bearing for centrifugal separators. No. 1,353,958; Sept. 28; v. 278; p. 579.

Hofmann, William G., assignor to Howard B. Sherman, Battle Creek, Mich. Cover-locking device for grease-cups. No. 1,352,064; Sept. 7; v. 278; p. 68.

Hoffne, Fred G., Kansas City, Mo. Vibrator. No. 1,352,894; Sept. 14; v. 278; p. 266.

Hogg, William S., Washington, D. C. Sound-direction indicator. No. 1,354,299; Sept. 28; v. 278; p. 649.

Hogue, Frank G., Birmingham, Ala. Window-shade bracket. No. 1,354,297; Sept. 28; v. 278; p. 669.

Højgaard, Anders, C. E., Copenhagen, Denmark. Device for automatic extinction or dampening of the flame in gas-cookers. No. 1,352,001; Sept. 7; v. 278; p. 57.

Hoke, Jacob F., Jr. (See Holcomb, J. I., and Hoke, Jr.)

Holaday, Albert H., *et al.* (See Zwicker, Frederick P., assignor.)

Holcomb and Hoke Manufacturing Company. (See Holcomb, J. I., and Hoke, Jr., assignors.)

Holcomb & Hoke Manufacturing Company. (See Tripp, Charles E., assignor.)

Holcomb, James I., and J. F. Hoke, Jr., assignors to Holcomb and Hoke Manufacturing Company, Indianapolis, Ind. Amusement apparatus. No. 1,352,666; Sept. 14; v. 278; p. 220.

Holden, Edward A. T., Duluth, Minn. Grain-scraper. No. 1,353,341; Sept. 21; v. 278; p. 412.

Holder, William H., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electrical controller. No. 1,352,896; Sept. 14; v. 278; p. 266.

Holdredge, Henry J., Wilkes-Barre, Pa. Electrical snap-switch. No. 1,353,589; Sept. 21; v. 278; p. 462.

Holley, Clarence M., and F. W. Robison, assignors to Utility Compressor Company, Detroit, Mich. Expansion-coil for refrigerating systems. No. 1,352,964; Sept. 14; v. 278; p. 280.

Hollmann, William H., Loretto, Tenn. Cultivator. No. 1,353,342; Sept. 21; v. 278; p. 413.

Holman, Stephen W. (See Andrews, M. L., and Holman.)

Holmes, Arthur, assignor to H. H. Franklin Manufacturing Company, Syracuse, N. Y. Valve-mechanism support. No. 1,352,897; Sept. 14; v. 278; p. 266.

Holmes, John H., Anoka, Minn. Winch. No. 1,353,238; Sept. 21; v. 278; p. 393.

Holsing, Claude J., South Orange, N. J. Welding system. No. 1,354,398; Sept. 28; v. 278; p. 669.

Holst, Charles T., assignor of one-half to W. J. Cullerton, Chicago, Ill. Guarding mechanism for spark-plugs of internal-combustion engines. No. 1,353,959; Sept. 28; v. 278; p. 579.

Holt, Frank A., Rochdale, and G. Kershaw, Whitworth, England, assignors, by mesne assignments, to Foster Machine Company, Westfield, Mass. Winding-machine. No. 1,353,474; Sept. 21; v. 278; p. 438.

Holt, Frank A., Rochdale, and G. Kershaw, Whitworth, England, assignors, by mesne assignments ,to Foster Machine Company, Westfield, Mass. Winding-machine. No. 1,353,475; Sept. 21; v. 278; p. 439.

Holt, Frank A., Rochdale, and G. Kershaw, Whitworth, England, assignors, by mesne assignments, to Foster Machine Company, Westfield, Mass. Yarn-tension device. No. 1,353,476; Sept. 21; v. 278; p. 439.

Holt, George H. F., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Storage-battery locomotive. No. 1,352,452; Sept. 14; v. 278; p. 177.

Holt, Samuel M. (See Graves, R. W., and Holt.)

Holton-Abbott Manufacturing Company. (See Holton, Edwin C., assignor.)

Holton, Edwin C., Somerville, assignor to Holton-Abbott Manufacturing Company, West Somerville, Mass. Handle for valves and other uses. No. 1,354,106; Sept. 28; v. 278; p. 610.

Homan, John G., Steubenville, Ohio, assignor, by mesne assignments, to W. H. Keller, Norton, Va. Alloy. No. 1,352,367; Sept. 7; v. 278; p. 125.

Homans, Thomas S., Hemnstead, assignor to Intertype Corporation, Brooklyn, N. Y. Typographical machine. No. 1,352,965; Sept. 14; v. 278; p. 280.

Honetschlager, George. (See Kelly, James, assignor.)

Honeywell, Edward R., Garber, Okla. Walking-tractor. No. 1,351,752; Sept. 7; v. 278; p. 7.

Honig, Charles A., St. Louis, Mo. Dressing for automobile-tops and the like. No. 1,353,239; Sept. 21; v. 278; p. 393.

Hood, William C., Chicago, Ill. Commutator-brush. No. 1,352,408; Sept. 7; v. 278; p. 132.

Hoodwin, Joseph W., Chicago, Ill. Crimping and folding machine. No. 1,353,590; Sept. 21; v. 278; p. 462.

Hooker Electrochemical Company. (See Marsh, William J., assignor.)

Hooker, Leslie E., Lowell, Mass. Machine for making cartridge-shells. No. 1,352,194; Sept. 7; v. 278; p. 92.

Hooper, Harris G., San Francisco, Calif. Aeroplane construction. No. 1,351,852; Sept. 7; v. 278; p. 28.

Hope, John F., and E. Lambert, Kansas City, Mo. Process of and apparatus for drying wood veneer or other substances. No. 1,353,591; Sept. 21; v. 278; p. 463.

Hopedale Manufacturing Company. (See Northrop, Jonas, assignor.)

Horn, Ernest H., assignor to Waterbury Clock Co., Waterbury, Conn. Stem-winding and stem-setting watch. No. 1,354,300; Sept. 28; v. 278; p. 649.

Horsey, Melvin, Crisfield, Md. Advertising device. No. 1,352,368; Sept. 7; v. 278; p. 125.

Horswell, Percy A., assignor, by mesne assignments, to The Cleveland Phonograph Company, Cleveland, Ohio. Talking-machine. No. 1,354,301; Sept. 28; v. 278; p. 649.

Horton, Dock G., Birmingham, Ala. Shade-roller. No. 1,352,410; Sept. 7; v. 278; p. 133.

Hottenstein, Philip, Gleason, Wis. Sign. No. 1,352,065; Sept. 7; v. 278; p. 68.

Houck, George H., Tonawanda, N. Y. Wrecking-trailer for automobiles. No. 1,352,898; Sept. 14; v. 278; p. 267.

Houck, John D., Chicago, Ill. Can-opener. No. 1,354,399; Sept. 28; v. 278; p. 669.

Houck, William A., Reading, Pa. Cop-mounting. No. 1,353,960; Sept. 28; v. 278; p. 580.

Houghton, E. F., & Co. (See Pelrson, C. H., and Butler, assignors.)

House, Henry A., Jr., Springfield, Mass., assignor to Wire Wheel Corporation of America, Buffalo, N. Y. Wire wheel. No. 1,353,394; Sept. 21; v. 278; p. 423.

House, Henry A., Jr., Springfield, Mass., assignor to Wire Wheel Corporation of America, Buffalo, N. Y. Forming wire-spoke nipples. No. 1,353,395; Sept. 21; v. 278; p. 423.

House, Thomas M., assignor of one-half to A. S. Kellam, Richmond, Va. Foldable basket and handle therefor. No. 1,354,253; Sept. 28; v. 278; p. 640.

Houston, Albert L., *et al.* (See Lambeth, Acey L., assignor.)

Hover, Charles F., Conrad, Mont. Mechanical movement. No. 1,351,753; Sept. 7; v. 278; p. 7.

Howard, Albertson, assignor of one-third to M. F. Lane and one-third to F. T. Peterman, Indianapolis, Ind. Storage-battery case. No. 1,354,302; Sept. 28; v. 278; p. 650.

Howard, Allen F. (See Leonard, C. L., and Howard.)

Howard, Frank E., Lamanda Park, Calif. Garment-supporter for hosiery. No. 1,353,592; Sept. 21; v. 278; p. 463.

Howcottt, H. A. W., *et al.* (See Stephens, James W. T., assignor.)

Huddleston, Loyd E, Kansas City, Mo. Burglar-proof sash-lock. No. 1,353,533; Sept. 21; v. 278; p. 450.

Howe, Andrew F., assignor, by mesne assignments, to Howe Safety Appliance Company, Granite City, Ill. Safety-guard for rotary grinding-machines. No. 1,351,908; Sept. 7; v. 278; p. 39.

Howe, Clinton W., Chicago, Ill. Pawl-and-ratchet mechanism. No. 1,352,603; Sept. 14; v. 278; p. 207.

Howe, James M., assignor to Grant Motor Car Corporation, Cleveland, Ohio. Packless joint. No. 1,354,192; Sept. 28; v. 278; p. 627.

Howe Lamp & Mfg. Co. (See Nelson, Arvid, assignor.)

Howe Safety Appliance Company. (See Howe, Andrew F., assignor.)

Howe Scale Company. (See Souander, Andrew, assignor.)

Howe, Winthrop K., Rochester, assignor to General Railway Signal Company, Gates, N. Y. System for governing railway traffic. No. 1,354,254; Sept. 28; v. 278; p. 640.

Howell, Clarence S., assignor, by mesne assignments, of one-half to L. McGuire, New York, N. Y. Concrete-pile construction. No. 1,352,128; Sept. 7; v. 278; p. 80.

Howitt, Herbert G., and W. J. Prichard, Merthyr Tydfil, Wales, and J. Evans, Eltham, London, England. Internal-combustion rotary engine and the like. No. 1,354,189; Sept. 28; v. 278; p. 626.

Hubard, Archibald B., Ogontz, Pa. Antifriction roller and ball-bearing. No. 1,351,754; Sept. 7; v. 278; p. 8.

Hubbell, Harvey, Bridgeport, Conn. Electric-switch mechanism. No. 1,352,604; Sept. 14; v. 278; p. 207.

Hubbell, Lindley D., Hartford, Conn. Firearm. No. 1,352,267; Sept. 7; v. 278; p. 106.

Huber, Sigmund V. (See Williamson, A. G., and Huber.)

Huffman Recording Pump Company, The. (See Hatmaker, William T., assignor.)

Huggins, Merion J., and W. C. Dressler, said Huggins assignor to Automotive Development Co., Inc., New York, N. Y. Speed-controlling mechanism for automobiles. No. 1,354,303; Sept. 28; v. 278; p. 650.

Hughes, Arthur J. (See Starling, S. G., and Hughes.)

Hughes, Henry & Son Limited. (See Starling, S. G., and Hughes, assignors.)

Hughes, Robert R., Jr., Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill. Trimming mechanism for sewing-machines. No. 1,353,534; Sept. 21; v. 278; p. 451.

Hughes, Thomas J., Seattle, Wash. Collapsible rivet-mold. No. 1,353,813; Sept. 21; v. 278; p. 506.

Hulse, Frederick W., Northfield, near Birmingham, England, assignor of one-half to Armes Automatiques Lewis, Antwerp, Belgium. Cartridge-extractor for fire-arms. No. 1,352,515; Sept. 14; v. 278; p. 190.

Hultberg, John E., Warren, Pa. Tool-handle. No. 1,353,043; Sept. 14; v. 278; p. 295.

Humphreville, Frank, Atlantic City, N. J. Toy rocker-carriage. No. 1,354,400; Sept. 28; v. 278; p. 669.

Hunt, Harry B., Foremost, Alberta, Canada. Sectional bookcase. No. 1,352,195; Sept. 7; v. 278; p. 92.

Hunt, Homer, Springfield, Mass. Brush. No. 1,352,369; Sept. 7; v. 278; p. 125.

Hunt, Nathaniel H., assignor of one-half to W. G. Kent, London, England. Means for measuring the velocity of a moving body. No. 1,352,809; Sept. 14; v. 278; p. 249.

Hunt, Otto H., Walla Walla, Wash. Clamp. No. 1,352,810; Sept. 14; v. 278; p. 250.

Hunter, Alfred R., Hartford, Conn., assignor to Hartford-Fairmont Company, Canajoharie, N. Y. Glass-working machine. No. 1,353,115; Sept. 14; v. 278; p. 308.

Hunter, Percy E., Pittsburgh, Pa. Metal supporting and transferring table. No. 1,352,811; Sept. 14; v. 278; p. 250.

Hunter, Samuel, Bellevue, Pa. Electric routing-machine. No. 1,352,196; Sept. 7; v. 278; p. 92.

Hunziker, Benjamin F., assignor to J. F. Hunziker, Minneapolis, Minn. Cigarette-case. No. 1,354,042; Sept. 28; v. 278; p. 597.

Hunziker, Julius F. (See Hunziker, Benjamin F., assignor.)

Hurst, Max, *et al.* (See Link, William, assignor.)

Hutchins, Frank E., *et al.* (See Rosentreter, Albert J., assignor.)

Hutchinson, David M., *et al.* (See Hachmann, Frederick, assignor.)

Jonassen, Alfred C. and N., Whakatane, New Zealand. Resilient tire. No. 1,353,757; Sept. 21; v. 278; p. 496.

Jones, Charles H., Medford, Mass. Mechanism for guiding and spacing candy. No. 1,352,607; Sept. 14; v. 278; p. 208.

Jones, Charles J., Cheyenne, Wyo. Weather-strip. No. 1,352,276; Sept. 7; v. 278; p. 107.

Jones, Emil J., Jamestown, N. Y. Knockdown sheet-metal drawer. No. 1,352,002; Sept. 7; v. 278; p. 57.

Jones, George G., Cleveland, assignor to Industrial Research Corporation, Toledo, Ohio. Device for removing tires from rims. No. 1,352,135; Sept. 7; v. 278; p. 81.

Jones, James E. (See Moody, William E., assignor.)

Jones, John J., Wichita, Kans. Automobile-body construction. No. 1,352,066; Sept. 7; v. 278; p. 68.

Jones, John W. (See Stretton, T., and Jones.)

Jones, Oliver R., Welland, Ontario, Canada. Wrench. No. 1,352,130; Sept. 7; v. 278; p. 82.

Jones, Thomas J., Herrin, Ill. Automatic flying-switch mechanism. No. 1,354,403; Sept. 28; v. 278; p. 670.

Jorgenson, John, Racine, Wis. Spark-plug. No. 1,353,593; Sept. 21; v. 278; p. 463.

Josephs, Julius, assignor to the Crofut & Knapp Company, New York, N. Y. Cap. No. 1,352,968; Sept. 14; v. 278; p. 281.

Joslin, Charles T., Feura Bush, N. Y. Cabinet for cigarettes. No. 1,354,307; Sept. 28; v. 278; p. 650.

Joslin, Frank M., assignor to Inman Manufacturing Company, Inc., Amsterdam, N. Y. Machine for making partitions for boxes. No. 1,353,344; Sept. 21; v. 278; p. 413.

Joule, Joseph, and C. A. Coups, assignors to Eastwood Wire Manufacturing Company, Belleville, N. J. Loom. No. 1,353,962; Sept. 28; v. 278; p. 580.

Joule, Joseph, and C. A. Coups, assignors to Eastwood Wire Manufacturing Company, Belleville, N. J. Loom. No. 1,353,963; Sept. 28; v. 278; p. 580.

Joyce-Cridland Company, The. (See Ripsch, C. W., and Dawley, assignors.)

Joyce, Michael J. (See Dence, Carl, assignor.)

Junggren, Oscar, Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine. No. 1,352,276; Sept. 7; v. 278; p. 108.

Junggren, Oscar, Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine. No. 1,352,277; Sept. 7; v. 278; p. 108.

Junggren, Oscar, Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine. No. 1,352,278; Sept. 7; v. 278; p. 108.

Kabushiki-Kwaisha Mamiyado. (See Mamiya, Katsusaburo, assignor.)

Kafafian, Krikor. (See Esmarian, G., and Kafafian.)

Kaisling, William, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Combined electromagnetically and manually operable organ-stop. No. 1,353,594; Sept. 21; v. 278; p. 463.

Kalata, Frank, Springfield, Ill. Car-coupling. No. 1,352,516; Sept. 14; v. 278; p. 190.

Kalix, John, White Plains, N. Y. Carrier. No. 1,352,969; Sept. 14; v. 278; p. 281.

Kallom, F. W., Malden, and P. S. Toennesen, Everett, Mass. Sanding device. No. 1,351,760; Sept. 7; v. 278; p. 9.

Kaltenbach, Robert W., assignor to The McMyler Interstate Company, Cleveland, Ohio. Box-car unloader. No. 1,352,608; Sept. 14; v. 278; p. 208.

Kalton, Martin A., Minneapolis, Minn. Door-spring. No. 1,354,196; Sept. 28; v. 278; p. 628.

Kane, Edmund J. (See Johnston E. H., and Kane.)

Karl, Ernest, Litchfield, Conn. Adjustable chase and lockup for printing, cutting, and creasing presses. No. 1,353,758; Sept. 21; v. 278; p. 496.

Karschits, Frank, Bridgeport, Conn. Combination-chair. No. 1,353,595; Sept. 21; v. 278; p. 463.

Kastenbois, Charles C., *et al.* (See Kugler, James R., and E. W., assignors.)

Kaufman, Michael M., and J. P. Lynn, Chicago, Ill., assignors to P. P. Thomas, trustee, Minneapolis, Minn. Mechanical pencil. No. 1,353,845; Sept. 21; v. 278; p. 413.

Kaufmann, John W., Baltimore, Md. Reproducer for talking-machine. No. 1,354,197; Sept. 28; v. 278; p. 628.

Kays, Charles A. (See Wilhem, J., and Kays.)

Kazienko, Julian, Rosebank, N. Y. Automobile turn-indicating device. No. 1,353,964; Sept. 28; v. 278; p. 580.

Keckler, Charles W., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,352,970; Sept. 14; v. 278; p. 281.

Keffer, Charles A. (See Stehle, F., and Keffer.)

Kehawke Mfg. Co. (See Hawkinson, Paul E., assignor.)

Keiper, Henry B., Lancaster, Pa. Ball retainer and separator for thrust-bearings. No. 1,353,044; Sept. 14; v. 278; p. 295.

Keitz, Joseph F., Jersey City, N. J. Eye-shield for automobile-drivers. No. 1,353,759; Sept. 21; v. 278; p. 496.

Kellam, Albert S. (See House, Thomas M., assignor.)

Kellam, Albert S., and N. F. Norvell, Richmond, Va. Valve. No. 1,352,900; Sept. 14; v. 278; p. 267.

Keller, William H. (See Homan, John G., assignor.)

Kelley, Charles E., and G. D. Speicher, Larksville, borough, Pa. Latch for doors of mine-cars. No. 1,353,760; Sept. 21; v. 278; p. 496.

Kelley, George S., Cranston, R. I. Bow-holder. No. 1,353,912; Sept. 28; v. 278; p. 570.

Kellogg Switchboard and Supply Company. (See Bryce, Harry W., assignor.)

Kellogg Switchboard and Supply Company. (See Kaisling, William, assignor.)

Kellogg, Waldo S., assignor to Austral Window Co., New York, N. Y. Balanced window. No. 1,352,971; Sept. 14; v. 278; p. 281.

Kelly, James, Eagle Pass, Tex., assignor of one-half to G. Honetschlager, Stanford, Mont. Ignition system for gas-engines. No. 1,353,045; Sept. 14; v. 278; p. 295.

Kelly, Thomas D., Hove, England. Construction of packing for piston-rings. No. 1,354,404; Sept. 28; v. 278; p. 670.

Kemble, Charles P. (See Kennicott, C. L., and Kemble.)

Kempton, Willard H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Mold. No. 1,352,457; Sept. 14; v. 278; p. 178.

Kempton, Willard H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Mold. No. 1,354,198; Sept. 28; v. 278; p. 628.

Kendall, Myron A., assignor to Stephens-Adamson Mfg. Co., Aurora, Ill. Coal-crusher. No. 1,352,609; Sept. 14; v. 278; p. 208.

Kennard, Joseph S., Jr., New York, N. Y. Combined motion-picture camera and projector. No. 1,352,003; Sept. 7; v. 278; p. 57.

Kennedy, Joseph, Richmond Hill, assignor to The Clements Co., New York, N. Y. Bolt-anchor. No. 1,352,199; Sept. 7; v. 278; p. 93.

Kennedy, Joseph, Richmond Hill, assignor, by mesne assignments, to The Orsbee Co., Inc., New York, N. Y. Bolt-anchor. No. 1,352,200; Sept. 7; v. 278; p. 93.

Kennedy, Joseph, Richmond Hill, assignor, by mesne assignments, to The Orsbee Co., Inc., New York, N. Y. Bolt-anchor. No. 1,352,201; Sept. 7; v. 278; p. 93.

Kenney, David T., North Plainfield, N. J. Heating system. No. 1,352,371; Sept. 7; v. 278; p. 126.

Kennicott, Cass L., and C. P. Kemble, Chicago Heights; said Kennicott assignor, by mesne assignments, to A. C. Harding, Chicago, Ill. Machine for forming metal. No. 1,352,813; Sept. 14; v. 278; p. 250.

Kenny, William J. (See Doyle, J. H., and Kenny.)

Kent, Arthur A. (See Richter, William H., assignor.)

Kent, Walter G. (See Hunt, Nathaniel H., assignor.)

Keppel, Jesse E., assignor to International Aerial Navigation Company, St. Louis, Mo. Tail-light signal. No. 1,352,279; Sept. 7; v. 278; p. 108.

Kessel, Fred, New York, N. Y. Caster. No. 1,352,004; Sept. 7; v. 278; p. 58.

Kessel, John A., Buffalo, N. Y. Ash-sifter. No. 1,352,667; Sept. 14; v. 278; p. 220.

Kessler, John H., Binghamton, N. Y. Extension window-screen. No. 1,352,372; Sept. 7; v. 278; p. 126.

Kettering, Charles F., assignor to Delco-Light Company, Dayton, Ohio. System of electrical control. No. 1,351,910; Sept. 7; v. 278; p. 40.

Ketteringham, George W., La Fayette, La. Drip-pan for sanitary closets. No. 1,354,199; Sept. 28; v. 278; p. 629.

Keyes, Charles H., Denver, Colo. Brake-shoe. No. 1,353,914; Sept. 28; v. 278; p. 570.

Keyser, Isaac N., Urbana, Ohio. Vermin-exterminator. No. 1,352,067; Sept. 7; v. 278; p. 69.

Keyworth, William C., Paterson, N. J. Swift for reeling-machines. No. 1,352,458; Sept. 14; v. 278; p. 178.

Kidney, Harvey R., Cleveland, Ohio. Compensating driving mechanism for motor-vehicles. No. 1,351,761; Sept. 7; v. 278; p. 9.

Kiefer, Arthur W., Chicago, Ill. Pipe-wrench. No. 1,353,246; Sept. 21; v. 278; p. 394.

Kiewicz, John, assignor to The Reece Button Hole Machine Company, Boston, Mass. Sewing-machine. No. 1,352,280; Sept. 7; v. 278; p. 108.

Kimball, A., Company. (See Heine Herman, assignor.)

Kimball, Robert E., Cleveland, Ohi Set-back register. No. 1,352,973; Sept. 14; v. 278; p. 281.

Kimbark, Eugene U., Evanston, Ill. Envelop. No. 1,352,972; Sept. 14; v. 278; p. 281.

Kime, Benjamin J., assignor of one-fourth to R. R. Micks, Seneca Falls, N. Y. Centrifugal pump. No. 1,353,915; Sept. 28; v. 278; p. 570.

King, Bert W., and A. C. Burkheiser, Detroit, Mich., assignors to Detroit Automatic Scale Company, Elkhart, Ind. Scale and thermostat therefor. No. 1,353,997; Sept. 28; v. 278; p. 587.

King, Bertell W., Brooklyn, N. Y. Means for inscribing unexposed photographic films, plates, or the like. No. 1,351,762; Sept. 7; v. 278; p. 9.

Schmidt, Albert, assignor to Champion Ignition Company, Flint, Mich. Spark-plug. No. 1,352,089; Sept. 7; v. 278; p. 73.
Schmidt, Albert, assignor to Champion Ignition Company, Flint, Mich. Spark-plug. No. 1,352,148; Sept. 7; v. 278; p. 84.
Schmidt, Albert, assignor to Champion Ignition Company, Flint, Mich. Spark-plug. No. 1,352,149; Sept. 7; v. 278; p. 84.
Schmidt, Edwin H., Inspiration, Ariz. Ball-mill. No. 1,351,793; Sept. 7; v. 278; p. 15.
Schmidt, William F., Freeburg, Ill. Shot-firing device. No. 1,351,794; Sept. 7; v. 278; p. 15.
Schmidt, Albert, assignor to Fisher Body Corporation, Detroit, Mich. Curtain-rod support. No. 1,352,479; Sept. 14; v. 278; p. 183.
Schnabel, Fritz W., Chicago, Ill. Attachment for ladders. No. 1,351,795; Sept. 7; v. 278; p. 15.
Schneider & Cie. (See Schneider, Eugène, assignor.)
Schneider, Eugène, assignor to Schneider & Cie, Paris, France. Recorder for fluid-pressure press. No. 1,352,150; Sept. 7; v. 278; p. 84.
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Apparatus for repeating automatically on a railway-locomotive track-signals provided for the protection of moving trains. No. 1,352,389; Sept. 7; v. 278; p. 129.
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Fuse for aviation-bombs. No. 1,352,542; Sept. 14; v. 278; p. 195.
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Percussion-fuse for projectiles. No. 1,352,543; Sept. 14; v. 278; p. 195.
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Percussion-fuse for projectiles. No. 1,352,544; Sept. 14; v. 278; p. 195.
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Power-barring apparatus. No. 1,353,275; Sept. 21; v. 278; p. 399.
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Process and apparatus for ascertaining the hardness of metal parts. No. 1,354,216; Sept. 28; v. 278; p. 632.
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Apparatus for ascertaining the hardness of metal parts. No. 1,354,217; Sept. 28; v. 278; p. 632.
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Process and apparatus for ascertaining the hardness of metal parts. No. 1,354,218; Sept. 28; v. 278; p. 632.
Schnekenburger, William, Detroit, Mich. Weather-strip. No. 1,352,545; Sept. 14; v. 278; p. 196.
Schnell, Lawrence J., Portland, Oreg. Lock-nut. No. 1,352,090; Sept. 7; v. 278; p. 73.
Schnuck, Carl F. (See Bowen, D. R., and Schnuck.)
Schoelkopf, Christian P., St. Paul, Minn. Portable door and window fastener. No. 1,353,543; Sept. 21; v. 278; p. 452.
Schoenky, August, R., Somerville, assignor to Reece Shoe Machinery Company, Boston, Mass. Stopping and starting mechanism. No. 1,352,226; Sept. 7; v. 278; p. 98.
Schoepf, Theodore H., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Control system. No. 1,352,480; Sept. 14; v. 278; p. 183.
Schofield, Frederick C., assignor, by direct and mesne assignments, to The Hillfield Body Company, Salem, Va. Dumping vehicle. No. 1,351,796; Sept. 7; v. 278; p. 15.
Schön, Ludwig, assignor to Fried Krupp Aktiengelschaft, Essen-on-the-Ruhr, Germany. Arrangement for automatically regulating the voltage of dynamos. No. 1,352,839; Sept. 14; v. 278; p. 255.
Schossow, Frederick A., Detroit, Mich. Controlling mechanism for flushing-valves. No. 1,353,804; Sept. 21; v. 278; p. 505.
Schrader's, A., Son. (See Bowden, Junius A., assignor.)
Schrage, Hidde K., Stockholm, Sweden. Machinery for balancing unsymmetrical loads with polyphase distribution-nets or supply-mains. No. 1,354,074; Sept. 28; v. 278; p. 603.
Schram, Alexander L., Hillsboro, Ill., assignor, by mesne assignments, to Drey Automatic Glass Machine Company, St. Louis, Mo. Drop-feeding device for glass-machines. No. 1,353,276; Sept. 21; v. 278; p. 400.
Schram, Alexander L., Hillsboro, Ill. Jar. No. 1,353,277; Sept. 21; v. 278; p. 400.
Schram, Alexander L., Hillsboro, Ill., assignor to Schram Glass Mfg. Co., St. Louis, Mo. Fruit-jar. No. 1,353,278; Sept. 21; v. 278; p. 400.
Schram Glass Manufacturing Co. (See Drey, L. A., and Hiatt, assignors.)
Schram Glass Mfg. Co. (See Schram, Alexander L., assignor.)
Schreiber, Edward A., assignor, by mesne assignments, to Vapor Car Heating Company, Inc., Chicago, Ill. Coupling for railway train-pipes. No. 1,351,875; Sept. 7; v. 278; p. 32.
Schulthess, Jacob, Salt Lake City, Utah. Copy-guide. No. 1,353,279; Sept. 21; v. 278; p. 400.
Schultze, August J., Galveston, Tex. Universal lock and latch. No. 1,352,762; Sept. 14; v. 278; p. 239.
Schulz, Heinrich, assignor to Firm Cornelius Heyl, Worms, Germany. Drying varnished (patent) leather. No. 1,353,937; Sept. 28; v. 278; p. 575.
Schumacher, John, Los Angeles, Calif. Plaster-board and making same. No. 1,352,390; Sept. 7; v. 278; p. 119.
Schümann, Detlef K. H., Hamburg, Germany. Respirator. No. 1,353,857; Sept. 28; v. 278; p. 559.
Schurr, Wilhelm, Langnau-on-the-Albis, Switzerland. Athletic exerciser. No. 1,353,938; Sept. 28; v. 278; p. 575.
Schuyler, Edward, Syracuse, N. Y. Headlight. No. 1,354,136; Sept. 28; v. 278; p. 616.
Schwartz, Michael, assignor to Automatic Electric Company, Chicago, Ill. Semiautomatic telephone system. No. 1,351,876; Sept. 7; v. 278; p. 32.
Schwarz, Frederick, Berne, Ind. Swing. No. 1,352,317; Sept. 7; v. 278; p. 116.
Schwarzenbach, Alwin J., Hasbrouck Heights, and B. W. Tucker, South Orange, N. J.; said Tucker assignor, by mesne assignments, of his right to Michael Gold, New York, N. Y. Machine for shaping artificial-flower petals. No. 1,353,426; Sept. 21; v. 278; p. 429.
Schweinert, Maxmilian C., West Hoboken, N. J. Gage for gas-engines or the like. No. 1,352,697; Sept. 14; v. 278; p. 226.
Schweinert, Maximilian C., West Hoboken, N. J. Pressure-gage. No. 1,352,698; Sept. 14; v. 278; p. 227.
Schwerin, Carl. (See Wais, Charles C., assignor.)
Schwerin, Botho, assignor, by mesne assignments, to The Chemical Foundation, Inc., Frankfort-on-the-Main, Germany. Diaphragm for electrochemical and electro-osmotic purposes. No. 1,352,763; Sept. 14; v. 278; p. 240.
Scott, Edward A., Stratford, assignor to Winchester Repeating Arms Co., New Haven, Conn. Folding paper carton. No. 1,354,344; Sept. 28; v. 278; p. 658.
Scott, Lewis L. (See Newcomb, E. C., and Scott.)
Scott, Lewis L., assignor to Standard Engineering Company, St. Louis, Mo. Combustion system. No. 1,352,227; Sept. 7; v. 278; p. 99.
Scott-Paine, Hubert, Southampton, England. Flying-boat or other light marine vessel. No. 1,353,669; Sept. 21; v. 278; p. 479.
Scott, William M., Tredyffrin township, Chester county, Pa. Electrical switching system. No. 1,353,185; Sept. 21; v. 278; p. 383.
Scovill Manufacturing Company. (See Warner, Percy de F. and F. E., assignors.)
Scullin Steel Co. (See Doerr, Harry E., assignor.)
Scully, George H. and J. B., Kansas City, Mo., assignors to J. F. Marx, Hartington, Nebr. Self-soaping washboard. No. 1,354,075; Sept. 28; v. 278; p. 604.
Scully, Jessie B. (See Scully, G. H. and J. B.)
Sealy, Christopher, Brooklyn, N. Y. Automobile pilot-signal. No. 1,353,790; Sept. 21; v. 278; p. 502.
Seattle-Astoria Iron Works. (See Troyer, Nelson, assignor.)
Seaver, Henry E., and C. L. Bowers, assignors to D. M. Wright, Hartford, Conn. Safety device for power-operated machines. No. 1,354,345; Sept. 28; v. 278; p. 658.
Seelau, Franz, Berlin-Wilmersdorf, assignor of one-half to A. M. Newman, Berlin-Wannsee, Germany. Arrangement for phonographically recording and reproducing telephonic messages. No. 1,352,546; Sept. 14; v. 278; p. 196.
Seguin, Laurent, assignor to Societe Des Moteurs Gnome Et Rhone, Paris, France. Dashboard for motor-vehicles. No. 1,353,427; Sept. 21; v. 278; p. 429.
Seifert, John W., Houston, Tex. Washing-machine. No. 1,353,791; Sept. 21; v. 278; p. 502.
Seimbille, Louis E., Paris, France, assignor to Les Successeurs d'Albert Godde, Bedin & Cie., Paris, France. Electrical heating apparatus. No. 1,352,547; Sept. 14; v. 278; p. 196.
Selander, Gustaf, Chicago, Ill. Clinker-extractor. No. 1,353,428; Sept. 21; v. 278; p. 430.

Selden Company, The. (See Selden, James M., assignor.)
Selden, James M., assignor to The Selden Company, Pittsburgh, Pa. Heater. No. 1,352,481; Sept. 14; v. 278; p. 183.
Sellers, William F., Wilmington, Del., assignor to Edge Moor Iron Company, Edgemoor, Del. Metallic baffle-plate. No. 1,351,797; Sept. 7; v. 278; p. 16.
Semon, William H., Minneapolis, Minn. Device for securing protecting-jackets upon cans. No. 1,353,280; Sept. 21; v. 278; p. 401.
Seltenright, Harry A., Toledo, Ohio. Propelling attachment for tractors. No. 1,354,219; Sept. 28; v. 278; p. 633.
Service Caster & Truck Company, The. (See Chestnutt, John L., assignor.)
Sesty, Leopold., Bridgeport, Conn. Lifeboat. No. 1,352,318; Sept. 7; v. 278; p. 116.
Severén, Thaddeus, Bridgeport, Conn. Ratchet-wrench. No. 1,352,764; Sept. 14; v. 278; p. 240.
Severns, William, Chicago, Ill. Polishing apparatus. No. 1,353,422; Sept. 21; v. 278; p. 430.
Severson, Sanford H. (See Libbey, Samuel R., asignor.)
Sévigné, Henri, Winthrop, Mass. Lock-nut. No. 1,352,765; Sept. 14; v. 278; p. 240.
Sgritta, Alfonso, Brooklyn, N. Y. Pulley. No. 1,353,074; Sept. 14; v. 278; p. 301.
Shafer, George B., *et al.* (See Anderson, Albert L., assignor.)
Shand, E. Blake, Detroit, Mich. Splicer for sash straps and cords. No. 1,352,091; Sept. 7; v. 278; p. 73.
Shanaman, John K., Annville, Pa. Auxiliary seat. No. 1,354,137; Sept. 28; v. 278; p. 616.
Shantz, Ralph A., assignor of one-third to O. A. Steelhammer, Salem, and one-third to J. F. Steelhammer, Woodburn, Oreg. Valve-grinder. No. 1,352,640; Sept. 14; v. 278; p. 255.
Shapiro, Samuel G., New York, N. Y. Shoe-heel. No. 1,354,138; Sept. 28; v. 278; p. 616.
Sharp, Robert H., Chicago, Ill. Vanity-case. No. 1,353,281; Sept. 21; v. 278; p. 401.

Sanlwax Paper Co., Kalamazoo, Mich. "Home Made." (For Bread.) No. 22,166; Sept. 21; v. 278; p. 541.

Sanlwax Paper Co., Kalamazoo, Mich. "Milk Maid." (For Bread.) No. 22,167; Sept. 21; v. 278; p. 541.

Sanlwax Paper Co., Kalamazoo, Mich. "Mothers." (For Bread.) No. 22,165; Sept. 21; v. 278; p. 541.

Shaw Family, Inc., The, San Jose, Calif. "Shaw's." (For Strawberry Jam.) No. 22,168; Sept. 21; v. 278; p. 541.

Shepherd & Cleveland, Chicago, Ill. "All In One Ointment." (For Ointment.) No. 22,169; Sept. 21; v. 278; p. 541.

Staehle, Louis L., Newark, N. J. "Essex Poisoned Wheat." (For Poisoned Food for Rats, Mice, &c.) No. 22,170; Sept. 21; v. 278; p. 541.

Sterling Pin Company, Derby, Conn. "Bird Design." (For Cartons Containing Hairpins.) No. 22,137; Sept. 14; v. 278; p. 366.

Sweet-Odor-Home Company, San Francisco, Calif. "Sweet-Odor-Home." (For Liquid Deodorant.) No. 22,171; Sept. 21; v. 278; p. 541.

Van Buskirk, Il., Seed Co., Rocky Ford, Colo. "Salmotinto." (For Cantaloup-Seed.) No. 22,145; Sept. 21; v. 278; p. 541.

Van Dyke, William L., Tampa, Fla. "Usacuba." (For Cigars.) No. 22,138; Sept. 14; v. 278; p. 366.

Walters, Henry V., Long Branch, N. J. "Some!!!" (For Cakes.) No. 22,139; Sept. 14; v. 278; p. 366.

Waterman, L. E. Company, New York, N. Y. "Waterman's Ideal Ink." (For Waterman's Ideal Ink.) Nos. 22,096–9; Sept. 7; v. 278; p. 162.

West, Augustus A., Philadelphia, Pa. "Magic Hair Curlers." (For Applied or Fastened Hair-Curlers.) Nos. 22,172–3; Sept. 21; v. 278; p. 541.

White & Wyckoff Mfg. Co., Holyoke, Mass. "Martha Washington." (For Boxes of Stationery and Writing-Tablets.) No. 22,140; Sept. 14; v. 278; p. 366.

ALPHABETICAL LIST OF REGISTRANTS OF PRINTS.

American Lead Pencil Company, New York, N. Y. "The Largest Selling Quality Pencil in the World." (For Lead-Pencils.) Nos 5,336–8; Sept. 14; v. 278; p. 366.

B. V. D. Company, The, New York, N. Y. "Long Wear." (For Athletic Underwear.) No. 5,340; Sept. 14; v. 278; p. 366.

B. V. D. Company, The, New York, N. Y. "Economy." (For Athletic Underwear.) No. 5,354; Sept. 21; v. 278; p. 542.

Beech-Nut Packing Company, Canajoharie, N. Y. "Handy Candy Caramels." (For Handy Candy Caramels.) No. 5,334; Sept. 7; v. 278; p. 162.

Beech-Nut Packing Company, Canajoharie, N. Y. "Handy Candy Cloves." (For Candy-namely, Cloves.) No. 5,352; Sept. 21; v. 278; p. 542.

Beech-Nut Packing Company, Canajoharie, N. Y. "Handy Candy Licorice." (For Candy—namely, Licorice.) No. 5,353; Sept. 21; v. 278; p. 542.

Boston Confectionery Company, Cambridge, Mass. "It Simply isn't Christmas without Sparrows." (For Confectionery.) No. 5,339; Sept. 14; v. 278; p. 366.

Cunningham, John A., & Co., Attleboro, Mass. "The Snappy Link." (For Cuff-Links.) No. 5,341; Sept. 14; v. 278; p. 366.

Detmer Woolen Co., New York, N. Y. "Come in Let Us Show You Detmer University Novelties, Latest Suitings." (For Detmer Woolens.) No. 5,342; Sept. 14; v. 278; p. 366.

Detmer Woolen Co., New York, N. Y. "Come In—Let us show you Detmer University Novelties, Latest Suitings." (For Detmer Woolens.) No. 5,365; Sept. 21; v. 278; p. 542.

Franklin, Joseph A., Chicago, Ill. "Shot." (For Non-Alcoholic Beverage.) No. 5,356; Sept. 21; v. 278; p. 542.

Franklin, Joseph A., Chicago, Ill. "The Drink With a Tickle for a Nickle." (For a Non-Alcoholic Beverage.) No. 5,357; Sept. 21; v. 278; p. 542.

Fuld, William, Baltimore, Md. "Ouija." (For a Talking-Board.) No. 5,358; Sept. 21; v. 278; p. 542.

Haynes Automobile Co., The, Kokomo, Ind. "The New Series Haynes Suburban." (For Automobiles.) No. 5,335; Sept. 7; v. 278; p. 162.

Hays, Daniel, Company, The, Gloversville, N. Y. "Hays Gloves." (For Leather Gloves.) No. 5,355; Sept. 21; v. 278; p. 542.

Heinz, H. J., Company, Pittsburgh, Pa. "Heinz Fig Pudding." (For Heinz Fig-Pudding." No. 5,343; Sept. 14; v. 278; p. 366.

Heinz, H. J., Company, Pittsburgh, Pa. "Heinz Tomato Ketchup." (For Heinz Tomato Catchup.) No. 5,344; Sept. 14; v. 278; p. 366.

Heinz, H. J., Company, Pittsburgh, Pa. "Heinz Oven Baked Beans." (For Heinz Oven-Baked Beans.) No. 5,345; Sept. 14; v. 278; p. 366.

Kirk, James S., & Company, Chicago, Ill. "For a Lovely Complexion and Glorious Hair." (For Soap.) No. 5,346; Sept. 14; v. 278; p. 366.

Mutual Service Corporation, New York, N. Y. "Delight in Every Bite." (For Apples.) No. 5,359; Sept. 21; v. 278; p. 542.

No-Leak-O Piston Ring Company, Baltimore, Md. "No-Leak-O Oilsealing." (For Piston-Rings.) No. 5,347; Sept. 14; v. 278; p. 366.

Palmolive Company, The. "Simple Home Treatment Which Makes Your Hair Thick and Beautiful." (For Shampoo.) No. 5,348; Sept. 14; v. 278; p. 366.

Porcher, E. P., Cocoa, Fla. "Deerfield." (For Oranges and Grapefruit.) No. 5,349; Sept. 14; v. 278; p. 366.

Reliance Manufacturing Company, Chicago, Ill. "Big Yank." (For Work-Shirts.) No. 5,360; Sept. 21; v. 278; p. 542.

Reynolds, R. J., Tobacco Company, Winston-Salem, N. C. "You'll fuss a pipe like it's the new baby." (For Smoking-Tobacco.) No. 5,350; Sept. 14; v. 278; p. 366.

Reynolds, R. J., Tobacco Company, Winston-Salem, N. C. "How do you get that way?" (For Smoking-Tobacco.) No. 5,351; Sept. 14; v. 278; p. 366.

Reynolds, R. J., Tobacco Company, Winston-Salem, N. C. "What a Grip You've Got on Smokesport at Both Ends." (For Smoking-Tobacco.) No. 5,361; Sept. 21; v. 278; p. 542.

Reynolds, R. J., Tobacco Company, Winston-Salem, N. C. "No Need Putting in a Call for the Old Family Yard Stick." (For Smoking-Tobacco.) No. 5,362; Sept. 21; v. 278; p. 542.

Whitaker, George S., Gloversville, N. Y. "The New Improved Double Floor Whitaker Denture Vacuum." (For a Vacuum Denture.) No. 5,363; Sept. 21; v. 278; p. 542.

World Phonograph Company, Chicago, Ill. "My Mama." (For Phonographs.) No. 5,364; Sept. 21; v. 278; p. 542.

DISCLAIMERS.

Duffy, Thomas I., Chicago, Ill.; disclaimer filed by assignee, Wire Wheel Corporation of America. Demountable wheel. No. 1,125,498; disclaimer filed Aug. 20, 1920; v. 278; p. 168.

Jepson, John W., Buffalo, N. Y.; disclaimer filed by assignee, Gould Coupler Company. Electrical system of distribution. No. 1,287,331; disclaimer filed Aug. 20, 1920; v. 278; p. 168.

Larsen, Louis B., O. J. Holmes, and H. G. Larsen, Chicago, Ill.; disclaimer filed by assignee, Acme Motion Picture Projector Co. Motion-picture machine. No. 1,283,224; disclaimer filed Sept. 8, 1920; v. 278; p. 548.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED DURING THE MONTH OF SEPTEMBER, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Accounting and record device. G. W. Moeller. No. 1,351,864; Sept. 7; v. 278; p. 30.
Acetylene-gas generator. C. T. and C. B. Cook. No. 1,353,455; Sept. 21; v. 278; p. 435.
Acid, Concentration of sulfuric. A. C. Bohre. No. 1,353,448; Sept. 21; v. 278; p. 433.
Acid, Producing hydrocyanic. G. H. Buchanan. No. 1,352,655; Sept. 14; v. 278; p. 218.
Acids and their glycerids, Method of and apparatus for hydrogenating fatty. A. Radisson and P. Berthon. No. 1,353,419; Sept. 21; v. 278; p. 428.
Adjustable clamp. R. H. Carpenter. No. 1,354,278; Sept. 28; v. 278; p. 665.
Adjustable clamp. M. L. Radtke. No. 1,351,966; Sept. 7; v. 278; p. 50.
Advertising device. M. Horsey. No. 1,352,368; Sept. 7; v. 278; p. 125.
Advertising device. W. B. Wheeler. No. 1,353,105; Sept. 14; v. 278; p. 307.
Advertising device. H. M. Yingst. No. 1,352,336; Sept. 7; v. 278; p. 119.
Aerial navigation, Apparatus for. C. Hering. No. 1,353,955; Sept. 28; v. 278; p. 578.
Aeronautical motor. C. B. Kirkham. No. 1,351,763; Sept. 7; v. 278; p. 9.
Aeroplane. E. V. Boller. No. 1,353,212; Sept. 21; v. 278; p. 388.
Aeroplane. H. L. Haskell. No. 1,352,600; Sept. 14; v. 278; p. 207.
Aeroplane. L. Hinz. No. 1,353,957; Sept. 28; v. 278; p. 579.
Aeroplane. F. C. Lawrence. No. 1,351,918; Sept. 7; v. 278; p. 41.
Aeroplane. R. R. Reed. No. 1,354,002; Sept. 28; v. 278; p. 588.
Aeroplane. P. T. Wolfe and W. H. Bovard. No. 1,353,692; Sept. 21; v. 278; p. 484.
Aeroplane construction. H. G. Hooper. No. 1,351,852; Sept. 7; v. 278; p. 28.
Aeroplane hoisting connection. H. Kleckler. No. 1,351,764; Sept. 7; v. 278; p. 10.
Aeroplane landing device. E. L. Martin. No. 1,352,077; Sept. 7; v. 278; p. 71.
Aeroplane-tractor. J. Ingells. No. 1,353,961; Sept. 28; v. 278; p. 580.
Aeroplane, Twin-propeller. L. B. Sperry. No. 1,353,544; Sept. 21; v. 278; p. 452.
Aeroplanes, Foldable landing-gear for. F. McCarroll. No. 1,353,407; Sept. 21; v. 278; p. 425.
Agraffe. R. W. Gertz. No. 1,353,904; Sept. 28; v. 278; p. 568.
Agricultural implement. S. L. Allen. No. 1,351,984; Sept. 7; v. 278; p. 54.
Agricultural implement, Balance. D. Y. Wheatley. No. 1,353,366; Sept. 21; v. 278; p. 417.
Agricultural machine. H. J. Davis. No. 1,352,725; Sept. 14; v. 278; p. 232.
Air and car coupling, Multiple electric. R. G. Averill and C. H. Tomlinson. No. 1,353,557. Sept. 21; v. 278; p. 455.
Air-compressor. C. F. Johnson. No. 1,354,402; Sept. 28; v. 278; p. 670.
Air-compressor, Hydraulic. H. M. De Witt. No. 1,353,897; Sept. 28; v. 278; p. 567.
Air-compressor regulator. C. Wainwright. No. 1,353,098; Sept. 14; v. 278; p. 305.
Air-compressor, Rotary. H. O. Jackson. No. 1,352,750; Sept. 14; v. 278; p. 237.
Air-compressor, Rotary. H. O. Jackson. No. 1,352,751; Sept. 14, v. 278; p. 237.
Air-deflecting device. C. T. Myers. No. 1,352,679; Sept. 14; v. 278; p. 223.
Aircraft safety device. G. Ajello. No. 1,354,367; Sept. 28; v. 278; p. 663.
Aircraft, Wing and similar member of. F. H. Page. No. 1,353,666; Sept. 21; v. 278; p. 478.
Airplane-hangars or other large openings, Multiple sliding door for. H. A. Johnson. No. 1,352,606; Sept. 14; v. 278; p. 208.
Airplane-wing. J. Petrovitch. No. 1,353,179; Sept. 21; v. 278; p. 382.
Airplane-wing-structure truss. G. H. Curtiss. No. 1,351,743; Sept. 7; v. 278; p. 6.
Airships, aeroplanes, &c., Shed for. G. Hervieu and P. M. G. Maréchal. No. 1,353,956; Sept. 28; v. 278; p. 579.
Airships, Apparatus for mooring. E. S. Ullmann. No. 1,351,931; Sept. 7; v. 278; p. 44.
Alarm: *See*—
Latch and burglar-alarm.
Alkaline melts, Manufacture of reducing. E. Bergve. No. 1,354,451; Sept. 28; v. 278; p. 679.
Alloy. J. G. Homan. No. 1,352,367; Sept. 7; v. 278; p. 125.
Alloy. Z. Jeffries and W. A. Gibson. No. 1,352,271; Sept. 7; v. 278; p. 107.
Alloy. Z. Jeffries and W. A. Gibson. No. 1,352,272; Sept. 7; v. 278; p. 107.
Alloy and making same, Metallic. T. D. Stay. No. 1,352,322; Sept. 7; v. 278; p. 117.
Alloys having high mechanical, chemical, and electrical resistance. A. Tedesco. No. 1,351,801; Sept. 7; v. 278; p. 19.
Alloys, Treating copper-bearing. W. J. Marsh. No. 1,353,773; Sept. 21; v. 278; p. 499.
Ammonia-compressor. G. Hilger. No. 1,354,190; Sept. 28; v. 278; p. 627.
Ammonia, Production of. J. C. Clancy. No. 1,352,180; Sept. 7; v. 278; p. 89.
Ammonia, Production of. J. C. Clancy. No. 1,352,181; Sept. 7; v. 278; p. 89.
Ammonia, Production of. J. C. Clancy. No. 1,352,174; Sept. 7; v. 278; p. 89.
Ammonia, Production of. J. C. Clancy. No. 1,352,182; Sept. 7; v. 278; p. 89.
Ammonia synthesis. J. C. Clancy. No. 1,352,179; Sept. 7; v. 278; p. 89.
Ammonia synthesis and catalyst therefor. J. C. Clancy. No. 1,352,178; Sept. 7; v. 278; p. 89.
Ammonia synthesis catalyst and making same. J. C. Clancy. No. 1,352,177; Sept. 7; v. 278; p. 89.
Amusement and exercise, Apparatus for the purpose of providing public. H. Clegg. No. 1,354,021; Sept. 28; v. 278; p. 592.
Amusement apparatus. C. Hermann. No. 1,354,436; Sept. 28; v. 278; p. 676.
Amusement apparatus. J. I. Holcomb and J. F. Hoke, Jr. No. 1,352,666; Sept. 14; v. 278; p. 220.
Amusement apparatus. H. F. Maynes. No. 1,353,929; Sept. 28; v. 278; p. 573.
Amusement device. H. A. Silver. No. 1,352,841; Sept. 14; v. 278; p. 255.
Amusement device, Speedway. A. P. Lauster. No. 1,353,918; Sept. 28; v. 278; p. 571.
Anchor-bolt. F. Hammermann. No. 1,353,159; Sept. 21; v. 278; p. 377.
Anchoring device. L. B. Fish. No. 1,351,845; Sept. 7; v. 278; p. 26.
Anemometer. S. G. Starling and A. J. Hughes. No. 1,352,391; Sept. 7; v. 278; p. 129.
Annealing furnace, Pipe-ball-. E. E. Alexander and J. T. Piggott. No. 1,354,368; Sept. 28; v. 278; p. 663.
Annealing-furnace. F. S. Kochendorfer and B. E. Balduf. No. 1,352,459; Sept. 14; v. 278; p. 178.
Antenna structure. L. Espenschied. No. 1,353,735; Sept. 21; v. 278; p. 492.
Antiskid device. W. C. Cutler. No. 1,352,403; Sept. 7; v. 278; p. 131.
Article-carrier. W. F. Sherman. No. 1,353,858; Sept. 28; v. 278; p. 559.
Antiskidding device. J. C. Dupler. No. 1,353,329; Sept. 21; v. 278; p. 410.
Armament, Mobile. M. Sitney. No. 1,351,928; Sept. 7; v. 278; p. 43.
Aseptic appliance. A. O. Kuhn. No. 1,351,917; Sept. 7; v. 278; p. 41.
Ash, cinder, and coal separator. E. C. Madsen. No. 1,351,861; Sept. 7; v. 278; p. 30.
Athletic exerciser. W. Schurr. No. 1,353,938; Sept. 28; v. 278; p. 575.
Attachment device, Separable. R. B. Benjamin. No. 1,352,776; Sept. 14; v. 278; p. 242.
Auger. R. Prew. No. 1,352,313; Sept. 7; v. 278; p. 115.
Auto-bumper. L. Cohen. No. 1,351,837; Sept. 7; v. 278; p. 25.
Auto-top. A. E. Lyons. No. 1,353,925; Sept. 28; v. 278; p. 572.
Automatic controlling device. C. J. Stuart. No. 1,353,434; Sept. 21; v. 278; p. 431.
Automatic gate. D. W. McCallum. No. 1,354,320; Sept. 28; v. 278; p. 653.

Automatic-locking spring-washer. A. T. Mills. No. 1,353,776; Sept. 21; v. 278; p. 499.
Automobile-body construction. J. J. Jones. No. 1,352,066; Sept. 7; v. 278; p. 68.
Automobile-bumper. E. A. Arnold and B. E. Bothig. No. 1,354,273; Sept. 28; v. 278; p. 644.
Automobile-bumper. W. V. Isgrig. No. 1,353,241; Sept. 21; v. 278; p. 393.
Automobile-bumper. F. R. Procunier. No. 1,352,220; Sept. 7; v. 278; p. 97.
Automobile-chock. F. Retterer. No. 1,353,541; Sept. 21; v. 278; p. 452.
Automobile-curtain. S. A. Gates. No. 1,353,568; Sept. 21; v. 278; p. 437.
Automobile direction-indicator. B. Carlisle. No. 1,353,023; Sept. 14; v. 278; p. 201.
Automobile-door lock. G. Harrison, Jr. No. 1,354,104; Sept. 28; v. 278; p. 610.
Automobile-drive. E. James. No. 1,352,130; Sept. 7; v. 278; p. 80.
Automobile-drive. E. James. No. 1,352,131; Sept. 7; v. 278; p. 81.
Automobile gear-lock. C. G. Trosien. No. 1,353,119; Sept. 14; v. 278; p. 309.
Automobile gear-lock. C. G. Trosien. No. 1,353,120; Sept. 14; v. 278; p. 309.
Automobile hauling attachment. E. Krumland. No. 1,353,762; Sept. 21; v. 278; p. 497.
Automobile-indicator. W. H. Burch. No. 1,352,874; Sept. 14; v. 278; p. 262.
Automobile-lock. F. O. Boswell. No. 1,353,143; Sept. 21; v. 278; p. 374.
Automobile-lock. R. C. Jenkins. No. 1,352,132; Sept. 7; v. 278; p. 81.
Automobile-lock. E. St. John. No. 1,354,071; Sept. 28; v. 278; p. 603.
Automobile-lock. J. Courtney. No. 1,354,172; Sept. 28; v. 278; p. 623.
Automobile-lock. R. M. Guy. No. 1,354,102; Sept. 28; v. 278; p. 609.
Automobile mud and dust shield. O. R. Emery. No. 1,352,798; Sept. 14; v. 278; p. 247.
Automobile pilot-signal. C. Sealy. No. 1,353,790; Sept. 21; v. 278; p. 502.
Automobile safety-signal. H. R. Delley. No. 1,351,773; Sept. 7; v. 278; p. 11.
Automobile safety-signal. F. Tokanos. No. 1,352,039; Sept. 7; v. 278; p. 63.
Automobile-signal. C. H. Felton. No. 1,352,946; Sept. 14; v. 278; p. 276.
Automobile-signal. C. F. Livingston and E. E. Lordge. No. 1,353,253; Sept. 21; v. 278; p. 395.
Automobile-signal. F. C. Roberts. No. 1,354,066; Sept. 28; v. 278; p. 602.
Automobile-signal. O. Freels. No. 1,353,950; Sept. 28; v. 278; p. 577.
Automobile-starter. H. C. Fentreas. No. 1,352,803; Sept. 14; v. 278; p. 248.
Automobile starting system. C. B. Mills and C. E. Wilson. No. 1,352,468; Sept. 14; v. 278; p. 180.
Automobile-tops. Dressing for. C. A. Honig. No. 1,353,239; Sept. 21; v. 278; p. 393.
Automobile-turn-indicating device. J. Kasienko. No. 1,353,964; Sept. 28; v. 278; p. 580.
Automobile-wrench combination. H. Rosenberg. No. 1,353,496; Sept. 21; v. 278; p. 443.
Automobiles, Antiskid device for. J. Grönroos. No. 1,351,750; Sept. 7; v. 278; p. 7.
Automobiles, Auxiliary radiator for. W. Nash. No. 1,353,263; Sept. 21; v. 278; p. 397.
Automobiles, Battery-charging and starting system for. C. E. F. Ahlm. No. 1,352,166; Sept. 7; v. 278; p. 87.
Automobiles, Convertible interior of. W. H. Griffin and O. C. Hartsough. No. 1,353,232; Sept. 21; v. 278; p. 391.
Automobiles, &c., Four-wheel drive for. H. A. Mieske. No. 1,353,411; Sept. 21; v. 278; p. 426.
Automobiles, Gear-casing and band-operating device for. J. T. Parrish. No. 1,353,812; Sept. 21; v. 278; p. 506.
Automobiles, Power attachment for. A. C. Beanblossom. No. 1,352,497; Sept. 14; v. 278; p. 186.
Automobiles, Signal-operating device for. M. Dean. No. 1,351,745; Sept. 7; v. 278; p. 6.
Automobiles, Speed-controlling mechanism for. M. J. Huggins and W. C. Dressler. No. 1,354,303; Sept. 28; v. 278; p. 650.
Automobiles, Pneumatic antivibration device for. G. W. Bell. No. 1,353,886; Sept. 28; v. 278; p. 565.
Automobile wrecking-trailer. G. H. Houck. No. 1,352,898; Sept. 14; v. 278; p. 267.
Automobiles, Power plant for. N. B. Wales. No. 1,353,099; Sept. 14; v. 278; p. 306.
Autos and trailers, Disk-flange attachment to. M. R. Thompson. No. 1,352,581; Sept. 14; v. 278; p. 199.
Auxiliary frame and spring attachment. J. B. Pospeshil. No. 1,352,625; Sept. 14; v. 278; p. 211.
Auxiliary seat. J. K. Shanaman. No. 1,354,137; Sept. 28; v. 278; p. 616.
Aviation-bombs, Fuse for. E. Schneider. No. 1,352,542; Sept. 14; v. 278; p. 195.
Ax. C. M. Doolittle. No. 1,354,384; Sept. 28; v. 278; p. 666.
Axle-box for adjustable locomotive-axles. P. Lefèbvre. No. 1,354,112; Sept. 28; v. 278; p. 611.
Axle brace, Front-. L. E. Boaley. No. 1,354,162; Sept. 28; v. 278; p. 621.
Axles, Forming. S. F. Borkey. No. 1,353,987; Sept. 28; v. 278; p. 585.
Axles, Spring-fitting for vehicle-. J. C. H. Grant. No. 1,353,470; Sept. 21; v. 278; p. 438.
Bag: *See*—
Fruit-picking bag.
Badges, Naval, military and other metallic. C. F. Gaunt. No. 1,353,228; Sept. 21; v. 278; p. 391.
Baffle-plate, Metallic. W. F. Sellers. No. 1,351,797; Sept. 7; v. 278; p. 16.
Bag-holder. E. Erickson. No. 1,353,330; Sept. 21; v. 278; p. 410.
Bag-machine. W. Rose. No. 1,354,339; Sept. 28; v. 278; p. 657.
Bags, Making and filling. A. M. Bates. No. 1,353,210; Sept. 21; v. 278; p. 387.
Bail, Container-body. J. H. Doyle and W. J. Kenny. No. 1,351,896; Sept. 7; v. 278; p. 37.
Balance. W. F. Bachman. No. 1,354,275; Sept. 28; v. 278; p. 644.
Bale-band-connecting means. E. V. Benjamin. No. 1,351,991; Sept. 7; v. 278; p. 55.
Bale-tie. A. H. Sinel. No. 1,353,859; Sept. 28; v. 278; p. 560.
Baling-presses, Block or follower for. I. N. Becker. No. 1,352,345; Sept. 7; v. 278; p. 121.
Baling-presses, Safety device for. C. R. Littig. No. 1,353,252; Sept. 21; v. 278; p. 395.
Baling-presses, Feeding apparatus for. T. R. Cameron. No. 1,352,785; Sept. 14; v. 278; p. 244.
Ball: *See*—
Tongue-ball.
Ball-mill. E. H. Schmidt. No. 1,351,793; Sept. 7; v. 278; p. 15.
Banana heater and ripener. A. L. Frankeberger. (Reissue.) No. 14,948; Sept. 14; v. 278; p. 312.
Banjo. G. Sandstrom. No. 1,354,268; Sept. 28; v. 278; p. 643.
Banjo. N. Brown. No. 1,352,654; Sept. 14; v. 278; p. 218.
Barge. J. Thies. No. 1,353,190; Sept. 21; v. 278; p. 384.
Barometer, Mercurial. A. M. Krause. No. 1,353,482; Sept. 21; v. 278; p. 440.
Barrel-head-machine. T. F. Ward. No. 1,351,934; Sept. 7; v. 278; p. 44.
Barrels, Head equipment for. H. U. Ruedy. No. 1,353,183; Sept. 21; v. 278; p. 382.
Basket. W. B. Loewenberg. No. 1,354,115; Sept. 28; v. 278; p. 612.
Basket and handle therefor, Foldable. T. M. House. No. 1,354,253; Sept. 28; v. 278; p. 640.
Bath: *See*—
Bird-bath.
Bath and developing-tray support and rocker, Fixing-. S. J. Tyler. No. 1,352,330; Sept. 7; v. 278; p. 118.
Bathtub attachment. C. H. Waechter. No. 1,353,313; Sept. 21. v. 278; p. 407.
Batteries, Terminal structure for electric. P. E. Norris. No. 1,352,619; Sept. 14; v. 278; p. 210.
Battery: *See*—
Electric battery.
Battery-box-forming machine. S. E. Hall. No. 1,353,339; Sept. 21; v. 278; p. 412.
Battery case, Storage-. A. Howard. No. 1,354,302; Sept. 28; v. 278; p. 650.
Battery-cell. P. D. Ivey and A. J. Salisbury. No. 1,354,256; Sept. 28; v. 278; p. 641.
Battery-cell hydrometer. P. D. Ivey and A. J. Salisbury. No. 1,354,255; Sept. 28; v. 278; p. 641.
Battery electrode or plate, Storage-. C. Ambruster. No. 1,354,086; Sept. 28; v. 278; p. 606.
Battery jars, Apparatus for forming storage-. T. A. Willard. No. 1,352,160; Sept. 7; v. 278; p. 86.
Battery jars, Forming hard-rubber storage-. T. A. Willard. No. 1,352,161; Sept. 7; v. 278; p. 86.
Battery jars, Making rubber storage-. H. L. Boyer. No. 1,352,170; Sept. 7; v. 278; p. 98.
Battery jars, Making storage-. H. L. Boyer. No. 1,352,418; Sept. 7; v. 278; p. 134.
Battery-plate support. E. M. Duffey. No. 1,353,154; Sept. 21; v. 278; p. 376.
Bearing and constructing same. J. J. Knight and M. Lee. No. 1,354,200; Sept. 28; v. 278; p. 629.
Bearing, Antifriction roller and ball. A. B. Hubard. No. 1,351,754; Sept. 7; v. 278; p. 8.
Bearings, Ball-retainer for radial ball-. C. A. B. R. Brakenhielm. No. 1,352,110; Sept. 7; v. 278; p. 77.
Bearings, Ball retainer and separator for thrust-. H. B. Keiper. No. 1,353,044; Sept. 14; v. 278; p. 295.
Beading. E. W. Aufderheide. No. 1,353,885; Sept. 28; v. 278; p. 564.
Bearing for centrifugal separators, Yielding upper. G. W. Hofmann and W. R. Moray. No. 1,353,958; Sept. 28; v. 278; p. 579.
Bearings, Machine for burning in and burnishing engine-. T. W. Jansen. No. 1,353,164; Sept. 21; v. 278; p. 378.
Bearing, Side. J. F. O'Connor. No. 1,353,971; Sept. 28; v. 278; p. 582.
Beating and refining engine. T. H. Nash. No. 1,351,962; Sept. 7; v. 278; p. 50.
Bed attachment, Combination. J. W. Weismantel. No. 1,353,502; Sept. 21; v. 278; p. 444.

Bed-bottom. E. Fuller. No. 1,353,579; Sept. 21; v. 278; p. 460.
Bed, Collapsible. L. F. Schilling. No. 1,354,343; Sept. 28; v. 278; p. 658.
Bed, Convertible wardrobe-. J. M. McGhee. No. 1,353,536; Sept. 21; v. 278; p. 451.
Bed, Folding. H. J. Meyers. No. 1,352,909; Sept. 14; v. 278; p. 269.
Bed, Folding. R. B. Page. No. 1,352,525; Sept. 14; v. 278; p. 191.
Bed-frame connection. B. H. Johnson and B. M. Phelps. No. 1,351,758; Sept. 7; v. 278; p. 8.
Bed having vertical pivots, Screened. W. C. James. No. 1,353,163; Sept. 21; v. 278; p. 378.
Bed headrest attachment. A. MacDonald. No. 1,353,537; Sept. 21; v. 278; p. 451.
Bed, Sofa-. J. J. Gruenfeld, Jr. No. 1,352,806; Sept. 14; v. 278; p. 229.
Bed, Vertically-pivoted wall-. W. C. James. No. 1,353,162; Sept. 21; v. 278; p. 378.
Bee-cage. E. B. Ault. No. 1,353,137; Sept. 21; v. 278; p. 373.
Beef-splitting machine. D. L. Appelberry. No. 1,353,013; Sept. 14; v. 278; p. 289.
Beet-puller, Automatic. V. Kosenko. No. 1,354,111; Sept. 28; v. 278; p. 611.
Beet-topping means. C. L. Leonard and A. F. Howard. No. 1,353,403; Sept. 21; v. 278; p. 425.
Belt-shifter. F. G. Kleckler. No. 1,354,406; Sept. 28; v. 278; p. 670.
Belting, Apparatus for Manufacturing. E. F. Gingras. No. 1,351,901; Sept. 7; v. 278; p. 38.
Belt-conveyer. C. S. Wray. No. 1,353,008; Sept. 14; v. 278; p. 288.
Belt-driving. K. E. A. Granstedt. No. 1,352,511; Sept. 14; v. 278; p. 189.
Belt transmission. H. Kocourek. No. 1,354,407; Sept. 28; v. 278; p. 671.
Berry-picker. A. Mahtes. No. 1,353,172; Sept. 21; v. 278; p. 380.
Beverage-dispensing apparatus, Portable. D. Richardson and C. N. Jacoby. No. 1,352,475; Sept. 14; v. 278; p. 182.
Beverage-preparing machine. E. C. Dennert. No.1,352,435; Sept. 14; v. 278; p. 173.
Bicycle-pedals, Repair of. J. Glanz. No. 1,352,445; Sept. 14; v. 278; p. 175.
Billiard-cues, Fastener for tips of. W. Fehlhaber and C. L. Smith. No. 1,354,387; Sept. 28; v. 278; p. 667.
Binder. F. L. Manny. No. 1,354,205; Sept. 28; v. 278; p. 630.
Bird-bath. A. H. Leverett. No. 1,354,113; Sept. 28; v. 278; p. 612.
Blade, Tempered. C. Napier. No. 1,352,140; Sept. 7; v. 278; p. 82.
Blower-pipe, windbreak, and silage-distributer. A. M. Tamm and J. Tennessen, Jr. No. 1,353,674; Sept. 21; v. 278; p. 480.

Dental casting-machine. F. C. Montuori. No. 1,352,080; Sept. 7; v. 278; p. 71.
Dental flask and charger. D. A. Akin. No. 1,353,942; Sept. 28; v. 278; p. 576.
Dental mandril for holding stones and sandpaper disks. W. S. Wright. No. 1,352,895; Sept. 7; v. 278; p. 130.
Dental mirror and syringe. J. E. Craig. No. 1,352,789; Sept. 14; v. 278; p. 245.
Dental plates, Suction mechanism for. J. Lehner. No. 1,352,614; Sept. 14; v. 278; p. 209.
Dental tool. H. Callsen. No. 1,354,089; Sept. 28; v. 278; p. 607.
Derrick, Farm-. R. A. Smith. No. 1,352,035; Sept. 7; v. 278; p. 62.
Demountable wheel. L. Baumgartl. No. 1,353,511; Sept. 21; v. 278; p. 446.
Denture-backings, Making metallic. R. M. Craig. No. 1,353,565; Sept. 21; v. 278; p. 457.
Depth charges, mines, &c., on boats or ships, Means for holding and releasing. J. Hampton. No. 1,353,652; Sept. 21; v. 278; p. 476.
Derailment-brake. J. T. Smith. No. 1,353,794; Sept. 21; v. 278; p. 503.
Despatch systems, Governing mechanism for. J. G. Maclaren. No. 1,354,116; Sept. 28; v. 278; p. 612.
Diacetate, Manufacture of ethylidene. M. Beudet. No. 1,351,990; Sept. 7; v. 278; p. 55.
Dial-sash. C. H. Hyde. No. 1,351,853; Sept. 7; v. 278; p. 28.
Diaphragm for electrochemical and electro-osmotic purposes. B. Schwerin. No. 1,352,763; Sept. 14. v. 278; p. 240.
Dictionary-key. C. Savitsky. No. 1,353,615; Sept. 21; v. 278; p. 468.
Die-head. W. C. Marks. No. 1,352,823; Sept. 14; v. 278; p. 252.
Diestock. W. Link. No. 1,354,316; Sept. 28; v. 278; p. 652.
Diestock attachment. B. E. Eichendorff. No. 1,552,253; Sept. 7; v. 278; p. 104.
Differential mechanism. F. V. Ebertz. No. 1,352,590; Sept. 14; v. 278; p. 205.
Digging implement attachment. R. Risch. No. 1,353,494; Sept. 21; v. 278; p. 443.
Direct-current machine. A. Scherbius. No. 1,352,920; Sept. 14; v. 278; p. 271.
Direction-indicator. J. T. Lindstrom and H. R. Deiley. No. 1,351,774; Sept. 7; v. 278; p. 11.
Direction-indicator. S. Nakasora. No. 1,353,128; Sept. 14; v. 278; p. 311.
Direction-indicator. J. W. Patterson. No. 1,353,783; Sept. 21; v. 278; p. 501.
Direction-indicator. R. P. Safely. No. 1,353,788; Sept. 21; v. 278; p. 502.
Directory, Card-index. L. Bachrach. No. 1,351,730; Sept. 7; v. 278; p. 3.
Directory-machine. W. C. Cutler. No. 1,352,416; Sept. 7; v. 278; p. 134.
Directory-machine. W. C. Cutler. No. 1,353,458; Sept. 21; v. 278; p. 435.
Dirigible light. L. I. and M. Z. Ryder. No. 1,352,993; Sept. 14; v. 278; p. 286.
Disk-cutting apparatus, Multiple-. J. A. Gray. No. 1,351,951; Sept. 7; v. 278; p. 48.
Disk-grinding machine. W. A. Lorenz. No. 1,353,967; Sept. 28; v. 278; p. 581.
Disk-grinding machines, Suction-head for. W. A. Lorenz. No. 1,353,966; Sept. 28; v. 278; p. 581.
Dish-washer. J. Linton. No. 1,354,049; Sept. 28; v. 278; p. 598.
Disk wheel. R. C. Hoffman. No. 1,353,161; Sept. 21; v. 278; p. 377.
Disinfecting apparatus. H. A. Clifford. No. 1,354,244; Sept. 28; v. 278; p. 638.
Dismountable house. A. Roure. No. 1,352,991; Sept. 14; v. 278; p. 285.
Dispensing device. J. H. Boye. No. 1,352,425. Sept. 14; v. 278; p. 172.
Display apparatus. Exhibiting or sign-. D. B. Dovel. No. 1,353,734; Sept. 21; v. 278; p. 491.

Display-rack. G. F. Cooper. No. 1,351,994; Sept. 7; v. 278; p. 56.
Display rack and cutting-table, Oilcloth-. F. M. Baldwin. No. 1,352,397; Sept. 7; v. 278; p. 130.
Display-stand. J. M. Walters. No. 1,351,817; Sept. 7; v. 278; p. 20.
Display-table. E. G. Anderson. No. 1,353,208; Sept. 21; v. 278; p. 387.
Dissolver, Rapid. J. Johnson. No. 1,353,166; Sept. 21; v. 278; p. 378.
Ditch-filler. G. F. Storm. No. 1,352,155; Sept. 7; v. 278; p. 85.
Doll. E. L. Lopes. No. 1,353,406; Sept. 21; v. 278; p. 425.
Doll's eye. O. E. Denivelle. No. 1,354,382; Sept. 28; v. 278; p. 666.
Doll-eye-painting machine. S. Radimak. No. 1,352,528; Sept. 14; v. 278; p. 192.
Doll, Walking. C. F. Arnold. No. 1,352,933; Sept. 14; v. 278; p. 273.
Dolls from tubular blanks, Forming. H. Nelke. No. 1,354,231; Sept. 28; v. 278; p. 655.
Door. M. A. Metzger. No. 1,353,176; Sept 21; v. 278; p. 381.
Door and window construction, Screen. D. C. Blake. No. 1,351,940; Sept. 7; v. 278; p. 45.
Door and window fastener, Portable. C. P. Schoelkopf. No. 1,353,543; Sept. 21; v. 278; p. 452.
Door-bumper. S. B. Atwood. No. 1,353,506; Sept. 21; v. 278; p. 445.
Door-check. M. E. and R. M. Tate. No. 1,354,079; Sept. 28; v. 278; p. 604.
Door check and closer. T. E. Collins. No. 1,353,219; Sept. 21; v. 278; p. 389.
Door-controlling apparatus. F. O. Liming. No. 1,352,980; Sept. 14; v. 278; p. 283.
Door-controlling device. E. S. Coffman. No. 1,353,218; Sept. 21; v. 278; p. 389.
Door-fastener. C. A. Bear. No. 1,351,736; Sept. 7; v. 278; p. 4.
Door-holder. E. Lanning. No. 1,354,046; Sept. 28; v. 278; p. 597.
Door-lock. W. Lougheed. No. 1,352,819; Sept. 14; v. 278; p. 251.
Door-lock. W. A. Lurie. No. 1,352,010; Sept. 7; v. 278; p. 59.
Door-lock. E. E. L. Montelius. No. 1,352,304; Sept. 7; v. 278; p. 113.
Door opening and closing device. V. Schildwachter. No. 1,354,135; Sept. 28; v. 278; p. 616.
Door-retainer. F. P. Eustege. No. 1,353,523; Sept. 21; v. 278; p. 448.
Door-spring. M. A. Kalton. No. 1,354,196; Sept. 28; v. 278; p. 628.
Door-stop. J. M. Guynn. No. 1,352,456; Sept. 14; v. 278; p. 178.
Door-stop. A. C. Sargeant. No. 1,352,147; Sept. 7; v. 278; p. 84.
Door track, Sliding-. J. Surprise. No. 1,352,100; Sept. 7; v. 278; p. 75.
Double-acting power-wrench. C. E. Pendleton. No. 1,353,417; Sept. 21; v. 278; p. 427.
Double clamp. G. T. Benton. No. 1,352,647; Sept. 14; v. 278; p. 216.
Dough-divider. W. B. Abrams and R. I. Gay. No. 1,352,424; Sept. 14; v. 278; p. 171.
Doughnuts, cakes, &c., Machine for cutting. A. A. Smith. No. 1,353,077; Sept. 14; v. 278; p. 302.
Dovetailing-machine. O. Onsrud. No. 1,352,620; Sept. 14; v. 278; p. 210.
Downdraft-furnace, Hot-blast. J. J. Smith. No. 1,351,803; Sept. 7; v. 278; p. 17.
Draft appliance. F. J. Trumpour. No. 1,353,094; Sept. 14; v. 278; p. 304.
Draft-arm. W. N. Oehm. No. 1,353,488; Sept. 21; v. 278; p. 441.
Draft-equalizer. T. J. Dudley. No. 1,354,033; Sept. 28; v. 278; p. 594.
Draft-gage. A. T. Baldwin. No. 1,352,719; Sept. 14; v. 278; p. 231.
Draft-gear bracket. J. M. Waugh. No. 1,353,871; Sept. 28; v. 278; p. 562.
Draft mechanism. H. E. Doerr. No. 1,353,224; Sept. 21; v. 278; p. 390.
Draft-regulator. E. McKiernan. No. 1,352,670; Sept. 14 v. 278; p. 221.
Draft-rigging. A. N. Warfield. No. 1,353,101; Sept. 14; v. 278; p. 306.
Drawer, Knockdown sheet-metal. E. J. Jones. No. 1,352,002; Sept. 7; v. 278; p. 57.
Drawer-locking device. J. S. Kramer. No. 1,352,902; Sept. 14; v. 278; p. 267.
Drawer-stabiliser. W. F. Streich. No. 1,352,924; Sept. 14; v. 278; p. 272.
Drawers, shelves, or other sliding structures, Means for simultaneously locking sliding. W. Chipperfield. No. 1,353,453; Sept. 21; v. 278; p. 434.
Dredge-tumbler. M. L. Summers. No. 1,352,997; Sept. 14; v. 278; p. 286.
Dredging by suction, Process and apparatus for. M. Valentin. No. 1,351,979; Sept. 7; v. 278; p. 53.
Drier: *See*—
Briquet-drier. Clothes-drier.

Drilling, reaming, and countersinking, Apparatus for. O. F. Baltzley. No. 1,352,646; Sept. 14; v. 135; p. 216.
Drinking-fountain, Automatic. L. H. Solomon. No. 1,354,349; Sept. 28; v. 278; p. 659.
Drinking-fountain, Sanitary. G. R. Pratt. No. 1,354,064; Sept. 28; v. 278; p. 601.
Driving mechanism. H. E. Heath. No. 1,351,999; Sept. 7; v. 278; p. 57.
Driving-pulleys, Means to change the speed of. W. Dorion. No. 1,353,153; Sept. 21; v. 278; p. 376.
Dropper: *See*—
Bomb-dropper.
Drum, Pulling-. C. C. Bagnell. No. 1,351,887; Sept. 7; v. 278; p. 35.
Drums, Snare-tensioning device for. R. C. Danly. No. 1,354,028; Sept. 28; v. 278; p. 593.
Dyeing raw silk. E. L. Maupai. No. 1,352,014; Sept. 7; v. 278; p. 59.
Dynamoelectric machine. T. Zimmerman. No. 1,353,883; Sept. 28; v. 278; p. 564.
Dynamos, Arrangement for automatically regulating the voltage of. L. Schön. No. 1,352,839; Sept. 14; v. 278; p. 255.
Dust-collector. J. F. Sims. No. 1,353,431; Sept. 21; v. 278; p. 430.
Earth-stirring implements, Draft connection for. C. P. Zinser. No. 1,353,620; Sept. 21; v. 278; p. 469.
Egg boiler and poacher, Combined. W. Eichelberger. No. 1,354,385; Sept. 28; v. 278; p. 666.
Egg-candler. W. D. Iseman. No. 1,351,757; Sept. 7; v. 278; p. 8.
Egg-candler. C. T. McLellan. No. 1,352,822; Sept. 14; v. 278; p. 252.
Egg-mixer. R. G. Wilson. No. 1,353,443; Sept 21; v. 278; p. 432.
Egg-washer. G. McCray. No. 1,352,138; Sept. 7; v. 278; p. 82.
Elbow-protector. M. Baldwin. No. 1,351,781; Sept. 7; v. 278; p. 3.
Electric-arc furnace. F. von Schlegell. No. 1,352,541; Sept. 14; v. 278; p. 194.
Electric battery. O. E. Ruhoff. No. 1,352,087; Sept. 7; v. 278; p. 72.
Electric battery and producing same, Oil-protected. O. E. Ruhoff. No. 1,352,834; Sept. 14; v. 278; p. 254.
Electric-circuit protector. S. N. Baruch. No. 1,352,044; Sept. 7; v. 278; p. 64.
Electric circuits, Controlling device for. E. C. Newcomb and L. L. Scott. No. 1,352,212; Sept. 7; v. 278; p. 95.
Electric connectors, Spring clasping terminal for. H. B. Sherman and F. D. Maltby. No. 1,352,092; Sept. 7; v. 278; p. 73.
Electric detonator. H. L. Grant and G. Haddow. No. 1,354,100; Sept. 28; v. 278; p. 609.
Electric furnace. F. von Schlegell and W. B. Lewis. No. 1,352,040; Sept. 7; v. 278; p. 63.
Electric furnace. J. Thomson. No. 1,351,977; Sept. 7; v. 278; p. 52.
Electric generator, Wind-wheel. A. H. Heyroth. No. 1,352,960; Sept. 14; v. 278; p. 278.
Electric heater. A. C. Mather. No. 1,351,779; Sept. 7; v. 278; p. 12.
Electric iron. J. A. Guyer No. 1,353,471; Sept. 21; v. 278; p. 438.
Electric-light bulbs, Shade-holder for. W. E. Surface. No. 1,351,879; Sept. 7; v. 278; p. 33.
Electric machine, Dynamo-. J. K. Kostko. No. 1,353,658; Sept. 21; v. 278; p. 477.
Electric machines, Arrangement of leads for dynamo-. R. E. Hellmund. No. 1,351,907; Sept. 7; v. 278; p. 39.
Electric machines, Regulating device for dynamo-. O. F. Conklin. No. 1,352,051; Sept. 7; v. 278; p. 61.
Electric machines, Rotatable member for dynamo-. G. M. Eaton. No. 1,351,898; Sept. 7; v. 278; p. 37.
Electric machines, Rotor for dynamo-. G. M. Eaton. No. 1,351,897; Sept. 7; v. 278; p. 37.
Electric meter. T. T. Varley. No. 1,352,564; Sept. 14; v. 278; p. 200.
Electric motor. F. C. C. Fox. No. 1,354,388; Sept. 28; v. 278; p. 667.
Electric plug. A. Aguere. No. 1,353,699; Sept. 21; v. 278; p. 485.
Electric regulation. J. L. Creveling. No. 1,353,319; Sept. 21; v. 278; p. 408.
Electric routing-machine. S. Hunter. No. 1,352,196; Sept. 7; v. 278; p. 92.
Electric switch. L. E. Carlson. No. 1,352,246; Sept. 7; v. 278; p. 102.
Electric switch. P. H. Chase. No. 1,352,400; Sept. 7; v. 278; p. 131.
Electric switch. P. H. Chase. No. 1,352,401; Sept. 7; v. 278; p. 131.

Electric switch. P. H. Chase. No. 1,352,402; Sept. 7; v. 278; p. 131.
Electric switch. J. Galamb. No. 1,353,580; Sept. 21; v. 278; p. 460.
Electric switch. H. F. Irrgang. No. 1,352,966; Sept. 14; v. 278; p. 280.
Electric switch. C. J. Klein. No. 1,353,124; Sept. 14; v. 278; p. 310.
Electric switch. T. L. Lee. No. 1,353,249; Sept. 21; v. 278; p. 394.
Electric switch. E. B. Thurston. No. 1,352,927; Sept. 14; v. 278; p. 272.
Electric-switch mechanism. H. Hubbell. No. 1,352,604; Sept. 14; v. 278; p. 207.
Electric waves or oscillations, Generator of sustained. M. Latour. No. 1,354,312; Sept. 28; v. 278; p. 651.
Electrical circuit-breaker, Automatic. H. E. Wadsworth and W. B. Ensign. No. 1,352,707; Sept. 14; v. 278; p. 228.
Electrical clamp. J. P. B. Fiske. No. 1,352,948; Sept. 14; v. 278; p. 276.
Electrical connection. E. A. Hawthorne. No. 1,353,748; Sept. 21; v. 278; p. 494.
Electrical connector. V. H. Broc. No. 1,352,499; Sept. 14; v. 278; p. 187.
Electrical connector. H. B. Sherman. No. 1,352,032; Sept. 7; v. 278; p. 62.
Electrical-control system. C. F. Kettering. No. 1,351,910; Sept. 7; v. 278; p. 40.
Electrical controller. W. H. Holder. No. 1,352,896; Sept. 14; v. 278; p. 266.
Electrical distribution system. L. A. Watson. No. 1,353,869; Sept. 28; v. 278; p. 561.
Electrical distribution system. L. A. Watson. No. 1,353,870; Sept. 28; v. 278; p. 562.
Electrical ignition system. F. Conrad. No. 1,352,432; Sept. 14; v. 278; p. 173.
Electrical ignition system. F. Conrad. No. 1,352,433; Sept. 14; v. 278; p. 173.
Electrical instruments, Protecting device for. M. M Davis. No. 1,352,117; Sept. 7; v. 278; p. 78.
Electrical protective device. B. H. Smith. No. 1,354,142; Sept. 28; v. 278; p. 617.
Electrical regulator. C. A. Boddie. No. 1,354,160; Sept. 28; v. 278; p. 621.
Electrical switching system. W. M. Scott. No. 1,353,185; Sept. 21; v. 278; p. 383.
Electrical testing device. C. L. Begas. No. 1,351,988; Sept. 7; v. 278; p. 55.
Electrical transmitting and indicating apparatus. E. A. Graham. No. 1,354,099; Sept. 28; v. 278; p. 609.
Electrode-holder. W. E. Clements. No. 1,353,028; Sept. 14; v. 278; p. 292.
Electrolytic apparatus. W. E. Greenawalt. No. 1,353,995; Sept. 28; v. 278; p. 587.
Electrolytic apparatus. C. M. Walter. No. 1,353,194; Sept. 21; v. 278; p. 384.
Electrolytic cell. E. A. Allen. No. 1,351,886; Sept. 7; v. 278; p. 35.
Electrolytic cells, Filling apparatus for. J. H. Fischer. No. 1,353,332; Sept. 21; v. 278; p. 410.
Electromagnet, Alternating-current. E. B. Thurston. No. 1,342,926; Sept. 14; v. 278; p. 272.
Electromagnetic device. E. J. Murphy. No. 1,352,307; Sept. 7; v. 278; p. 114.
Electromagnetic device. A. H. Packer and F. H. Patten. No. 1,354,208; Sept. 28; v. 278; p. 630.
Electromagnetic sounding device. H. Gernsback. No. 1,354,389; Sept. 28; v. 278; p. 667.
Electroplating, Holder for. H. M. Blaetz. No. 1,354,234; Sept. 28; v. 278; p. 636.
Electroplating nonconducting substances with copper. U. Unno. No. 1,352,331; Sept. 7; v. 278; p. 118.

Music-holders, Illuminating attachment for. F. A. Bua. No. 1,352,349; Sept. 7; v. 278; p. 122.
Music-leaf turner. J. O. Gemsey. No. 1,353,582; Sept. 21; v. 278; p. 461.
Music moving and time-keeping apparatus, Sheet-. J. Flynn. No. 1,352,363; Sept. 7; v. 278; p. 124.
Music, Sheet-. J. S. Dobson. No. 1,354,176; Sept. 28; v. 278; p. 624.
Music-sheet for automatic musical instruments, Perforated. G. H. Davis. No. 1,353,460; Sept. 21; v. 278; p. 436.
Musical chart, Transposing. R. B. Robinson. No. 1,354,214; Sept. 28; v. 278; p. 632.
Musical instrument. H. R. Heller. No. 1,352,958; Sept. 14; v. 278; p. 278.
Musical instruments, Expression device for automatic. H. J. La Joie. No. 1,354,045; Sept. 28; v. 278; p. 597.
Musical instruments, Mouthpiece for wind. C. O. Widmayer. No. 1,353,297; Sept. 21; v. 278; p. 404.
Musical instruments, Pneumatic action for. C. V. Jameson. No. 1,353,753; Sept. 21; v. 278; p. 495.
Musical-instrument-string retoner. L. L. Almutt. No. 1,353,135; Sept. 21; v. 278; p. 373.
Napkin, Washable sanitary. J. Weisaman. No. 1,353,196; Sept. 21; v. 278; p. 385.
Necktie-pressing device. B. L. McKnight. No. 1,352,294; Sept. 7; v. 278; p. 111.
Newspaper-holder. J. Bartusel. No. 1,352,398; Sept. 7; v. 278; p. 131.
Nickel and copper from copper-nickel mattes or materials, Separating. R. C. Stanley. No. 1,351,877; Sept. 7; v. 278; p. 33
Nickel-plating. E. N. Todd and W. R. King. No. 1,352,328; Sept. 7; v. 278; p. 118.
Nitro-cellulose film of low inflammability. J. G. Jarvis. No. 1,354,401; Sept. 28; v. 278; p. 670.
Nitrogen, Fixing atmospheric. C. P. Hidden. No. 1,352,193; Sept. 7; v. 278; p. 92.
Nitrogenous compounds, Process of and means for forming. J. C. Clancy. No. 1,352,176; Sept. 7; v. 278; p. 89.
Noodle-machine. F. Michalek. No. 1,352,826; Sept. 14; v. 278; p. 253.
Nozzle. F. Craigie and J. Hines. No. 1,351,840; Sept. 7; v. 278; p. 25.
Nozzle, Spray-. E. Roberts. No. 1,353,495; Sept. 21; v. 278; p. 443.
Nozzles, Making flow-. H. C. Lord. No. 1,352,292; Sept. 7; v. 278; p. 111.
Nut-bleaching apparatus. H. B. Barkis, Sr. No. 1,353,209; Sept. 21; v. 278; p. 387.
Nut-lock. J. J. Crissinger. No. 1,353,382; Sept. 21; v. 278; p. 421.
Nut-lock. J. W. Curtin. No. 1,352,053; Sept. 7; v. 278; p. 65.
Nut-lock. C. A. Magnuson. No. 1,353,602; Sept. 21; v. 278; p. 465.
Nut-lock. G. L. Moore. No. 1,353,777; Sept. 21; v. 278; p. 500.
Nut, Lock-. H. A. Sévigné. No. 1,352,765; Sept. 14; v. 278; p. 240.
Nut-lock. J. A. Stubblefield. No. 1,351,974; Sept. 7; v. 278; p. 52.
Nut, Lock-. N. R. Thibert. No. 1,352,103; Sept. 7; v. 278; p. 75.
Nut-lock. J. A. Young. No. 1,352,648; Sept. 14; v. 278; p. 215.
Nut-lock and rail-joint protector. P. J. A. Peterson. No. 1,351,786; Sept. 7; v. 278; p. 14.
Nutcracker. S. L. Allen. No. 1,351,988; Sept. 7; v. 278; p. 54.
Oar, Bow-facing. W. H. Clay. No. 1,353,027; Sept. 14; v. 278; p. 292.
Observation-station. W. G. Ruggles. No. 1,352,992; Sept. 14; v. 278; p. 285.
Odometer, Hub-. C. D. Richard. No. 1,353,003; Sept. 28; v. 278; p. 588.
Oil-burner. W. B. Booker. No. 1,352,347; Sept. 7; v. 278; p. 121.
Oil-burner. L. M. Kohner. No. 1,352,378; Sept. 7; v. 278; p. 126.
Oil-burner. W. C. Leist and C. Wagner. No. 1,354,314; Sept. 28; v. 278; p. 652.
Oil-burner system and torch therefor. P. Wade. No. 1,353,683; Sept. 21; v. 278; p. 482.
Oil-can holder. H. L. Decker and H. E. Adams. No. 1,353,898; Sept. 28; v. 278; p. 567.
Oil-engine. A. Hyder. No. 1,354,455; Sept. 28; v. 278; p. 680.
Oil from the peel of citrus fruits, Extracting. F. A. McDermott. No. 1,353,169; Sept. 21; v. 278; p. 379.
Oil kit. J. W. Layton. No. 1,353,920; Sept. 28; v. 278; p. 571.
Oil-retainer. H. C. Uttech and A. E. Ohrmundt. No. 1,353,095; Sept. 14; v. 278; p. 305.
Oil-stills, Safety-damper for. V. L. Emerson. No. 1,352,255; Sept. 7; v. 278; p. 104.
Oiler, Gravity center-. W. W. Nugent. No. 1,352,986; Sept. 14; v. 278; p. 284.
Oils, Making lubricating-. L. S. Eastlake. No. 1,352,502; Sept. 14; v. 278; p. 187.
Oils, Treating mineral. W. Johnson. No. 1,354,257; Sept. 28; v. 278; p. 641.
Oilcloth-cutting machine. F. M. Baldwin. No. 1,352,240; Sept. 7; v. 278; p. 101.
Open-hearth furnace. J. O. Griggs. No. 1,353,830; Sept. 28; v. 278; p. 554.
Ophthalmic mounting. W. H. Boutelle. No. 1,353,311; Sept. 21; v. 278; p. 407.
Optical apparatus. W. Meyer. No. 1,353,259; Sept. 21; v. 278; p. 396.
Optical element and method and means for making same, Multifocal. A. E. Paige. No. 1,351,785; Sept. 7; v. 278; p. 14.

Optiphone. F. C. Brown. No. 1,352,940; Sept. 14; v. 278; p. 274.
Orchard-heater, Smokeless. W. B. Crawford. No. 1,353,636; Sept. 21; v. 278; p. 472.
Ore-concentrating device. B. H. Dosenbach. No. 1,354,031; Sept. 28; v. 278; p. 594.
Ore-concentrator. D. H. Donegan. No. 1,352,882; Sept. 14; v. 278; p. 264.
Ore-concentrators, Driving mechanism for. W. G. Burns. No. 1,353,451; Sept. 21; v. 278; p. 434.
Ores, Apparatus for the concentration of. F. J. Lyster. No. 1,352,072; Sept. 7; v. 278; p. 69.
Organ-stops, Combined electromagnetically and manually operable. W. Kaisling. No. 1,353,594; Sept. 21; v. 278; p. 463.
Organs, Swell-box for pipe-. W. C. Reed. No. 1,353,667; Sept. 21; v. 278; p. 478.
Oscillation generator system. C. V. Logwood. No. 1,351,776; Sept. 7; v. 278; p. 12.
Outlet-boxes, Support for. E. H. Kruse. No. 1,354,309; Sept. 28; v. 278; p. 651.
Oven-grill. G. B. Caswell. No. 1,352,852; Sept. 7; v. 278; p. 122.
Oven, Japanning-. O. Porbeck. No. 1,354,210; Sept 28; v. 278; p. 631.
Overshot. R. A. Dailey. No. 1,351,744; Sept. 7; v. 278; p. 6.
Oxid, Converting refractory. L. E. Saunders. No. 1,352,387; Sept. 7; v. 278; p. 129.
Oxygen, Apparatus for producing liquid. C. F. and O. J. Crommett. No. 1,354,380; Sept. 28; v. 278; p. 665.
Oyster-shucking knife. K. B. Arthur. No. 1,352,108; Sept. 7; v. 278; p. 76.
Package. P. E. Hitzigrath. No. 1,352,962; Sept. 14; v. 278; p. 279.
Packing. W. E. Moody. No. 1,353,940; Sept 28; v. 278; p. 556.
Package, Shipping-. O. O. Eaton. No. 1,353,155; Sept. 21; v. 278; p. 376.
Package-tie. F. F. Buchanan and N. F. Slack. No. 1,353,717; Sept. 21; v. 278; p. 488.
Package-tie. J. C. Culligan. No. 1,352,357; Sept. 7; v. 278; p. 123.
Package-tie. J. H. Reed. No. 1,353,611; Sept. 21; v. 278; p. 467.
Packages, Machine for sealed wrapped. J. D. Reifsnyder. No. 1,352,221; Sept. 7; v. 278; p. 97.
Packages, Producing sealed wrapped. W. A. Weightman and C. H. Nitch. No. 1,352,282; Sept. 7; v. 278; p. 100.
Packer, Ensilage-. H. E. Cobb. No. 1,353,724; Sept. 21; v. 278; p. 489.
Packing, Labyrinth. A. Bonom. No. 1,354,235; Sept. 28; v. 278; p. 636.
Packing-washer for caps. H. P. Kraft. No. 1,354,201; Sept. 28; v. 278; p. 629.
Packless joint. J. M. Howe. No. 1,354,192; Sept. 28; v. 278; p. 627.
Pad: *See*—
Vulcanising-pad.
Pudding. W. H. Wehrenberg. No. 1,352,231; Sept. 7; v. 278; p. 99.
Pail and sprinkler, Combined. B. W. Groves. No. 1,353,650; Sept. 21; v. 278; p. 475.
Pail, Collapsible. D. H. Bucher. No. 1,353,627; Sept. 21; v. 278; p. 470.
Pail, Dinner-. L. Windbichler. No. 1,351,823; Sept. 7; v. 278; p. 22.
Painting objects of art. J. A. Williams. No. 1,351,885; Sept. 7; v. 278; p. 35.
Pants, Boys'. G. L. Kirkpatrick. No. 1,353,480; Sept. 21; v. 278; p. 440.
Paper-board. F. B. Davidson. No. 1,353,323; Sept. 21; v. 278; p. 409.
Paper-board filler for boxes, Folded. S. Morrison. No. 1,354,413; Sept. 28; v. 278; p. 672.
Paper carton, Folding. E. A. Scott. No. 1,354,344; Sept. 28; v. 278; p. 658.
Paper finish, Wall-. C. J. Heidorf. No. 1,353,473; Sept. 21; v. 278; p. 438.
Paper-finishing machine. F. C. Ladd and F. G. Neal. No. 1,352,611; Sept. 14; v. 278; p. 209.
Paper fixture, Toilet-. F. W. Cook. No. 1,354,170; Sept. 28; v. 278; p. 623.
Paper-hanging apparatus. A. and M. Grigas. No. 1,354,184; Sept. 28; v. 278; p. 625.
Paper-making machines, Fourdrinier. W. A. Aitken. No. 1,353,941; Sept. 28; v. 278; p. 575.
Paper-making machines, Screen-box for. F. P. Miller. No. 1,354,324; Sept. 28; v. 278; p. 654.
Paper-making machines, Shower-pipe for. I. W. Stevens. No. 1,352,485; Sept. 14; v. 278; p. 184.
Paper-pad press. R. R. Palmer. No. 1,354,061; Sept. 28; v. 278; p. 601.
Paper towels and toilet-papers, Process of and machine for winding rolls of. W. S. Crandell. No. 1,353,634; Sept. 21; v. 278; p. 471.
Papering device, Wall-. S. G. Canellos. No. 1,354,430; Sept. 28; v. 278; p. 675.
Parachute. E. R. Calthrop. No. 1,353,378; Sept. 21; v. 278; p. 420.
Parachute. W. J. Ruff. No. 1,353,130; Sept. 14; v. 278; p. 311.
Parachute. W. J. Ruff. No. 1,353,131; Sept. 14; v. 278; p. 311.
Parachute. E. E. Smith. No. 1,354,225; Sept. 28; v. 278; p. 634.
Paste-dispensing device. S. L. Harwood. No. 1,353,747; Sept. 21; v. 278; p. 494.
Patch, Blow-out. W. V. Hayes. No. 1,352,957; Sept. 14; v. 278; p. 278.
Patch-holder. C. A. Erdley. No. 1,352,799; Sept. 14; v. 278; p. 247.
Pattern-controlled mechanism. C. Johanson. No. 1,353,756; Sept. 21; v. 278; p. 496.
Pawl-and-ratchet mechanism. C. W. Howe. No. 1,352,603; Sept. 14; v. 278; p. 207.
Peanut-blanching machine. F. Townsend. No. 1,352,702; Sept. 14; v. 278; p. 227.
Pearls, Forming artificial. T. Mise. No. 1,353,932; Sept. 28; v. 278; p. 574.
Pen and feed pusher. B. B. Bradford. No. 1,352,498; Sept. 14; v. 278; p. 186.
Pen, Fountain-. P. P. Sanford. No. 1,351,873; Sept. 7; v. 278; p. 32.
Pencil. F. J. Kristofek. No. 1,351,916; Sept. 7; v. 278; p. 41.
Pencil. F. J. Kristofek and H. L. Fischer. No. 1,353,352; Sept. 21; v. 278; p. 415.
Pencil, Electric retouching-. J. R. and E. W. Kugler. No. 1,352,976; Sept. 14; v. 278; p. 282.
Pencil-eraser attachment. W. J. Campbell. No. 1,353,215; Sept. 21; v. 278; p. 388.
Pencil, Mechanical. M. M. Kaufmann and J. P. Lynn. No. 1,353,345; Sept. 21; v. 278; p. 413.
Pencils, Eraser attachment for. W. W. Moore. No. 1,352,677; Sept. 14; v. 278; p. 222.
Perfumier. L. L. Martin. No. 1,353,258; Sept. 21; v. 278; p. 396.
Petroleum, Cracking. L. P. Lowe and F. C. Ruff. No. 1,351,859; Sept. 7; v. 278; p. 29.
Phase-distribution system. T. F. Baily and F. T. Cope. No. 1,353,983; Sept. 28; v. 278; p. 584.
Phonograph. W. S. Kuckl. No. 1,352,282; Sept. 7; v. 278; p. 109.
Phonograph and lamp, Combination. P. R. Gonsky. No. 1,353,469; Sept. 21; v. 278; p. 438.
Phonograph-articulator. F. B. Long. No. 1,352,291; Sept. 7; v. 278; p. 111.
Phonograph-lighting attachment. G. E. Bernecker. No. 1,352,779; Sept. 14; v. 278; p. 243.
Phonograph, Spring-winding mechanism for. W. M. Allen. No. 1,351,938. Sept. 7; v. 278; p. 45.
Photographic-film sheath. W. F. Fohner. No. 1,351,998; Sept. 7; v. 278; p. 57.
Photographic films, plates, or the like, Means for inscribing unexposed. B. W. King. No. 1,351,762. Sept. 7; v. 278; p. 9.
Photographic objective. F. E. Ross. No. 1,352,028; Sept. 7; v. 278; p. 61.
Photographic-printing frame. C. J. Lish. No. 1,353,922; Sept. 28; v. 278; p. 572.
Photographic prints, Process and apparatus for making. C. W. Wilson. No. 1,353,690; Sept. 21; v. 278; p. 483.
Piano. E. W. Gertz. No. 1,353,903; Sept. 28; v. 278; p. 568.
Piano-action. R. W. Gertz. No. 1,353,905; Sept. 28; v. 278; p. 568.
Piano action-bracket, Grand-. F. L. George. No. 1,353,648; Sept. 21; v. 278; p. 475.
Piano action, Grand-. F. L. George. No. 1,353,647; Sept. 21; v. 278; p. 475.
Piano actions, Combination jack-spring and touch-regulator for upright-. F. L. George. No. 1,353,649; Sept. 21; v. 278; p. 475.
Piano actions, Damper for grand-. F. L. George. No. 1,353,643; Sept. 21; v. 278; p. 474.
Piano actions, Damper for upright-. F. L. George. No. 1,353,644; Sept. 21; v. 278; p. 474.
Piano actions, Hammer rest-rail for grand-. F. A. Wesell. No. 1,353,442; Sept. 21; v. 278; p. 432.
Piano actions, Pianissimo device for upright-. F. L. George. No. 1,353,645; Sept. 21; v. 278; p. 474.
Piano actions, Touch-regulator for grand-. F. L. George. No. 1,353,646; Sept. 21; v. 278; p. 474.
Piano-flange. E. Koll. No. 1,353,596; Sept. 21; v. 278; p. 464.
Piano-pedal. B. H. Jefferson and W. I. Kirk. No. 1,353,755; Sept. 21; v. 278; p. 496.
Piano, Player-. J. W. Zimmerman. No. 1,352,337; Sept. 7; v. 278; p. 120.
Piano transmissions, Automatic drag for player-. W. T. Waite. No. 1,351,881; Sept. 7; v. 278; p. 34.
Pianos and similar instruments, Hammer for. A. E. N. Lawrance. No. 1,353,357; Sept. 21; v. 278; p. 416.
Picker: *See*—
Berry-picker. Cranberry-picker.
Picker-sticks, Buffer-bracket for. J. Savoie. No. 1,354,072; Sept. 28; v. 278; p. 603.

Pin-attached separable fastener. I. V. Benoit. No. 1,354,159; Sept. 28; v. 278; p. 621.
Pin-pointing machine. H. Heine. No. 1,351,849; Sept. 7; v. 278; p. 27.
Pinwheel. C. F. Mitchell. No. 1,352,674; Sept. 14; v. 278; p. 222.
Pipe-bending mechanism. G. P. McArthur. No. 1,353,168; Sept. 21; v. 278; p. 379.
Pipe-bends, serpentines, &c., Method and device for manufacturing. R. H. Böhling. No. 1,353,714; Sept. 21; v. 278; p. 488.
Pipe-clamp. W. Bueker. No. 1,354,087; Sept. 28; v. 278; p. 606.
Pipe-coupling. F. Dow. No. 1,352,118; Sept. 7; v. 278; p. 78.
Pipe-coupling. J. Williams. No. 1,353,005; Sept. 14; v. 278; p. 288.
Pipe coupling, Metal-. F. W. Erickson. No. 1,352,256; Sept. 7; v. 278; p. 104.
Pipe coupling, Train-. J. Williams. No. 1,353,006; Sept. 14; v. 278; p. 288.
Pipe-fitting. A. E. Tatro. No. 1,352,102; Sept. 7; v. 278; p. 75.
Pipe-joining device. B. C. Shipman. No. 1,352,767; Sept. 14; v. 278; p. 241.
Pipe-joints, Apparatus for forming. D. H. Wyatt. No. 1,352,571; Sept. 14; v. 278; p. 201.
Pipe-molds, Gas-burner for. L. R. Lemoine. No. 1,351,770; Sept. 7; v. 278; p. 11.
Pipe-molds, Method of and apparatus for charging rotating. J. B. Ladd. No. 1,351,767; Sept. 7; v. 278; p. 10.
Pipe-vise. J. L. Dillon. No. 1,353,568; Sept. 21; v. 135; p. 458.
Pipe-wrench. A. W. Kiefer. No. 1,353,246; Sept. 21; v. 278; p. 394.
Pipes, Coupling for railway-train. E. A. Schreiber. No. 1,351,875; Sept. 7; v. 278; p. 32.
Pipes, Roof connection for vent-. E. E. Coar. No. 1,352,248; Sept. 7; v. 278; p. 103.
Piston. F. Hachmann. No. 1,353,041; Sept. 14; v. 278; p. 294.
Piston. F. Konyvka. No. 1,352,460; Sept. 14; v. 278; p. 178.
Piston packing-ring. R. I. Erlichman. No. 1,354,287; Sept. 28; v. 278; p. 647.
Piston-ring. F. K. Steble and C. A. Keffer. No. 1,353,082; Sept. 14; v. 278; p. 302.
Piston-rings, Construction of packing for. T. D. Kelly. No. 1,354,404; Sept. 28; v. 278; p. 670.
Piston-rings, Machine for slotting. M. D. Avillar. No. 1,353,558; Sept. 21; v. 278; p. 456.
Piston-rings, Making. H. S. Frank. No. 1,353,227; Sept. 21; v. 278; p. 390.
Piston-rings, Manufacturing. H. S. Frank. No. 1,353,576; Sept. 21; v. 278; p. 460.
Piston-vane. J. D. Carroll. No. 1,354,281; Sept. 28; v. 278; p. 646.
Piston-vanes, Rocker for. J. D. Carroll. No. 1,354,282; Sept. 28; v. 278; p. 646.
Pitch and sulfur composition and making same, Bituminous. J. J. White, Jr. No. 1,353,003; Sept. 14; v. 278; p. 287.
Pitting-knife. S. J. Dunkley. No. 1,353,328; Sept. 21; v. 278; p. 410.
Pivoted link. W. L. Shiffer and P. K. Shynder. No. 1,353,134; Sept. 14; v. 278; p. 312.
Planter. J. Haines. No. 1,354,039; Sept. 28; v. 278; p. 596.
Planter, Checkrow corn-. J. W. McNeal. No. 1,353,927; Sept. 28; v. 278; p. 573.
Planter-lifting device. E. H. Snyder. No. 1,352,634; Sept. 14; v. 278; p. 213.
Planter, Potato-. H. J. H. Lafleche. No. 1,354,202; Sept. 28; v. 278; p. 629.
Planter, Potato-. F. W. Lee. No. 1,353,356; Sept. 21; v. 278; p. 415.
Plants, Growing. E. Miller. No. 1,353,931; Sept. 28; v. 278; p. 574.
Plaster-board and making same. J. Schumacher. No. 1,352,390; Sept. 7; v. 278; p. 129.
Plastic material, Machine for turning. E. A. Fries. No. 1,352,443; Sept. 14; v. 278; p. 175.
Pliers, Finishing and burnishing. L. R. Smith. No. 1,352,552; Sept. 14; v. 278; p. 197.
Pliers, Sewing-. J. and S. Ftacek. No. 1,352,508; Sept. 14; v. 278; p. 188.
Pliers, Wire-stripping. S. E. Aaron. No. 1,354,365; Sept. 28; v. 278; p. 662.
Plow. W. T. Herndon. No. 1,351,850; Sept. 7; v. 278; p. 28.
Plow. A. Mitchell. No. 1,351,782; Sept. 7; v. 278; p. 13.
Plow, Garden-. L. T. Thomasson. No. 1,353,091; Sept. 14; v. 278; p. 304.
Plow-hitch. T. G. Eubanks and J. B. Bennett. No. 1,354,288; Sept. 28; v. 278; p. 647.
Plows, Clevis adjustment for. A. A. Bryant. No. 1,353,946; Sept. 28; v. 278; p. 576.
Plug, Attachment-. C. J. Klein. No. 1,352,817; Sept. 14; v. 278; p. 251.
Pocket-case. H. T. Reed. No. 1,354,211; Sept. 28; v. 278; p. 631.
Pocket, Garment-. S. Levine. No. 1,354,047; Sept. 28; v. 278; p. 598.
Pocket-knife, Safety. J. Pantalek. No. 1,353,490; Sept. 21; v. 278; p. 442.
Pocket-marking machine. F. M. Laserson. No. 1,353,051; Sept. 14; v. 278; p. 296.
Pocket, Protective. C. C. Wais. No. 1,351,816; Sept. 7; v. 278; p. 20.
Poison-bottle indicator. A. G. Baxter. No. 1,352,344; Sept. 7; v. 278; p. 121.
Polish, Liquid. A. F. Mendes. No. 1,352,015; Sept. 7; v. 278; p. 59.
Polishing and buffing metal articles. H. C. Hart. No. 1,352,598; Sept. 14; v. 278; p. 206.
Polishing apparatus. W. Severns. No. 1,353,429; Sept. 21; v. 278; p. 430.
Pot: *See*—
Dash-pot.
Potassium chlorid from brine, Recovering. J. L. Silsbee. No. 1,353,288; Sept. 21; v. 278; p. 401.
Potato cutter, Seed-. C. P. Miller and R. R. Lee. No. 1,354,263; Sept. 28; v. 278; p. 642.
Potato masher and beater, Combination. C. C. Defenbaugh. No. 1,353,520; Sept. 21; v. 278; p. 448.
Potato picker or gatherer. C. Fowler. No. 1,351,948; Sept. 7; v. 278; p. 42.
Potatoes and other seed, Machine for planting. J. Hutton. No. 1,352,411; Sept. 7; v. 278; p. 185.
Potatoes or yams, Curing sweet-. W. E. Bobo. No. 1,353,561; Sept. 21; v. 278; p. 456.
Powder and making same, Perforated pellet of explosive. F. I. and E. du Pont. No. 1,352,121; Sept. 7; v. 278; p. 79.
Powder and making same, Progressively-burning. R. G. Woodbridge, Jr., K. K. V. Casey, and C. I. B. Henning. No. 1,354,442; Sept. 28; v. 278; p. 678.
Powder-dispensing pencil, Antiseptic-. N. O. Anderson and C. Scheich. No. 1,352,932; Sept. 14; v. 278; p. 273.
Power-barring apparatus. E. Schneider. No. 1,353,275; Sept. 21; v. 278; p. 399.
Power-generating system. A. J. Meier. No. 1,352,616; Sept. 14; v. 278; p. 210.
Power installation, Regenerative. P. A. Bancel. No. 1,353,706; Sept. 21; v. 278; p. 486.
Power-operated machine, Safety device for. H. E. Seaver and C. L. Bowers. No. 1,354,345; Sept. 28; v. 278; p. 658.
Power plant, Air-compression. N. B. Wales. No. 1,353,100; Sept. 14; v. 278; p. 306.
Power reversing mechanism. T. R. Cameron. No. 1,352,784; Sept. 14; v. 278; p. 244.
Power system, Totalizing. L. Wilson. No. 1,352,235; Sept. 7; v. 278; p. 100.
Power transmission. W. C. Nutt. No. 1,353,068; Sept. 14; v. 278; p. 299.
Power transmission and storage apparatus. T. F. Barrett. No. 1,352,936; Sept. 14; v. 278; p. 274.
Power-transmission attachment for automobiles. D. D. Roberts. No. 1,353,786; Sept. 21; v. 278; p. 501.
Power-transmission device. H. E. Owen. No. 1,353,178; Sept. 21; v. 278; p. 381.
Power-transmission device. R. Prantner. No. 1,353,936; Sept. 28; v. 278; p. 574.
Power-transmission machine. P. R. Peterson. No. 1,354,209; Sept. 28; v. 278; p. 631.
Precious metals, Extracting. C. P. Priest. No. 1,352,882; Sept. 14; v. 278; p. 254.
Preserving and protecting poles, Apparatus for. T. E. Lewis. No. 1,353,598; Sept. 21; v. 278; p. 464.

Rail-support for temporary use, Auxiliary. J. J. Duffy. No. 1,353,572; Sept. 21; v. 278; p. 459.
Railway-brake, Safety. J. B. Wright and F. O. Lawson. No. 1,352,861; Sept. 14; v. 278; p. 259.
Railway-carriages, Journal-box for. N. A. Palmgren. No. 1,353,489; Sept. 21; v. 278; p. 442.
Railway-crosstie. J. Leventry. No. 1,354,258; Sept. 28; v. 278; p. 641.
Railway draft-gears, Manufacture of. S. Simonson. No. 1,352,152; Sept. 7; v. 278; p. 85.
Railway draft-gears, Manufacture of yokes for. H. T. Anderson. No. 1,352,167; Sept. 7; v. 278; p. 87.
Railway draft-gears, Yoke for. S. Simonson. No. 1,352,151; Sept. 7; v. 278; p. 84.
Railway-gate-control mechanism. F. A. Grant. No. 1,353,038; Sept. 14; v. 278; p. 294.
Railway guard device. S. Clary. No. 1,353,723; Sept. 21; v. 278; p. 489.
Railway-rail brace. H. C. Bunnell. No. 1,354,239; Sept. 28; v. 278; p. 637.
Railway-rails, Anticreep device or anchor for. H. Yates. No. 1,353,206; Sept. 21; v. 278; p. 387.
Railway-signal. F. J. Evans. No. 1,352,801; Sept. 14; v. 278; p. 248.
Railway signaling device. F. L. Dodgson. No. 1,352,793; Sept. 14; v. 278; p. 246.

Railway-spike. G. F. A. Ochs. No. 1,353,843; Sept. 28; v. 278; p. 556.
Railway switch and signal, Automatic. I. L. Edwards. No. 1,351,946; Sept. 7; v. 278; p. 47.
Railway-switch handles, Self-locking attachment for. C. Forth. No. 1,353,825; Sept. 28; v. 278; p. 552.
Railway system. G. B. Samuelson and W. H. Glaser. No. 1,353,423; Sept. 21; v. 278; p. 429.
Railway-tie. C. O. Whitcomb. No. 1,351,819; Sept. 7; v. 278; p. 21.
Railway-tie construction. F. Adamczyk. No. 1,354,366; Sept. 28; v. 278; p. 662.
Railway-track construction. J. Malik. No. 1,353,771; Sept. 21; v. 278; p. 499.
Railway-traffic-controlling apparatus. L. V. Lewis. No. 1,353,250; Sept. 21; v. 278; p. 395.
Railway-track crossing. B. G. Van Dyke, Jr. No. 1,354,080; Sept. 28; v. 278; p. 605.
Railway-track switch. I. G. Pospyhala. No. 1,352,988; Sept. 14; v. 278; p. 285.
Railway-traffic-controlling system. L. V. Lewis. No. 1,351,771; Sept. 7; v. 278; p. 11.
Railway traffic, System for governing. W. K. Howe. No. 1,354,254; Sept. 28; v. 278; p. 640.
Railway-train brake. P. F. Dufour. No. 1,352,586; Sept. 14; v. 278; p. 204.
Railways, Rail-bond for electric. E. A. Hoffman and T. P. Him. No. 1,353,287; Sept. 21; v. 278; p. 392.
Raising or lowering device. J. Gasser and A. H. Barber. No 1,353,737; Sept 21; v. 278; p. 492.
Rake attachment. O. Rundberg. No. 1,352,386; Sept. 7; v. 278; p. 128.
Range-finder. E. W. Deming. No. 1,353,151; Sept. 21; v. 278; p. 376.
Ratchet and clutch mechanism. I. Church. No. 1,352,354; Sept. 7; v. 278; p. 123.
Ratchet mechanism. C. W. Ripsch and J. C. Dawley. No. 1,352,631; Sept. 14; v. 278; p. 213.
Ratchet-wrench. T. Severén. No. 1,352,764; Sept. 14; v. 278; p. 240.
Razor-blade holder. A. F. Barro. No. 1,351,987; Sept. 7; v. 278; p. 54.
Razor-blade holder, Safety-. F. McEown. No. 1,352,011; Sept. 7; v. 278; p. 59.
Razor or other strops, Composition. B. E. Wise. No. 1,353,979; Sept. 28; v. 278; p. 583.
Razor, Rotary safety-. A. C. Hanson. No 1,353,160; Sept. 21; v. 278; p. 377.
Razor, Safety-. L. H. Allan. No. 1,351,826; Sept. 7; v. 278; p. 22.
Razor, Safety-. C. S. Farriss. No. 1,354,178; Sept. 28; v. 278; p. 624.
Razor, Safety-. R. H. Parker. No. 1,353,609; Sept. 21; v. 278; p. 466.
Razor, Safety-. S. G. Malby. No. 1,353,603; Sept. 21; v. 278; p. 465.
Reamers, Device for expanding. H. H. La Vercombe. No. 1,353,535; Sept. 21; v. 278; p. 451.
Receiver. H. C. Harrison. No. 1,352,597; Sept. 14; v. 278; p. 206.
Receptacle. L. R. Zifferer. No. 1,352,495; Sept. 14; v. 278; p. 186.
Receptacle-closure. D. Bloom. No. 1,353,017; Sept. 14; v. 278; p. 290.
Reciprocating engine. E. P. Palmer. No. 1,353,539; Sept. 21; v. 278; p. 452.
Reciprocating motor, Fluid-actuated. W. A. Smith. No. 1,354,348; Sept. 28; v. 278; p. 659.
Recording apparatus. C. E. Goddard. No. 1,351,902; Sept. 7; v. 278; p. 38.
Rectifier and condenser. H. E. Beyer and W. G. Hall. No. 1,352,648; Sept. 14; v. 278; p. 216.

Tire and mounting, Combined resilient. G. N. Widenhofer. No. 1,354,363; Sept. 28; v. 278; p. 662.
Tire, Automobile-. E. Y. Malone. No. 1,354,411; Sept. 28; v. 278; p. 671.
Tire, Automobile-. A. L. Meeks. No. 1,352,375; Sept. 7; v. 278; p. 126.
Tire-carrier. W. R. Green. No. 1,352,595; Sept. 14; v. 278; p. 206.
Tire-casing holder and spreader. P. E. Hawkinson. No. 1,352,601; Sept. 14; v. 278; p. 207.
Tire-casing spreader. P. E. Hawkinson. No. 1,352,807; Sept. 14; v. 278; p. 229.
Tire-chain connection. S. Goddard. No. 1,353,628; Sept. 28; v. 278; p. 553.
Tire-chain holder, Automobile-. E. L. Arthur. No. 1,352,238; Sept. 7; v. 278; p. 101.
Tire changer, Auto-. F. Martin. No. 1,354,118; Sept. 28; v. 278; p. 613.
Tire-core, Collapsible. F. L. Johnson. No. 1,352,274; Sept. 7; v. 278; p. 107.
Tire cover or protector. M. A. Shotwell. No. 1,352,093; Sept. 7; v. 278; p. 73.
Tire, Elastic. K. Fukuda. No. 1,352,885; Sept. 14; v. 278; p. 264.
Tire-holder, Automobile. L. H. Teel. No. 1,352,559; Sept. 14; v. 278; p. 199.
Tire, laminated tire treads, &c., Method and machines for making the rubber elements for. H. I. Morris. No. 1,353,934; Sept. 28; v. 278; p. 574.
Tire-mandrel and producing same. J. B. Gammeter. No. 1,353,158; Sept. 21; v. 278; p. 377.
Tire-mold. A. R. Thompson. No. 1,354,227; Sept. 28; v. 278; p. 635.
Tire remover, Automobile-. A. A. Smith. No. 1,353,078; Sept. 14; v. 278; p. 302.
Tire-removing apparatus. N. L. Caldwell. No. 1,352,722; Sept. 14; v. 278; p. 231.
Tire, Repaired. C. W. Yelm. No. 1,352,164; Sept. 7; v. 278; p. 87.
Tire, Resilient. M. A. Greene. No. 1,354,392; Sept. 28; v. 278; p. 668.
Tire, Resilient. A. C. and N. Jonassen. No. 1,353,757; Sept. 21; v. 278; p. 496.
Tire-rim-expanding jack. N. Lewsen. No. 1,353,765; Sept. 21; v. 278; p. 497.
Tire-spreader. D. O. Nation. No. 1,354,457; Sept. 28; v. 278; p. 680.
Tire, Spring-cushion. G. Orbin. No. 1,351,784; Sept. 7; v. 278; p. 13.
Tire-treads, Apparatus for laying or forming. H. I. Morris. No. 1,353,933; Sept. 28; v. 278; p. 574.
Tire-valves, Dust-cap for. G. B. Mullen. No. 1,353,061; Sept. 14; v. 278; p. 299.
Tire, Vehicle-. C. R. Irvine. No. 1,352,370; Sept. 7; v. 278; p. 125.
Tire, Vehicle-. G. C. Lehr. No. 1,353,921; Sept. 28; v. 278; p. 572.
Tire, Vehicle-. D. H. Moore. No. 1,352,305; Sept. 7; v. 278; p. 114.
Tires and machine for practising the same, Wrapping. E. H. Angier. No. 1,354,371; Sept. 28; v. 278; p. 663.
Tires, Apparatus for mounting or removing pneumatic. J. W. Brand. No. 1,352,020; Sept. 14; v. 278; p. 290.
Tires from rims, Device for removing. G. G. Jones. No. 132,135; Sept. 7; v. 278; p. 81.
Tires, Machine and building. W. C. Stevens. No. 1,352,099; Sept. 7; v. 278; p. 75.
Tires, Manufacture of pneumatic. T. Sloper. No. 1,354,425; Sept. 28; v. 278; p. 674.
Tires, Manufacture of solid rubber. C. Macbeth and W. E. Hardeman. No. 1,353,769; Sept. 21; v. 278; p. 498.
Tires, Manufacturing. H. M. Lambert. No. 1,351,856; Sept. 7; v. 278; p. 29.
Tires, Resilient core for. J. H. Dalbey. No. 1,351,894; Sept. 7; v. 278; p. 36.
Tobacco-biter. L. E. Ashenfelter. No. 1,353,944; Sept. 28; v. 278; p. 576.
Tobacco-pouches, Apparatus for making. F. F. Jameson. No. 1,353,477; Sept. 21; v. 278; p. 439.
Tobacco, Preserving manufactured or leaf. V. C. Alsina and G. Fernandes. No. 1,352,421; Sept. 14; v. 278; p. 171.
Toilet-pins, Apparatus for manufacturing. M. Vidaver. No. 1,353,294; Sept. 21; v. 278; p. 403.
Token. M. V. Bauer. No. 1,353,709; Sept. 21; v. 278; p. 487.
Tone-modifier. E. F. Copp. No. 1,354,171; Sept. 28; v. 278; p. 623.
Tongue-ball. R. W. Boje, Jr. No. 1,352,047; Sept. 7; v. 278; p. 65.
Tool. W. A. Findlay. No. 1,351,947; Sept. 7; v. 278; p. 47.
Tool. B. H. Parker. No. 1,353,847; Sept. 28; v. 278; p. 557.
Tool. V. H. Peterson. No. 1,352,688; Sept. 14; v. 278; p. 224.
Tool, Boring-. W. C. Meredith and W. C. Willis. No. 1,352,825; Sept. 14; v. 278; p. 252.
Tool, Butting-. E. W. Ayling. No. 1,352,341; Sept. 7; v. 278; p. 120.
Tool, Combination-. J. Ziegler. No. 1,353,445; Sept. 21; v. 278; p. 433.
Tool, Electrically-heated. F. Kuhn, L. H. Thomas, and J. G. Spiess. No. 1,353,965; Sept. 28; v. 278; p. 581.
Tool, Fluid-operated percussive. H. I. Stage. No. 1,353,796; Sept. 21; v. 278; p. 503.
Tool for aligning and fitting machine parts. J. Peyer. No. 1,352,311; Sept. 7; v. 278; p. 115.
Tool, Groove-cutting. J. A. Lewis. No. 1,352,522; Sept. 14; v. 278; p. 191.
Tool-handle. J. E. Hultberg. No. 1,353,043; Sept. 14; v. 278; p. 293.
Tool-handle. W. McKenzie. No. 1,352,012; Sept. 7; v. 278; p. 59.
Tool holder, Multiple-. J. H. Fullmer. No. 1,352,949; Sept. 14; v. 278; p. 276.
Tool, Hose-clamping. F. W. Gunn. No. 1,353,338; Sept. 21; v. 278; p. 412.
Tool, Jointing-. J. W. Wright. No. 1,354,443; Sept. 28; v. 278; p. 678.
Tool, Piston-ring. N. C. Ensworth. No. 1,354,034; Sept. 28; v. 278; p. 595.
Tool, Pneumatic. F. L. Henig. No. 1,352,191; Sept. 7; v. 278; p. 91.
Tool, Spring-inserting. L. A. Suckoff. No. 1,352,157; Sept. 7; v. 278; p. 85.
Tool, Tire-. C. E. Singleton. No. 1,352,550; Sept. 4; v. 278; p. 197.
Tool, Tree-barking. E. Evans. No. 1,352,057; Sept. 7; v. 278; p. 67.
Tool, Valve-facing. S. D. Hartog. No. 1,352,599; Sept. 14; v. 278; p. 206.
Tool, Valve-grinding. E. G. Thompson. No. 1,352,638; Sept. 14; v. 278; p. 214.
Tool, Wire-stretching. W. D. Manly. No. 1,352,983; Sept. 14; v. 278; p. 283.
Tools, Mechanism for driving. A. E. Bergey. No. 1,352,045; Sept. 7; v. 278; p. 64.
Tooth, Artificial. G. H. Whiteley, Jr. No. 1,353,199; Sept. 21; v. 278; p. 385.
Tooth-fillings, Device for measuring material for. J. F. Fietsch. No. 1,353,467; Sept. 21; v. 278; p. 437.
Toothbrush. M. Mueller. No. 1,353,780; Sept. 21; v. 278; p. 500.
Torches, Circle-guide oxyacetylene-. H. J. Forster. No. 1,351,846; Sept. 7; v. 278; p. 26.
Torches, Tool-holder for blow-. W. and C. Pruessing. No. 1,354,065; Sept. 28; v. 278; p. 601.
Torpedo-flask. A. H. Chase and H. L. Boesch. No. 1,354,091; Sept. 28; v. 278; p. 607.
Towel and antiseptic pad, Combined. T. B. Henry. No. 1,353,954; Sept. 28; v. 278; p. 578.
Towel-rack. B. G. Richards. No. 1,353,271; Sept. 21; v. 278; p. 399.
Toy. F. L. Babcock. No. 1,353,703; Sept. 21; v. 278; p. 486.
Toy. A. Dayon. No. 1,354,381; Sept. 28; v. 278; p. 665;
Toy. H. G. Runne. No. 1,352,836; Sept. 14; v. 278; p. 254.
Toy. E. C. Flatman. No. 1,353,900; Sept. 28; v. 278; p. 567.
Toy aeroplane. A. Z. Baker. No. 1,352,343; Sept. 7; v. 278; p. 121.
Toy aeroplane. A. D. Converse. No. 1,353,147; Sept. 21; v. 278; p. 375.
Toy animal. J. Barnard. No. 1,353,707; Sept. 21; v. 278; p. 486.
Toy bucket. E. Marsh. No. 1,352,463; Sept. 14; v. 278; p. 179.
Toy cannon. W. L. Nicols. No. 1,352,681; Sept. 14; v. 278; p. 223.
Toy gun. R. Baisch and O. Kreutz. No. 1,353,138; Sept. 21; v. 278; p. 373.
Toy machine-gun. H. Abramowitz. No. 1,353,696; Sept. 21; v. 278; p. 484.
Toy pin-board. W. Lenchard. No. 1,352,137; Sept. 7; v. 278; p. 82.
Toy rocker-carriage. F. Humphreville. No. 1,354,400; Sept. 28; v. 278; p. 669.
Toy steam-shovel. C. F. Zipf. No. 1,351,981; Sept. 7; v. 278; p. 53.
Toy tractor-chain and link therefor. L. Strohacker. No. 1,353,861; Sept. 28; v. 278; p. 560.
Toy vehicle. J. G. Gaviak. No. 1,353,581; Sept. 21; v. 278; p. 461.
Toy vehicle. H. G. Runne. No. 1,352,835; Sept. 14; v. 278; p. 254.
Toy vehicle, Adjustable. M. D. Brock. No. 1,352,577; Sept. 14; v. 278; p. 202.
Track-laying wheel. O. G. Malsbary. No. 1,353,256; Sept. 21; v. 278; p. 396.

Traction-increasing device. J. E. Ollivier. No. 1,352,683; Sept. 14; v. 278; p. 223.
Traction-machine. W. Strait. No. 1,353,617; Sept. 21; v. 278; p. 468.
Traction-wheel. F. M. Koets. No. 1,352,281; Sept. 7; v. 278; p. 109.
Tractor. J. M. Johnson. No. 1,354,108; Sept. 28; v. 278; p. 611.
Tractor. E. E. Larson. No. 1,352,286; Sept. 7; v. 278; p. 110.
Tractor, Agricultural. B. A. J. Chapron. No. 1,351,942; Sept. 7; v. 278; p. 46.
Tractor attachment. H. J. Helmers. No. 1,354,252; Sept. 28; v. 278; p. 640.
Tractor-frame. W. D. Prentice. No. 1,354,128; Sept. 28; v. 278; p. 615.
Tractor, Garden-. P. B. Ford. No. 1,353,156; Sept. 21; v. 278; p. 377.
Tractor-machine. A. R. Blewett. No. 1,353,945; Sept. 28; v. 278; p. 576.
Tractor, Walking. E. R. Honeywell. No. 1,351,752; Sept. 7; v. 278; p. 7.
Tractor-wheel. N. Peterson. No. 1,353,068; Sept. 14; v. 278; p. 300.
Tractor-wheel. W. S. Stothoff and C. A. Pallander. No. 1,352,635; Sept. 14; v. 278; p. 214.
Tractors and other vehicles, Steering means for. R. Tinker. No. 1,353,192; Sept. 21; v. 278; p. 384.
Tractors, Driving-gearing for. H. A. Harrah. No. 1,352,125; Sept. 7; v. 278; p. 79.
Tractors, Propelling attachment for. H. A. Seltenright. No. 1,354,219; Sept. 28; v. 278; p. 633.
Tractors, Steering and control mechanism for. G. R. Nichols, Jr. No. 1,353,606; Sept. 21; v. 278; p. 466.
Tractors, Steering attachment for. R. S. Farnsworth. No. 1,354,036; Sept. 28; v. 278; p. 595.
Traffic-signal. D. W. Gore. No. 1,354,249; Sept. 28; v. 278; p. 639.
Traffic-signal. L. A. Lawhead. No. 1,351,857; Sept. 7; v. 278; p. 29.
Trailer. C. De Mattia. No. 1,354,175; Sept. 28; v. 278; p. 624.
Train classification and number indicator. W. H. Lowd. No. 1,354,437; Sept. 28; v. 278; p. 677.
Train-control system. A. G. Williamson and S. V. Huber. No. 1,351,822; Sept. 7; v. 278; p. 22.
Train-stop. N. Stramaglia. No. 1,353,064; Sept. 14; v. 278; p. 303.
Trammel-point. H. V. Souders. No. 1,352,320; Sept. 7; v. 278; p. 117.
Tramways, Trolley for electric. G. Odierno. No. 1,354,060; Sept. 28; v. 278; p. 601.
Transmission-lock. H. Whitt. No. 1,352,489; Sept. 14; v. 278; p. 184.
Transmission mechanism. C. A. Grotz. No. 1,353,390; Sept. 21; v. 278; p. 422.
Transmission mechanism. H. N. Moore. (Reissue.) No. 14,952; Sept. 28; v. 278; p. 681.
Transmission of intelligence by wire, Apparatus for electrical. J. A. Tillinghast. No. 1,353,000; Sept. 14; v. 278; p. 287.
Transmission of intelligence, Electrical. C. D. Ehret. No. 1,352,589; Sept. 14; v. 278; p. 205.
Transmission system, Four-wire. G. A. Campbell. No. 1,352,786; Sept. 14; v. 278; p. 244.
Trap: *See*—
Insect-trap. Multiple trap.
Manometer-tube trap. Steam-trap.
Tray. C. E. Roy. No. 1,353,273; Sept. 21; v. 278; p. 399.
Tree: *See*—
Shoe-tree.
Tree-protector. P. A. Libby. No. 1,353,404; Sept. 21; v. 278; p. 425.
Tree trimming and harvesting machine. G. A. Russell. No. 1,354,267; Sept. 28; v. 278; p. 643.
Trestle-joint. E. B. Giles. No. 1,352,188; Sept. 7; v. 278; p. 91.
Trimming and finishing mechanism. H. Reynolds. No. 1,353,668; Sept. 21; v. 278; p. 479.
Trolley. T. S. Pukerud. No. 1,352,474; Sept. 14; v. 278; p. 182.
Trolley, Pantograph-. W. Schaake. No. 1,354,134; Sept. 28; v. 278; p. 616.
Trolley-pole head. S. S. Cooper. No. 1,353,381; Sept. 21; v. 278; p. 420.
Trolley-retriever. E. A. Morris. No. 1,353,262; Sept. 21; v. 278; p. 397.
Trolley-tender. R. G. Averill. No. 1,353,507; Sept. 21; v. 278; p. 445.
Trolley-tender. R. G. Averill. No. 1,353,508; Sept. 21; v. 278; p. 445.
Trolley-wire and guard-hanger, Combined. T. W. Twyman. No. 1,352,105; Sept. 7; v. 278; p. 76.
Trowel. E. J. Ashby. No. 1,353,014; Sept. 14; v. 278; p. 289.
Truck. W. E. Sullivan. No. 1,351,808; Sept. 7; v. 278; p. 18.
Truck-body. D. H. Harris. No. 1,354,187; Sept. 28; v. 278; p. 626.
Truck, Elevating-. J. A. Butterworth. No. 1,352,426; Sept. 14; v. 278; p. 172.
Truck for locomotives, Front. W. M. Sheehan. No. 1,354,140; Sept. 28; v. 278; p. 617.
Truck, Rail-. P. H. Madden. No. 1,352,076; Sept. 7; v. 278; p. 70.
Truck, Six-wheel pivotal bogie-. E. E. Cook. No. 1,352,878; Sept. 14; v. 278; p. 263.
Truck steering-gear, Power-driven. D. T. Timberlake. No. 1,354,143; Sept. 28; v. 278; p. 619.
Trucks and automobiles, Safety-guard for use on. S. E. Atherton. No. 1,354,444; Sept. 28; v. 278; p. 678.
Trucks and similar vehicles, Brake for. H. C. Struchen. No. 1,353,862; Sept. 28; v. 278; p. 560.
Trucks, Centrifugal brake for power-. A. H. Gibson. No. 1,352,060; Sept. 7; v. 278; p. 67.
Trucks, Operating mechanism for elevating-. J. L. Chesnutt. No. 1,353,564; Sept. 21; v. 278; p. 457.
Truing-stand. C. S. Ash. No. 1,353,505; Sept. 21; v. 278; p. 445.
Trump-indicating device. E. Steigerwald. No. 1,351,971; Sept. 7; v. 278; p. 51.
Trunk-band. R. T. Emery. No. 1,353,814; Sept. 21; v. 278; p. 506.
Trunk opener and carrier, Wardrobe-. W. W. Whittem. No. 1,352,234; Sept. 7; v. 278; p. 100.
Truss. C. S. Wahlstrom. No. 1,353,867; Sept. 28; v. 278; p. 561.
Tube: *See*—

Turbine, Marine steam-. A. M. Rodberg. No. 1,353,360; Sept. 21; v. 278; p. 416.
Turbines, Blade or vane for steam-. K. Baumann. No. 1,353,710; Sept. 21; v. 278; p. 487.
Turntable. A. Corpee and A. Craft. No. 1,354,285; Sept. 28; v. 278; p. 646.
Turntable, Phonograph-. H. G. Saal. No. 1,352,224; Sept. 7; v. 278; p. 98.
Twine-holder. P. G. Fassoulis. No. 1,354,434; Sept. 28; v. 278; p. 676.
Two-cycle engine. W. A. Edwards. No. 1,353,465; Sept. 21; v. 278; p. 437.
Twyer and cooling-box. J. P. Dovel. No. 1,354,032; Sept. 28; v. 278; p. 594.
Type-casting machine. A. Albé. No. 1,352,644; Sept. 14; v. 278; p. 216.
Typewriter attachment. F. L. Deden. No. 1,353,150; Sept. 21; v. 278; p. 375.
Typewriter attachment. E. and C. E. Sudler. No. 1,353,939; Sept. 28; v. 278; p. 575.
Typewriting-machine. L. S. Burridge. No. 1,351,993; Sept. 7; v. 278; p. 56.
Typewriting-machine. W. F. Helmond. No. 1,354,298; Sept. 28; v. 278; p. 649.
Typewriting-machine. A. F. Moser. No. 1,354,329; Sept. 28; v. 278; p. 655.
Typewriting-machine. E. B. Stuart. No. 1,352,229; Sept. 7; v. 278; p. 99.
Typewriting-machine. E. Thomas and B. C. Stickney. No. 1,351,812; Sept. 7; v. 278; p. 19.
Typographical machine. T. S. Homans. No. 1,352,965; Sept. 14; v. 278; p. 280.
Umbrella. R. Esturo. No. 1,353,084; Sept. 14; v. 278; p. 293.
Umbrella and parasol. I. H. Weinberg and C. F. Bisbing. No. 1,352,332; Sept. 7; v. 278; p. 118.
Umbrella, Folding. A. Gustafson. No. 1,353,234; Sept. 21; v. 278; p. 392.
Underreamer for reaming out producing-sands. A. L. Lambeth. No. 1,353,354; Sept. 21; v. 278; p. 415.
Underwear. A. Duvall. No. 1,352,944; Sept. 14; v. 278; p. 275.
Universal lock and latch. A. J. Schultze. No. 1,352,762; Sept. 14; v. 278; p. 239.
Upholstering. J. Heitsenreder, Jr. No. 1,353,340; Sept. 21; v. 278; p. 412.
Utensil, Combination. W. Dietzel. No. 1,353,222; Sept. 21; v. 278; p. 389.
Vacuum-cleaner. F. L. Leland. No. 1,352,520; Sept. 14; v. 278; p. 191.

Valve. A. P. Brush. No. 1,354,019; Sept. 28; v. 278; p. 592.
Valve. C. F. Crommett. No. 1,353,321; Sept. 21; v. 278; p. 409.
Valve. F. Franke. No. 1,353,037; Sept. 14; v. 278; p. 294.
Valve. A. S. Kellam and N. F. Norvell. No. 1,352,900; Sept. 14; v. 278; p. 267.
Valve. F. v. D. Longacre. No. 1,354,318; Sept. 28; v. 278; p. 653.
Valve. C. M. Nell. No. 1,352,469; Sept. 14; v. 278; p. 180.
Valve. W. A. Smith. No. 1,352,036; Sept. 7; v. 278; p. 63.
Valve, Air-. W. C. Mead. No. 1,351,780; Sept. 7; v. 278; p. 12.
Valve-cap. W. H. West. No. 1,353,878; Sept. 28; v. 278; p. 563.
Valve-changing means. A. B. Edwards, C. A. Turner, and T. L. Reed. No. 1,353,114; Sept. 14; v. 278; p. 308.
Valve, Combined by-pass and relief. E. B. Whelan. No. 1,353,296; Sept. 21; v. 278; p. 404.
Valve-control mechanism. T. W. Stone. No. 1,353,977; Sept. 28; v. 278; p. 583.
Valve cut-off, Automatic. R. W. Snyder. No. 1,354,426; Sept. 28; v. 278; p. 674.
Valve diaphragm, Compressed-air-. I. Stokke. No. 1,353,290; Sept. 21; v. 278; p. 402.
Valve, Engineer's brake-. J. W. Bingley. No. 1,353,375; Sept. 21; v. 278; p. 419.
Valve-grinder. R. A. Shantz. No. 1,352,840; Sept. 14; v. 278; p. 255.
Valve-grinder and breast-drill, Combination. I. Rosenberg. No. 1,352,476; Sept. 14; v. 278; p. 182.
Valve-handle. E. C. Holton. No. 1,354,106; Sept. 28; v. 278; p. 610.
Valve-lifter, Self-adjusting. E. F. Fisher. No. 1,353,993; Sept. 28; v. 278; p. 586.
Valve lock, Gate-. L. B. Madrin. No. 1,354,322; Sept. 28; v. 278; p. 653.
Valve member, &c. H. C. Egerton. No. 1,352,735; Sept. 14; v. 278; p. 234.
Valve-mechanism support. A. Holmes. No. 1,352,897; Sept. 14; v. 278; p. 266.
Valve, Packless. J. P. Lavigne. No. 1,353,053; Sept. 14; v. 278; p. 297.
Valve, Plate-. W. Prellwitz. No. 1,352,025; Sept. 7; v. 278; p. 61.
Valve, Pneumatic. J. N. Newsom, H. E Harder, and W. F. Leachen. No. 1,353,415; Sept. 21; v. 278; p. 427.
Valve-spring lifter. G. Guinand. No. 1,352,407; Sept. 7; v. 278; p. 132.
Valve-spring lifter. N. H. Lundquist. No. 1,353,255; Sept. 21; v. 278; p. 396.
Valve-spring lifter. J. B. Meller. No. 1,354,412; Sept. 28; v. 278; p. 672.
Valve, Standing. T. M. Adams. No. 1,353,303; Sept. 21; v. 278; p. 405.
Valve-stem stuffing-box. J. Shelton. No. 1,352,548; Sept. 14; v. 278; p. 196.
Valve system, Combined mixing and delivery. J. Fraser. No. 1,354,291; Sept. 28; v. 278; p. 647.
Valve, Throttle-. H. S. Vincent. No. 1,352,772; Sept. 14; v. 278; p. 241.
Valve-unloading mechanism. R. N. Ehrhart. No. 1,352,439; Sept. 14; v. 278; p. 174.
Valve, Water-seal vacuum-. J. H. Lindsay. No. 1,353,767; Sept. 21; v. 278; p. 498.
Valves and similar articles, Forging. E. Fuchs. No. 1,351,949; Sept. 7; v. 278; p. 47.
Valves, Controlling mechanism for flushing-. F. A. Schossow. No. 1,353,554; Sept. 21; v. 278; p. 505.
Valves, Dust-cap for pneumatic. J. Currie and H. W. Bell. No. 1,353,125; Sept. 14; v. 278; p. 310.
Valves, Thermo-. G. D. Hoffman. No. 1,352,808; Sept. 14; v. 278; p. 229.
Vanity-case. R. H. Sharp. No. 1,353,281; Sept. 21; v. 278; p. 401.
Varnish-drying oven, Portable. W. O. Guice. No. 1,352,893; Sept. 14; v. 278; p. 266.
Vases, Making. M. Martin. No. 1,353,928; Sept. 28; v. 278; p. 573.
Vault-light, skylight, or floor-light construction. C. H. Law. No. 1,353,919; Sept. 28; v. 278; p. 571.
Vegetable-cutter. J. Loeffler. No. 1,353,484; Sept. 21; v. 278; p. 441.
Vehicle-bodies, Spring-mounting for. C. Westergard. No. 1,354,082; Sept. 28; v. 278; p. 605.
Vehicle-body, Convertible. R. M. Freeman. No. 1,353,157; Sept. 21; v. 278; p. 377.
Vehicle body, Motor-road-. W. I. Rogers. No. 1,353,787; Sept. 21; v. 278; p. 502.
Vehicle brake, Motor-driven-. S. H. Lewis. No. 1,353,806; Sept. 21; v. 278; p. 505.
Vehicle, Child's. M. J. O'Meara. No. 1,352,213; Sept. 7; v. 278; p. 95.
Vehicle, Child's. P. O. Morats. No. 1,354,121; Sept. 28; v. 278; p. 613.
Vehicle construction, Child's-. W. J. Sleffel. No. 1,354,141; Sept. 28; v. 278; p. 617.
Vehicle, Dumping-. F. C. Schofield. No. 1,351,796; Sept. 7; v. 278; p. 15.
Vehicle-hoisting device. W. C. George and F. N. Nofsger. No. 1,354,038; Sept. 28; v. 278; p. 596.
Vehicle, Motor-. G. M. and H. F. S. Caulfield. No. 1,353,379; Sept. 21; v. 278; p. 420.
Vehicle, Motor-. M. Haupt. No. 1,353,393; Sept. 21; v. 278; p. 422.
Vehicle-propelling attachment, Motor-. O. E. Haglund. No. 1,354,103; Sept. 28; v. 278; p. 610.
Vehicle signal device. P. Niewiarowski. No. 1,353,359; Sept. 21; v. 278; p. 416.
Vehicle-top. F. K. Lewis. No. 1,353,129; Sept. 14; v. 278; p. 311.
Vehicle-wheel. W. N. Allan. No. 1,353,700; Sept. 21; v. 278; p. 485.
Vehicle-wheel. A. S. Baldwin. No. 1,352,168; Sept. 7; v. 278; p. 87.
Vehicle-wheel. H. F. Brandt. No. 1,354,163; Sept. 28; v. 278; p. 621.
Vehicle-wheel. E. A. Thompson. No. 1,352,639; Sept. 14; v. 278; p. 214.
Vehicle-wheel. T. V. Washburn. No. 1,354,269; Sept. 28; v. 278; p. 643.
Vehicle-wheel, Cast. W. S. Allen. No. 1,353,819; Sept. 28; v. 278; p. 551.
Vehicle-wheel, Demountable-rim. A. H. Shoemaker. No. 1,354,221; Sept. 28; v. 278; p. 633.
Vehicle-wheel, Resilient. R. L. Wilson. No. 1,352,858; Sept. 14; v. 278; p. 259.
Vehicle with two or more pairs of driving-wheels. U. Pavesi. No. 1,353,848; Sept. 28; v. 278; p. 557.
Vehicles, Antiskid device for motor-. H. Bell. No. 1,353,560; Sept. 21; v. 278; p. 456.
Vehicles, Automatic steering attachment for motor-. B. H. Pegram. No. 1,354,417; Sept. 28; v. 278; p. 673.
Vehicles, Compensating driving mechanism for motor-. H. R. Kidney. No. 1,351,761; Sept. 7; v. 278; p. 9.
Vehicles, Dashboard for motor-. L. Seguin. No. 1,353,427; Sept. 21; v. 278; p. 429.
Vehicles, Demountable-rim support for motor-. W. N. Booth. No. 1,354,161; Sept. 28; v. 278; p. 621.
Vehicles, Direction-indicator and tail-light for. J. Klunder. No. 1,351,913; Sept. 7; v. 278; p. 40.
Vehicles, Direction-indicator for. F. H. Sweeney. No. 1,352,327; Sept. 7; v. 278; p. 118.
Vehicles, Dumping-body for. L. B. Nelson. No. 1,353,062; Sept. 14; v. 278; p. 299.
Vehicles, Electrical system for motor-. M. Hirsch. No. 1,352,266; Sept. 7; v. 278; p. 106.
Vehicles, Lifting-jack and the like for use on motor road and other. F. L. Rapson. No. 1,354,338; Sept. 28; v. 278; p. 657.
Vehicles, Multiple wheel for road-. C. Corte. No. 1,351,996; Sept. 7; v. 278; p. 56.
Vehicles, Non-skid device for motor-. G. Gunther. No. 1,352,260; Sept. 7; v. 278; p. 105.
Vehicles, Propelling mechanism for. J. L. Sipples. No. 1,354,423; Sept. 28; v. 278; p. 674.
Vehicles, Radiator for motor-. A. C. Hamilton. No. 1,352,190; Sept. 7; v. 278; p. 91.
Vehicles, Radiator for motor-driven. C. F. Spery. No. 1,354,351; Sept. 28; v. 278; p. 659.
Vehicles, Shock-absorbing mechanism for motor-. S. L. C. Coleman. No. 1,353,029; Sept. 14; v. 278; p. 294.
Vehicles, Side bumper for. A. H. Sweet. No. 1,353,553; Sept. 21; v. 278; p. 455.
Vehicles, Steering-wheel lock for motor-. P. D. Massoline and L. Ronca. No. 1,353,487; Sept. 21; v. 278; p. 441.
Vehicles, Steering mechanism for motor-operated. C. H. Young. No. 1,352,572; Sept. 14; v. 278; p. 201.
Vehicles, Traction device for. J. A. Cowan. No. 1,353,318; Sept. 21; v. 278; p. 408.
Vehicles, Wheel for power-driven winter-. K. A. Blystad. No. 1,351,992; Sept. 7; v. 278; p. 55.
Vehicles, Windshield attachment for auto-. A. H. Sweet. No. 1,353,552; Sept. 21; v. 278; p. 454.
Velocity of a moving body, Means for measuring the. N. H. Hunt. No. 1,352,809; Sept. 14; v. 278; p. 240.
Vending machine, Liquid-. D. W. Anthony. No. 1,352,645; Sept. 14; v. 278; p. 216.
Veneer, Process of and apparatus for drying wood. J. F. Hope and E. Lambert. No. 1,353,591; Sept. 21; v. 278; p. 463.
Ventilator: *See*—
Car-door ventilator. Window-ventilator.
Water-closet ventilator.
Ventilator. C. Evans. No. 1,352,257; Sept. 7; v. 278; p. 104.
Ventilator attachment. F. C. Smith. No. 1,352,843; Sept. 14; v. 278; p. 256.
Vermin-exterminator. I. N. Keyser. No. 1,352,067; Sept. 7; v. 278; p. 68.
Vermin in clothes, bedding, &c., Disinfecting and destruction of. P. S. Lelean. No. 1,352,289; Sept. 7; v. 278; p. 110.

Water-heaters, Gas-burner for. P. H. Hamilton. No. 1,354,295; Sept. 28; v. 278; p. 648.
Water-jacket, Inverted-head-engine. A. E. Osborn. No. 1,354,335; Sept. 28; v. 278; p. 656.
Water-motor. P. Egedi. No. 1,352,588; Sept. 14; v. 278; p. 204.
Waterer, Stock-. F. A. Clemons. No. 1,353,146; Sept. 21; v. 278; p. 375.
Waterproof fibrous material and making same. J. P. Elliott. No. 1,342,796; Sept. 14; v. 278; p. 247.
Wax, Electric heater for sealing-. A. J. Ording. No. 1,353,972; Sept. 28; v. 278; p. 582.
Waxlike material from paper-stock, Separating. W. H. Smith. No. 1,352,553; Sept. 14; v. 278; p. 197.
Wearing-apparel, Hook-link fastener for eyeleted. H. E. Ross. No. 1,353,614; Sept. 21; v. 278; p. 468.
Weather-strip. H. S. Davis. No. 1,352,879; Sept. 14; v. 278; p. 263.
Weather-strip. H. C. Egerton. No. 1,352,732; Sept. 14; v. 278; p. 234.
Weather-strip. C. J. Jones. No. 1,352,275; Sept. 7; v. 278; p. 107.
Weather-strip. L. M. Rees. No. 1,352,695; Sept. 14; v. 278; p. 226.
Weather-strip. W. Schnekenburger. No. 1,352,545; Sept. 14; v. 278; p. 196.
Weed and clod cutter. H. A. M. Bromfield. No. 1,353,626; Sept 21; v. 278; p. 470.
Weed-destroyer. G. Kramer. No. 1,354,043; Sept. 28; v. 278; p. 597.
Weft-detecting mechanism. E. H. Ryon. No. 1,352,536; Sept. 14; v. 278; p. 193.
Weighing-machine. R. R. Bennett. No. 1,353,189; Sept. 21; v. 278; p. 373.
Weir, Reversible. O. Sommer. No. 1,353,285; Sept. 21; v. 278; p. 401.
Welded tubes, Closing die or bell for. D. W. Chisholm. No. 1,353,721; Sept. 21; v. 278; p. 489.
Welding and reactor, Electric. S. R. Bergman. No. 1,353,711; Sept. 21; v. 278; p. 487.
Welding, Apparatus for and method of. E. J. von Henke. No. 1,351,815; Sept. 7; v. 278; p. 20.
Welding, Holder for use in coating rods for electric. F. W. Pershing. No. 1,354,418; Sept. 28; v. 278; p. 672.
Welding-machine. R. E. Wagner and W. E. Laird. No. 1,353,684; Sept. 21; v. 278; p. 482.
Welding-rod. E. F. Russell. No. 1,352,534; Sept. 14; v. 278; p. 193.
Welding, Slug-. J. H. Gravell. No. 1,354,293; Sept. 28; v. 278; p. 648.
Welding steel, Electrically. J. W. Plant. No. 1,354,206; Sept. 28; v. 278; p. 643.
Welding system. C. J. Holslag. No. 1,354,398; Sept. 28; v. 278; p. 669.
Well construction. P. E. Vaughan and S. M. Halstead. No. 1,353,132; Sept. 14; v. 278; p. 312.
Well digging outfits, Compensating apparatus for. O. E. Oakes. No. 1,351,867; Sept. 7; v. 278; p. 31.
Wells, Cleaning oil and gas. J. R. Dulang. No. 1,351,945; Sept. 7; v. 278; p. 47.
Wells, Gas-energy-control head for oil-. E. V. Crowell. No. 1,354,027; Sept. 28; v. 278; p. 593.
Wells, Valve for deep. C. M. Heeter. No. 1,351,906; Sept. 7; v. 278; p. 39.
Wells, Valve structure for oil-. J. P. McEvoy. No. 1,353,409; Sept. 21; v. 278; p. 426.
Welting, Jointed. C. D. Libby. No. 1,353,251; Sept. 21; v. 278; p. 395.
Wheel: *See*—
Building and polishing wheel. Sheet-metal wheel.
Cushioned wheel. Steel wheel.
Demountable wheel. Stone-polishing wheel.
Disk wheel. Track-laying wheel.
Fan-wheel. Traction-wheel.
Resilient wheel. Vehicle-wheel.
Wheel cleat mechanism, Traction-. C. L. Pennell. No. 1,353,849; Sept. 28; v. 278; p. 557.
Wheel-lock. C. E. Thompson. No. 1,353,117; Sept. 14; v. 278; p. 309.
Wheel-puller. A. G. Albrecht. No. 1,354,271; Sept. 28; v. 278; p. 644.
Wheel-retaining spindle-cap. C. A. Lindberg. No. 1,354,114; Sept. 28; v. 278; p. 612.
Wheel-rim, Cushioned. A. S. Duffes. No. 1,353,326; Sept. 21; v. 278; p. 409.
Wheels, Locking device for steering-. W. W. Winchester. No. 1,352,491; Sept. 14; v. 278; p. 185.
Winch. J. H. Holmes. No. 1,353,238; Sept. 21; v. 278; p. 393.
Wind-motor. J. G. Gracey. No. 1,352,952; Sept. 14; v. 278; p. 277.
Winding-machine. F. A. Holt and G. Kershaw. No. 1,353,474; Sept. 21; v. 278; p. 488.
Winding-machine. F. A. Holt and G. Kershaw. No. 1,353,475; Sept. 21; v. 278; p. 489.
Winding-machine. P. F. Rhoades. No. 1,353,269; Sept. 21; v. 278; p. 398.
Winding-machine. W. P. Wood. No. 1,352,930; Sept. 14; v. 278; p. 273.
Winding machines, Chuck for ribbon-. E. A. Oppenheimer. No. 1,352,376; Sept. 7; v. 278; p. 127.
Windmill. W. A. Wilson. No. 1,352,859; Sept. 14; v. 278; p. 259.
Windmills, Electric generator attachment for. H. H. Taylor. No. 1,351,975; Sept. 7; v. 278; p. 52.
Window and wall cleaner. H. Engel and E. Feldman. No. 1,352,122; Sept. 7; v. 278; p. 79.
Window, Automobile-curtain. G. I. Bair. No. 1,353,306; Sept. 21; v. 278; p. 406.
Window, Balanced. W. S. Kellogg. No. 1,352,971; Sept. 14; v. 278; p. 281.
Window-cleaner. M. Goldstone. No. 1,353,741; Sept. 21; v. 278; p. 493.
Window fastener, Storm-. C. R. Sibley. No. 1,354,222; Sept. 28; v. 278; p. 633.
Window-holder. T. J. Heady. No. 1,353,655; Sept. 21; v. 278; p. 476.
Wind instrument. D. T. Thomassian. No. 1,353,864; Sept. 28; v. 278; p. 561.
Window-lock, Safety. H. Polcek. No. 1,352,624; Sept. 14; v. 278; p. 211.
Window-locking device. J. Chomos. No. 1,352,114; Sept. 7; v. 278; p. 77.
Window-sash brake. E. F. Chaffee. No. 1,352,875; Sept. 14; v. 278; p. 262.
Window-screen. C. J. Barker. No. 1,351,783; Sept. 7; v. 278; p. 4.
Window-screen, Extension. J. H. Kessler. No. 1,352,372; Sept. 7; v. 278; p. 126.
Window-seat. L. Viezzi. No. 1,353,681; Sept. 21; v. 278; p. 481.
Window-ventilator. F. Sceltz. No. 1,353,789; Sept. 21; v. 278; p. 502.
Window-washing machine. P. J. Palutskas. No. 1,354,127; Sept. 28; v. 278; p. 614.
Windshield. H. G. Smith. No. 1,352,094; Sept. 7; v. 278; p. 74.
Windshield, Aerial observer's. R. T. Vredenburgh. No. 1,352,106; Sept. 7; v. 278, p. 76.
Windshield-cleaner. W. M. Folberth. No. 1,352,504; Sept. 14; v 278; p. 187.
Winter road or snow and ice melting machine. A. Wettervick. No. 1,352,567; Sept. 14; v. 278; p. 200.
Wire-drawing machine. W. D. Pierson. No. 1,354,336; Sept. 28; v. 278; p. 656.

Wire-fabric machine. A. L. Kitselman. No. 1,353,846; Sept. 21; v. 278; p. 413.
Wire-screen holding and dispensing receptacle. T. E. Bernard. No. 1,352,016; Sept. 14; v. 278; p. 290.
Wire-spoke nipples, Forming. H. A. House, Jr. No. 1,353,895; Sept. 21; v. 278; p. 423.
Wire-stretcher. A. Hansen. No. 1,353,835; Sept. 28; v. 278; p. 555.
Wire-stretcher. A. W. Lord. No. 1,354,203; Sept. 28; v. 278; p. 629.
Wire-stretcher. W. B. Stephens. No. 1,353,083; Sept. 14; v. 278; p. 303.
Wire-stretcher. B. Webb and W. A. Gardner. No. 1,353,865; Sept. 21; v. 278; p. 417.
Wire-tightening implement. M. Steinbach. No. 1,352,484; Sept. 14; v. 278; p. 184.
Wire wheel. H. A. House, Jr. No. 1,353,894; Sept. 21; v. 278; p. 423.
Wireless receiving apparatus. E. J. Berg. No. 1,352,242; Sept. 7; v. 278; p. 102.
Wooden lappet. W. H. Bowker. No. 1,351,829; Sept. 7; v. 278; p. 23.
Woodworking sticker or molder-head. J. Shuff. No. 1,353,616; Sept. 21; v. 278; p. 468.
Work-holding clamp. H. I. Lavers. No. 1,353,353; Sept. 21; v. 278; p. 415.
Woven carrier. V. H. Jennings. No. 1,352,453; Sept. 14; v. 278; p. 177.
Woven fabrics, Apparatus for use in connection with the finishing or treating of. P. K. Whitehead and J. Rothwell. No. 1,353,879; Sept. 28; v. 278; p. 563.
Woven pocketed carrier. V. H. Jennings. No. 1,352,133; Sept. 7; v. 278; p. 81.
Wrapping-machine. F. A. Sutherland. No. 1,351,809; Sept. 7; v. 278; p. 19.
Wrench: *See*—

Mop-wringer.
Writer's aiding device. A. A. Disbrow. No. 1,353,730; Sept. 21; v. 278; p. 491.
Writing implement. C. J. App. No. 1,352,340; Sept. 7; v. 278; p. 120.
Writing-machine. H. Elmblad. No. 1,352,405; Sept. 7; v. 278; p. 132.
Writing or reading device, Self-luminous. P. M. Willis. No. 1,351,935; Sept. 7; v. 278; p. 45.
X-ray cone. H. P. MacLagan. No. 1,352,198; Sept. 7; v. 278; p. 93.
X-ray tube. T. B. Rider. No. 1,352,630; Sept. 14; v. 278; p. 213.
Yarn-holder. A. E. Gaeng. No. 1,353,528; Sept. 21; v. 278; p. 449.
Yarn-tension device. F. A. Holt and G. Kershaw. No. 1,353,476; Sept. 21; v. 278; p. 439.
Zinc-bearing ores, Treating. F. K. Cameron, J. A. Cullen, and R. W. Hyde. No. 1,352,399; Sept. 7; v. 278; p. 131.
Zinc-reduction furnace. J. D. Shipton. No. 1,353,362; Sept. 21; v. 278; p. 417.
Zithers, Playing attachment for. F. M. Nickerson. No. 1,352,618; Sept. 14; v. 278; p. 210.

ALPHABETICAL LIST OF DESIGNS.

Automobile-body. H. J. Lozier. No. 56,289; Sept. 14; v. 278; p. 318.
Anchor-rod eye. A. B. Chance. No. 56,273; Sept. 14; v. 278; p. 315.
Automobile side curtain. R. K. Thomson. Nos. 56,312–13; Sept. 14; v. 278; pp. 321–2.
Bell, Table-. A. S. C. and H. R. P. Forbes. No. 56,280; Sept. 14; v. 278; p. 316.
Bolt. J. F. O'Reilly. No. 56,303; Sept. 14; v. 278; p. 320.
Bottle. H. R. Nicholson. 56,301; Sept 14; v. 278; p. 319.
Bowl. S. Blickman. No. 56,272; Sept. 14; v. 278; p. 315.
Box. E. B. Philips. No. 56,306; Sept. 14; v. 278; p. 320.
Buckle. L. Alterson. No. 56,246; Sept. 7; v. 278; p. 135.
Bundle-tier-machine frame. A. H. Saxton and J. J. Bachmayer. No. 56,310; Sept. 14; v. 278; p. 321.
Cabinet, Phonograph-. T. Knudson. No. 56,287; Sept. 14; v. 278; p. 317.
Cabinet, Phonograph-. J. Wolff. Nos. 56,317–29; Sept. 14; v. 278; pp. 322–5.
Candelabrum and electric terminal, Combined. C. B. Ferguson. No. 56,248; Sept. 7; v. 278; p. 136.
Cans, Pouring-spout for. H. L. Strongson. No. 56,311; Sept. 14; v. 278; p. 321.
Condenser and motor and compressor base. E. Olsen. No. 56,302; Sept. 14; v. 278; p. 319.
Confectionery bouquet. A. M. Porter. No. 56,308; Sept. 14; v. 278; p. 321.
Counter and display-cabinet, Help-self. W. J. Bailey. No. 56,263; Sept. 14; v. 278; p. 313.
Culinary fixture. W. R. Walker. No. 56,315; Sept. 14; v. 278; p. 322.
Handbag. J. F. Wright. No. 56,261; Sept. 14; v. 278; p. 313.
Insulator. A. O. Austin. No. 56,262; Sept. 14; v. 278; p. 313.
Jar. C. D. Huyler. No. 56,252; Sept. 7; v. 278; p. 136.
Jewelry-holder. P. Viggiano. No. 56,314; Sept. 14; v. 278; p. 322.
Key-ring holder. A. F. Haber. No. 56,281; Sept. 14; v. 276; p. 316.
Lamp or similar article, Rim for a vehicle-. C. D. Ryder. Nos. 56,256–8; Sept. 7; v. 278; pp. 137–8.
Lamp, Electric floor-. F. A. Freriehs. No. 56,249; Sept. 7; v. 278; p. 136.
Lens, Automobile-. A. Senger. No. 56,259; Sept. 7; v. 278; p. 188.
Lighting-fixture arm. S. Kostszewski. No. 56,253; Sept. 7; v. 278; p. 137.
Mirror for motor-vehicles, Rear-sight. F. W. Rees. No. 56,309; Sept. 14; v. 278; p. 321.
Mud-guard, Bicycle. E. J. Lonn. No. 56,288; Sept. 14; v. 278; p. 317.
Paper holder, Toilet-. W. L. Lee. No. 56,254; Sept. 7; v. 278; p. 137.
Pencils, Rubber-eraser head for lead-. E. Faber. No. 56,247; Sept. 7; v. 278; p. 136.
Phonograph-casing. C. J. and S. L. M. Pearson. No. 56,305; Sept. 14; v. 278; p. 320.
Phonograph tone-arm. H. Lubé. No. 56,290; Sept. 14; v. 278; p. 318.
Radiators of motor-vehicles, Guard for. E. T. Curran. No. 56,275; Sept. 14; v. 278; p. 316.
Radiator-inclosure. D. C. Moore. No. 56,255; Sept. 7; v. 278; p. 137.
Razor. H. H. Johnson. No. 56,283; Sept. 14; v. 278; p. 317.
Sharpener, Knife-. M. T. Graf. No. 56,250; Sept. 7; v. 278; p. 136.
Talcum-powder box. F. X. Beckman. No. 56,264; Sept. 14; v. 278; p. 314.
Talcum-tin. M. H. Connor. No. 56,274; Sept. 14; v. 278; p. 315.
Talking-machine. E. H. McConnell. Nos. 56,291–8; Sept. 14; v. 278; pp. 318–19.
Talking-machine tone-arm. J. Wolff. No. 56,316; Sept. 14; v. 278; p. 322.
Tire. J. C. McLean. No. 56,300; Sept. 14; v. 278; p. 319.
Tire-casing. R. Iredell. No. 56,282; Sept. 14; v. 278; p. 317.
Tire, Elastic vehicle-. J. M. Alderfer. No. 56,260; Sept. 14; v. 278; p. 313.
Tire, Pneumatic. R. M. Pierson. No. 56,307; Sept. 14; v. 278; p. 320.
Tire-tread. J. C. McLean. No. 56,299; Sept. 14; v. 278; p. 319.
Tire tread, Elastic-. E. O. Blekre. Nos. 56,265–71; Sept. 14; v. 278; pp. 314–15.
Tombstone. G. F. Eisenbrown. Nos. 56,276–9; Sept. 14; v. 278; p. 316.
Truck, Barrel-. T. E. Jordan. No. 56,284; Sept. 14; v. 278; p. 317.
Vehicle-chock. F. M. Keeton. No. 56,286; Sept. 14; v. 278; p. 317.
Vehicle-wheel chock. F. M. Keeton. No. 56,285; Sept. 14; v. 278; p. 317.
Vending-machine casing. F. R. Greene. No. 56,251; Sept. 7; v. 278; p. 136.

ALPHABETICAL LIST OF TRADE-MARKS.

Abrasive, detergent, and polishing materials. Chelsea Engineering Sales Corporation. No. 134,905; Sept. 21; v. 278; p. 530.
Accounting-forms. J. H. Greenhalgh & Company. No. 134,669; Sept. 14; v. 278; p. 356.
Adhesives. Dewey & Almy Chemical Company. No. 135,366; Sept. 28; v. 278; p. 706.
Air-conditioning apparatus, air-driers, &c. W. L. Fleisher & Co. No. 134,649; Sept. 14; v. 278; p. 355.
Alcohol, Isopropyl. Standard Oil Company. No. 134,818; Sept. 14; v. 278; p. 360.
Alloys, Base-metal. W. W. Holland. No. 134,970; Sept. 21; v. 278; p. 532.
Ammonia, bluing, bleaching preparation, and disinfectant. Elberfeld Chemical & Mfg. Co. No. 134,936; Sept. 21; v. 278; p. 531.
Amusement devices. Orotock Manufacturing Co. No. 135,295; Sept. 28; v. 278; p. 704.
Analgesic and antipyretic. The Bayer Company. Nos. 134,891–2; Sept. 21; v. 278; p. 529.
Anesthetics, Local. Novocol Chemical Mfg. Co. No. 134,520; Sept. 7; v. 278; p. 160.
Antiseptic and disinfectant for sick-rooms, &c. Kall Manufacturing Co. No. 134,509; Sept. 7; v. 278; p. 160.
Antiseptic, Liquid. A. S. Mann. No. 134,730; Sept. 14; v. 278; p. 358.
Antiseptic powder. Anglo-American Pharmaceutical Corporation. No. 134,856; Sept. 14; v. 278; p. 363.
Antiseptics. Eli Lilly and Company. No. 134,495; Sept. 7; v. 278; p. 159.
Apparel, Wearing-. Eloesser-Heynemann. No. 134,937; Sept. 21; v. 278; p. 531.
Aprons. Brooklyn Shield & Rubber Company. No. 134,604; Sept. 14; v. 278; p. 354.
Arctics. United States Rubber Company. No. 134,837; Sept. 14; v. 278; p. 361.
Aspirin. Smith, Kline & French Co. No. 134,540; Sept. 7; v. 278; p. 161.
Automobile and furniture polish. E. E. Stitzel & Son. No. 134,823; Sept. 14; v. 278; p. 361.
Automobile and furniture polish. Lamb Railway Service Co. No. 134,708; Sept. 14; v. 278; p. 357.
Automobile-bumpers and attaching-brackets. Biflex Products Company. No. 134,595; Sept. 14; v. 278; p. 354.
Automobile-polish. A. M. Vesper. No. 134,841; Sept. 14; v. 278; p. 361.
Automobiles. The Baker R & L Company. No. 134,889; Sept. 21; v. 278; p. 529.
Automobiles. The Baker R & L Company. No. 135,174; Sept. 21; v. 278; p. 530.
Automobiles. Gardner Motor Co. No. 134,653; Sept. 14; v. 278; p. 355.
Automobiles. The Haynes Automobile Company. No. 134,678; Sept. 14; v. 278; p. 356.
Automobiles. Jordan Motor Car Co. No. 134,985; Sept. 21; v. 278; p. 532.
Automobiles. Louisiana Motor Car Company. No. 134,720; Sept. 14; v. 278; p. 357.
Automobiles. The Morris Adler Company. No. 134,873; Sept. 21; v. 278; p. 529.
Automobiles and repair parts therefor, Ignition and electric-lighting systems and magnetos for. The Cleveland Ignition Company. No. 134,911; Sept. 21; v. 278; p. 182.
Automobiles and automobile-trucks. Belmont Motors Corporation. No. 135,367; Sept. 28; v. 278; p. 707.
Babbitt metal and antifriction metals. P. R. Brown. No. 135,203; Sept. 28; v. 278; p. 701.
Baking plant. Peoples System of Bakeries. No. 134,523; Sept. 7; v. 278; p. 160.
Baking-powder. Rumford Chemical Works. No. 134,786; Sept. 14; v. 278; p. 359.
Banjos, mandolins, guitars, and ukulele-banjos. Lyon & Healy. No. 135,272; Sept. 28; v. 278; p. 703.
Bassinettes. L. G. Dibble. No. 134,629; Sept. 14; v. 278; p. 355.
Batteries and parts thereof, Electric. Ionite Storage Battery Co. No. 134,981; Sept. 21; v. 278; p. 532.
Batteries and parts thereof, Storage. The Hartford Battery Manufacturing Company. No. 134,677; Sept. 14; v. 278; p. 356.
Batteries, Electric. Acorn Battery Company. No. 134,871; Sept. 21; v. 278; p. 529.
Batteries, Electric. Burgess Battery Company. No. 134,605; Sept. 14; v. 278; p. 354.
Batteries, Electric storage. Perfection Storage Battery Co. No. 135,299; Sept. 28; v. 278; p. 704.
Battery-testers. Service Station Supply Co. No. 134,801; Sept. 14; v. 278; p. 360.

Wheel, Demountable. T. I. Duffy. No. 1,125,498; date of patent Jan. 19, 1915; disclaimer filed Aug. 20, 1920; v. 278; p. 168.
Electrical distribution system. J. W. Jepson. No. 1,287,331; date of patent Dec. 10, 1918; disclaimer filed Aug. 20, 1920; v. 278; p. 168.
Picture machine, Motion-. L. B. Larsen, O. J. Holmes, and H. G. Larsen. No. 1,283,224; date of patent Oct. 29, 1918; disclaimer filed Sept. 8, 1920; v. 278; p. 548.

CLASSIFICATION OF PATENTS

SEPTEMBER, 1920.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 7: 1,353,989
14: R. 14,951
2— 15: 1,351,816
1,354,047
32: 1,351,893
41: 1,352,704
54: 1,354,352
